These controls utilize a snap-on contact block system with pushbuttons for a variety of switching configurations — momentary and maintained, lighted and unlighted, round and square keylocks and selectors. Suited for direct and pilot duty. Maximum contact rating of 6 A at 600 VAC. Contemporary front panel design. Order contact blocks separately.

MT Green Series

These switches are best known for their ease of mounting and actuation as well as for long term reliability. Variety and quality are designed in, not added on. The miniature "Green Series" features the following: molded-in terminals, anti-push-in toggle, hi-torque bushing, gold flash terminals, UL Listed (File No. E46765). **Contact Rating:** 6 amps at 125 VAC, 3 amps at 250 VAC, 4 amps at 28 VDC. **Contact Resistance:** Below 10 milliohms. **Insulation Resistance:** 1000 megohms min. Solid silver contacts. Green diallyl phthalate case. () denotes momentary.

Miniature Toggle Switches — Gemini Series

Machined brass, heavy nickel-plated toggle. Rigid one-piece die-cast, copper flash, heavy nickel-plated bushing and frame. DAP case for electrical performance and mechanical strength. "Captured" design eliminates possibility of displacement due to shock. Epoxy seal of terminals is standard. Electrical Life: 80,000 cycles SPDT, all others 40,000 cycles. Contact Rating: Silver 5 Amps @ 120 VAC; Gold 0.4VA @ 20 VDC max. Insulation Resistance: 1,000 megohms min. at 500 VDC. Dielectric Strength: 1,000 V rms at sea level. Contact Resistance: 30 milliohms max. Operating Temperature: -30°C to +85°C.

4 mm Square and Sealed Switch

Compatible with all surface mount soldering processes and all popular vacuum pick-and-place equipment. Meets EIA/EIAJ/IPC/VRCI SMD standard outline dimensions. Top or side actuated. **Current Contact Rating:** 100 mZ max. **Max. Voltage:** 24 V. Switch is normally open type. **Operating Temperature Range:** -55°C to +125°C.

754-0250. 7914G-1-000E.....PER PK./100 79.00
754-0252. 7914J-1-000E.....PER PK./100 79.00

4 mm Square SPDT Sealed Rotary Switch

Compatible with all surface mount soldering processes and all popular vacuum pick-and-place equipment. Meets EIA/EIAJ/IPC/VRCI SMD standard outline dimensions. **Max. Current Contact Rating:** 100 mA. **Max. Voltage:** 24 V. **Operating Temperature Range:** -55°C to +125°C. **Rotational Life:** 50 cycles. Non-shorting contact timing. Switch is single pole double throw type. Withstands 260° soldering heat for 10 seconds.

754-0255. 7814G-1-051E.....PER PK./100 160.00
754-0257. 7814J-1-051E.....PER PK./100 160.00

3 mm Square SPDT Rotary Switch

This low level signal switch is compatible with all surface mount soldering processes. Withstands 260° soldering heat. **Rotational Life:** Type 7813J-1-051E — 50; Type 7813J-1-023E — 2000 cycles. **Max. Current Contact Rating:** 100 mA. **Max. Voltage:** 24 V. Non-shorting contact timing. Switch is single pole double throw type. **Operating Temperature Range:** -55°C to +125°C.

754-0260. 7813J-1-051E.....PER PK./100 160.00
754-0261. 7813J-1-023E.....PER PK./100 200.00

6 mm Square Sealed 10-Position Rotary Selector Switch

Miniature industrial rotary selector switch. Vertical adjust. Rugged surface mount design. Switch is SP9T, break-before-make timing. "0" position is off with no contact made. Withstands 260° soldering heat for five seconds. **Max. Current Contact Rating:** 100 mA. **Max. Voltage:** 24 V. **Operating Temperature Range:** -55°C to +125°C.

754-0265. 7643J-1-010. 1-99.....EACH 2.86
100-499.....EACH 2.00

6mm Square Washable Key Switch

This low level signal switch is wave solderable, board washable, and has 20 mA maximum current with 15 VDC maximum voltage. The SPST switch is available in either vertical or horizontal actuation and with or without ground terminal. Contact bounce is 3 ms max. for on position and 10 ms max. for off position. Switch is normally open type (push-on). Withstands 260° soldering heat for five seconds. **Operating Temperature Range:** -20°C to +70°C.

Panel-Mounted Rocker and Lever Handle Switches

Contact Rating: 5 Amps at 120 VAC or 28 VDC; 2 Amps at 250 VAC. **Operating Temp.:** -30° to 85°C. **Rocker and lever handles:** Black Nylon. **Bushings:** brass, nickel-plated. **End contact:** coin silver, silver plated. **Center contact and terminals:** brass, silver plated. **Mounting Bracket:** stainless steel. **Case:** red diallyl phthalate. **Included hardware:** nuts, screws, lockwashers, and standoffs.

BP Series Side Actuated DIP Switches

High temperature materials (UL 94V-0)—withstands soldering temperatures. SPST switch function—1,2,3,4, 5,6,7,8,10, and 12 position models. Reverse throw models available. Side actuators with positive detent. Reliable wiping contact mechanism—self cleaning. Gold and tin plated contacts available. All terminals tin plated for solderability. Epoxy terminal seal standard. Tape seal available. Splash resistant.

LD Series Sealed* Low Profile DIP Switches

Machine insertable—low profile. Process sealed construction—withstands soldering and cleaning processes—removable polyimide top tape seal STD. Designed with high temperature materials (UL 94V-0). Recessed side actuators and positive detent—prevent accidental activation. Bifurcated gold plated contacts—no lubricants required. Tin-lead alloy coats all sides of terminals.

P Series Low Profile Key Switches

High reliability switch—single pole and two pole models. Ratings from low level to 4 amps @ 125 V AC. One piece switch and lock housing—four standard colors—custom colors available. Smallest behind-the-panel clearance—approximately .600 inches. Supervisory key capability.

A Series Switchlocks

Contact rating: switch—2.5 Amps at 125 VAC or 28 VDC; 150 MA at 250 VAC or DC, carry—5 amps continuous. Electrical life: 15,000 make-and-break cycles at full load. Insulation resistance: 10⁹ ohms min. Dielectric strength: 1,000 V rms min. at sea level. Lock: zinc alloy, stainless facing, four tumbler mechanism. Switch housing and top plate: glass filled Nylon. Movable contact: coin silver, silver plated. Stationary contacts and terminals: brass, silver plated. Included hardware: hex nut. Two nickel keys supplied. All models UL, CSA.

Y Series Tubular Switchlocks

Contact rating: 4 amps at 125 VAC or 28 VDC; 2 amps at 250 VAC. Electrical life: 10,000 make-and-break cycles at full load. Insulation resistance: 9 million ohms min. Dielectric strength: 1,000 V rms min. at sea level. Stainless steel facing on the 6 tumbler tubular locks. Switch housing and top plate glass filled polyester. Silver-plated copper terminals and contacts. Hardware and two keys included. UL/CSA.

Y Series Switchlocks

Contact rating: 4 amps at 125 VAC or 28 VDC; 2 amps at 250 VAC (UL/CSA). Electrical life: 10,000 make-and-break cycles at full load. Insulation resistance: 10⁹ ohms min. Dielectric strength: 1,000 V rms min. at sea level. Lock: zinc alloy, stainless steel facing, four tumbler mechanism. Switch housing and top plate: glass filled nylon. Contacts and terminals: copper, silver plated. Included hardware: nut. Two nickel keys supplied.

Tiny Toggle Switches

Toggles: brass, chrome plated. **Bushings:** brass, nickel plated 10-48UNS-2A. **Included hardware:** nut, locking ring, and lockwasher.

Switches not right angle mounted or with support bracket. **Contact rating:** 3 Amps at 120 VAC or 28 VDC (UL) for all models with On-None-On switch function, all others 2 Amps at 120 VAC or 28 VDC. **End contacts:** coin silver, silver plated. **Center contact and terminals:** brass, silver plated.

Switches with right angle mounting or support bracket. **Contact rating:** 0.4 VA max. at 20 VAC or DC max. **Contacts and terminals:** brass, with gold plate over nickel plate.

Tiny Pushbutton Switches

Plunger: thermoplastic polyester. **Bushings:** brass, nickel plated. **Included hardware:** nut, locking ring, and lockwasher.

Switches with solder terminals. **Contact rating:** 1-Amp at 120 VAC or 28 VDC (UL listed). **Contacts:** coin silver, silver plated. **Terminals:** Brass, silver plated.

Switches with PC terminals. **Contact rating:** 0.4 VA max. at 20 VAC or DC max. **Contacts and terminals:** brass, with gold plate over nickel plate.

Tiny Slide Switches

Contact rating: 0.4 VA max. at 20 VAC or DC max. **Operating temp.:** -30°C to 85°C. **Actuator:** Nylon, black. **End contacts:** coin silver, silver plated. **Center contact and terminals:** brass, with gold plate over nickel plate.

Switches

Multisection switches can be made by ordering number of sections desired and accessories such as end plates and blank sections. **Description.** Thumbwheel: matte black with unsealed switch contacts. **Operating Voltage:** 50 mV to 28 VDC or 120 VAC. **Operating temperature:** -10°C to 65°C. **Body and Wheel:** ABS plastic. **Rotor contacts:** precious metal on copper alloy. **Stator contacts:** hard gold over nickel over 2 oz. copper on epoxy fiberglass. **Contact rating:** 1 Amp continuous carry, 100 mA max. switched current. **Insulation resistance:** 10⁹ ohms min. **Dielectric strength:** 500 V RMS min. at sea level between common terminal and any output.

Basic Precision

Basic precision switch, is used in applications requiring minimum pretravel and overtravel, with moderate operating force. 20 Amps at 125, 250, 480 VAC; 1/2 Amp 125 VDC, 1/4 Amp 250 VDC; UL and CSA. Last digit in Mfr.'s Type indicates termination: -1 solder terminals; -5 screw terminals.

Heavy Duty

Precision switch, used for control of heavy duty electric circuits, including motor loads up to 2 HP at 250 VAC, 1 HP, 125 VAC. 20 Amps at 125, 250, 480 VAC; 10 Amps 125 VAC, lamp load, inrush current 75 Amps at 480 VAC. UL and CSA. Last digit in Mfr.'s Type indicates termination: -1 solder terminals -5 screw terminals.

*Operates under direct pressure on rod end or by 15" max. lateral movement.

Terminal and Switch Enclosures

Terminal and switch enclosures, used to install HB and HL type switches with electric conduit, electrical tubing, or armored cable. The switch is inserted through the open top of the enclosure where it is secured by two screws that are supplied with the unit. The lower section is removable for easy access to terminals. TC-1, a molded phenolic cover for terminals only, has knock-outs for convenient positioning of wire.

Series 75 Lighted Pushbutton Switches

The RAFI Series 75 panel-mounted switches include momentary and alternate action lighted pushbuttons and keylocks. Each is designed to mount in a 16.2mm diameter panel cutout. Units are rated at 4A at 120/240VAC, and are available in one, two, three, and four pole models. Standard soldering terminals are silver (gold contacts available on request). The series 75 are recognized by UL, CSA, and VDE. Operating life at 250VAC/2A exceeds 200,000 operations. Cataloged units feature a black collar.

Series 75 Anti-Static Keylocks

The RAFI Series 75 panel-mounted keylock switches are designed to mount in a 16.2mm diameter panel cutout. Units are rated at 4A at 120/240VAC. Each features silver contacts (gold contacts available on request) and are designed to tolerate more than 14KV of electrostatic discharge. Units are recognized by UL, CSA, and VDE. Cataloged units feature a black collar.

Series 25 Snap-In Mount, Lighted Pushbuttons

The RAFI Series 25 momentary action, lighted pushbuttons are designed to mount in the popular 16.2mm diameter panel cutout...without the need for any installation tools. Simply insert into the drilled panel cutout, press the pushbutton once, and the snap-in locking mechanism secures the assembly to the front panel. Each unit features SPST gold-plated contacts designed for a maximum load of 100mA at 24V. The Series 25 pushbuttons feature black bezels and a 25mm square operator button designed to meet industrial-grade "water-tight" sealing requirements (IP65). Electrical connections are made via a 4-pole flat cable insulation displacement connector (IDC) - thus eliminating the need for soldering or stripping insulation.

Heavy Duty Rocker Switches

These full-size rocker switches are designed for AC and low voltage DC applications. They include a slow make, slow break contact mechanism, nylon snap-in brackets and are available to resolve most insulation requirements. They are rated at 15 amps 125 VAC, 28 VDC, 10 amps 250 VAC 3/4 H.P. CSA certified.

*Momentary contact in "On" position.

Medium and Heavy Duty Toggle Switches (AC/DC)

These switches have contacts with a quick-make/quick-break wiping action. The three-position switches offer a unique positive center stop feature, which assures that the lever cannot be thrown from one side through the center "Off" position without stopping. This design feature is a major factor in the widespread acceptance of these switches for motor reversing and speed control applications. Copper and bronze contacts are standard, as well as brass screw terminals.

PCB Subminiature Pushbutton Switch

"Crossed Wire" contact system eliminates bounce. High contact pressure gives low contact resistance. Drain holes permit complete flux washdown. Solid silver contacts with gold over nickel plate. Momentary or Latch-Down (depress plunger and rotate 30° clockwise) operation. **Current Ratings:** 1 A at 6 VDC and 12 VDC; 0.5 A at 28 VAC and 125 VAC. 2 circuit poles and throw. Right Angle PC mounting. **Note:** Optional snap-on buttons should be ordered separately.

Cutler Hammer

Cutler Hammer has been a leading manufacturer of standard and custom-designed UL recognized power switches for more than fifty years. Many of our products have international approvals, reflecting our commitment to the world market. Cutler Hammer switches are specified wherever highest quality standards are a requirement. We are proud that our switches, which range from heavy duty 800-ampere power toggles to miniature pushbuttons, are represented in every major electrical catalog. The switches shown in this catalog are typical of the products currently being used in existing equipment manufacturers. Special switches not shown in this catalog are available upon request. Please contact the factory for details. Cutler Hammer welcomes inquiries to meet your specific requirements.

General Purpose Momentary AC Switches

Push switches with slow-make/slow-break butt type contacts. 7836K11A/7835K11A Series rated at 3 A, 120 VAC; 1 A, 250 VAC; 1/10 HP, 120 VAC. Solder lug terminations. Bushing .562" (14.27 mm) long. 7836K11A/7835K11A Series UL recognized, CSA Listed.

Miniature Snap-In AC Rocker Switches

These switches come in lighted and non-lighted versions in a variety of standard or custom colors. They are UL, CSA and VDE approved. Ideal applications include appliances, electronic instrumentation, data processing, communications, medical and office equipment and many others in both domestic and foreign markets. Options available are legend stamping, solder lugs, independent lamp circuits, special and matched colors, high inrush capabilities. Aesthetically pleasing yet ruggedly functional with traditional Cutler Hammer quality, these switches are ideal for up-front applications where both appearance and reliability are required. The smoothly rounded bezel and gently contoured rocker have a soft matte finish that blends in with the most sophisticated product designs. When a switch has to be more than just a switch, Cutler Hammer's rocker switch offers that designer touch that will enhance any product line.

Lighted or non-lighted versions available in standard black gloss or optional matte finish. Handles high inrush currents up to 100 A Peak for 10 milliseconds @ 250 VAC. Electrical life rated at 10,000 cycles minimum. **Operating Temperature:** 0°C to +85°C. *Momentary.

Snap-In Mount Rockette Switches

The rocker switches offer a remarkable silicone rubber seal that protects contacts and mechanisms better than conventional seal and boot combinations. The switches resist contaminants such as sand, dust and moisture with both base to frame seal and an actuator seal. Available in one and two-pole. Rated 15 A, 125 VAC; 10 A, 250 VAC. Spade terminals (brass).

Series C1

Standards

- Dialyl Phthalate Material
- 30° Index (2-12 Pos.)
- .250" Shaft Length
- Solder Lug Terminals
- Adjustable Stops

Options

- Right Angle and Rear PC Terminal
- Dual Concentric Designs
- Watertight Seals
- Keylocks

Series C1 is the ideal rotary switch to specify when space is at a premium and dependable switching is a priority. The subminiature, rectangular design is a fully enclosed, environment-proof package that helps keep dirt and moisture out of the contact area, while keeping the lubricant sealed in for long life and high reliability. Its modular design allows for a wide variety of switching configurations to suit your needs. **Electrical Ratings (Resistive):** Silver plated brass contacts — .10 A at 125 VAC, .25 A at 28 VDC. **Contact Resistance (Ohms — Initial):** Silver plated brass — .005 or less. **Current Carrying Capacity:** 6 A. **Maximum Temperature Rise:** 30°C. **Voltage Breakdown (Sea Level):** 600 VAC. **Rotational Torque (Variable):** 5 to 30 in. oz. **Stop Strength:** Acetal housing material — 5 in. lbs. **Minimum Mechanical Life:** 25,000 cycles. **Available Index Angles:** 30°, 60°, 90°.

Series C3

Standards

- Polyester Material
- 30° Index (2-12 Pos.)
- .250" Shaft Length
- Right Angle PC Mount
- Adjustable Stops

Options

- 8 Pin Model
- Watertight Seals
- Keylocks

An ideal solution to high density, printed circuit module switching requirements is the Series C2 switch. Either the 12-pin or the 8-pin version can do the job well. These switches feature fully enclosed, environment-proof bodies with in-line PC terminals, a proven 25,000+ cycle detent mechanism, and the ability to provide complicated switching patterns in a minimum of space. The Series 400 is the preferred device by those in the data transfer, instrumentation, and stereo markets. **Electrical Ratings (Resistive):** Silver plated brass contacts — .10 A at 125 VAC, .25 A at 28 VDC. **Contact Resistance (Ohms — Initial):** Silver plated brass — .030 max. **Current Carrying Capacity:** 6 A. **Maximum Temperature Rise:** 30°C. **Voltage Breakdown (Sea Level):** 750 VAC. **Rotational Torque (Variable):** 5 to 30 in. oz. **Stop Strength:** Die cast housing material — 8 in. lbs. **Minimum Mechanical Life:** 25,000 cycles. **Available Index Angles:** 30°, 60°, 90°.

Series C4

Standards

- Dialyl Phthalate Material
- 30° Index (2-16 Pos.)
- .375" Shaft Length

The most versatile of all the enclosed rotary switches, the Series C4 provides a fully enclosed, modular, environment-proof package that helps keep dirt and moisture out of the contact area, while locking in lifetime lubricants. The modular design allows for a wide range of switching configurations, while the rugged, wear-compensating detent and thermostat modules provide a powerful construction to satisfy the most demanding industrial, computer or other commercial application. **Electrical Ratings (Resistive):** Silver plated brass contacts — .3 A at 125 VAC, .5 A at 28 VDC. **Contact Resistance (Ohms — Initial):** Silver plated brass (standard material) — .003 or less; Silver alloy — .002 or less. **Current Carrying Capacity:** 15 A. **Maximum Temperature Rise:** 30°C. **Voltage Breakdown (Sea Level):** 1000 VAC. **Rotational Torque (Variable):** 12 to 95 in. oz. **Stop Strength:** Acetal housing material (standard material) — 10 in. lbs.; Die cast housing material — 25 in. lbs. **Minimum Mechanical Life:** 25,000 cycles. **Available Index Angles:** 22.5°, 30°, 36°, 45°, 60°, 90°, 180°.

- Solder Lug Terminals
- Adjustable Stops

Options

- Right Angle, Rear Mount
- Vertical Mount, and Front Mount PC Terminal
- Keylocks
- Spring Return

Series C6

Standards

- Polyester Material
- 30° Index (2-12 Pos.)

- .312" Shaft Length
- Solder Lug Terminals
- Adjustable Stops

Options

- Rear PC Terminals
- Flag Terminals

The Series C6 is an economical, one deck, washable switch with a minimum mechanical life of 25,000 cycles. This unique design features a 360° housing-to-deck snap fit, insert molded terminals, and O-ring sealing options (both internal shaft and external panel). It is ideal for applications where process or environmental moisture or contamination concerns must be solved. **Electrical Ratings (Resistive):** Silver plated brass contacts — 1.0 A at 125 VAC. **Contact Resistance (Ohms — Initial):** Silver plated brass less than .020 ohms. **Current Carrying Capacity:** 5 A. **Maximum Temperature Rise:** 30°C. **Voltage Breakdown (Sea Level):** 1000 VAC. **Rotational Torque (Variable):** 15 in. oz. **nominal. Stop Strength:** Adjustable stop housing — 5 in. lbs. minimum; Fixed stop housing — 12 in. lbs. **nominal. Minimum Mechanical Life:** 25,000 cycles. **Available Index Angles:** 30°.

Series M6

Standards

- Dialyl Phthalate Material
- 30° Index (2-12 Pos.)
- .437" Shaft Length

- Solder Lug Terminals
- Adjustable Stops
- UL Listed

Options

- Keylocks
- Spring Return
- Waterproof Mount

Series M6 switches utilize a technologically advanced, versatile design that enables standard modular units to be combined in a myriad of complex switching applications. They are meticulously hand assembled and tested for the ultimate reliability/quality necessary for exacting applications. All modules are rigidly stacked together into a rugged, vibration-proof unit designed to meet MIL-S-3786, Style SR04 requirements for materials, life, shock, vibration, salt spray, explosion, thermal shock, high altitude, sand, dust, fungus, moisture resistance, etc. **Electrical Specifications. Interrupting Ratings:** 2.5 amps resistive at 120 VAC (UL1054), 2.0 amps resistive at 30 VDC (UL1054). **Continuous Rating:** 12 amps for 20°C max. temperature rise. **Contact Resistance:** .005 ohms (maximum). **Insulation Resistance:** 10⁹ megohms (min.). **Dielectric:** 1500 VRMS initial, minimum (1000 VRMS — UL1054). **Thermal EMF:** Less than .5 microvolts per degree. **Mechanical Specifications. Size:** 1.0" diameter, enclosed construction. **Decks:** 1-20. **Poles:** 1-48. **Positions:** 2-12. **Indexing:** 30°, 36°, 45°, 60°, 90°. **Mounting:** Single hole 3/8"-32 NEF-2A bushing with non-turn washer. **Panel:** 1/4" maximum thickness. **Rotational Torque:** 10-60 oz.-in. **Stop Strength:** 15 in. lbs. (min.). **Temperature Range:** -65°C to 125°C. **Life:** 50,000 cycles (min.) per MIL-S-3786. **Shock:** High-impact per MIL-S-3786. **Vibration:** 10-2000 Hz per MIL-S-3786. **Altitude:** High-altitude to 70,000 ft.

How To Select

42D, 44D, 71D and 56D Series are adjustable stop rotary switches. As listed, they are available with one or two poles per deck. Stop pins or washers can be removed from the front of the switch and replaced to set the number of positions per pole from two to the maximum number noted. Selections of the switch series depends upon the switching current requirements and the size restrictions of the application. The Series 56D is a single deck design with the lowest switching current rating, 200 mA, but requiring the least

amount of space. The Series 50D and 51D and CD are also single deck designs. Their switching current rating is also 200 mA. The Series 42D and 44D switch up to 1 ampere of current, but are the largest in diameter at one inch. The Series 71D is GRAYHILL's most popular multi-deck switch providing a mid range 250 mA switching in an approximate one-half inch diameter. These switches are form, fit and function equivalent to their fixed stop counterparts, which can also be ordered from Allied Electronics.

42D and 44D Series 1 Amp Adjustable Stop Rotary

Fully enclosed switches interchange with fixed stop models. **Electrical Ratings:** make/break 1 amp, carry 10 amps at 115 VAC, resistive. **Insulation Resistance:** 50,000 megohms initial, 10,000 megohms minimum. Non-shorting contacts. $\frac{3}{16}$ -32NEF bushing. **Behind-Panel Depth:** 1-deck, 1.025"; 2-deck, 1.371"; 3-deck, 1.717"; 4-deck, 2.063". **42D Series:** 10-position switch. 36° indexing. 1" diameter. **44D Series:** 12-position switch. 30° indexing. 1.162" diameter.

19 Series 15-Amp Power Tap Rotary Switches

UL Recognized. Single pole, single deck units have 2 to 11 positions plus common, with 30° indexing. Available in solder lug terminal with 0.125" wire hole or Faston terminal with 0.080" wire hole. 15 amps, 120 VAC, non-inductive load. **Contact Resistance:** 10 milliohms at 2 VDC and 100 mA; contacts are non-shorting. **Insulation Resistance:** 100,000 megohms. **Voltage Breakdown:** 2500 VAC.

71 Series 1/4 Amp, 1/2" Diameter Adjustable Stop Rotary Switches

71AD36

71ADF36

71 Series multi-deck, single shaft switches are adjustable stop. **Insulation Resistance:** 10,000 megohms minimum. **Voltage Breakdown:** 500 VAC minimum. Meet moisture, shock, salt spray, explosion and stop strength requirements of MIL-S-3786. 71AD are standard style with solder lug terminals and 0.125" diameter shaft; 71BD same but have 0.250" diameter shaft. 71ADF are PC mount with 0.125" diameter shaft; 71BDF same but have 0.250" diameter shaft. All are either 30° or 36° angle of throw. **Behind-Panel Depth:** 1-deck, $\frac{9}{16}$ "; 2-deck, 1".

56 Series 1/2" Diameter Single Rotary Switches

Economically priced, high quality, single deck rotary switches from GRAYHILL require a minimum of space. Rated to make and break 200 mA of current at 115 VAC or 30 VDC, resistive load for 10,000 cycles of operation. Maximum contact resistance is 100 milliohms, minimum of 10,000 megohms. Insulation resistance, and 600 VAC voltage breakdown. The Series 56 switches that are listed below are adjustable stop to allow you to set and reset the number of positions per pole to suit the application's need. These switches have non-shorting contacts, please contact Allied Electronics for shorting contact types.

Dual-In-Line Package Switches

76 Series Rocker-Actuated DIP Switches

- ▶ High Pressure Spring and Ball Contact System Assures Reliable Switching, Positive Positioning and Immunity To Shock and Vibration
- ▶ Epoxy-Sealed Bases Keep Switches Contamination-Free
- ▶ Sealed Bases Make Underside Of Switch Impenetrable To Cleaning Solutions and Impurities

Rated at 150 mA for 10,000 cycle life, SPST and SPDT DIP switches. Available with low profile, raised and recessed rocker actuators plus, for easy access panel-edge mounting, use the PIANO-DIP® switch. Switch Height With Raised Rocker: .295". With Recessed Rocker: .247". PIANO-DIP Style: .281". 10,000 operation life. Numerical suffix indicates number of rockers. 'S' after suffix indicates top tape seal.

78 Series Slide-Actuated

78 Series. 150 mA DIP switches provide 10,000-operation life. SPST circuitry with raised slide actuators. Switch Height: .295". For other 78 Series slide styles — including SPDT, DPDT and multiple pole single throw circuitries — contact your nearest Allied location. The suffix 'S' on switch type numbers indicates top tape seal is included. Use high pressure spring and ball contact system.

Series 84LS 12 and 16 Button Environmentally Sealed Keypads

— **NEW** —

Series 84LS 12 and 16 button keypads have matrix circuitry output and are completely sealed by a silicon rubber boot. Legends are epoxy printed on the top surface of the boot. 3 × 4 legend is numeric telephone and 4 × 4 is hexadecimal notation as shown in the figure. 3 × 4 is 2.35" × 3.1"; 4 × 4 is 3.1" × 3.1". Termination accommodates standard connector. Integral studs mount to panel. Rated for 3,000,000 operations per button; 10 mA at 24 VDC.

Series 38 Miniature Alternate Action Pushbutton Switches

— NEW —

Alternate Action Pushbutton Switch can be used as ON/OFF switch with silver plated contacts. Mounted on PC board, dimensions are 1.25" D x .35" H x .32" W. Rated for 25,000 operations. Silver-Plated contacts rated 1.0 A at 28 VDC. Gold-plated contacts rated 2 A at 30 VDC. O-ring sealed switches are process compatible.

Reed Switches

Highest quality reed switches feature contacts hermetically sealed in a protective atmosphere. Protected contacts mean reliable operation in wet, oily, dirty—even explosive—environments.

Glass capsule size ranges from a compact 2-inch glass length down to under 1/4-inch long! Ideal for use in proximity switches, flow meters, counting devices, limit switches, reed relays and precision instrumentation.

Actuate time: 3 millisecond or less on 2-inch capsules; 1 millisecond or less on capsules under 1-inch in length.

Typical life expectancy 50 million operations. **Contacts:** Form A (SPST-N.O.) or Form C (SPDT), may be actuated by permanent magnet or coil. Magnets and coils sold below.

Average shipping weight: 1 ounce each.

Reed Switch Test Coils

The coils described below are used for testing magnetic characteristics of reed switches. Pull-In, Drop-Out, Operate Time, Bounce Time, and Release Time are typical parameters measured using one of these coils. Coil specifications reference EIA/NARM RS 421-A for dry reed switches. MIL Spec MIL-S-55433.

Actuating Magnets

The quality magnets below are available for operation of our dry reed switches. They feature temperature stable Alnico V material magnetized lengthwise for strong consistent operation. The variety of sizes enables you to match your proximity or motion application to our switch and magnet with ease and satisfaction.

Proximity Sensors

Hermetic Switch, Inc. manufactures a variety of two part magnetic proximity sensors (sensor and actuator). All sensors feature hermetically sealed reed switch contacts that can survive harsh environments. Specially selected epoxy potting materials and rugged plastic cases withstand the impacts and forces of the real world. Many models are listed with Underwriters Laboratories, verifying that they have passed rigorous testing. The

sensors listed in this catalog are designed for use in alarm systems, automotive, consumer products, industrial controls, safety interlock, and many other applications. New to the Hermetic Switch line the 9000 series Power Proximity Sensors (Fig. R below) which offer contact ratings up to 200 watts D.C. Leaded units have color coded leads for easy identification.

Rotary DIP Code Switches

- Kinked terminals to hold switches in PC board to prevent lift off in wave soldering. Switches are still socket pluggable.
- Knob and wheel type switches may be hand adjusted.
- The wheel type RDS switch is designed so that it may be mounted on the end or side of a PCB and adjusted from the side without pulling the board out of the cage.
- Detent action is positive and firm assuring reliable settings.
- These switches may be interchanged with EECO and others.
- Optional red or green, screen indicator or knob color available.
- New right angle socket for mounting standard rotary switches provides possible 4-point contact.

The new RDS rotary DIP switches embody many new improved features and at a reduced cost! This new model features molded-in contacts, ultrasonic welded body to base and an "O" ring around the rotor shaft. These features insure an absolute seal to fluxes, flux gasses and cleaners. (Acceptable solvents are isopropyl alcohol, ethyl alcohol, toluene, benzene, trichloroethylene, freon; acetone and methanol solvents are not acceptable.)

Current rating and voltage: Non switching 125 mA at 30 VDC; Switching 125 mA at 30 VDC. **Contact resistance:** 100 milliohms maximum. **Insulation resistance:** 1000 megohms at 250 VDC for 1 minute minimum. **Durability:** 20,000 actuations. **Positions:** 10 and 16. **Temperature rating:** -25°C (-13°F) to 85°C (185°F). **Body:** Glass-filled polyamide. (UL94V-0). **Contacts:** Copper alloy, selective gold plating over nickel. **Rotor contact:** Polycrystal. **Rotor switch element:** Glass epoxy, gold over nickel plated circuits.

Thumbwheel Switches

Type "H"

These switches are relatively small in size and are used extensively in instrumentation and test equipment. They are mounted through the panel from the front and snapped into place and held firm by a pair of springs attached to each end plate. **Contact rating:** 100 milliamperes. **Max. Current:** 1 amp. **Working voltage:** 50V AC or DC. **Dielectric strength:** 500V. **Insulation resist. at 20°C:** 10⁹ megohms. **Temperature range:** -55°C to +85°C. **Character height:** 4mm.

Type "M"

The type "M" thumbwheel switch is of relatively small size and is designed for use in computers, machine tool controls, data handling equipment and test equipment. This series is designed for front panel insertions into a panel cutout and requires no separate mounting hardware. **Contact rating:** 100 milliamperes. **Max. Current:** 1 amp. **Working voltage:** 50V AC or DC. **Dielectric strength:** 500V. **Insulation resistance at 20°C:** 10⁹ megohms. **Temperature range:** -25°C to +70°C. **Height:** 4mm.

Type "U"

This series is front panel mounted for insertion into a rectangular panel cutout. They are designed for use in computers, machine tool controls, data handling equipment and test equipment. **Contact rating:** 100 milliamperes. **Max. Current:** 1 amp. **Working voltage:** 50V AC or DC. **Dielectric strength:** 500V. **Insulation resistance at 20°C:** 10⁹ megohms. **Temperature range:** -25°C to +70°C. **Character Height:** 5mm.

Type "L"

This series is designed for rear panel insertion into a rectangular panel cutout. They are designed for use in computers, machine tool controls, data handling equipment and test equipment. Their small size gives you the most switch with the least panel space. **Working voltage:** 50V AC or DC. **Contact rating:** 75 milliamperes. **Max. current:** 1 amp. **Insulation resistance at 20°C:** 10⁹ megohms. **Operating temperature:** -25°C to +70°C. **Character height:** 4mm.

Type "P"

This series of switch is designed for rear panel insertion into a rectangular panel cutout. The type "P" thumbwheel switch is used in computers, machine tool controls, data handling equipment and test equipment. **Contact rating:** 100 milliamperes. **Max. Current:** 50V AC or DC. **Dielectric strength:** 500V. **Insulation resistance at 20°C:** 10⁹ megohms. **Temperature range:** -55°C to +85°C. **Height:** 4mm.

Foot Switches

LINEMASTER

632 Clipper Series

The rugged, long life "Clipper" models have a patented molded nylon actuating cam that ensures long trouble-free performance. All models rated 20 Amps 1 Hp at 125-250VAC. **Models 632-D and 632-S** consists of a cast-iron housing with skid-proof base pads, black finish and strain relief connector. **Model 632-S Twin** consists of two SPDT switches, on a heavy steel base. **Dimensions:** 632-D and 632-S, $4\frac{1}{2} \times 3\frac{1}{2} \times 1\frac{1}{2}$ ". 632-S Twin, $8\frac{3}{8} \times 4\frac{1}{2} \times 1\frac{1}{2}$ ". **Weight:** 632-D and 632-S - $2\frac{1}{4}$ lbs.; 632-S Twin - 5 lbs.

842-6692	632-S Twin	SPDT Momentary	90.18	83.24

Junior Foot Switches

The low, smooth style plus its ease of operation make these models an ideal switch for both office or shop use. **Model 121-S** rated 20 Amps, 1 Hp at 125-250VAC. **Model 124-S** rated 15 Amp $\frac{1}{2}$ Hp at 125-250VAC. Both feature aluminum cast housings with a black finish and a skidproof base. Supplied with strain relief clamps and bushings for a wide variety of cord sizes. **Dimensions:** $5\frac{1}{2} \times 3\frac{1}{4} \times 1\frac{1}{4}$ ". **Weight:** 1 lb.

Stock No.	Mfr.'s Type	Circuit	EACH

Nautilus Foot Switches

Rugged aluminum casting for a long life. Piston type actuator sealed with "O" rings. Electrical Contacts sealed in a "Well." Dust tight, water-tight, oiltight, and rust resistant. Grey enamel finish. **Model WP-541-D** rated 12 Amp at 125VAC, 6 Amp at 250VAC. **Model WP-541-S** rated 20 Amp at 125-250VAC. **Dimensions:** $8 \times 4 \times 2\frac{1}{2}$ ". **Weight:** $2\frac{1}{2}$ lbs.

842-6684**	491-SC36	SPST Momentary	31.93	29.47

*Wired N.O. and supplied with an 8' 16/3 cord with a 3 prong series plug. Green lead grounded.

**Wired N.O. and supplied with a 6' 16/3 cord without plug. Green lead grounded.

Lektro-Lok Foot Switches

The Lektro-Lok operates on the teeter-totter principle. Pressure on one side opens or closes circuits, release and switch returns to normal off position. Mechanical interlock prevents operation of both circuits at the same time. Second position operates independent of first. Both sides can be wired N.O. or N.C. All connections made internally with only one cord coming out. Rugged stamped metal housing has a black finish and a skidproof base. Both type rated 10 Amps at 125VAC. **Dimensions:** $5 \times 2\frac{1}{2} \times 1\frac{1}{4}$ ". **Weight:** 10 oz.

842-6635	L-4-S	DPDT Momentary*	66.21	61.12

*Both sides.

Executive Foot Switches

Uses same operating principle as "Lektro-Lok" series with internal wiring and one cord coming out. Also incorporates mechanical interlock to prevent accidental operation of both circuits at the same time. Both types rated 10 Amps at 125-250VAC. Modern style die cast cover is medium grey with skidproof back. **Dimensions:** $4\frac{5}{8} \times 4 \times 1\frac{1}{8}$ ". **Weight:** $1\frac{1}{4}$ lbs.

Stock No.	Mfr.'s Type	Circuit	EACH

*Both sides.

Duplex Foot Switches

This neat cast aluminum housing is pivoted in the center for easy heel-toe operation. Uses same mechanical interlock system as the Executive and Lektro-Lok switches. Comes with an adjustable strain relief connector for most cord sizes. Smooth black finish with a skidproof base. Rated 15 Amps $\frac{1}{2}$ Hp at 125-250VAC. **Dimensions:** $8\frac{1}{2} \times 3\frac{1}{2} \times 2$ ". **Weight:** $1\frac{3}{4}$ lbs.

			1-9	10-Up
842-6670	476-S	SPDT Momentary*	66.86	61.72

*Both sides.

Treadlite II Foot Switches

Operating efficiency and handsome appearance go hand-in-hand with this compact, versatile foot-switch. Each model has a nonskid pad on the actuating treadle and a skidproof base. Formed steel casings with a black finish. 10 and 15 amps. $\frac{1}{2}$ HP at 125 VAC. **Dimensions:** $3\frac{1}{2} \times 2\frac{5}{8} \times 1$ ". **Weight:** 7 oz.

*Supplied with 6' 18.3 SJT cable with 3 prong series plug, green lead grounded.

**Supplied with 6' 18.3 SJT cable without plug.

Gem Foot Switches

These switches feature a round, black actuating cap in a chrome plated heavy die-cast housing with a full non-skid base pad. Moderate pressure from any direction operates the switch. Internal over travel stop ring prevents damage to switch when excessive force is applied. The **GEM-3** is supplied with a 6' 18/3 cord and 3 prong plug, green lead grounded. The **GEM-36** is supplied with a 6' 18/3 cord without plug. Both type rated 7 amps, $\frac{1}{6}$ Hp at 125VAC. **Dimensions:** $3\frac{1}{8} \times 1\frac{1}{8} \times 1\frac{1}{8}$ ". **Weight:** 1 lb., without cord set.

Full-Foot Switch Guards

- Pre-Drilled
- Alert Orange Color
- Complete With Hardware and Instructions

Type 522-B14. Full single guard. Accepts most "executive" and "compact" foot switch models. **Dimensions:** $6 \times 6 \times 4\frac{1}{2}$ ". **Weight:** 4 lbs.

842-6652. 1-9EACH 29.25
10-UpEACH 27.00

Type 522-B12. Full Twin Guard. Accepts twin clipper style only. **Dimensions:** $11 \times 6 \times 4\frac{1}{2}$ ". **Weight:** 7 lbs.

842-6653. 1-9EACH 49.21
10-UpEACH 45.43

M Series

356,000 different configurations; most popular shown here. **Standard Features:** epoxy sealed terminals, high torque bushings, antijamming levers, stainless steel housing, plus numerous interior construction features that assure highly reliable mechanical and electrical performance. Bright chrome plated brass levers, 1/4"-40 threaded, .350" long bushing with keyway; variations from these standards noted with detail drawings. Solder lug terminals with holes .043" x .079". Silver or gold contacts. **Electrical Capacity:** 6A @ 125V AC or 30V DC (silver). **Contact Resistance:** 10 milliohms max. **Insulation Resistance:** 1,000 megohms min. @ 500V DC. **Dielectric Strength:** 1,500V AC min. **Electrical Life:** 25,000 operations min. **Ambient Temperature:** -15°C through +85°C. **Standard hardware:** 2 hex nuts, 1 locking ring, 1 lockwasher. **Panel thickness:** .102".

Lamp Specifications

Specifications are determined at basic temperature of 25°C.

Voltage	6V	12V	28V	110V Neon	Recommended Resistor
Current	80mA	50mA	22mA	1.5mA	for Neon: 33KΩ for 110V & 100KΩ for 220V AC
Endurance	2000 hrs	2000 hours	2000 hrs	2000 hrs	

Snap-in Paddle and Rocker Switches

PW Series Features: snap-in mount, .846" behind panel, UL recognition, CSA certification, and staked-in terminals. **Electrical Capacity:** 5A resistive load @ 125V AC. **Dielectric Strength:** 1,000V AC minimum. **Electrical Life:** 10,000 operations minimum. **Angle of Throw:** 26°. **Ambient Temperature:** -10°C through +70°C. **Terminal Holes:** .043" x .079". **Panel Thickness:** .039" through .126" without bezel and .039" through .098" with bezel.

Basic Switch with Solder Lug Terminals

Order caps and bezel separately.

Lighted Toggle and Rocker Switches

M2100 Series Features: LED-tipped, antijamming, and epoxy sealed terminals. High torque bushing on toggle models. Patented silver alloy contacts. Synchronous and isolated LED circuits. **Electrical Capacity:** 6A resistive load @ 125V AC (silver); 0.4VA maximum @ 28 V maximum AC/DC (gold). **Dielectric Strength:** 1,500V AC minimum. **Electrical Life:** 25,000 operations minimum. **Angle of Throw:** 20°. **Ambient Temperature:** -10°C through +55°C.

Toggle Actuator with Synchronous LED and Solder Lug Terminals

Silver contacts rated 6A. 1/4"-40 dia. bushing. **Terminal Holes:** .043" x .079". **Hardware:** 2 hex nuts, 1 locking ring, 1 lockwasher ring, 1 lockwasher. **Panel Thickness:** .102". **LED Coding:** C = red single color, F = green single color, CF = red/green bicolor.

Super-Subminiature Switches

NKK®
switches

Toggles, Rockers, Pushbuttons and Slides

Standard Features: PC mountable with straight, right angle, and vertical terminals which are molded in and epoxy sealed. .100" X .100" PCB grid spacing. Single or double pole. Washable toggles, rockers, and pushbuttons. Patented Sliding Twin Crossbar (STC) contacts. **Electrical Capacity:** 0.4VA maximum @ 28V AC/DC maximum. **Contact Resistance:** 50 milliohms maximum. **Insulation Resistance:** 500 megohms minimum @ 500V DC. **Dielectric Strength:** 500V AC minimum. **Electrical Life:** 50,000 operations minimum. **Ambient Temperature:** -25°C through +70°C for toggles and -10°C through +85°C for rockers, pushbuttons, and slides.

Toggle Switch

Antistatic bushing. Toggle has bright nickel finish.

Note: AB11 & AS11 do not have terminal 2.

Miniature Keylock Switches

Features: 12mm dia. bushing, silver contacts, UL recognition, CSA certification, short behind panel dimension, and epoxy sealed solder lug terminals. Terminals have .043" x .079" holes. Face and bezel have brushed chrome finish. 2 keys of chromate over zinc alloy provided with each switch. **Electrical Capacity:** 3A @ 125V AC. **Contact Resistance:** 10 milliohms maximum. **Insulation Resistance:** 1,000 megohms minimum @ 500V DC. **Dielectric Strength:** 1,000V AC minimum between contacts and 1,500V AC min. between contacts and case. **Mechanical Life:** 30,000 cycles minimum. **Electrical Life:** 10,000 cycles minimum. **Operating Torque:** 270 grams. **Ambient Temperature:** -10°C through +70°C. **Angle of Throw:** 90° for on-none-on models and 45° for on-off-on models. **Panel Thickness:** .315". **Standard Hardware:** 1 hex nut and 1 locking ring.

HB Series

Super-subminiature with LED full or spot illumination. Front panel relamp. Front panel threaded mount. Dual, sliding silver contacts. Momentary and alternate action circuits with latchdown. Molded-in terminals. **Resistive Load:** 0.1A max. @ 30V AC/DC. **Contact Resistance:** 50 milliohms max. **Dielectric Strength:** 500V AC min. **Electrical Life:** 50,000 operations minimum. **Travel:** .118". **Operating Force:** 350g. **Ambient Temperature:** -20°C through +50°C.

Basic Switches and Indicators

LB Series. Standard size, snap-in mounting. Bright, full surface illumination. Front panel relamping and cap changing. Stainless steel clips for secure mounting and wide range of panel thicknesses: .039" - .157". Latchdown for indication of circuit status. Snap-action contact mechanism. Combination solder lug and .110" quick connect, epoxy sealed terminals. **Resistive Load:** 3A max. @ 125/250V AC for silver contacts (gold contacts available rated 0.4VA max. @ 28V AC/DC max.). **Contact Resistance:** 50 milliohms maximum. **Dielectric Strength:** 1,500 V AC minimum. **Electrical Life:** 100,000 operations minimum. **Total Travel:** .118" for momentary and .094" for alternate action. **Operating Force:** 450 grams. **Ambient Temperature:** -15°C through +50°C. Panel sealed model available and meets IP 65 of IEC 529 specifications.

S Series. Variations: 1-4 pole; 5A-25A range of electrical capacities; solder lug, screw and .250" quick connect terminals; 12mm bushings. Many devices UL recognized and CSA certified. Terminal hardware provided with screw terminals. Bright chrome bat lever finish. Bushing hardware provided. **S114 and S116 bodies:** .693" W x 1.094" L x .685" H.

High Capacity Toggle Switches

Variations: 2-3 pole; 30-50A range of electrical capacities; 12mm bushings. Screw terminals. Terminal hardware provided. Bright chrome bat lever. **S821 UL recognized; S532, S533, S821 CSA certified. S732 body:** 1.496" W x 2.362" L x 1.535" H.

Standard Size and High Capacity Rotaries

Available in a variety of families from 6 Amp devices to large 30 Amp rotaries. Available in 1-12 positions and 1-6 pole with nonshorting circuits. (Shorting circuits are also available.) Adjustable settings: 2, 3, 4, etc. through 11. .250" quick connect/solder lug terminals on HS. Hardware provided with screw terminals on TS and PS models.

Switches

- Slow-Break, Quick-Make
- Non-Shorting Type
- Single and Tandem Models

212, 312, 412, 608

Model 711

Typical Tandem Model

T505, T507

Ohmite power tap switches (high power rotary switches) are constructed to provide dependable, convenient operation. All switches have ceramic arc-proof bodies (except 711), metal alloy contacts, and are of an all-soldered and all-riveted construction which assures mechanical and operational integrity. The 711 Tap Switch has a reinforced non-metal body and solid metal alloy contacts; a very small unit with high current handling capability. These Tap Switches have a wide range of applications such as arcwelders, battery chargers, motor controls, X-ray equipment, etc. Additional number of taps, configurations, assemblies, and arrangements are available as special order items. Call for pricing and delivery info.

Ceramic High-Current Rotary Switches

Models 111, 212, 312, 412, 608.

Non-shorting, single pole, rotary, multi-position unit with single, dual and triple tandem units. Bodies are high grade, arc proof ceramic bodies. Large, solid, silver alloy contacts. Positive cam and roller mechanism provides slow-break, quick-make action. Shaft is insulated by strong ceramic hubs. Enclosed mechanism. Contacts and mechanism are entirely enclosed and protected.

Model 711 Miniature Switch

Single pole, non-shorting selector switch with stationary and movable solid silver alloy contacts. Common contact is rounded for assured seating. Self-cleaning with built in wiping action. Slow-break, quick-make action achieved with cam and cam follower. Breaks 7 amps at 125 VAC (for 20 VDC); carries 15 amps at 125 VAC/DC. Molded melamine phenolic body 1 1/8" dia. x 1 3/16" depth behind panel; 1/4" flatted shaft. Mounts by 3/8-32 bushings and hex nut. Model number suffix indicates taps (711-3 = 3 taps). Use 5103 knob.

Light Current Rotary Switches

Models T505 and T507.

Rated at 7 amps max, but only 3 amps at 120 VAC should be interrupted. Current ratings are less for inductive circuits, high voltages and all direct current circuits above 20 volts. Porcelain base and porcelain ring carrying the fixed contacts are vitreous coated. Metal tap contacts. Brush is silver graphite for very low resistance. Body dia. is 2 5/16". Behind panel depth is 1 3/8". Weight: .28 lb. Knob 5150 is recommended.

D4D-N Series

Compact general purpose limit switches employ a fail-safe mechanism that forcibly opens contacts, and assures accurate switching. Two sets of contacts: one (NC) for safety circuit and the other (NO) for control circuit. **Ratings:** IP67, IEC529, and NEMA 3, 4, 4x, 6p and 13. Meets European Standards approval.

D4BL Series

The D4BL Safety-door Lock Switch keeps protective doors locked until machine completely stops operation. Lock mechanism only releases when voltage is imposed on the lock mechanism solenoid. **Enclosure Rating:** IP67, IEC529 and EN60529. **Approved Standards:** UL, CSA, BIA, SUVA, TUV. **Conduit Size:** 1/2-14PT. Some models include easy-to-see indicators for monitoring.

SS Economical Subminiature Snap Action Switches

Three load switching capacities to choose from in a compact snap action switch. Long service life, high vibration and shock resistance, and easy installation. Solder terminals. **Body Size:** 19.7 × 9.4 × 6.4 mm (0.77 × 0.37 × 0.25). (9.5 mm). **Heavy Duty Load:** rivet contacts (non-inductive, resistive) 10.1 A @ 125 VAC/250 VAC, 10.1 A @ 8 VDC/14 VDC, 4 A @ 30 VDC; 20 A max. inrush current NC, 15 A max. inrush current NO. **Standard Load:** rivet contacts (non-inductive, resistive); 5 A @ 125 VAC/250 VAC, 5 A @ 8 VDC/14 VDC, 4 A @ 30 VDC; 20 A max. inrush current NC, 10 A max. inrush current NO. **Microvoltage/Current Load:** bifurcated crossbar contacts (non-inductive, resistive); 0.1 A @ 125 VAC/30 VDC; 1 A max. inrush current.

D2F Subminiature Snap Action Switch

Permits direct soldering to PC board. Quick reverse-action mechanism with 2 leaf springs assures long life. Construction resistant to flux wicking. PCB termination. **Standard:** (non-inductive, resistive); 3 A @ 125 VAC, 2 A @ 30 VDC with 5.3 oz. operating force model; 1 A @ 125 VAC, 0.5 A @ 30 VDC with 3 oz. operating force. **Micro Load:** (non-inductive, resistive); 0.1 A @ 30 VDC. **Body Size:** 6 × 12.8 × 5.8 mm (0.24 × 0.50 × 0.23 inch).

Knob and Keyswitches

— NEW —

All versions are fully assembled. Contact blocks have screw terminals. Compact style requires only 16 mm dia. mounting holes. Comply with IP65 seal requirements (oil resistant). Snap flange design on contact block for ease of wiring and assembly. Accommodates panel thicknesses of 0.5 to 5 mm. **Contact Rating:** 5 A @ 120 VAC 3 A @ 250 VAC resistive 3 A @ 30 VDC resistive.

Type B3F Mechanical Keyswitches

Flux tight mechanical keyswitch with snap action short keystroke with positive feedback. 50 mA @ 24 VDC resistive load switching capacity. 100 mOhm max. initial contact resistance. **Insulation Resistance:** 100 mOhm @ 250 VDC. Ideal for applications such as audio, office and communications equipment, measuring instruments, TV, VTRs and etc.

UM/UX Series Subminiature Basic Switches

— NEW —

UM Series Snap Action Switches can fit a broad range of applications, and can handle loads from milliamperes up to 5 A. UX Series Snap Action Switches are ideal for compact application. With dimensions of .197" H x .236" W x .504" L these switches can be used where space is a factor. 125-250 VAC, 30 VDC.

V3 Series Miniature Precision Switches

V3 Series miniature basic switches feature high electrical capacity and long life. Their size and shape meet design requirements in all types of applications. All are single-pole double throw. Switches are UL recognized and CSA certified. D8 suffix offers quick connect terminals .188 x .020 thick. D9 suffix has quick connect terminals .250 x .032. All others have screw terminals.

E6-V6 Compact Enclosed Switches

These enclosed switches contain a precision snap-action basic switch inside a rugged cast zinc housing. Lead washers are used to seal the mounting holes on side mount switches. Removal of the bottom enclosure exposes the terminals for easy wiring.

BZG1 and BAF1 Series Sealed Enclosed Switches

Switches have a neoprene seal gasket between the housing halves, elastomer boot actuators, sealed conduits connectors and die cast aluminum housing. Mounting holes are for #10 screws and are located outside the switch cavity. Each has a single conduit opening. Rating is a 15 amps for sealed enclosed switches and 20 amps for high capacity switches.

Miniature Pre-Wired Enclosed Switches

Factory pre-wired with SJTO industrial cable. Cable electrical connection and basic switch terminals are encapsulated in epoxy compound. Elastomer seal between plunger and switch housing. Plus mounting screw holes with continuous walls keep liquids from entering switch cavity. SPDT, UL rating: 5 amps, 1/10 HP, 125 or 250VAC. Zinc die-cast housing. Last digit in type number indicates cable length in inches. Minimum overtravel is: 0.118". Differential travel: 0.004. UL listed, CSA certified.

AML21 Series Incandescent and Non-Lighted Electronic Control Pushbutton Switches

AML21 switches with black bezels are designed to meet CEE requirements. Type numbers 13th digit 'A' have silver contacts rated 2A, 250VAC and 24VDC resistive; 3A, 125 VAC. 13th digit 'B' have gold contacts rated 100mA, 125VAC/DC resistive. Terminals are solder or quick-connect. Panel cutout: 0.75" square. Lighted units use incandescent T-1 1/4 wedge base industry lamp nos. 73, 85, 86, which are ordered separately. Order AML51 switch buttons separately on this page.

Controlmat Industrial Switching Mat

— NEW —

Designed for heavy moving loads, indoor or outdoor use. Top and bottom surfaces fully ribbed to prevent trapping moisture — no partial ribbing. Industrial grade surface is superior to soft cast or molded vinyl products. DRI-RUN cable is standard. Flexible mat is easy to install — ideal for door opening/closing, robotic installations, passenger sensing, machine tool protection. Nominal foot pressure anywhere on active area will be sensed. Write for installation notes. Color: Charcoal (or chrome yellow, special order only) available 16" long by 4' wide. Leads 6' long. No special handling. Lie flat on floor, and can be lifted for cleaning. Weight: 3.5 lbs. per ft.² (17 Kg/m²).

TH25 Series IP67 Pushbutton Switch — Oil-tight, Dustproof, and Submersible

The IP67 version of the TH25 series offers protection against all dust contamination, water being projected by a nozzle from any angle, and the IP67 rated switch is submersible in up to 1.2 meters of water. This series fits a 16.2 mm panel cutout and can be used with a load ranging from milliamps up to 16 amps. This switch is available in a number of bezel sizes and styles. The style shown is a 18 × 24 straight black bezel.

TH25 Series 3 Position Key-Switches

Tschudin & Heid key-switches offer you the greatest amount of flexibility in selecting a key-switch. You can select the key removable position and the bezel style. These key-switches are rated 5 amps and up to 250 VAC with a lifetime of 50,000 operations and fit a 16.2 mm panel cutout. The key-switch is available in a two position version and an IP65 rated version. **Switches Positions:** position 1 on the left, position 0 center, and position 2 on the right.

TH25 Series 3 Position Rotary Switches

Similar to the TH25 Series Key-Switches, the 3 position rotary offers you the widest selection of rotary elements and bezel styles. The 3 Position Rotary Switch uses the same bezels as the 3 Position Key-Switch.

TH4 Series 30 mm IP65 Splashproof and Oil-Tight Mushroom Switches

This TH4 series fits a 22.5 mm panel cutout. Rated 5 amps and 250 VAC, the TH4 mushroom switch comes with the mushroom cap assembled at the factory. Please order the cap at the same time that the switch is ordered.

Lighted Pushbutton Switches

TH5 Series Lighted Pushbutton Switches

The TH5 series is rated up to 5A, 250 VAC. Compact size is perfect for applications where depth is a problem. As with all T&H switches, the TH5 offers front panel access for bulb replacement. Available in Square, Round, and Rectangle bezel styles. Lens shape and color must be ordered separately.

Tapered Bezel Pushbutton Switches

TH5 Series with gently tapered bezels for European front panel styling. Features T&H unique bi-functional mechanism which allows the maintained version to be converted to a momentary function and back again. Customer selection of the lens color and the lamp voltage are ordered separately and are custom assembled.

Covered Bezel Pushbutton Switches

TH5 covered bezel style provides the largest lens cap area available. The version is excellent for multiple switch panel designs. The extra large lens is the best style available for engraving or legending. Features T&H unique bi-functional mechanism which allows the maintained version to be converted to a momentary function and back again. Customer selection of the lens color and the lamp voltage are ordered separately and are custom assembled.

TH25 series is rated 5A, 250VAC. The TH25 series patented contact block mounting system allows the switch to be mounted to the panel and the wire harnessing to be completed with the contact block and then mounted to the switch. Available in Square, Round, and Rectangle styles with contact block terminals in solder, .110x.020 quick connect, and shielded quick connect versions. A completely modular switch, it is custom assembled with each component; switch, lens, contact block, and lamp individually selected.

Model 33 3-1/2 Digit Auto-Ranging DMM

Features

- ▶ Basic Accuracy 0.5%
- ▶ 20A Fused
- ▶ Data Hold
- ▶ Auto Ranging
- ▶ High LCD Display

The model 33 has 3 1/2 digit, 0.5% accuracy. The LCD display is 0.75" high and has data-hold function. The ranges are 200mV to 1000V DC, 2V to 750V AC, 20mA to 20A AC/DC, 200 to 20M ohms resistance. It also has a diode and audible continuity check.

952-0033. Model 33 3 1/2EACH 59.95

Model 140/140K

Covers all standard DMM functions. 3 1/2 digit with 1% basic accuracy. Gold plated circuit board. Comprehensive assembly instructions provided for the kit version.

Specifications. DCV Range: 200mV, 2V, 20V, 200V, 1000V. ACV Range: 200V, 750V. Input Impedance: 10 MΩ. DCA Range: 200μA, 2 mA, 20 mA, 200 mA, 2A, 10A (10A not fused). Resistance Range: 200Ω, 2KΩ, 20KΩ, 200KΩ, 2MΩ, 20MΩ. Diode Check: Display reads approximate forward voltage of diode. Display: 3 1/2 digit LCD 0.4" high with "LOBAT". Power: Single 9V battery (1000 hours typical). 1 pair test probes, 1 spare fuse, manual. Dimensions: 5.9" L x 3.2" W x 1.2" H. Weight: 7.1 oz.

952-0140. Model 140EACH 39.95

952-0141. Model 140K. (Kit Form)EACH 49.95

Model 3000/3010/3100/3200

Model 3000. The 3000 series are highly-advanced, state-of-the-art autoringing digital multimeters, which additionally include a 40-segment analog bargraph and automatic data hold capabilities. All three meters offer Auto power off, continuity beeper, diode test ranges, range hold to disable autoringing when desired, relative measurement mode, Min/Max memories, dBm measurement mode, logic monitor mode with variable thresholds, and 20 amps continuous current measurement capability. Also included is Fast display mode which allows the display to update every 50ms instead of the normal 300ms.

Specifications. DCV Range: 400mV, 4V, 40V, 400V, 1000V. ACV Range: 4V, 40V, 400V, 750V. ACA and DCA Range: 40mA, 400mA, 20A. Resistance Range: 400Ω, 4KΩ, 40KΩ, 400KΩ, 4MΩ, (20MΩ), 20MΩ. Diode Test: Display reads approximate forward voltage of diode. Audible Continuity: Buzzer sounds if conductance is less than 10 ohms. DBM Measurement: -20 dBm to +60 dBm (600 ohm ref.). Display: 4000 count, 65°, 3 1/4 digit LCD with "LOBAT". Power: 9V battery (NEDA 1604); 360 hours typical. Dimensions: 6.4" H x 3.25" W x 4" D. Weight: 12.5 oz.

952-3000. Model 3000. .5% AccuracyEACH 129.95

Models 3010/3100. Same as above with Range Alert for use searching circuitry for a specific, settable level or range of levels, and activates an audible alarm when the set level is located.

952-3010. Model 3010. .25% AccuracyEACH 149.95

Model 3200. Same as 3100 in drop proof and contamination proof case.

952-3200. Model 3200. .25% AccuracyEACH 229.95

Model 35/37 4000 Count, Auto-Ranging DMM

Features

- ▶ Basic Accuracy 0.3%
- ▶ 20A Fused
- ▶ Auto Data Hold
- ▶ Auto Ranging
- ▶ High LCD Display
- ▶ Min/Max Memories
- ▶ Relative Mode
- ▶ Frequency Counter
- ▶ Capacitance Measurement
- ▶ Memory and Read Function
- ▶ 2-Year Warranty
- ▶ True RMS Measurement*

*(37 only)

The models 35 and 37 are 3 3/4 digit meters with 0.3% basic accuracy. They have a 0.67" high display with bargraph. The ranges are 4nF to 40μF capacitance measurement, 100Hz to 600KHz frequency measurement, 400mV to 1000V DC, 400mV to 750V AC, 40mA to 20A AC/DC and 400 to 40M ohms resistance. They also have relative mode, data-hold, min/max memory and read function and true RMS (model 37).

952-0035. Model 35EACH 89.95

952-0037. Model 37EACH 103.38

Model 470D

The 470D is housed in a rugged, drop-proof, heavy-duty case. This hand-held LCR meter is ideal for either shop or field. It is an excellent tool for testing the quality of transformers or capacitors by dissipation factor. It permits finding opens and shorts on transmission lines. And it has the ability to measure SMD or chip type components for resistance or capacitance. Low resistance ranges provide for precision resistance measurements (down to 1 milliohm). Optional SMD probes enable measurement of capacitance from the 200pF to 20mF ranges and resistance from the 2 to 20 MΩ ranges. **Typical Applications:** Quality control of transformers (opens, shorts); finding opens or shorts of transmission lines; capacitance and resistance measurements of SMD or chip type components; phase detection, mutual inductance and ratio of turns for transformers; quality control of PC boards (components, PC stripes, connectors, busbars, relay contacts, etc.).

Specifications. Capacitance: Range—200 pF, 2 nF, 20 nF, 200 nF, 2 μF, 20 μF, 200 μF, 2 mF, 20 mF; Dissipation Factor Range—0.001 = 1.999. Inductance: Range—200 μH, 2 mH, 20 mH, 200 mH, 2 H, 20 H, 200 H; Dissipation Factor Range—0.001 = 1.999. Resistance: Range—2 Ω, 20 Ω, 200 Ω, 2 KΩ, 20 KΩ, 200 KΩ, 2 MΩ, 20 MΩ. Power: Single 9V battery or line operations by 9V AC/DC adapter. Display: 0.5" digital height, 3 1/2-digit LCD with "LOBAT" and decimal annunciators. Size: 6.9" x 3.5" x 1.6". Weight: 0.88 lb. **Supplied Accessories:** 1 pair test clips, 1 spare fuse (0.125A), operations manual. **Optional Accessories:** TL-06 clip for SMD type component.

952-0470. Model 470DEACH 249.95

Model 120

This handy DMM offers maximum convenience of multiple functions in one package. 3 1/2 digit with 0.5% basic accuracy. Used in radio and TV repair, quality control, HVAC repair and maintenance, electronic design, schools, and field service.

Specifications. DCV Range: 200 mV, 2V, 20V, 200V, 1000V. ACV Range: 200 mV, 2V, 20V, 200V, 750V. Input Impedance: 10 MΩ. Resistance Range: 200Ω, 2 KΩ, 20 KΩ, 200 KΩ, 2 MΩ, 20 MΩ. ACA and DCA Range: 200μA, 2 mA, 20 mA, 200 mA, 2A, 10A (10A not fused). Audible Continuity Check: Buzzes if conductance is less than 30Ω. Diode Check: Displays approximate forward voltage of diode. Temperature: Uses 120°F (optional—not supplied) or any converter giving 1 mV per °C output. Display: 3 1/2 digit LCD 0.4" high with "LOBAT". Power: Single 9V battery (800 hours typical). 1 pair test probes, 1 spare fuse, manual. Dimensions: 5.9" L x 3.2" W x 1.2" H. Weight: 7.1 oz.

Model 39 4000 Count, Drop-Proof, Auto-Ranging DMM

Features

- ▶ Basic Accuracy
- ▶ 20A Fused
- ▶ Auto Data Hold
- ▶ Auto Ranging
- ▶ High LCD Display
- ▶ Min/Max Memories
- ▶ Relative Mode
- ▶ Frequency Counter
- ▶ Capacitance Measurement
- ▶ Temperature Measurement
- ▶ Fast Display Mode
- ▶ Drop-Proof to 10'
- ▶ 2-Year Warranty
- ▶ True RMS Measurement

The model 39 is a 3 3/4 digit meter with 0.25% accuracy. It is a highly advanced, state-of-the-art DMM which includes the following advanced features: true RMS, min/max, data hold, relative measurement, frequency counter, capacitance measurement, temperature measurement, and fast display mode (updates the display every 50ms instead of the normal 300ms period). Also, it offers auto power-off feature, DCV/ACV, DCA/ACA, continuity beeper, diode test, range hold to disable auto-range when desired, and 20 amps continuous current measurement. In addition, a yellow ABS plastic rugged case is utilized to offer the drop-proof feature of this meter.

Model 9808/High-Speed Gang Programmer with User Replaceable ZIP Sockets

The 9808 is a stand-alone, high speed EPROM gang programmer designed for mass programming applications. The programmer is equipped with nine 32-pin ZIP (zero insertion force) sockets with the master device occupying the first socket. The 9808 programs up to eight 8M-bit EPROMs or 2M-bit flash EEPROMs from one master device with a single keystroke. In order to provide years of reliable service, all ZIP sockets of the 9808 programmer are removable. Worn-out or damaged ZIP sockets can be easily and economically replaced by the user which eliminates programmer down-time and improves productivity. **Specifications. Power Supply:** 90 to 260 VAC; 47 to 63 Hz auto-switching. **Power Consumption:** 60 W maximum. **Dimensions:** 31.6 cm $\times$ 26.6 cm $\times$ 7.1 cm (12.4" $\times$ 10.5" $\times$ 2.8"). **Net Weight:** 3.2 kgs (7 lbs.). **Operating Temperature:** 5° to 45°C. **Humidity:** 90% non-condensing.

952-9808.....EACH 1495.00

Model 9850UV Personal E/EEPROM Programmer

- Simple Function Key Operations
- Programs 2716 to 27513 EPROMs and 2804 to 28256 EPROMs
- Built-in UV Eraser
- Stand-Alone or PC Remote Operation with Auto Detection
- Programming Algorithms: STANDARD, INTELLIGENT, INTERACTIVE AND QUICK PULSE

Specifications. EPROMs: 2716, 2716B, 2732, 2732A, 2732B, 2764, 2764A, 27128, 27128A, 27256, 27256D, 27512, 27513. **EEPROMs:** 2804A, 2816A, 2817A, 2864, 28256. **Programming Functions:** Read, Program, Auto, Verify, Blank Check. **Data Formats:** Intel Hex, Binary, Motorola S, Tektronix Hex. **Device Check:** Blank, Verify, Over Current, Checksum. **Programming Algorithms:** Standard, Intelligent, Interactive, Quick Pulse. **Serial Interface:** RS-232, DB-25F. **Data Rates:** 150-19200 baud. **Data Socket:** (1) 28 pin ZIF. UV Erase (9850UV); 6 devices. **Display:** 16 $\times$ 1 Dot Matrix LCD. **Protection:** Reverse Insertion. **Data RAM:** 64KB. **Power:** 110/220 VAC, 50/60 Hz.

9860 Universal Programmer

- Programs PROMs, E/EEPROMs, PALs, PEELs, FPLAs, GALs, E/EEPROMs and MPUs
- User Definable Programming Parameters
- Provides Test Vectors for PLD Functional Test
- Menu-Driven Operation on any IBM PC/XT/AT or 80386
- Software Diagnosis/Hardware Calibration
- Four Software Updates Annually
- PLCC Adapters Available (option)

An additional CPU independent clock is used to generate precision programming pulses to increase accuracy when programming devices. This unit utilizes a 1 MB dynamic memory buffer which has no limit in regards to device size. Even memory devices as large as 64 MB can be programmed with only 384 KB of a computer's RAM. When programming, each pin is independently driven which means a vast amount of devices may be supported by the unit. The PC-based programmer is menu driven, provides on-line help, and has one touch function key operation. These features ensure an easy-to-learn and simple-to-use programmer. Additional devices may be added by either varying the device options function to program similar devices or by special request for a new device (allow 6 weeks and provide data sheets and 2-3 samples of the device). **Specifications. Programming Functions:** Read, Program, Verify, Blank Check. **General Functions:** Select Device, Modify Vector, Functional Test, Input/Output to disk, Device Options, Hardware Test, Quit to DOS. **Edit Commands:** Go-To, Search, Fill, Complement, Copy and Checksum. **Programming Algorithms:** Standard, Traditional, Intel, Quick Pulse, Interactive and User Defined. **Data File Formats:** JEDEC, Intel Hex, Motorola S, Tektronix Hex, binary and HP64000ABS. **Power:** +5V @ 1A, +12V @ 0.2A (stand-by), 1A (active), -12V @ 0.1A. **I/O Connector:** 37 pin D-sub. **Host Computer Requirements:** IBM PC/XT/AT or compatibles and 386 based machines to 25 MHz. 384K RAM minimum. **Display:** Hercules, CGA, VGA, EGA, MCGA or monochrome. **Supplied Accessories:** Module, PCL-506A PC interface card, cable, software and operator's manual. **Size:** 10"L $\times$ 5.9"W $\times$ 1.7"H. **Weight:** 1 lb. 4 oz.

6000 Series Ruggedized Digital Multimeters

These exceptional 3 1/2 Digit Heavy Duty Drop Proof Digital Multimeters have the capacity of reading up to 10 functions on 33 ranges. This new series of ruggedized digital multimeters have features such as drop proof to five feet, 6KV transient voltage protection, audible continuity, diode test, overload protection on all ranges, meets IEC-348 Class II and UL-1244 standards, employs a combination tilt stand/hanger and have a one year limited warranty. Many other features in this new family are: large LCD displays, data hold, low ohm range, capacitance, transistor HFE, and direct temperature measurement.

DM-6100 3 1/2 Digit Heavy Duty Drop-Proof Digital Multimeter. Ranges: 200 mV/2/20/200/1000 Vdc, 200 mV/2/20/200/750 Vac, 20 μ 200 μ A/2 m/20 m/200 mA/20 ADC, 20 μ 200 μ A/2 m/20 m/200 mA/20 AAC, 20/200/2 K/20 K/200 K/2 M/20 M ohm, Continuity and Diode Test. 947-6100. Model DM-6100 EACH 94.95

DM-6200 3 1/2 Digit Heavy Duty Drop-Proof Digital Multimeter with Temperature Ranges. Ranges: 200 mV/2/20/200/1000 Vdc, 200 mV/2/20/200/750 Vac, 200 μ A/2 m/20 m/200 mA/20 ADC, 200 μ A/2 m/20 m/200 mA/20 AAC, 200/2 K/20 K/200 K/2 M/20 M ohm. -50° to 200°F/1400°F, -50° to 200°F/750°C. Model FG-2000 Combustion Flue Gas Analyzer with Printer

The FG-2000 plus is a battery operated instrument utilizing the latest in electronic technology to give accurate digital readings of oxygen, carbon dioxide, carbon monoxide, and temperature. Simultaneously, the on-board computer quickly and easily calculates the combustion efficiency of commercial and domestic boilers using any of five different fuels including natural gas and propane. The FG-2000 uses the unique five year oxygen cell drastically reducing operating and maintenance costs. The unit continuously samples so peak efficiency is also easily obtained. Readings may be recorded on the optional built-in printer.

947-2010. Model FG-2000 **NEW** EACH 2750.00

Model FG-1000 Flue Gas Analyzer

The FG-1000 is a portable, battery operated unit designed to quickly and easily determine the combustion of a boiler using almost any fuel. Fitted with the latest in sensor technology, it has a guaranteed sensor life of five years and reduces annual maintenance costs dramatically. Because the FG-1000 continuously samples, peak efficiency is almost determined. The FG-1000 gives digital readings of both oxygen and temperature with carbon monoxide levels being indicated on an easy to read analog scale. FG-1000 comes complete with combustion efficiency charts, battery charger, lengthy probe extensions for temperature and gases and a rugged permanent-style storage/carrying case.

947-1000. Model FG-1000 **NEW** EACH 1100.00

Model CG-600 TRAC- A-LEAK Combustible Gas Leak Detector

The slim-line TRAC-A-LEAK will detect minute amounts of all combustible gases including natural gas, butane, methane and propane. The TRAC-A-LEAK gives both an audible and visual warning, making it ideal for checking around gas taps, gas lines, meters, appliances, and all other type installations of combustible gas. The combination of a remote sensor connected by a long, flexible lead, and adjustable sensitivity allows the user to easily trace any leak right to the source even in the most awkward, restricted spaces. Rugged, simple to use, and powered by rechargeable batteries, the TRAC-A-LEAK is housed in a rugged shatterproof housing and comes complete with battery charge and a durable padded carrying case for extra protection in transit and storage.

947-0690. Model CG-600 **NEW** EACH 200.00

Model DM-2A Pocket Pro DMM

UL listed 3.5 digit pocket size DMM has auto/manual range selection, built in test leads, electronic burn out protection to 400 volts on ohm/audible continuity and diode test ranges. Ranges are 0-20/20/200/400 VAC/DC, 0-200/2 K/20 K/200 K/2 M ohms resistance. Audible continuity. 4.2" x 2.0" x .4", 3.5 oz. Comes with (2) B-6 1.5 V batteries, C-79 case, operating instructions #219.

947-6205. Model DM-2A EACH 32.95

Model DM-6953A "Pen-Style" DMM

5 Functions, 15 ranges, 3.5 digit autoranging DMM has interchangeable probe tip, data hold, audible continuity, overload protection on all ranges. Ohms and Diode ranges are protected to 250 volts electronically. Ranges: 0-200 mV (DC only) 2/20/200/500 Volts AC/DC, 0-200/2 K/20 K/200 K/2 M/20 M ohm resistance. 6.3" x 1.2" x .8", 2.3 oz. Comes with (2) B-6 "button" batteries, TL-49 test leads, AG-940 alligator clip-on alligator clip, 1 long, 1 short probe tip C-49 Case, instructions #167-2.

947-6593. Model DM-2A EACH 62.95

Model CO-500 CO-TRAC Digital Carbon Monoxide Detector

This compact hand-held instrument easily and accurately detects and measures carbon monoxide over the range of 0-2000 PPM (parts per million) with resolution to 1 PPM. Simple to use and easy to read with its large LCD display, the CO-TRAC is designed for rugged and dependable field service. Powered by a rechargeable battery (with "low battery" warning) and using a durable remote sensor it allows easy access into even the most hard to reach places around furnaces, heaters, and other appliances. An adapter is also available for use in testing for CO levels in flues and chimneys.

947-0500. Model CO-500 **NEW** EACH 500.00

Model CA-200 AC AMP Adapter for DMMs

CA-200 works with all DMMs with 10 Mohms input impedance and 200 mV or greater DCV range. Rugged ABS plastic, 40" leads with shielded banana plug. Fits up to 3/8" conductor, rated for continuous use up to 200 amps at 50-60 Hz. Gives True RMS readings when used with True RMS DMM. 5.75" x 2.75" x 1.5", 8 oz.

947-6680. Model CA-200 EACH 42.95

Model CA-250 AC/DC AMP Adapter for DMMs

CA-250 works with all DMMs with 10 Mohm input impedance and 0-200 mV/2 or greater ranges AC/DC. Rugged ABS plastic, 40" leads with shielded banana plug. "Low Battery" indicator and zero adjust for DC ranges. Fits up to 2.31" conductors. Rated for continuous duty at 50-60 Hz on 2 ranges. 0-200/2000 Amps AC/DC on circuits to 750 volts AC. Gives true RMS readings when used with True RMS DMM. 7.75" x 2.5" x 1.5", 18 oz.

AC Digital Snap-Around Volt-
Ohm-Ammeter**

Accurate, capable and durable. Current reading capability of up to 2000A. Features one-hand operation power/function rotary switch, tear-drop shaped jaws, and data hold switch. Overload protection on all ranges (electronic overload protection to 500VAC on resistance range). Shielded banana plugs and recessed input terminals. Peak hold for measuring peak voltage or current. **Specifications. AC Current. Ranges:** 200A, 2000A. **Resolution:** 0.1A, 1A. **Accuracy 50/60Hz:** ± (1.0%rdg + 2d) (0-1500A), ± (2.5%rdg) (1500-1999A). **Overload Protection:** 3000A. **AC Voltage. Ranges:** 200V, 750V. **Resolutions:** 0.1V, 1V. **Accuracy 50/60Hz:** ± (1.0%rdg + 2d). **Overload Protection:** 1000V. **Resistance. Ranges:** 200Ω. **Resolution:** 0.1Ω. **Accuracy:** ± (1.5%rdg + 2d). **Overload Protection:** 500VAC/DC for 1 min. **Display:** 3.5 digit LCD, max. reading 1999 with function and decimal annunciators. **Sampling Rate:** Approx. 3 x/sec. **Operating Environment:** -10° to 50°C (14° to 122°F) at <85% relative humidity. **Accuracy Temp. Coef.:** <0.05 x applicable accuracy spec per °C for temp. -10° to 13°C and 33° to 50°C. **Max. Conductor Size:** 2.16" (55mm) dia. **Power Supply:** 1 AWS B-4, 9V transistor type battery. **Battery Life:** 400 hours typical with carbon zinc cell. **Dielectric Strength:** 2500VAC for 1 min. **Size:** 9.7 x 2.8 x 1.4" (245 x 70 x 36mm). **Weight:** 14.1oz (400g). DSA-2002 package comes complete with TL-48 test leads, B-4 battery, carrying case, operating instructions, and lifetime warranty.

947-2001. Model 2002P	EACH 241.95
947-2002. Model DSA-2002 (As above without peak hold)	EACH 199.95

Model DSA-7610A Digital Snap-Around Volt-Ammeter

Features include autoranging, auto off, ohm range, instant continuity buzzer, overload protection, and data hold switch. **Specifications.** (at 50/60Hz, 23° ± 5°C). **Display:** 3.5 digit LCD, max. reading 1999 with auto sign and function annunciators. **Sampling Rate:** 2 x /second. **Continuity:** Visual and audible sound at <600Ω (ohm range 0-2K). **Overload Protection:**

500VAC for 1 min. **AC Current (AC Voltage) Ranges:** 200A, 300A (200V, 500V). **Accuracy:** ± 1.5 (1.2%)rdg + 4 dgt. **Overload Protection:** 500AAC (750VAC) for 1 min. **Environmental. Operating Environment:** 0°-40°C (32°-104°F) at <80% relative humidity. **Power Supply:** 2 AWS B-6 1.5V button type batteries. **Power Consumption:** 3mW typical. **Battery Life:** Approx. 100 hrs. **Dielectric Strength:** 2000VAC for 1 min. **Jaw I.D.:** 0.90" (23mm). **Size:** 6.87 x 1.61 x 1.1" (174.5 x 41 x 28mm). **Weight:** 0.44 lb. (200g). DSA 7610A package includes TL-52 test leads, 2B-6 batteries, carrying case, operating instructions, and lifetime warranty.

DSA 600 Series Digital Snap Arounds
DSA-600 and DSA-600A

DSA-600 and DSA-600A are 12 range 6 function 3 1/2 digit Volt-Ohm-Ammeters. Features include: DC volt ranges, electronic burn out protection to 500 volts on ohms, continuity, and diode test ranges, with overload protection on all ranges. Both meet I.E.C. 348 class II standards and utilize UL type 1244 safety test leads and recessed inputs. 600 amp jaw readily accommodates up to 750 MCM conductors. 7.5" x 3.2" x 1.39", 9.4 oz weight. Both include TL-52 test leads, B-4 (9v) battery, Instructions #243. DSA-600 includes C-62 case.

DSA-600P

A 12 range, 6 function 3 1/2 digit snap around volt ohm ammeter with peak hold and data hold. Features include: DC volt ranges, electronic burn out protection to 500 volts on ohms, continuity and diode test ranges, with overload protection on all ranges. Both meet I.E.C. 348 class II standards and utilize UL Type 1244 test leads and safety recessed inputs. 600 amp jaw capacity readily accommodates conductors up to 750 MCM. Basic accuracy is 1.5 % of reading @ 50-60Hz, 2% of reading @ 40-1Khz. 7.5" x 3.2" x 1.3", 9.4 ounces weight. Includes TL-52 test leads, B-4 (9V) battery, instructions #243.

**DSA-2009 True RMS/DSA-2003
Avg. AC/DC Digital Snap Around**

Reads true RMS AC Amps, volts AC on DC signals, and DC amps, volts. Electronic burn out protection to 500 volts. Accurate Amp/Volt measurements on non-sine wave power circuits such as SCR drivers. Triac circuits, variable speed/frequency drives, HID lighting, UPS systems, and other non-linear loads, as well as DC drives, cranes, DE powered vehicles, and battery power systems. Tear drop jaws allow easy access to tight places. Output jack for recording or oscilloscope viewing. **Specifications. Ranges. AC Current True RMS:** 200A, 2000A. **DC Current:** 200A, 2000A. **AC Volts True RMS:** 200V, 750V. **DC Volts:** 20V, 200V, 1000V. **Resistance:** 200 OHM, 1500 OHM. **Output Terminal True RMS:** 200 AAC, 200 ADC, 2000 AAC, 2000ADC. **Overload Protection:** Up to 500V AC/DC on resistance range. **Diode test range. Data Hold Switch:** Freezes readings. **Display:** 3.5 digit LCD, Max reading 1999. **Max. Conductor Size:** 2.16 Dia. **Power:** One 9V battery (NEDA Type 1604). 16 hours typical with carbon zinc cell. **Dimensions:** 9.7"H x 2.8"W x 1.4"D. **Weight:** 17.7 oz. **Supplied Accessories:** TL-48 test leads, B-4 battery, C-50 carrying case, form #171-1 operating instructions, millivolt output jack, and warranty card.

Model VH-601A Volt Sensor Non-Contact Voltage Detector

Easy to use detector indicates presence of AC voltages from 100-600 VAC, and identifies "HOT" with respect to ground by easy to identify audible and visual signals. Power/variable sensitivity switch sets detection levels, LED indicates "Power on". Light weight, shirt pocket size with built in pocket clip. Reads AC Volts 100-600 VAC @ 50-60Hz. 4.9" x 1.4" x .9", 1.5 oz, dielectric strength 2000 volts, 1 minute at 100 IA or less. Requires 2 AA batteries, not supplied, comes with instructions form #194.

Specifications: Working Voltage Range: 100-600 Vac max to ground. Frequency: 50-60Hz. Dielectric Strength: 2000V, 1 minute, 100uA or less or less during dielectric strength test. Temperature Range: 32-104°F (0-40°C). Battery: Two "AA" 1.5V batteries. AWS Part #B-1. Dimension: 4.9 (L) x 1.4 (W) x 0.9 (H) in. Weight: 1.4 lb. (40g). Model VH-601A comes packed complete with Form #194 Operating Instruction. Requires two "AA" type batteries (not included).

DSA-2413 Digital Snap Around Surface Leakage/High Current

The DSA-2413 digital clamp meter for leakage and high current measurements has shielded transformer jaws to minimize the effect of external stray magnetic fields, locates ground faults without costly shut-downs, can measure from 0.1mA to 1000A AC and has a single power/range selector switch for easy one handed operation. The data hold function allows easy reading in hard-to-reach locations. The display can be observed away from the conductor. Peak hold facility offers selectable response time of 10ms or 100ms. An AC output terminal is provided for connection to an oscilloscope for waveform viewing or for connection to a true RMS digital multimeter for reading true RMS. A DC output terminal is provided for recording the current input, or waveform viewing on an oscilloscope. 40Hz to 1KHz frequency response on all ranges (20 KHz on 200mA range).

Specifications: Range: 0.1-200mA, 2, 20, 200, 1000AAC. Selection: Manual rotary switch. Sensing: Average sensing, calibrated in RMS of sine wave. Display: Field Effect 3 1/2 digit LCD. Frequency Response: 50/60 Hz and 40 Hz to 1 KHz (20 KHz on 200mA range). Conductor Size: 2.7" max. Power: Single 9V battery plus two AA. Low Battery Indication: "B" symbol displayed. Battery Life: 80 hours typical (9V alkaline); 100 hours typical (AA alkaline). Size (H x W x D): 9.8" x 5.1" x 2". Weight: 20 oz. including battery. Limited lifetime warranty.

947-2413. Model DSA-2413.....EACH 514.95

AC/DC Voltage Tester

Voltage tester features AC/DC indication, firm grip prod handles, prod storage in housing, and a convenient pocket size. **Specifications:** Solenoid type construction. Frequency Response: 50-60Hz. Indication: Approximate AC volts 120/240/480/600; Approximate DC volts 120/240/600. Polarity Indication: AC both Neons glow; DC negative Neon glows. Intermitent Duty Cycle: 30 sec. maximum. Size: 7 x 2 1/4 x 1 1/4"; 11 oz. Packaged in see-through blister pack; operating instructions and applications and application notes (including diagrams) printed on rear panel of package.

SLM-110 Digital Light Meter

The SLM-110 is a digital light meter which combines a 5% basic accuracy with the capability of reading up to 10,000 footcandles. This unit is compact, light weight and easy to operate. It has a separate light sensor to allow optimum measurements on its large LCD display. It also has a data hold switch to freeze readings. Range: 0-200/2,000/10,000 fc. Power: Single 9V battery. Battery Life: 150 hours typical. Supplied Accessories: C-57 Carry case, one 9V transistor battery, and one year warranty.

947-0110. SLM-110.....EACH 89.95

TACH-1

The TACH-1 is a digital photo/contact tachometer. This multi-function instrument combines 0.05% basic accuracy with the capability of RPM and surface speed measurements. **Specifications:** Has both photo tachometer (RPM) and contact tachometer (RPM, M/Min, Ft/Min). Measuring Range: 0.5 to 100,000 RPM, 0.05 to 2,000 M/Min, 0.2 to 6560 Ft/Min. Memory Recall: automatically displays last value, max. value and min. value. Display: 5-digit LCD with insignificant zero suppression. Housing: ABS Plastic. Range Selection: autoranging. Power: four "AA" batteries (Part # B-1). Dim.: 8.5" x 2.6" x 1.5". Wt.: 66 lb. including batteries. Supplied Accessories: C-55 carrying case, four "AA" batteries, T-1 reflective tape, 2 W-1 RPM adapter (cone), W-2 adapter (funnel), W-3 surface speed test wheel and form # 189 operating instructions.

731-0022	DP-21	20 MHz Logic Probe	All Models	35.70
731-0035	DP-31A	Pulser Probe	All Models	39.00
731-0071	DP-52	50 MHz Digital Logic Probe	—	45.00
731-0075	DP-101	Digital Pulsing Probe	—	111.00
731-0044	HV-44	Direct-Reading 40 K VDC Probe	—	99.00
731-0027	PR-28	Hi Voltage Probe	—	51.45
731-0028	PR-32	Demod Probe	HV Multimeter Probe for all A.D. Meters with Standard Dual Banana	59.00
731-0037	PR-37AG	Grey Probe	All B and K Scopes with BNC	57.23
731-0039	PR-37AK	Red Probe	All B and K Scopes with BNC	54.50
731-0081	TP-29	Thermocouple Probe	390, 3706, TP-30	15.75
731-0046	PR-46	10:1/Deluxe Probe	All Scopes with BNC	75.50
731-0100	PR-100A	X100	All Scopes with BNC	66.00
731-0001	TL-1	Replacement DMM Test Leads	All "Test Bench" and "Tool Kit" Series	8.00
731-0005	TL-2	Deluxe DMM Test Leads	All "Test Bench" and "Tool Kit" Series	20.00
731-0006	TL-3	Accessory Tip Kit	TL-2	12.00
731-0007	PR-33A	X1-X10 Scope Probe	All Scopes through 60 MHz	43.00
731-0008	TP-30	Temperature Adapter	All DMMs	125.00
731-0009	CP-3	DC/AC Current Clamp Adapter	All DMMs	86.00
731-0010	TP-1	Immersion/General Purpose Temperature Probe	390, 2706, TP-30	33.00
731-0012	TP-2	Air/Gas Temperature Probe	390, 2706, TP-30	37.00
731-0013	TP-3	High Temperature Probe (900°F)	390, 2706, TP-30	12.00
731-0014	TP-4	Surface Temperature Probe	390, 2706, TP-30	45.00

Charges and Battery Paks for Test Instruments

731-0020	BC-28	115 V Adapter/Charger	820, 830	24.15
731-2800	BP-28	Battery Pak	820, 830	51.98
731-0095	BP-14	Battery Pak	1422	74.50

Carrying Case and Covers For Test Equipment

731-0031	LC-22	Carrying Case	1422	64.05
731-0021	LC-28	Carrying Case	820, 830	23.10
731-0002	LC-29A	Carrying Case	All DMMs and Models 810A, 815, 875, 878	10.00
731-0030	LC-32	Carrying Case	PR-28, H-44	22.05
731-0210	LC-210	Scope Carrying Case	All Scopes except 1422	92.00

"Over 30 Years of Servicing the Electronic Industry Together."

Model 1856A
2.4 GHz Multifunction Counter

- ▶ Frequency, Period, Period Average and Totalize Functions
- ▶ Selection Resolution
- ▶ Display Hold
- ▶ 0.5 PPM TCXO Time Base (23 +5°C)
- ▶ 8 Digit LED Display
- ▶ Low Pass Filter
- ▶ Remote Start-Stop
- ▶ Accepts Standard 10 MHz External Time

731-1856. Model 1856A.....EACH 499.00
731-0018. Model AN18. Antenna.....EACH 30.00

Model 1806
100 MHz Battery/AC Powered Counter

- ▶ Frequency, Period, and Totalize Functions
- ▶ 2 PPM Timebase, 20° to 30°C
- ▶ Selectable 1.0 Sec./0.1 Sec. Gate Times
- ▶ 5 Hz to 100 MHz Range
- ▶ Low Pass Filter
- ▶ 8 Digit LED Display
- ▶ Charger/AC Adapter Included

731-1806. Model 1806A.....EACH 249.00
731-9998. Model PR37A. Probe.....EACH 57.23

Model 1803C
100 Battery/AC Powered Multi-Function Counter

- ▶ 5 Hz to 100 MHz Range
- ▶ 2 PPM Timebase, 20° to 30°C
- ▶ Selectable 1.0 Sec./0.1 Sec. Gate Times
- ▶ Low Pass Filter
- ▶ 8 Digit LED Display
- ▶ Charger/AC Adapter Included

731-1810. Model 1803C.....EACH 210.00
731-9998. Model PR37A. Probe.....EACH 57.23

Model 1807
1.3 GHz Battery/AC Powered Counter

- ▶ 5 Hz to 1.3 GHz Range
- ▶ 0.5 PPM TCXO Time Base, 20° to 30°C
- ▶ Low Pass Filter
- ▶ 1 Sec. and 0.1 Sec. Gates
- ▶ 8 Digit LED Display

731-1807. Model 1807.....EACH 299.00
731-9998. Model PR37A. Probe.....EACH 57.23
731-0018. Model AN18. Antenna.....EACH 30.00

Model 1823
175 MHz Universal Counter

- ▶ 5 Hz to 175 MHz Range
- ▶ 8 Digit LED Display
- ▶ Display Hold and Reset Feature
- ▶ 10 PPM Time Base

731-1823. Model 1823.....EACH 399.00

Model 810 A
Capacitance Meter

- ▶ 3 1/2 Digit LCD Display
- ▶ Measures Capacitance to 20 mF
- ▶ Nine Ranges from 200 pF to 20 mF
- ▶ 0.1 pF Resolution
- ▶ Low Battery and Overload Indicator

Model 820
Manual Ranging Capacitance Meter

- ▶ 4 Digit LED Display
- ▶ Measures Capacitance to 999.9 mF
- ▶ 10 Ranges from 999.9 pF to 999.9 mF

731-0820. Model 820.....EACH 279.00

Model 830
Auto Ranging Capacitance Meter

- ▶ 3 1/2 Digit LED Display
- ▶ Measures Capacitance to 199.9 mF
- ▶ 10 Ranges from 199.9 pF to 199.9 mF

731-0830. Model 830.....EACH 325.00

"Over 30 Years of Servicing the Electronic Industry Together."

Model 4010 2 MHz Bandwidth Function Generator

- ▶ 2 MHz Bandwidth
- ▶ Sine, Square, Triangle Wave Outputs
- ▶ TTL and CMOS Outputs
- ▶ Variable Symmetry
- ▶ Variable DC Offset

731-4010. Model 4010.....EACH 229.00

Model 4011 — 5 MHz Function Generator with Digital Display

- ▶ 5 MHz Bandwidth
- ▶ 4-Digit Counter
- ▶ Sine, Square, Triangle Wave Outputs
- ▶ TTL and CMOS Outputs
- ▶ Variable Symmetry
- ▶ Variable DC Offset

731-4011. Model 4011.....EACH 289.00

Model 4017 10 MHz Sweep/Function Generator

- ▶ 10 MHz Bandwidth
- ▶ 5-Digit LED Display
- ▶ Linear and Log Sweep
- ▶ Sine, Square, Triangle Wave Outputs
- ▶ TTL and CMOS Outputs
- ▶ Variable Symmetry
- ▶ Variable DC Offset

731-4017. Model 4017.....EACH 369.00

Model 4040 — 20 MHz Sweep/Function Generator with Frequency Counter

- ▶ 20 MHz Bandwidth
- ▶ Amplitude or Frequency Modulation
- ▶ Burst Operation
- ▶ External Frequency Counter to 30 MHz
- ▶ 5-Digit LED Display
- ▶ Linear and Log Sweep
- ▶ Sine, Square, Triangle Wave Outputs
- ▶ TTL and CMOS Outputs
- ▶ Variable Symmetry
- ▶ Variable DC Offset

731-4017. Model 4017.....EACH 369.00

Model 3001 Sine/Square Wave Audio Generator

- ▶ Sine and Square Wave Generator
- ▶ 20 Hz to 150 KHz in 46 Steps
- ▶ Low Distortion R-C Oscillator
- ▶ Variable Output Control
- ▶ Compact, Fully Portable, Light Weight
- ▶ Low Battery Indicator

731-3001. Model 3001.....EACH 79.00

Model 2005A 150 MHz RF Signal Generator

- ▶ 100 KHz to 150 MHz on Six Bands
- ▶ Output to 450 MHz on Harmonics
- ▶ AM Modulation, Internal or External, 0% to 100%
- ▶ Frequency Monitor Output for External Frequency Counter
- ▶ Step and Variable Attenuation to -40 dB

731-2005. Model 2005A.....EACH 275.00

Model 1211D Hand Held Color Pattern Generator

- ▶ Compact, Battery Operated
- ▶ 5 Patterns Including Full Field Raster
- ▶ Composite Video Output to 1 V p-p
- ▶ Progressive Scan
- ▶ CH 3 and CH 4 Crystal Controlled RF Outputs
- ▶ Chroma Can Be Switched Off

731-1213. Model 1211D.....EACH 235.00

Model 1249A NTSC Generator with RGB

- ▶ NTSC Color Bar Pattern, $\pm 5^\circ$ and ± 5 IEEE Units
- ▶ CH 3, CH 4 and IF Outputs Crystal Controlled
- ▶ Calibrated 1 Vp-p or Variable Composite Video Output
- ▶ RGB Outputs on BNC or 9-Pin D Connector
- ▶ Composite sync, Vertical Sync, and Horizontal Sync Outputs
- ▶ Chroma Can Be Switched Off

731-1249. Model 1249A.....EACH 569.00

Model 1251 NTSC Signal Generator

- ▶ NTSC Color Bars, With or Without -IQW
- ▶ Linear Staircase with High or Low Chroma
- ▶ Multiburst
- ▶ Sound Modulation, 1 KHz or 3 KHz
- ▶ External Video, External Audio
- ▶ Raster on 8 EIA Colors
- ▶ Interlaced Scan

731Q1251. Model 1251.....EACH 1195.00

Model 1260 NTSC Deluxe Video Signal Generator

- ▶ High Accuracy NTSC Color Bars, $\pm 2.5^\circ$
- ▶ TCXO Master Oscillator
- ▶ RGB Outputs
- ▶ Gen Lock; Circle Pattern; Black Burst
- ▶ Multiburst to 8 MHz, Selectable 100% or 50% Level
- ▶ Interlaced or Progressive Scan

731Q1260. Model 1260.....EACH 1995.00

"Over 30 Years of Servicing the Electronic Industry Together."

Model 2120 — 20 MHz Dual Trace Oscilloscope

- ▶ Dual or Single Trace Operation
- ▶ 1 mV/div Sensitivity
- ▶ AUTO/NORM Triggered Sweep Operation with AC, TVH, TVV and Line Coupling
- ▶ Calibrated 18 Step Timebase with X10 Magnifier
- ▶ Compact Low-Profile Design

731-2110. Model 2120.....EACH 549.00

Model 2125 — 20 MHz Dual Trace Oscilloscope with Delayed Sweep

- ▶ Dual or Single Trace Operation
- ▶ 1 mV/div Sensitivity
- ▶ AUTO/NORM Triggered Sweep Operation with AC, TVH, TVV and Line Coupling
- ▶ Calibrated 20 Step Timebase with X10 Magnifier
- ▶ Compact Low-Profile Design
- ▶ Delayed Sweep in 18 Ranges
- ▶ Built-In Component Tester for Capacitors, Inductors, Diodes, Transistors, Zener Diodes

731-2125. Model 2125.....EACH 646.00

Model 1422 20 MHz Dual Trace Oscilloscope

- ▶ 20 MHz Dual Trace, AC/DC Battery, Portable
- ▶ 18 Calibrated Sweep Positions
- ▶ Operates on AC, External DC or Optional Internal Battery
- ▶ Fits Into Attache Case

731Q1422. Model 1422.....EACH 1395.00

Model 1541C 40 MHz Dual-Channel Oscilloscope

- ▶ 1 mV/div Sensitivity
- ▶ 19 Calibrated Sweeps
- ▶ Video Sync Separators
- ▶ X10 Sweep Mag. Single Sweep
- ▶ V Mode—Displays Two Signals Unrelated in Frequency

731-1445. Model 1541C.....EACH 799.00

Model 2160 60 MHz Dual Trace Dual Time Base Oscilloscope

- ▶ 1 mV/div Sensitivity
- ▶ Sweep to 5 ns/div
- ▶ Signal Delay Time
- ▶ Component Tester
- ▶ Z Axis Input
- ▶ Single Sweep
- ▶ 22 Calibrated Ranges — Main Time Base
- ▶ 19 Calibrated Ranges — Delayed Time Base
- ▶ V Mode — Displays Two Signals Unrelated in Frequency

731Q2160. Model 2160.....EACH 1099.00

Model 2190A 100 MHz Three Trace Dual Time Base Oscilloscope

- ▶ 1 mV/div Sensitivity
- ▶ Sweep to 5 ns/div
- ▶ Signal Delay Time
- ▶ Channel 1 Output
- ▶ 22 Calibrated Ranges — Main Time Base
- ▶ 19 Calibrated Ranges — Delayed Time Base
- ▶ Calibrated Delay Time Multiplier
- ▶ 15 kV Accelerating Voltage

731Q2195. Model 2190A.....EACH 1599.00

Model 2260 — 60 MHz Cursors and Readouts, Dual Time Base Oscilloscope

- ▶ Cursors and Readouts
- ▶ 1 mV/div Sensitivity
- ▶ Signal Delay Time
- ▶ Component Tester
- ▶ Z Axis Input
- ▶ Single Sweep
- ▶ 23 Calibrated Ranges — Main Time Base
- ▶ 19 Calibrated Ranges — Delayed Time Base
- ▶ V Mode — Displays Two Signals Unrelated in Frequency

731Q2260. Model 2260.....EACH 1399.00

Model 2522A 20 MHz Digital Storage/ Analog Oscilloscope

- ▶ 20 MHz Analog Bandwidth
- ▶ 20 MS/s Sampling Rate Each Channel
- ▶ 2 K Memory Per Channel
- ▶ 20 MHz Equivalent Time Sampling
- ▶ Pre-Trigger Capture

731Q2522. Model 2522A.....EACH 1099.00

Model 2560 60 MHz Digital Storage Oscilloscope

- ▶ Cursors and Readouts
- ▶ RS-232 Port
- ▶ 20 MS/s Real Time Sampling
- ▶ 1 GHz Equivalent Time Sampling (at 0.1 μ s/div.)
- ▶ Prints Via RS-232 Port to Any HP-GL Plotter

731Q2560. Model 2560.....EACH 2395.00

Model 2000 Automotive Oscilloscope

- ▶ 20 MHz, Dual Trace Scope
- ▶ Automotive Probe and Lead Set
- ▶ Comprehensive, Easy to Understand Training Manual with Typical Waveforms and Test Data

731-2000. Model 2000.....EACH 795.00

"Over 30 Years of Servicing the Electronic Industry Together."

Model 480 and 490 CRT Testers/Rejuvenators

- ▶ Test and Restore Color or Monochrome CRTs
- ▶ Test and Restore Most Computer Monitor CRTs
- ▶ Test and Restore Most Projection TV CRTs
- ▶ Test Emission, Tracking, Leakage, Shorts, Life
- ▶ Remove Shorts, Clean and Balance Guns, Rejuvenate Cathodes
- ▶ Continual Set-Up chart Updates and New Adapter Development
- ▶ Extra Rugged Polyethylene Case

731-0480. Model 480.....EACH 739.00
731-0490. Model 490.....EACH 1049.00

Model 510 Portable Transistor Tester

- ▶ Good/Bad Test for Transistors, FETs and SCRs
- ▶ Identifies Transistors as NPN or PNP, FET and N-Channel or P-Channel
- ▶ Identifies FET-Gate Lead, All Leads of Transistors in LO Drive; Base Lead in HI Drive, All Leads of SCR
- ▶ Includes Three Test Leads with Mini-Lock Clips, Carrying Case, and Instruction Manual

731-0510. Model 510.....EACH 239.00

Model 520B Industrial Tester

- ▶ HI/LO Drive
- ▶ Works In-Circuit
- ▶ Identifies All Three Transistor Leads
- ▶ Random Lead Connection
- ▶ Automatic NPN/PPN Determination
- ▶ Audibly and Visually Indicates Good Transistor
- ▶ Positive Si/Ge Identification
- ▶ Tests Diodes, SCRs, FETs and Darlingtons

731-0520. Model 520B.....EACH 399.00

Model 545 PC Board Circuit Analyzer

- ▶ Simple to Use
- ▶ Tests All Active and Passive Components
- ▶ Tests Digital and Analog ICs Up to 40 Pins
- ▶ Autoscan Mode Gives a Positive Pass/Fail Indication
- ▶ Built-In Switcher Automatically Tests IC Pins Sequentially

- ▶ Built-In Pulse Generator Tests SCRs
- ▶ Signature Storage on Computer Using Optional Software

731-0545. Model 545.....EACH 2950.00

Model 560A Programmable PC Board Tester

- ▶ Tests Digital ICs Both In- and Out-of-Circuit
- ▶ Simple To Use — Testing Experience Is Not Required
- ▶ Tests Over 90% of Existing TTL/CMOS ICs
- ▶ Instant Pass/Fail Indications
- ▶ Library Updates Are Available
- ▶ Enhanced RS-232 Serial Port
- ▶ Loop Test Locates Intermittent Failures
- ▶ Accurately Tests Devices in Non-Standard Circuit Configurations
- ▶ Board Learn Stores Test Information for All ICs on a PC Board (Up to 100) in Removable EEPROMS
- ▶ 40 Character Vacuum Fluorescent Display

731-0560. Model 560A.....EACH 3500.00

Model 815 Hand-Held Parts Tester

- ▶ Large 0.8" Digit, High Contrast LCD Readout
- ▶ Tilt Stand for Benchtop Use
- ▶ 25 User Ranges for Versatile Test Selection
- ▶ Tests Resistance from 0.1 Ohm through 20 M Ohm
- ▶ Tests Transistors, SCRs, Diodes and LEDs
- ▶ Tests Batteries Under Actual Loaded Conditions
- ▶ 5 Foot Drop-Proof, Heavy Duty Case

731-0815. Model 815.....EACH 99.00

Model 878 Dual-Display Hand-Held LCR Bridge with Statistical Functions

- ▶ Measures Capacitance, Resistance and Inductance
- ▶ Accuracy Compares to More Costly Bench Bridges
- ▶ Measures Dissipation Factor of Capacitors and Q of Inductors
- ▶ Excellent for Sorting Parts in Engineering, QC, or Production
- ▶ Simultaneously Displays Measured Value and Q or Dissipation Factor
- ▶ Remembers Minimum and Maximum Values
- ▶ Keeps a Running Average of Tested Component Values
- ▶ Relative Mode Displays the Difference Between the Measured and Reference Component Values
- ▶ Tolerance Mode "Beeps" to Indicate Measured Components Outside a 1%, 5%, or 10% Tolerance Around a Reference Value
- ▶ Two Selectable Test Frequencies (120 Hz, 1 kHz)
- ▶ Auto or Manual Ranging

731-0878. Model 878.....EACH 275.00

Model 300 Insulation Tester

- ▶ Convenient and Economical
- ▶ Tests Insulation Resistance to 2000 MΩ
- ▶ Applies 1000 VDC
- ▶ Measures Up to 600 VAC
- ▶ Battery Powered
- ▶ Carrying Case Included

731-0400. Model 300...EACH 129.00

Model 875A LCR Meter

- ▶ Measures Capacitance, Resistance and Inductance
- ▶ Measures Dissipation Factor of Capacitors and 1/Q of Inductors
- ▶ 3 1/2 Digit LCD Display

731-0875. Model 875A.....EACH 199.00

Model 1045A Telephone Product Tester

- ▶ Provides Basic Operation Tests for Corded and Cordless Telephones, Answering Machines, FAX Machines and Automatic Dialers
- ▶ Checks Line and Handset Cord for Continuity, Shorts and Intermittents
- ▶ Verifies Number Dialed or Redialed (Pulse or Touch Tone®)
- ▶ Verifies that Voice and DTMF Level Share Above Minimum Required Level
- ▶ Provides Low and Normal Ring Tests
- ▶ Tests Two-Line Phones

731-1045. Model 1045A.....EACH 599.00

Model 1050 Telephone Product Analyzer

- ▶ For Diagnostic Testing, Servicing and Calibration of Corded and Cordless Telephones, Answering Machines and Automatic Dialers
- ▶ Measures RF Frequency Error and Modulation Deviation in Cordless Phone Systems
- ▶ Verifies Pulse and Touch Tone® Numbers — Even for High-Speed Auto-Dialers
- ▶ Measures Relative RF Power Levels and Receiver Sensitivities in Cordless Phone Systems with the Use of an External Antenna
- ▶ Provides Continuity Check of Telephone and Handset Cords
- ▶ Includes Audio Generator Outputs for Guardtone and Voice Simulation
- ▶ Provides Adjustable Ring Voltage Generator

731-1050. Model 1050.....EACH 2260.00

BL-10 K Multitester

- ▶ 18 Ranges
- ▶ 6 Function
- ▶ Battery Test
- ▶ Fully Protected

Specifications. 3-color mirrored scale 180 μ A movement. Ranges: DC Voltage — 0 to 2.5, 10, 50, 500, 1000 V; AC Voltage — 0 to 10, 50, 250, 1000 V; DC Current: 0, 10 mA, 250 mA; Resistance: 0-5 k, 5000 Ω , (R $\times$ 10R $\times$ 1 K). Battery Test: 1.5 V (125 mA); 9 V (10 mA); 10,000 ohms/volt. Uses "AA" battery (UM-3). Supplied with test leads, manual, and battery.

776-1000. Model BL-10K.....EACH 16.86

Model DMR-35A 3 1/2 Digit Economy LCD Digital Multitester

- ▶ 3 1/2 Digit 0.5" Height LCD Reading to 1999
- ▶ Auto-Polarity-Display for Negative Input
- ▶ 27 Ranges
- ▶ High Overload Protection for all Ranges
- ▶ Power Consumption for 20 mW Approx.
- ▶ 6 Functions

10 megohm input on DC volt. Power Consumption: 20 mW. Includes diode check. Supplied with batteries, test leads, and case. **Specifications.** DC Volts: 5 ranges, 200 mV to 1000 V, 0.8% +1 digit. AC Volts: 2 ranges, 200 V to 750 V, 1.2 +3 digits. DC Current: 5 ranges, 200 microamps to 10 amps, 0.8% +2 digits. Resistance: 6 ranges, 200 ohms to 20 Megohms, 1% +2 digits.

776-0351. Model DMR-35.....EACH 50.51

Model DMR-2012A

- ▶ 9 Functions, 35 Ranges
- ▶ Capacitor, Transistor, Diode Test
- ▶ Audible Continuity
- ▶ .5% Accuracy
- ▶ 20 Amp AC/DC Ranges
- ▶ Drop Proof Case

9 function, 35 range LCD multimeter with 20 amp AC/DC ranges. Housed in drop proof case. **Specifications.** Ranges: Volts — 200 mV, 2 V, 20 V, 200 V, 1000 V (750 V AC); Current (AC/DC) — 200 μ A, 2 mA, 20 mA, 200 mA, 20 A; Resistance — 200, 2 K, 20 K, 200 K, 2 M, 20 M; Capacitance — 2000 pF, 20 nF, 200 nF, 2 μ F, 20 μ F. Transistor Check: NPN, PNP, hFE. Protection: Fuse and diode overload protected. Size: 6 1/4" H $\times$ 2 1/8" W $\times$ 1 1/4" D. Supplied With: Battery, test leads and case.

776-2012. Model DMR-2012A.....EACH 63.51

Model DMR-2322A

- ▶ 10 M Ohm/Volt Large Oversize Display
- ▶ 3 1/2 Digit LCD Multimeter
- ▶ Fuse and Diode Overload Protected
- ▶ High Visibility Yellow Housing
- ▶ 11 Functions
- ▶ 45 Ranges
- ▶ Audible Continuity
- ▶ Test Capacitors, Transistors, Diodes
- ▶ 20 Amp AC/DC Ranges
- ▶ Shockproof Case
- ▶ 7 1/2" H $\times$ 3 1/2" W $\times$ 1 1/2" D

- ▶ Auto Power Off
- ▶ Probes Slot Onto Case
- ▶ Display Boxed
- ▶ Complete with Battery, Test Leads and Case
- ▶ Logic Test, Transistor Test, Capacitor Test, Frequency Measurement

Specifications. DC Volt Range: 200 mV, 2 V, 20 V, 200 V, 1000 V; AC Volt Range: 200 mV, 2 V, 20 V, 200 V, 750 V; DC Amps: 200 mA, 2 mA, 20 mA, 200 mA, 20 A; AC Amps: 200 mA, 2 mA, 20 mA, 200 mA, 20 A; Resistance: 200, 2 K, 20 K, 200 K, 2 M, 20 M; Capacitance: 2000 pF, 20 nF, 200 nF, 2 μ F, 20 μ F; Freq.: 20 KHz, 200 KHz. Supplied with ruggedized case and test leads.

776-2322. Model DMR-2322A.....EACH 86.56

DMR-2500 Multitester

- ▶ DC Volts: 200 mV, 2 V, 20 V, 200 V, 1000 V
- ▶ AC Volts: 200 V, 750 V
- ▶ DC Current: 200 μ A, 2 mA, 20 mA, 200 mA, 2000 mA, 10 A
- ▶ Resistance: 200, 2 K, 20 K, 200 K, 2000 K

Specifications. 6 Functions. 19 Ranges. 10 Amp DC range. Diode test. Shockproof case. Low battery indication. Fuse and diode overload protected. High surge voltage protection. 5 1/2" H $\times$ 2 3/4" W $\times$ 1" D. Complete with battery, instruction manual and probes. Display boxed.

776-2500. Model DMR-2500.....EACH 41.00

RES-5A Resistance Decade Box

- ▶ Universal Binding Posts
- ▶ Easy to Read Slide Switch Operation

Range: From 1 Ohm to 11,111,110 Ohms in 1 Ohm increments. Accuracy: $\pm$ 1% Tolerance Minimum. Power Capacity: 1/2 Watt.

776-1175. RES-5A.....EACH 33.86

25 MHz Dual Trace Oscilloscope with Component Tester

Model OSC-25DT. Dual trace 25 MHz bandwidth with high brightness 5" CRT. Ch1 Signal output for use with a frequency counter. Component Testing Special Circuit. Ch2 polarity inversion switch. Vertical Deflection magnification X5 giving 1mV/DIV. Selectable alt/hopping function. Scale illuminating system. Alternate triggering allows observation of waveforms with different frequencies. Single sweep mode for one time/sudden events. Simultaneous observation of X1 and X10 trace. Delay line for viewing high frequency pulse edges. Front panel adjustable DC balance for Ch1 and Ch2. **Specifications.** Vertical Deflection. Sensitivity: 5 mV/DIV to 5 V/DIV 1 mV/DIV to 1 V/DIV (X5 mag). Bandwidth: DC — DC to 25 MHz $\pm$ 3 dB (X5 Mag: DC to 10 MHz $\pm$ 3 dB); AC — 5 Hz to 25 MHz $\pm$ 3 dB (X5 Mag: 5 Hz to 10 MHz $\pm$ 3 dB). Rise Time: Less than 17.5 ns. Max. Input Voltage: 300 V (DC + AC peak). Input Impedance: 1 M Ω $\pm$ 3%, 1/25 pF. Polarity Inversion: CH2 only. Chop Frequency: Approx. 250 KHz. Operating Modes: CH1, CH2, ALT, CHOP or DUAL. Overshoot: Less than $\pm$ 6% (5 mV/div to 0.5 V/div, X1). Horizontal Deflection. Operating Modes: X-Y operation CH1-X axis, CH2-Y axis. Input Impedance: 1 M ohm, 25 pF. Bandwidth: DC — DC to 500 KHz ($\pm$ 3 dB); AC — 5 Hz to 500 KHz ($\pm$ 3 dB). X-Y Phase Shift: 3° or less DC to 50 KHz. Time Base. Sweep Mode: Auto, Norm, TV-V, TV-H or Single. Sweep Time: 0.2 μ s-0.2 s/DIV $\pm$ 3% in 1-2-5 steps (X1 only). Magnified Sweep: 10 times $\pm$ 5% (additional), max. 20 ns. Delayed Sweep. Delay Time: 1 μ s-100 ms in 5 ranges. Jitter: 5,000:1. Triggering. Trigger Source: INT (Ch1, Ch2, or ALT), LINE, EXT or EXT-10. Coupling: AC, HF, REJ, TV, DC. Trigger Sensitivity: INT — DC-2 MHz - 0.5 div, DC-25 MHz - 1.5 div; EXT — DC-2 MHz - 200 mVpp, DC-25 MHz - 800 mVp-p. CH1 Amplifier Output. Output Voltage: Approx. 20 mV/DIV. Output Impedance: 50 ohm. Bandwidth: 50 Hz-5 MHz ($\pm$ 3 dB). Intensity Modulation Z-Axis. Bandwidth: DC — 2 MHz. Max. Input Voltage: 30 V (DC + AC peak). Sensitivity: 5 Vp-p. Probe Calibration Output. Squarewave: Approx. 1 KHz ($\pm$ 20%), 0.5 Vp-p ($\pm$ 3%). CRT Display: 6" (150 mm) rectangular type with an illuminated, parallaxfree, internal graticule, 2 kV accelerating voltage and 8 $\times$ 10 divisions (1 division = 10 mm). Power Requirements. Voltage: AC 100 V/117 V/220 V/240 V $\pm$ 10%, 50/60 Hz. Power Consumption: 45 W. Dimensions: 11" W $\times$ 6" H $\times$ 17" D. Net Weight: 16.5 lbs. Accessories: X1/Ref/X10 probe 2 pcs, operation manual, power cord and fuse.

F-72 Multitester

- ▶ Better Overload Protection
- ▶ Battery Tester
- ▶ With Carrying Case and Buzzer
- ▶ Includes Test Leads and Batteries
- ▶ Adjustable Handle
- ▶ Mirror-Back Scale
- ▶ 23 Ranges

Specifications. 20 k ohms/Vdc. DC V: 0, 2.5, 10, 50, 250, 1000 V. AC V: 0, 10, 50, 250, 1000 V. DC Current: 0, 5, 50, 500 mA, 10 A on separate jack. Resistance: R $\times$ 1, R $\times$ 10, R $\times$ 1K (Center 50 ohm). Decibel: -8 dB to +62 dB on all AC V range. Battery Test: 1.5 V size AA; internal loading resistance and current 75 ohm/20 mA; 9 V Std.; internal loading resistance and current 450 ohm/20 mA. Audio Power Level: -8 dB to +22 dB on a 600 Ω arc of scale length. Batteries: 1.5 V AA $\times$ 2 pcs. Protection: 1 A/250 V fuse and silicon double diode. MT-20-BC made of high impact plastic and phenolic PCB. 5 1/4" H $\times$ 3 1/2" W $\times$ 1 1/2" D. Weight: 1.2 lbs.

GEN-SS-1 Solid State Sine/Square Wave Generator

Provides sine and square wave outputs simultaneously while covering 20 Hz to 2 MHz in 5 bands. **Specifications.** Square Wave: 20 Hz-200 KHz. Sine Wave: 20 Hz to 2 MHz. Output Voltage: sine wave 0-7.5 volts rms into high impedance output, 0-6.5 volts into 600 ohms. Square Wave: 0-10 volts p-p into high impedance, positive direction with ground zero. Calibration Accuracy: 3% except for 5%, 20 Hz to 100 Hz and 1 MHz to 2 MHz. Maximum Distortion Across Audio Range: 0.25% rise time at 20 KHz, less than 0.1 microseconds. Power Requirements: 105-132 volts, 50/60 Hz, 10 VA.

652 LAN CableMeter

— NEW —

The 652 is the most comprehensive LAN cable testing, verification and certification tool on the market today. Now, with a single instrument, installers can test Ethernet, Token Ring, and ARCnet cabling in every nook and cranny of a network. Nothing stops the 652 because it uses traditional AA batteries. So you never have to wait for recharging.

The 652 is the only CableMeter designed to meet all the challenges of an installer's full day of work.

It provides a complete suite of tests; from wire mapping to noise and traffic measurements; from Near-End Crosstalk (NEXT) to identifying split pairs. It also offers full cable verification, certification, and documentation features. Results are compared to IEEE-802 and EIA/TIA 568 Commercial Building Telecommunications Wiring Standards and may be printed out for future reference. There's even an O'SCOPE mode that lets you view TDR pulses and reflections on an oscilloscope such as a Fluke ScopeMeter, for detailed analysis of cables having multiple faults.

Specifications. Cable Types. Unshielded Twisted Pair (UTP) — 10BaseT Level 3, 4, 5; and IBM Type 3 Level 3, 4, 5; IBM Type 1; Coaxial — 10Base2, RG58, RG58 Foam, RG59, RG59 Foam, RG62, 10Base5. Also allows two custom cable types with selection of characteristic impedance, nominal velocity of propagation (NVP), and BNC or RJ-45 (Ethernet or Token-Ring wired) connectors. **Display.** 64 character, four line LCD with backlight. **Measurements.** Length, wire map, attenuation, near-end crosstalk (NEXT), characteristic and termination impedance, noise and Ethernet traffic. **Autotest.** Automatically sequences through a series of cable measurements, compares results to both the IEEE-802 specifications and EIA/TIA 568 specifications, displays a Pass/Fail message along with audible tone and summarizes key cable parameters. Up to 400 autotest measurements can be saved in non-volatile memory and printed via the serial printer port. **Wire Map.** Detects correct and faulty pair wiring in cables with RJ-45 connectors. Indicates the following faults: opens, shorts, reversed pairs, and crossed pairs. **Length.** A built-in TDR is used to make the measurement. **Range:** 6 m to 600 m (20 ft. to 2000 ft.) for UTP Cable; 6 m to 1200 m (20 ft. to 4000 ft.) for Coaxial Cable. **Accuracy:** $\pm 1\% + 0.6$ m (2 ft.). **Resolution:** 1 m or 1 ft. **Display Units:** Meters or feet.

Fluke 620 CableMeter

- ▶ One Person Verifies Each Connection As He Goes
- ▶ Versatility to Test All LAN Cable Types
 - UTP, STP, FTP¹, Coax
 - Test Two, Three, or Four Wire Pairs in Twisted Pair Cables
- ▶ Detect Wiring Problems: Open, Short, Crossed-, Reversed-, Split Pair
- ▶ Locate Wiring/Connection Errors (Distance to the Open or Short)
- ▶ Measure Cable Length
- ▶ Ease-of-Use: Single Rotary Knob to Select the Test
- ▶ Portable, Long Battery Life (50 Hours)
- ▶ Best Price-Performance Ratio

Included with the 620 CableMeter

- ▶ A Carrying Case
- ▶ One UTP Category 5 Patch Cable, RJ45-RJ45 Straight Through, 4 Ft. in Length (EIA/TIA 4 Pair Cat 5)
- ▶ One RJ45F-RJ45F In-Line Coupler (Barrel Connector)
- ▶ One Cable Identifier for the Verification of the Wire Map and the Cable Routing (Cable Identifier #1)
- ▶ A Quick Reference Card (Explains Display Symbols and Menu Selections)
- ▶ An Operator Manual
- ▶ A Warranty Card (Registration Card)

Physical Characteristics. Dimensions: 7.25" x 3.875" x 1.8" (18.4 cm x 9.8 cm x 4.6 cm). **Weight:** 12.5 oz. (354 g). **Batteries:** 1.5 V Alkaline Size AA.

650 LAN CableMeter

— NEW —

Have you been looking for a better way to troubleshoot LAN cable? The grab Fluke's compact, new 650 CableMeter. This easy-to-use handheld tool takes you directly to the source of network cabling problems so you can pinpoint and repair problems fast. In seconds, you can perform a simple pass/fail test to verify cable performance, or identify a particular cable as the culprit. The high-performance 650 is indispensable for anyone responsible for cable installation or on-going maintenance of a network. It tests standard or custom unshielded twisted pair (UTP) and coaxial wiring in both Ethernet and 4 Mbps Token-Ring LANs. Fluke's 650 CableMeter is as easy to learn as it is to use. All functions are selected with a rotary knob on the clean, simple face. With a twist of the knob you can test for faults, with another twist you can do wire mapping. You can also monitor Ethernet traffic and noise over time to locate intermittent problems. Don't let the 650's size and uncomplicated design fool you. This is one powerful instrument. It provides very specific diagnostic information, together with detailed cable performance analysis and certification of standard or custom cable types. It also features a replaceable battery so recharging doesn't keep you waiting. Feature for feature, you won't find a better way to locate network cabling problems than with Fluke's new 650 CableMeter.

Specifications. Measurements. Length, wire map, attenuation, near-end crosstalk (NEXT), characteristic and termination impedance, noise and Ethernet traffic. **Autotest.** Automatically sequences through a series of cable measurements, compares results to industry cable standards, displays a Pass/Fail message along with audible tone and summarizes key cable parameters. Up to 50 autotest measurements can be saved in non-volatile memory and printed via the serial printer port. **UTP Measurements:** Wire map, length, background noise, near-end crosstalk, attenuation, characteristic impedance and impedance anomalies. **Coaxial Measurements:** Length, background noise, characteristic impedance, termination resistance and impedance anomalies. **Length.** A built-in TDR is used to make this measurement. **Range:** 20 ft. to 2000 ft. or 6 m to 600 m for UTP Cable; 20 ft. to 4000 ft. or 6 m to 1200 m for Coaxial Cable. **Accuracy:** $\pm 1\% + 0.6$ m (2 ft.). **Resolution:** 1 m or 1 ft. **Display Units:** Meters or feet. **Wire Map.** Detects correct and faulty pair wiring in Ethernet or Token-Ring cables with RJ-45 connectors. Indicates the following faults: opens, shorts, reversed pairs, and crossed pairs. **Near-End Crosstalk (NEXT).** Measures crosstalk between cable pairs in unshielded twisted pair cables. Near-end crosstalk of less than 20 dB is used to warn user of a possible split pair. **Range:** 0 dB to 40 dB, 5 MHz to 10 MHz in 100 kHz steps. **Accuracy:** ± 2 dB. **Attenuation.** Measures attenuation of unshielded twisted pair cables. **Range:** 0 dB to 40 dB, 5 MHz to 10 MHz in 100 kHz steps. **Accuracy:** ± 2 dB.

610 LAN CableMapper

- ▶ The One-Button Answer to Wire Mapping
- ▶ 610 CableMapper Determines UTP Termination Faults Per LAN Cabling Standard EIA/TIA 568 for Ethernet and Token Ring LANs
- ▶ Measures Near-End Crosstalk (NEXT) for Split Pair Identification
- ▶ Lightweight, Handheld Design for Portability
- ▶ Fault Codes and Cable Identifier Number Indicated Directly on Front Panel
- ▶ Bright LEDs Signify Pass (Green) or Fail (Red) for Each Pair
- ▶ Handy Carrying Case Organizes 610, Cable Identifiers and Manual
- ▶ Protective Holster

The Fluke 610 LAN CableMapper is a low cost solution to LAN cable testing. It will find the most common problems such as opens, shorts, reverses, crossed pairs, and split pairs. The Cable Identifiers have a unique ID number which is displayed on the 610. This enables the 610 to distinguish one cable run from another. The 610 comes with Cable Identifier number 1. Optional Cable Identifiers are numbered 2-8 allowing the user to easily test and identify multiple cables.

Specifications. Cable Length: 0 to 122m (0 to 400 ft.). Identifies opens, shorts, reversed pairs or crossed pairs, and other miswires. Split pair detection. Pairs are checked at 10 MHz and reported if Crosstalk exceeds 21 db ± 3 dB. **Input Connector:** RJ-45. **Input Protection:** Inputs withstand telco ringing and loop voltages. Display alarms on overvoltage faults.

11=Fit will be loose.

ScopeMeter® Series II

— NEW —

Model 99

Model 96

Model 92

Model 91

When the Fluke ScopeMeter® test tool was first introduced in 1991, it revolutionized field troubleshooting. For the first time it gave technicians a powerful oscilloscope, a full-featured digital multimeter, and a frequency counter all in one portable, handheld digital instrument. Now the Fluke ScopeMeter Series® II takes that breakthrough to the next level. Along with a 50 MHz scope bandwidth and 3 1/2 digit true RMS meter, Series II gives you direct access to 30 measurement functions you perform every day. To start the measurement you simply select a single menu item. ScopeMeter® Series II automatically configures itself for the best operating mode and continues to adjust itself as the input changes. It makes routine setups a snap and complex tasks just as easy. You can also adjust the controls manually. Whether you're troubleshooting electronics, machine control, electrical, telecommunications, or computer circuits, ScopeMeter® Series II makes it easy to get the right answers. **Size:** 60 x 130 x 260 mm (2.4 x 5.1 x 10.2"); with holster — 65 x 140 x 275 mm (2.5 x 5.5 x 10.8"). **Weight:** 1.5 kg (3.3 lbs.); with holster — 1.8 kg (4.0 lbs.). **Safety:** Designed to CAT III per IEC 1010 and UL 1244 approved for 600 V measurements on industrial power systems. **Standard Equipment:** ScopeMeter Series II is supplied with NiCad battery pack, AC mains adapter/battery charger, safety designed probe set, multimeter test leads and accessories, and yellow protective holster. Three-year warranty.

	Fluke 99	Fluke 96	Fluke 92	Fluke 91
Bandwidth	50 MHz Dual Input			50 MHz Single Input
Sample Rate	25 Megasamples/sec.			
Measure Menu	Direct access to 33 measurements. The best operating mode is automatically selected.		Direct access to 18 measurements. The best operating mode is automatically selected.	
Continuous Autoset	Hands-free signal probing. Tracks input signal changes and quickly selects the proper ranges and trigger.			
On Line Information	Instant on line information about functions and operation.			
Meter Min. Max. TrendPlot	Monitor any meter reading automatically with simultaneous graphs of the MIN., MAX., and AVG. values from 15 sec./div. (120 sec.) to 8 days/div. (40 days). Automatic vertical scaling and time compression.			
Scope Min. Max. Envelope Mode	Monitor waveforms from both inputs and record the MIN. and MAX. excursions with a grayscale envelope.			
Multimeter Display	3½ digits (>3000 Counts). With a full screen width automatic scope waveform.			
True RMS Volts	AC or AC+DC up to 600 V (1700 V Pk-Pk)			
Diode Test	Up to 2.8 V			
Continuity Beeper	Yes			
Time/Division	10 ns/div. to 60 sec./div.			
Volts/Division	* 1 mV/div. to 100 V/div.			
Digital Trigger Delay	By number of cycles, event, time or zoom mode			
Special Multimeter Modes	Relative (zero), % Scale, Smoothing*, Change Alert*, dBm, dBV, dBQ, Audio or RF Watts, Hz, Pulse Width, Duty Cycle, RPM; Measure amps, C or F with optional probes			
Scope Input Scaling	Measure amps with optional current probes			
Glitch Capture	≥40 ns			
Scope Waveform Processing	Analog-like grey-scale display and waveform averaging			
Display	240 × 240 pixels, electroluminescent backlit LCD			
RS232 Interface via Optional Adapter/Cable, 600 V Isolation	Transfer Setups, Waveforms, and Screens* or Directly Print	Directly Print or Capture Screens*	Capture Screen*	
Screen Memories	10	5		
Waveform Memories	20	10		
Set-Up Memories	40	20		
Oscilloscope Cursor Readings	15 Measurements, Display 5 Simultaneously			
Waveform Mathematics	Add, Subtract, Multiply, Invert, Filter or Integrate			
Signal Generator Output	Sinewave or Squarewave			
Component Tester Output	Voltage or Current Ramp

100 MHz ScopeMeter® 105

— NEW —

- ▶ Integrated 100 MHz Full Function Digital Storage Oscilloscope and 3 1/2 Digit True RMS Multimeter
- ▶ Rugged, Portable, Battery Powered Instrument
- ▶ Measure Menu For Quick Setup
- ▶ Continuous Autoset™ For Hands Free Signal Probing
- ▶ Large Memory For 40 Front Panel Setups, 20 Waveforms and 10 Screens
- ▶ Min./Max. TrendPlot™ With Time Stamp For Long Term Recording
- ▶ Optical-To-RS232 Interface Port, 600 V Isolation
- ▶ Safety Designed For Use On 600 V Three Phase Power Distribution Circuits; Rated To IEC 1010 CAT III And UL 1244 Listed
- ▶ Includes PM9080 Optically Isolated 125-232

The Fluke ScopeMeter® Series II, with 100 MHz bandwidth, is a fully integrated digital storage oscilloscope and digital multimeter in a rugged, battery powered splash proof case. This new test tool is easy to use with quick setups and hands free operation.

730-0105, Model 105.....EACH 2595.00

80i-110s AC/DC Current Probe

The 80i-110s accurately reproduces current waveforms as they occur. Connect the clamp to a Fluke ScopeMeter® Test Tool or other waveform recording device like a Fluke CombiScope® or Power Harmonics Analyzer, to clearly see distorted waveforms that result from non-linear loads such as computers, adjustable speed motor drive, and electronic ballasts for fluorescent lighting.

Electrical Specifications. Current Ranges: 0 to 10 A DC or AC Peak; 0 to 100 A DC or AC Peak. **Output Signals:** 10 A Range — 100 mV/A; 100 A Range — 10mV/A. **Working Voltage (Clamp Jaws To Ground):** 600 V AC RMS On Installation Category II per IEC 1010-1 Circuits; 300 V AC RMS On Installation Category III per IEC 1010-1 Circuits. **Floating Voltage (Output Cable and Connector To Ground):** 600 V AC RMS On Installation Category II per IEC 1010 1 Circuits; 300 V AC RMS On Installation Category III per IEC 1010-1 Circuits.

Basic Accuracy (DC to 1 kHz)

Input Current DC Or AC Peak	Error (After Zero Check)	
	100 mV/A	10 mV/A
50 mA to 10 A	<3% of reading +50 mA	—
50 mA to 40 A		<4% of reading +50 mA
40 to 80 A		<12% of reading +50 mA
80 to 100 A		<15% of reading

80i-500s and 80i-1000s — NEW — Clamp-On AC Current Probes

Precision Designed to Increase AC Current Accuracy in Oscilloscopes and Power Meters

- ▶ AC Current Ranges: 80i-500s — 1 to 500 A AC RMS; 80i-1000s — 100 mA to 1000 A RMS Continuous
- ▶ Best Accuracy 2% Of Reading
- ▶ Usable Frequency Range (With Current Derating): 80i-500s — 5 Hz to 10 kHz; 80i-1000s — 5 Hz to 100 kHz
- ▶ Built-In Low Pass Filter (Eliminates High Frequency Noise)
- ▶ Minimal Amplitude And Phase Distortion
- ▶ Built-In Safety Features: 600 V RMS Rating At Input Jaws Output Cable and BNC Connector

Specifications

Function	80i-500s	80i-1000s
AC Current Ranges	1 A to 500 A AC RMS (to 700 A RMS for max. of 10 minutes)	0.1 A to 1000 A, continuous (2000 A instantaneous peak)
Accuracy	100 A to 500 A, ±2% of reading; 20 A to 100 A, ±5% of reading; 1 A to 20 A, ±5% of reading +0.3 A	0.5 A to 1000 A, 2% of reading; 0.1 A to 10 A, 3% of reading ±100 mA
Usable Frequency Range (With Current Derating)	5 Hz to 10 kHz	5 Hz to 100 kHz
Working Voltage	600 V AC RMS clamp jaws to ground	600 V AC RMS clamp jaws to ground
Common Mode Voltage	600 V AC RMS at output cable and connector to ground	600 V DC or AC RMS at output cable and connector to ground
Maximum Conductor Diameter	1.18" (30 mm) (2 x 500 MCM THHN)	2.13" (54 mm) (2 x 500 MCM THHN)
Output Cable	63" (1.6 m) BNC termination; Cable and BNC rated to 600 V AC RMS for enhanced safety	63" (1.6 m) BNC termination; Cable and BNC rated to 600 V AC RMS for enhanced safety

Accurate current measurements are critical to resolving power quality problems in commercial and industrial power distribution systems. Fluke now offers two clamp-on AC current probes that boost the performance of any oscilloscope or voltage input device capable of millivolt measurements. When connected to an oscilloscope or other waveform recording tool, the 80i-1000s and new 80i-500s eliminate distortion and accurately reproduce current waveforms as they occur. Clearly see distorted waveforms that result from non-linear loads. Other current clamps, not designed for oscilloscopes, may add their own distortion over and above the actual distortion present in your power distribution system.

80 Series Analog/Digital Multimeters

Model 83

Model 85

Model 87

High Performance Meters with 11 Functions and 40 Ranges for a Wide Variety of Electronic and Industrial Applications

- ▶ MIN MAX AVERAGE Recording Mode with Min Max Alert™
- ▶ Frequency, Duty Cycle and Capacitance Measurements
- ▶ 1000 V Input Protection; Input Alert™ Detects Wrong Input Jack Connections
- ▶ 3 1/2 Digit, 4000 Count Display Updates 4 Times Per Second, Analog Display Updates 40 Times Per Second
- ▶ 4 1/2 Digit Mode, 1 ms Peak Hold, Back Lit Display and True RMS Measurements (87 Only)
- ▶ Touch Hold™ and Relative Modes
- ▶ Splash Proof and Dust Proof Case; EMI Shielded
- ▶ Protective Holster with Flex-Stand™
- ▶ Safety-Designed Test Lead Set

The Fluke 80 Series (83, 85, and 87) is a family of versatile analog/digital multimeters with an impressive range of capabilities, including frequency, duty cycle and capacitance measurement. Designed for electronic as well as industrial applications, the 80 Series features durable construction and several unique safety features.

MIN MAX AVERAGE Recording Mode With Min Max Alert™

Stores the highest, lowest, and average of all readings, allowing you to monitor a signal for seconds or days. Selectable response times allow you to specify the time interval to sense changes. Min Max Alert gives an audible tone for readings above or below previous minimums or maximums.

Touch Hold™ and Relative Modes

Touch Hold captures the measurement, beeps and locks it on the digital display until you're ready to view it. It automatically updates with each new measurement. The Relative Mode remembers a reading and shows the change (difference) between it and any readings that follow.

Frequency, Duty Cycle and Capacitance Measurements

Fluke 80 Series meters have a counter for frequency measurements from 0.5 Hz to 200 kHz, and duty cycle measurements from 0.1% to 99.9% of cycle. All three meters measure capacitance from 10 pF to 5 µF. Larger value capacitors may be measured using the analog display in the resistance mode.

Input Alert and Overload Protection

Input Alert™ provides an audible warning if the input jack connections are not correct for the measurement selected. This reduces the risk of damage to the equipment being tested and to the meter. Fluke 80 Series meters also provide 1,000 volt input protection in both ohms and diode test.

Fast 3 1/4-digit, 4000 Count Digital Display, High Resolution Analog Display

Digital display updates 4 times/second. For changing or unstable signals, the 87 features a high-resolution analog pointer; the 83 and 85 use an analog bargraph. The 83 and 85 also feature Zoom Mode for higher resolution analog readings. Analog displays update 40 times per second.

4 1/2 Digit Mode, 1 ms Peak Hold, True RMS, Back-Lit Display (87 Only)

The Fluke 87 is a true-rms meter, and offers a 4 1/2 digit, 19,999 count high resolution mode, plus 1 ms Peak Min Max hold. The back lit display assures readability in poorly lit settings. Light shuts off automatically after 68 seconds, prolonging battery life.

Specifications. Rugged, Sealed Construction. Splash proof and dust proof case and a specially designed protective holster protect the meter even under harsh operating conditions. All units are sealed and EMI shielded. **Standard Equipment.** Every meter comes packaged with a yellow protective holster complete with Flex-Stand™ safety-designed test leads, 9 V battery (installed), manual and operator guide. **Options/Accessories.** A dark grey holster with Flex-Stand™ is available. The full line of Fluke measurement accessories is compatible with the 80 Series. **Battery Life:** 500 hours typical (alkaline). **Three Year Warranty:** One year calibration interval. **Size:** 1.25"H x 3.41"W x 7.35"L (32 mmH x 87 mmW x 187 mmL). **Weight:** 12.5 oz. (0.36 kg).

4 1/2 Digit Handheld DMMS

- ▶ True-RMS AC Voltage and Current Measurement
- ▶ Audible/Visual Continuity Tests
- ▶ Relative Reference (Offset)
- ▶ Low-Power Ohms on all Resistance Ranges

- ▶ Constant-Current Diode Test Mode
- ▶ Measures Resistance to 300 M
- ▶ Model 8060A — Frequency and dB Measurements*
- ▶ UL 1244 Listed

Model 8060A. The 8060A 4 1/2 digit handheld DMM offers more measurement capabilities than most bench or portable models. This microcomputer-based unit provides unique features never before available in a small low-cost DMM, features like: dB and Frequency. Accuracy measurement of the dB gain or loss of amplifiers, filters, or attenuators in a direct dB readout. Rel dB measurement when used with the relative function. Precision frequency measurement. **Relative Reference.** The microcomputer allows user to automatically subtract lead resistance when measuring ohms, and this displays only the difference between a stored reference value and a measured value — even if rate was changed between reading. Works in all functions and ranges. Ideal for use in dB and frequency measurements. **Automatic MΩ Range Selection.** Front panel offers one manually-selectable position above 200 KΩ. In that position, the appropriate range — 2 MΩ, 20 MΩ, or 300 MΩ — is automatically selected. **True-RMS AC.** Provides accurate true-RMS AC measurements on non-sinusoidal waveforms and sine waves. **Special Annunciators.** Annunciator symbols appear in the display to remind user which measurement function has been selected. These symbols indicate relative, continuity/diode, dB, and frequency functions as well as low battery and overload conditions. In addition to these features, the 8060A is designed with overload protection and a rugged case with safety-engineered components for excellent precision performance. **Basic DC Accuracy:** 0.04% rdg + 2 digit. **Dimensions:** 1.8 x 3.4 x 7.1" (45 x 86 x 180 mm). **Weight:** 0.90 lbs. (0.41 kg). Comes with Y8132 test leads, 9V battery, spare fuse, and operator's manual. One year warranty with guaranteed calibration.

730-8060. Model 8060A EACH 459.00

Model 8062A. The 8062A 4 1/2 digit handheld DMM offers more measurement capabilities than most bench or portable models. This microcomputer-based unit provides unique features never before available in a small low-cost DMM, features like: Relative Reference. The microcomputer allows user to automatically subtract lead resistance when measuring ohms and then displays only the difference between a stored reference value and a measured value — even if rate was changed between reading. Works in all functions and ranges. Ideal for use in dB and frequency measurements. **Automatic MΩ Range Selection.** Front panel offers one manually-selectable position above 200 K. In that position, the appropriate range — 2 MΩ, 20 MΩ, or 300 MΩ — is automatically selected. **True-RMS AC.** Provides accurate true-RMS AC measurements on non-sinusoidal waveforms and sine waves. **Special Annunciators.** Annunciator symbols appear in the display to remind user which measurement function has been selected. These symbols indicate relative and continuity/diode functions, as well as low battery and overload conditions. In addition to these features, the 8062A is designed with overload protection and a rugged case with safety-engineered components for excellent precision performance. **Basic DC Accuracy:** 0.05% rdg + 2 digits. **Dimensions:** 1.8 x 3.4 x 7.1" (45 x 86 x 180 mm). **Weight:** 0.90 lbs. (0.41 kg). Comes with Y8132 test leads, 9V battery, spare fuse and operator's manual. 1-yr. warranty and guaranteed calibration.

25/27 Analog/Digital Multimeters

- ▶ Survives 6 kV Transients on 660V Major AC Feeders
- ▶ High Performance
- ▶ Superior Shielding Against EMI

- ▶ Operates from -15° to +55°C, 95% Relative Humidity
- ▶ UL 1244 Listed

The Fluke 25 and 27 3 1/2 digit handheld multimeters combine precision digital and analog measurement capabilities with ruggedness and durability. O-ring sealed case withstands water, contaminants, and chemicals under the harshest conditions. A separate sealed battery/fuse door allows access without interrupting the primary case seal. **Other Features Include:** 3200-Count Digital Display; Better accuracy and resolution than a conventional 3 1/2 digit DMM. The high contrast LCD with wide viewing angle updates twice every second. **31-Segment Analog Bar Graph:** Makes measurements such as peaking, nulling, zero adjustments, and capacitor checking. Updates ten times faster than digital readout. **Touch Hold™.** Allows automatic measurements while watching probes and circuit. Meter captures the measurement, beeps, and locks it in display until user is ready to view it. Will automatically update each new measurement. **Min-Max and Resistive Modes (Model 27 only):** Min-Max stores the highest and lowest digital readings to allow user to monitor a signal for a few seconds or days. Relative remembers a reading and displays the difference between it and any following readings. **Autorange™:** Instantly selects the proper range. Optional manual ranging included. **Audible Continuity/Diode Test:** Quickly check wiring, diode, and transistor without looking at display. Low frequency (1500Hz) beeper. **Safety-Designed:** Overload protection, high-energy fuses, fused 10 A range, non-metallic case and bail. All voltage inputs meet the power line surge tests for major feeders as defined in IEEE-587-1980, Category B. Offered in a choice of dark charcoal grey or safety yellow. Operates on a standard 9 V battery which yields a life of over 1000 hours. Meets military stock, vibration, and water-resistance requirements. Each meter includes a pair of safety-designed TL70 right-angle test leads, 2 insulated alligator clips, spare fuse, 9 V battery, and operator's manual. **Optional Accessories.** Type C20 heavy-duty hard plastic case features a carrying handle, operating guide decal, and test lead storage. Type C25 padded soft case has 2 storage pockets and a water-resistant zipper. **Specifications. Basic Accuracy (% of reading + number of digits):** DCV — 0.1% + 1; ACV — 0.5% + 3; OHMS — 0.2% + 1; DC Current — 0.75% + 2%; AC Current — 1.5% + 2. **AC/DC Volt:** 100 µV to 1000 V. **AC Response:** 30 kHz. **AC/DC Current:** 0.1 µA. **Resistance:** 0.1 to 32 M, up to 10,000 M with conductance. **Dimensions:** 2 x 3.75 x 8" (56 x 95 x 203 mm). **Weight:** 1.6 lbs. (0.75 kg). Two-year warranty; one-year calibration.

Models 30 and 32 Clamp Meters

- True-RMS Measurement for Accurate Readings of Non-Linear Loads (Model 32)
- Average AC Responding Measurements (Model 30)
- Measures up to 400 A AC, 600 V AC, 200 Ω
- Meets UL, CSA and TÜV Certification Standards (Pending for Model 32) and Conforms to the IEC 1010 Safety Standard
- Rugged Enough to Take a Drop from a Six-Foot Ladder
- Display Hold Captures Readings in Difficult to Reach Areas for Later Viewing
- Easy-to-Read 3 1/2 Digit 2000 Count Digital Display
- Manual Ranging for Repetitive Measurements
- Continuity Beeper
- Protective Soft Carrying Case and Fluke Hard Point™ TL 75 Test Leads Included

The Fluke Models 30 and 32 Clamp Meters are rugged, self contained, general purpose clamp meters that measure up to your tough standards at a basic price. Use the Models 30 and 32 to measure AC current, AC volts, ohms, and continuity for troubleshooting commercial and residential electrical and HVAC systems. You can view the results instantly on the easy-to-read digital display.

80T-IR Infrared Temperature Probe

- Fast Non-Contact Temperature Measurements
- Ideal When Object to Measure is Moving, Hard to Reach, Hazardous to Touch, Or Easily Contaminated
- 0 to 500°F (–18 to 260°C) Measurement Range
- Internal Selection Switch for °F or °C
- 1 mV dc per °F or °C Output, Compatible With the Most Popular DMMs

Specifications. Temperature Range: 0 to 500°F (–18 to 260°C). Accuracy: $\pm 3\%$ of reading or $\pm 5^\circ\text{F}$ ($\pm 3^\circ\text{C}$), whichever is greater, at 64° to 82°F (18° to 28°C) ambient operating temperature. Temperature Coefficient: 0.2% of 82°F (28°C) or below 64°F (18°C). Response Time: 1 second. Repeatability: 1% of reading. Emissivity: Fixed at 95%. Analog Output: 1 mV per degree F or C (switchable). Operating Temperature: 32°F to 150°F (0°C to 260°C). Optical Resolution: 4:1 distance to target ratio. Size: 1.5" (38mm) W x 7" (178 mm) L. Weight: 10 oz. (286 g). DMM Compatibility: Any DMM with 10 M Ω input impedance, accepting .160" (4 mm) diameter safety-shrouded test leads.

50 Series Thermometers

FLUKE 51 Single Point Thermometer

Offers high accuracy. 0.1°C resolution, high repeatability, and low thermal "lurch." Features include digital noise filter, automatic 2-second diagnostic self-test, Fahrenheit/Celsius conversion, and display freeze function. All functions are pushbutton activated. Operates on a standard 9 V battery (included) — 1200 hours of life. Accepts any K-Type or J-Type thermocouple with a standard mini-connector plug. **Accuracy:** K-Type — $\pm(0.1\% \text{ rdg.} + 0.7^\circ\text{C or } 1.3^\circ\text{F})$; J-Type — $\pm(0.1\% \text{ rdg.} + 0.8^\circ\text{C or } 1.4^\circ\text{F})$. **Reading Rate:** 1 second. Comes with a Type 80PK-1 bead probe.

730-0051. Model 51.....EACH 149.00

FLUKE 52 Dual Point Thermometer

Offers the same great performance and features as the Model 51 plus dual-point or differential measurements, scanning and Min./Max. storage capabilities, and selectable high or low resolution readouts. **Accuracy:** K-Type — $\pm(0.1\% \text{ T1-T2 rdg.} + 1.0^\circ\text{C or } 1.8^\circ\text{F})$; J-Type — $\pm(0.1\% \text{ T1-T2 rdg.} + 1.2^\circ\text{C or } 2.2^\circ\text{F})$. **Max. DCMV:** 1 V. **Reading Rate:** 2 thermocouples — 1.7 seconds. Comes with 2 Type 80PK-1 bead probes.

730-0052. Model 52.....EACH 199.00

Temperature Probes

80PK-1 Bead Probe. For general purpose applications, Teflon tape insulation. Not to be used for liquid immersion. **Measurement Range:** $-40^\circ\text{ to } +260^\circ\text{C}$ ($-40^\circ\text{ to } +500^\circ\text{F}$).

730-8001. Type 80PK-1.....EACH 12.00

80PK-2A Immersion Probe. For use with liquids and gels. Inconel sheath protection from tip to handle. Can be used in most general temperature measurement applications. **Measurement Range:** $0^\circ\text{ to } 927^\circ\text{C}$ ($32^\circ\text{ to } 1700^\circ\text{F}$).

730-8002. Type 80PK-2A.....EACH 46.00

80PK-3A Surface Probe. For flat or slightly convex surfaces. Ideal for use with hot rollers and plates. **Measurement Range:** $20^\circ\text{ to } 260^\circ\text{C}$ ($68^\circ\text{ to } 500^\circ\text{F}$).

730-8003. Type 80PK-3A.....EACH 85.00

80PK-4A Air Probe. For air and gases. Measuring bead is protected by perforated stainless steel baffle. Not for immersion in liquid. **Restrictions:** The 304 stainless steel baffle cannot be exposed to halides or sulfides. **Measurement Range:** $-196^\circ\text{C to } 816^\circ\text{C}$ ($-320^\circ\text{F to } 1500^\circ\text{F}$). **Maximum Temperature:** Cable — 105°C (220°F); Handle — 125°C (257°F).

730-8004. Type 80PK-4A.....EACH 64.00

80PK-5A Stainless Steel Piercing Probe. FDA Approved. Similar to 80PK-2A.

730-8005. Type 80PK-5A.....EACH 58.00

80PK-6A Exposed Probe. Exposed bead attached to 6-inch sheath, designed for general purpose, air, and gas measurements. **Restrictions:** The 304 stainless steel shaft cannot be exposed to halides or sulfides, or reducing to atmospheres or a vacuum. **Measurement Range:** $-196^\circ\text{C to } 816^\circ\text{C}$ ($-320^\circ\text{F to } 1500^\circ\text{F}$). **Maximum Temperature:** Cable — 105°C (220°F); Handle — 125°C (257°F).

730-8006. Type 80PK-6A.....EACH 65.00

80PK-7 Industrial Surface Probe. Performs surface measurements in rugged environments over a wide temperature range. **Measurement Range:** $-196^\circ\text{C to } 600^\circ\text{C}$ ($-320^\circ\text{F to } 1112^\circ\text{F}$). Made of 303 stainless steel, with a state-of-the-art ribbon sensor for extra durability. **Maximum Temperature:** Cable — 105°C (220°F); Handle — 125°C (275°F).

730-8017. Type 80PK-7.....EACH 189.00

80PK-8 Pipe Clamp Temperature Probe. Produces fast and accurate temperature and super heat measurements of pipe surfaces from $1/4"$ (6.4mm) to $1 1/8"$ (34.9mm) diameter. **Measurement Range:** $-29^\circ\text{C to } 149^\circ\text{C}$ ($-20^\circ\text{F to } 300^\circ\text{F}$). **Basic Accuracy:** $\pm 1.9^\circ\text{C}$ ($\pm 3.4^\circ\text{F}$). **Maximum Temperature:** Cable — 105°C (220°F); Handle — 149°C (300°F).

730-8018. Type 80PK-8.....EACH 99.00

80T-150U Universal Temperature Probe. Highly accurate P-N junction probe converts any DMM into a thermometer. For air, surface, and non-corrosive liquid measurement applications. **Isolation:** 350 VDC or peak AC. **Basic Accuracy:** $\pm 1^\circ\text{C}$ (1.8°F), $0^\circ\text{ to } 100^\circ\text{C}$. **Range:** $-50^\circ\text{ to } +150^\circ\text{C}$ ($-58^\circ\text{ to } +320^\circ\text{F}$).

730-8015. Type 80T-150U.....EACH 120.00

80TK Thermocouple Module. Use with a standard banana plug to convert any 10 M DMM into a thermometer. Uses K-type thermocouple with miniconnectors. Switch-selectable $^\circ\text{C}$, $^\circ\text{F}$, use with interchangeable probes described below (Type 80PK-1 Bead Probe included with this module). **Basic Accuracy:** $\pm 0.5\% + 2^\circ\text{C}$ (3.6°F)

730-8079. Type 80TK.....EACH 69.00

Non-Contact Infrared Temperature Probe

Instantly measures temperature from $-18^\circ\text{C to } 260^\circ\text{C}$ ($0^\circ\text{ to } 500^\circ\text{F}$) without contact. Ideal for maintenance applications where object to be measured is hazardous to touch, is moving, easily contaminated, or difficult to reach. Highly repeatable readings. Senses and converts infrared energy emitted from an object into a signal readable on a DMM or Digital Thermometer display. Results displayed in $^\circ\text{C}$ or $^\circ\text{F}$, 1 mV dc per $^\circ\text{C}$ or $^\circ\text{F}$ output. Automatic shut-off after 10 minutes of operation saves battery life. **Specifications.** **Temperature Range:** $-18^\circ\text{C to } 260^\circ\text{C}$ ($0^\circ\text{F to } 500^\circ\text{F}$). **Accuracy:** $\pm 3\%$ of reading or $\pm 3^\circ\text{C}$ ($\pm 5^\circ\text{F}$), whichever is greater, $18^\circ\text{C to } 28^\circ\text{C}$ ($64^\circ\text{F to } 82^\circ\text{F}$) ambient operating temperature. **Temperature Coefficient:** 0.2% of reading or $\pm 0.2^\circ\text{C}$ ($\pm 0.3^\circ\text{F}$), whichever is greater, change in accuracy per degree change in ambient temperature above 28°C (82°F) or below 18°C (64°F). **Response Time:** 1 second. **Emissivity:** fixed at .95. **Output:** Type-K thermocouple mini-connector. **Operating Temperature:** $0^\circ\text{C to } 65^\circ\text{C}$ ($32^\circ\text{F to } 150^\circ\text{F}$). **Resolution:** 1°C or $^\circ\text{F}$. **Optical Resolution:** 4:1 distance to target ratio. **Power:** 9 V battery. **Size (L x W x H):** 180 mm x 30 mm x 50 mm (7.1" x 1.2" x 2"). **Weight:** 180 g (6.4 oz.). **Warranty:** 1 year. **Compatibility:** Any Type-K thermometer or other temperature measuring device that accepts Type K mini-connector inputs.

730-8019. Type 80PK-IR.....EACH 219.00

Current, Voltage Accessories

► One Year Warranty On All Accessories

A Y8100 Clamp-On AC/DC Current Probe

Battery-powered Hall-effect clamp-on probe with switch selectable 200 A or 20 A current range. Produces 2 V full range output. For conductors to 1.9 cm (0.75"). **Accuracy:** $\pm 2\%$ of range from DC to 200 Hz.

730-8100. Y8100.....EACH 319.00

B Y8101 AC Clamp-On Current Probe

Measures AC current from 1 A to 150 A. Division ratio is 1000 to 1. Clamps over conductors 1.1 cm (.43") in diameter. **Accuracy:** $\pm (2.5\% + 0.15 \text{ A})$ 48 Hz to 440 Hz, $\pm (3\% + 0.15 \text{ A})$ 440 Hz to 1200 Hz.

730-8101. Y8101.....EACH 79.00

C 80i-400 Clamp-On AC Current Probe

Measures AC current from 1 A to 400 A. 1000 to 1 division ratio. **Maximum Conductor Size:** One 30 mm (1.18") or two 25 mm (0.98"). **Accuracy:** $\pm (3\% + 0.4 \text{ A})$ from 48 Hz to 440 Hz, $\pm (4\% + 0.4 \text{ A})$ 440 Hz to 1000 Hz.

730-8400. 80i-400.....EACH 83.00

D 80i-410 AC/DC Clamp-On Current Probe

Battery-powered Hall-effect clamp-on probe measures AC or DC current from 5 A to 400 A. **Maximum Conductor Size:** One 30 mm (1.18") or two 25 mm (0.98"). Output is 1 mV per amp DC or AC. **Accuracy:** $\pm (5\% + 2.5 \text{ A})$, 5 A to 400 A, DC to 62 Hz. Useable to 400 Hz.

730-8410. 80i-410.....EACH 179.00

E 80i-600 Clamp-On AC Current Probe

Measures AC current from 1 A to 600 A. Division ratio is 1000 to 1. Clamps on conductors to 5 cm (2") in diameter. **Accuracy:** $\pm 2\%$, 50 Hz to 1 kHz, $\pm 3\%$ (typical) 30 Hz to 10 kHz.

730-8600. 80i-600.....EACH 119.00

F 80i-1010 AC/DC Clamp-On Current Probe

Battery-powered Hall-effect clamp-on probe measures AC current to 700 A, DC current to 1000 A. Thumbwheel ZERO control compensates for residual core magnetism, improving the accuracy of DC measurements down to 1 A. Output is 1 mV per amp DC or AC. **Accuracy:** $\pm (2\% + 1 \text{ A})$, 1 A to 100 A, DC to 62 Hz. Useable to 440 Hz.

730-1010. 80i-1010.....EACH 297.00

G 80J-10 Current Shunt

Allows measurement of AC or DC current with precision DMM (such as an 8050A or 8060A). Will pass 10 A continuously, 20 A for one minute. **Accuracy:** $\pm 0.25\%$ from DC to 10 kHz.

730-0810. 80J-10.....EACH 65.00

H 85RF High Frequency Probe

Converts 10 M Ω DMM into high frequency AC voltmeter. AC to DC conversion ratio is 1:1 over a range of 0.25 to 30 V rms. The probes DC output is calibrated to the rms value of a sinewave input. **Frequency Range:** 100 kHz to 500 MHz. **Accuracy:** $\pm 0.5 \text{ dB}$ above 0.5 V.

730-0085. 85RF.....EACH 99.00

H 83RF High Frequency Probe

Similar to 85RF, with frequency range from 100 kHz to 100 MHz. **Accuracy:** $\pm 1 \text{ dB}$ above 1 V.

730-0083. 83RF.....EACH 89.00

J 80K-40 High Voltage Probe

Measures up to 40 kV DC or 28 kV rms AC. Division ratio is 1000 to 1. Has 1000 M Ω input resistance. **DC Accuracy:** $\pm 1\%$ from 20 kV to 30 kV, changes linearly from 1% at 30 kV to 2% at 40 kV, and from 1% at 20 kV to 2% at 1 kV. **AC Accuracy:** $\pm 2.5\%$ at 60 Hz. **WARNING:** To avoid damage or electric shock, use under dry conditions within the following ratings: low energy applications such as CRT supplies, 40 kV DC or AC peak; other applications 40 kV DC or AC peak in circuits where transient overvoltages (micro second transients) are limited to 80 kV peak.

730-8040. 80K-40.....EACH 119.00

K 80K-6 High Voltage Probe

Division ratio is 1000 to 1. Extends measurement capabilities to 6000 V DC or peak AC. **Accuracy:** $\pm 1.0\%$ DC; $\pm 1\%$ to 500 Hz AC, $\pm 2\%$ 500 Hz to 1 kHz AC. **WARNING:** To avoid damage or electric shock, use under dry conditions within the following ratings: low energy applications such as CRT supplies, 6 kV DC or AC peak; other applications 6 kV DC or AC peak in circuits where transient overvoltages (micro second transients) are limited to 16 kV peak.

730-8016. 80K-6.....EACH 65.00

Model 45

- True-RMS for Voltage and Current
- Touch Hold®, Relative, Min/Max
- Compare Function (Hi/Low/Pass)
- dB Function (21 Ref. Impedances)
- Diode Test
- Multi-Function Dual Display
- RS-232 Interface for PC Instrument Applications (Uses DB-9)
- 1 μ V and 0.1 μ A Resolution

- Bright Vacuum Fluorescent Primary and Secondary Displays
- IEEE-488.2 Option Available for Remote Use and Control of Unit
- Autoranging
- Frequency Counter to 1 MHz
- Audio Power
- Continuity
- Data Recorded in Lotus 123 Format

Feature Rich 5-Digit 100,000 count DMM with unique multi-function dual display, allowing measurement of two signal parameters from a single test connection. The standard RS-232 interface allows measurement data to be filed, manipulated, printed or transmitted by modem. The print mode automatically formats measurement data for printing on an RS-232 printer. IEEE-488.2 option available factory installed or as kit for field installation. Does not require removal of RS-232. Calibration performed via either RS-232 or IEEE-488.2 without opening case. Provides digital read-out of decibels using front panel selection of any of twenty-one references from 2 ohms to 8000 ohms. For 2, 4, 8, and 16 ohms, the meter displays audio power in watts. Using front panel entry of upper and lower limits, unit shows both a Hi/Low/Pass evaluation and measured value. Touch Hold® captures the measurement, beeps, and locks it on the display until you are ready to use it. It automatically updates with each new stable measurement. Relative mode remembers a reading and shows the change (difference) between it and any readings that follow. Min/Max records the highest and lowest values measured. Either can be displayed at any time. Extended three year warranty option available. **Specifications. Display Counts At Full Range:** 2.5 readings/second (slow) 99,999; 5 readings/second (medium) 30,000; 20 readings/second (fast) 3,000. **Resolution:** DC volts — 1 μ V; AC volts — 1 μ V; Ohms — 1 mOhms; DC Amps — 100 nA; Frequency — 10 MHz.

Basic Accuracy (Given as $\pm\%$ of Reading + Number of Least Significant Digits): DC volts — .02% + 2; AC volts — .2% + 2; Ohms — .05% + 2; DC Amps — .05% + 10; Frequency — .05% + 1. One Year Warranty. **RS-232 Baud Rate:** 300, 600, 1200, 2400, 4800 and 9600; Odd, even or no parity; one stop bit, 8 data bits. **Size:** 3.67 in. $\times$ 8.50 $\times$ 11.27 in. **Weight:** 5.2 lb; with battery 7.0 lb. Includes operators manual, quick reference guide, line cord, test leads.

Interchangeable Test Lead Accessories

The best meter in the world is no good if you can't make a proper test connection.

This group of interchangeable test lead accessories allows you to match a wide variety of clips and probes to make the most dependable test connections possible for your application.

TL24 and TL22 Interchangeable Test Leads

- 385 internal strands and superior strain relief provide flexibility to prevent kinks and bends in test leads.
- Silicone-insulated; won't crack from cold or melt from accidental contact with soldering iron.
- Safety-designed with double insulation for added protection.
- All metal on banana plugs is capped and shrouded to prevent accidental contact.
- Compatible with all meters accepting safety-shrouded, standard-sized banana plugs.

Test Probes and Clips

- Made from a combination of high quality steel and Polyamid plastic bodies for exceptional durability.
- Safety grip clips keep your hand a safe distance from test connection and are easy to use even when wearing gloves.

Test Lead Kit

Y8134 Shrouded Test Lead Kit
Interchangeable tips: 2 alligator clips, 2 spade lugs, 1 retractable hook tip, and 2 standard pointed tips. Shrouded banana plugs, C75 carrying case. Y8132 Test Leads included.
730-8134EACH 36.00

Test Leads

TL22 Flexible Test Leads

Silicone-insulated test leads have superior flexibility and cold/heat resistance from -80°C to +150°C (-112°F to +302°F). Shrouded right-angle connectors on both ends. 63" (1.6m). 1000V, 10A maximum. One red, one black. Listed to UL Safety Standards UL 1244.
730-9022EACH 17.00

TL24 Flexible Test Leads — Straight
Same as TL22 except that one end has a shrouded, straight connector. One red and one black. Listed to UL Safety Standards UL 1244.
730-9024EACH 17.00

Clips

AC20 Industrial Test Clips

Safety-grip, spring-loaded alligator clips with a wide .750" (19 mm) jaw opening. 1000V, 10A maximum. One red, one black. Recommended for use with TL22 Test Leads. Listed to UL Safety Standards UL 1244.
730-9020EACH 22.00

AC80 Hook-Style Test Clips

Safety-grip, spring-loaded clips with hook grip. Hook size is .400" x .080" (10 mm x 2 mm). 1000V, 3A maximum. One red, one black. Recommended for use with TL22 Test Leads. Listed to UL Safety Standards UL 1244.
730-9080EACH 17.00

AC83 Pin-Grabber Test Clips

Safety-grip, spring-loaded pin-grabber hooks for use with test points in close contact areas. Flexible shaft is 4" (100 mm), grabber extends 375" (9.5 mm). 1000V, 1A maximum. One red, one black. Recommended for use with TL22 Test Leads. Listed to UL Safety Standards UL 1244.
730-9083EACH 22.00

AC89 New Insulation Piercing Clip

Clamp-type test probe has spring-loaded stainless steel tip for piercing insulated wires. Pierces insulated wires from 30 AWG (.25 mm) to 14 AWG (1.5 mm). 250V, 5A. A single probe per package. Recommended for use with TL24 Test Leads. For use only with shrouded test leads having standard diameter banana plugs.
730-9089EACH 22.00

AC85A Large Jaw Alligator Clips

Fully insulated banana-jack alligator clips. All new construction with stronger teeth. Large .750" (19 mm) opening. 600V, 10A maximum. One red, one black. Recommended for use with TL24 Test Leads. Listed to UL Safety Standards UL 1244.
730-9085EACH 11.00

AC70A Alligator Clips

Gold-plated beryllium copper spring contacts accept probe tips from .076" to .084" (1.93 mm to 2.13 mm). Standard jaw opening of .313" (8 mm). 1000V, 10A maximum. One red, one black.
730-0069EACH 7.35

AC75 Banana Jack-Alligator Clips

Insulated alligator clips with banana jacks. Standard .313" (8 mm) jaw opening. Compatible with test leads Y8131 through Y8134 and TL24. 1000V, 10A maximum. Two red, two black.
730-0750EACH 7.00

Test Probes

TP 20 Industrial Test Probes

Very sharp, extra-long .750" (19mm) stainless steel tip. For reaching deep test points or recessed components; will pierce insulation. 1000V, 10A maximum. One red, one black. Recommended for use with TL24 Test Leads. Listed to UL Safety Standards UL 1244.
730-9021EACH 8.00

TP80 Electronic Test Probe

Designed for electronic probing of high density components or boards. IC insulator cap prevents shorting of adjacent IC legs. Probe has tapered .160" (4mm) steel tip. 1000V, 10A maximum. One red, one black. Recommended for use with TL24 Test Leads.
730-9081EACH 13.00

Test Lead Sets

TL26 5-Way Multipoint Test Lead Set

Industry-standard for telecom and automotive applications. 5 ways to connect: 1) U-shaped nose for blade-shaped terminals; 2) Notched jaw for gripping screw heads, bare wire or terminals; 3) Serrated teeth for gripping threaded or wire-wrapped terminals; 4) Cluster of sharp needles for piercing small gauge (#22-#28 AWG) wires; 5) Large needle for penetrating larger gauge wires. 60" (1.5m), silicone-insulated, useable from -80°C to +150°C (-112°F to +302°F). 250V, 10A maximum. One red, one black.
730-9026EACH 35.00

TL28 2-Way Clip Test Lead Set

Solid, spring-loaded copper clips with a wide .50" (12.7mm) jaw opening and serrated teeth. Large piercing needle for penetrating larger gauge wires. 60" (1.5m), silicone-insulated, useable from -80°C to +150°C (-112°F to +302°F). 250V, 10A maximum. One red, one black.
730-9028EACH 25.00

TL20 Industrial Test Lead Set

Suggested for Electrical/HVAC applications. Set consists of silicone-insulated TL22 Test Leads (one red and one black), stainless-steel TP20 Industrial Test Probes (one red, one black), and AC20 Industrial Alligator Clips (one red, one black). 1000V, 10A maximum. Shrouded right-angle connectors. Listed to UL Safety Standards UL 1244.
730-0200EACH 42.00

TL75 Hard Point™ Test Lead Set
Comfort-grip probe with PVC-insulated leads. Super strong tips and new integral strain relief provide extended service life. Safety-shrouded, right-angled inputs. Not recommended for µV measurements. 48" (1.2 m). 1500 V, 10A. Replacement test leads for all Fluke DMMs except 8060A and 8062. Replaces TL70. Listed to UL Safety Standards UL 1244.
730-0701EACH 9.00

Safety Standards UL 1244.

Y8132 Detachable Probe Test Lead Set

Test leads have straight, shrouded banana plugs on both ends. Detachable probes with standard point tips. PVC-insulated, 48" (1.2m), 2000V, 10A maximum. One red, one black. Listed to UL Safety Standards UL 1244.
730-8132EACH 15.00

Y8140A Slim-Flex Test Lead Set
Slim, retractable, insulated needle-point test leads adjust to desired length by extending probe up to 2.5" (63.5mm). Needle points will pierce varnish and thin insulation. 48" (1.2m). Shrouded plugs, 1000V, 2A maximum. One red, one black. Factory Mutual Approved.
730-8140EACH 26.00

*Factory Mutual Approved †Heavy Industrial Rating, Overvoltage Category III (CAT III) per IEC 1010-1

Carrying Cases

C12 Soft Case
Soft Sided, zippered, vinyl carrying case for all Series 10 meters. Inside pockets are designed to carry a meter, manual, and test leads. Clear pocket fits international business cards. Convenient hanging loop.
739-0104EACH 12.00

C25 Ruggedized Soft Case
For Fluke 25 or 27 or other Fluke handheld meters including Fluke 21, 23, 29, 50 or 70 Series meters in C70 Holster, or 80 Series meters in C81 Holster. Also for use with PV350 and PV500. Water resistant zipper, two inside pockets for test leads or small accessories.
730-2500EACH 21.00

C90 Soft Case (not shown)
Similar to C25, but smaller and without accessory storage space or water resistant zipper. One internal pocket; will hold Fluke 21, 23, 29, 50 or 70 Series meters in a C70 holster. Not for Fluke 25, 27 or 80 Series.
730-0090EACH 16.00

C40 Soft Case
For Fluke 45. Test lead storage in removable upper pouch, shoulder strap.
739-0042EACH 52.50

C50 Compact Soft Case
Vinyl case with belt loop. For Fluke 21, 23, 29, 50 and 70 Series without holster. Holds meter, manual, and leads ready for testing. Use C25 when using meter with holster.
730-0050EACH 16.00

C75 Test Lead Case
Vinyl carrying case with two inside pockets. Designed to carry test leads, test probes or clips. Will not accommodate large probes or AC83 Test Clips. Size: 7.25" x 4.25" x 1.25" (190.5 mm x 108 mm x 31.8 mm).
730-0017EACH 6.00

C10 Holster
Yellow, snap-on holster for all Series 10 meters absorbs shocks and protects the meter from rough handling. Built-in stand and hanger-loop allows for positioning meter. Molded hanger-loop can also be used as a stationary probe holder, allowing one hand to hold, operate, and contact test points simultaneously.
739-0103EACH 12.00

C30 Replacement Holster
For Fluke 31 and 33 clamp-meters. Protects meter display, and has a convenient belt clip for hands free carrying. Rugged velcro closure makes it easy to access meter even when wearing gloves.

739-0110EACH 15.75

C70Y/G Series II Holster
For all 70 and 50 Series and 21, 23 and 29 meters. Choice of high-visibility yellow (C70Y) or grey (C70G). Easy-to-clean, vinyl, snap-on holster absorbs shocks and protects meter from rough handling. Unique Flex-Stand™ allows meter to hang, lean or stand for best viewing position. Belt hook and lead/probe storage on back. Replaces C70.
730-7000EACH 16.00

C81Y/C81G Holster
For 80 Series DMMs. Yellow version (C81Y) is included with multimeter. Grey version (C81G) is optional. Easy-to-clean, vinyl, snap-on holster absorbs shocks and protects meter from rough handling. Lead and probe storage on back; includes unique Flex-Stand™ so meter can hang, lean or stand in best viewing position.

730-0081.C81GEACH 16.00
730-0082.C81YEACH 16.00

C20 Hard Case
Heavy duty case for Fluke 25 and 27. Top cover snaps on back to serve as tilt stand. Carrying handle and storage compartment for test leads and small accessories are part of case.
730-0020EACH 30.00

C100 Universal Carrying Case
For any Fluke handheld DMM or Fluke 50 Series thermometers and most Fluke DMM accessories. Tough polypropylene case provides protection against rough handling and bad weather.
730-1000EACH 31.50

C800 Hard Storage Case (not shown)
Smaller than C100. Will hold 21, 23, 29, 70 Series and 80 Series in holsters. Double seal latches resist popping open if case is dropped. Includes compartments for holding accessories and manuals. Lid is detachable for easy storage.
730-0080EACH 28.00

Fluke 23 and Fluke 87 Service Kits
Both of these fully-equipped service kits include all the tools you need to take on just about any job. And they'll save you 10% off the total cost of the separate tools.
Each Kit Includes: Either the Fluke 23-2 or Fluke 87 digital multimeter. 80i-400 Clamp-on AC Current Probe, to measure current to 400 A. TL22 Flexible Test Leads (resistant to heat and cold). AC20 Industrial Test Clips (spring-loaded with extra wide jaw opening.) TP20 Industrial Test Probes (safety-designed, extra long to reach deep test points). Hard Shell DuraCase™ that holds meters in transit with right-angle test leads connected. Training and application booklets (87 Service Kit only) "Understanding Harmonics" video.
730-0060. Kit 23EACH 309.00
730-0087. Kit 87EACH 469.00
► Full one year warranty on all accessories.

860 Series Graphical Multimeters

Model 867

Model 865

Model 863

Introducing the 860 Series of Graphical™ Multimeters, a whole new category of innovative handheld instruments. The GMM™ test tool family gives you state-of-the-art multimeter capabilities coupled with the graphical power of wave form display, trend plotting, in-circuit component testing and logic activity. You choose the best format for your application. Four meter display modes show you the measured information in different forms — to help you pinpoint more problems faster with a single handheld tool. You won't have to learn how to use your new GMM instrument — you'll already know. It has the familiar, intuitive feel of a Fluke DMM. Just glance at the simple rotary knob, and you instantly see which function is selected. If you want to see the latest major advance in handheld instruments, you need to look at Fluke's new Graphical Multimeter.

Fluke 40 and 41 Power Meters

Models 40 and 41

- ▶ Measure Power and True-RMS Voltage and Current
- ▶ Waveform, Bar Graph and Numeric Views of all Measurements
- ▶ Rated to 600V; Meets IEC 1010-1 Safety Standards
- ▶ One-Button Measurements; No Menus
- ▶ Display Individual Harmonics up to the 31st
- ▶ Minimum, Maximum, and Average Recording
- ▶ Battery Operated
- ▶ Bright, Backlit Display

Models 41

- ▶ Storage of up to Eight Complete Measurement Sets of Single-Phase Voltage and Current
- ▶ Isolated Serial Interface for Communications with DOS- or Windows-Compatible Computers

The Model 40 Power Harmonics Meter and Model 41 Power Harmonics Analyzer combine the ease of use of a digital multimeter, the visual feedback of an oscilloscope, and the power of an harmonics analyzer in a single instrument that provides a comprehensive view of critical power system values: not only voltage, current, frequency and power, but also harmonics (to the 31st) and power-correction factors.

The Model 41 is ideal for further analyzing data and optimizing power system performance. Use the Model 41's FlukeView™ software to download acquired data to a printer or an MS-DOS® or Windows™ compatible computer for further processing.

Standard Equipment. Each instrument comes with an 80i-500s AC current probe, test leads, test probes, and test clips. The Model 41 also includes an isolated RS-232 cable and FlukeView™ software.

Specifications. Voltage (True-rms). Input Range: 0.0 to 600.V rms (ac + dc); 0.0V to ± 933V peak. **Basic Accuracy (Fundamental, 5 to 65 Hz):** rms: ± (0.3% + 2 digits); peak, dc: ± (2% + 3 digits). **Current, With 1mV/A Input (True-rms). Input Range:** 1.00 to 1000A rms (ac + dc); 1.0 to ± 2000A peak. **Basic Accuracy (Fundamental, 5 to 65 Hz):** rms: ± (0.3% + 3 digit)s + probe specs. **80i-500s Current Probe:** 1 to 20 A ac: ± (5% + 0.3)A; 20 to 100 A ac: ± 5%; 100 to 500 A ac: ± 2%. **Power (Watt and Volt-Amps) With 1mV/A Input. Range:** 0 to 600 kW (kVA) average. **Basic Accuracy (Fundamental, 5 to 65 Hz):** Average W (kVA) ± (1% + 4 digits) + probe specs. **Harmonics Accuracy (Cursor Data). Fundamental to 15th Harmonic:** ± (2% + 3 digits) ± probe specs for amps and watts; 16th to 31st Harmonic: ± (3% + 4 digits) ± probe specs for amps and watts. **General Specifications. Battery Type:** 4 alkaline "C" cells (supplied); **Battery Operating Time:** 24 hours minimum (continuous, without backlight). **Safety:** Designed for 600V measurements on industrial power distribution circuits. **Protection Levels:** IEC 1010-1, Pollution Degree 2, Installation; Category III, Material Group II, 600 V. **Protection Class:** Protection Class II as described in IEC 1010-1, Annex H. **Waveform Memory (Model 41 Only):** Eight nonvolatile memories each store waveform data for both voltage and current inputs for later recall or sending to a computer. **EIA-232-E (RS-232) Interface (Model 41 Only):** Optically isolated, 1.2, 9.6, or 19.2k baud rate. Printer output in either Epson® FX-80® or HP® Thinkjet® format. FlukeView Windows and DOS software provided.

Model 77

All Models

- Automatic Touch Hold®
- Diode Test
- Audible Continuity Beeper
- Autoranging with Manual Ranging
- TL75 Test Leads with Hard Points™

Sleep Mode

- 3 Year Warranty
- 79/77/75/73/70 for Measurements to 4800 V-A
- 29/23/21 for Higher Energy Measurements

The Fluke 70 Series multimeters were first introduced in 1983 with three models, 73, 75 and 77. The Series was later expanded with the addition of the Industrial Models, 21 and 23. This Series has become a Classic. We have improved on the existing models and added three models, the 70, 79/77. **Autoranging.** With autoranging, you choose the function you want and the meter automatically selects the range with the greatest accuracy and resolution. Symbols on the liquid crystal display remind you what is being measured and the range of measurement.

Model mA-2000 Clamp-On mA Current Meter

- Measures DC and AC Currents with 0.1 mA Resolution
- Simple Clamp-On Operation
- Frequency Range DC to 100 KHz
- Built in 3 1/2 Digit Display
- True RMS Measurement
- BNC Analog Output for Connection to Oscilloscope or Recorder
- Supplied with Optional AC Battery Eliminator and Hard Carrying Case

Measures AC and DC currents on two ranges; 0-200 mA and 0-2000 mA. **Resolution:** 0.1 mA on low range and 1 mA on high range. **Basic Accuracy:** 1%. **Aperture:** 0.21 inches.

3001 Digital Capacitance Meter

Direct, highly accurate 3 1/2-digit readout of capacitance from 1 pF to 199,900 pF. Unique dual threshold technique delivers 0.1% accuracy on seven of its nine ranges and eliminates errors due to dielectric absorption. Uses DC charging characteristics to

determine true capacitance, even in wires, switches and other components. Zero Calibrate knob allows nulling of spurious capacitance up to 100 pF. **Timebase:** 2 MHz crystal oscillator. **Accuracy:** $\pm 0.1\%$ of reading on seven lower ranges (up to 1999 pF), $\pm 0.5\%$ on upper ranges; $\pm 2\text{pF}$, ± 1 count, at 23°C ($\pm 5^\circ$). **Power Required:** 105-135 VAC, 57-63 Hz, 6 VA, max. **Size:** $3 \times 10 \times 7$ " ($7.6 \times 25.4 \times 17.8$ cm). **Weight:** 3.0 lbs (1.4 kg).

761-3001. Model 3001EACH 299.95

Logic Monitor

Self-contained, pocket-size unit simultaneously reads the logic state of every mode of any DTL, TTL, HTL, or CMOS DIP IC with up to 16 pins. Completely automatic — needs no set-up, calibration or adjustment. Automatically seeks IC's supply pins, drawing its power from them with power seeking gate network. Each clip contact connects to a single logic comparator with LED readout, activated when applied voltage exceeds a fixed threshold. Fast, accurate, reliable. Permits step-by-step or dynamic signal tracing — even through mixed logic systems. **Input Voltage:** 4-15 VDC. **Max. Input Frequency:** 10 kHz. **Dimensions:** $4.0 \times 2.0 \times 1.5$ " ($10.2 \times 5.1 \times 3.8$ cm). **Weight:** 3 oz. (85 gm).

761-1400. Model LM-1EACH 59.95

Shortsqueek SQ-1

Shortsqueek is a unique type of "audible" tone ohmmeter that simplifies finding shorts on PC boards, backplanes, or complex hard wire assemblies. It does this by responding, via a shift in tone frequency, to very small changes in resistance that conventional ohmmeters can't cope with. Most important, Shortsqueek significantly reduces the time it takes to locate those hard to find shorts.

761-0003. SQ-1EACH 49.95

5002 Universal Counter-Timer

High Resolution Reciprocal Measuring Technique with Revolutionary Portable 1.3 GHz Counter-Timer

- AC or Battery Operation
- Portable with Detachable AC Line Cord
- Frequency, Period, Ratio, Pulse Width and Count Modes
- High Resolution Reciprocal Measurement
- 1.3 GHz Maximum Frequency

- Selectable Gate Times 0.1, 1, 10 Seconds
- Trigger Level Control and Low Pass Filter
- External Standard with Auto-Change Over
- Provides 7 Digits of Significant Accuracy in One Second

761-5002. Model 5002EACH 499.95

6002 1.3 GHz Frequency Counter

- External Timebase Input
- Extended Range to 1.3 GHz
- Switchable Low Pass KHz Filter
- Frequency Multiplication

- Easy-Touch, Push-Button Control
- Measures Periods 1 μs to 200 ms
- Easy-To-Read 8 1/2 Digit LED Display
- Three Selectable Resolutions in Each Mode

761-6002. Model 105-6002EACH 499.95

Logic Test Kit

Model LTC-2. A complete, high-speed logic analysis kit contained in a handsome lightweight, custom-molded carrying case. Captures pulses less than 10 nsec., repetitive rates to 50 MHz. Ideal kit for service, design, testing, production and troubleshooting applications. **Kit Includes:** Model LP-3 Logic Probe, Model DP-1 Digital Pulser, and Model LM-1 Logic Monitor (all described in detail on this page). Kit also contains two 1 1/2" (38 mm) probe tips, two 2 1/2" (64 mm) probe tips, 3" (76 mm) "easy clip" adapter, two 3" (76 mm) ground leads, test probe tip adapter, banana plug adapter, two 36" (91.4 cm) power/ground leads, plus complete manuals/application guides. **Dimensions:** $9.1 \times 7.5 \times 2.25$ " ($23.1 \times 19.1 \times 5.7$ cm). **Weight:** 23 oz. (652 gm).

Logic Probes

- LP-1 Digital Probe**
 - Circuit Powered
 - Compatible with TTL/CMOS Logic Families
 - Captures 50 nsec Pulses

- LP-3 Digital Logic Probe**
 - For High Speed Logic Systems
 - High Constant Input Impedance
 - Captures 15 nsec Pulses

- LP-4 ECL Logic Probe**
 - High Speed; 3 ns, Over 100 MHz
 - Simple Readout
 - HI/LO/PULSE Indicators
 - 2-Position Slide Switch For Pulse Or Memory Latch

- LP-5 Logic Probe**
 - Captures 5 nsec Pulses
 - Multi-Family Logic Probe
 - Detects Out-Of-Tolerance Logic Signals, Open Circuit Nodes, Transient Events

- DP-1 Digital Pulser**
 - Hand-Held Digital Signal Injector
 - Compatible With Most Logic Families
 - Powered By Circuit Under Test
 - Short Circuit Protected

2003 Synthesized Function Generator

The 2003 has a frequency range of DC to 1.6MHz, with sine, square, triangle and ramp outputs. Up to 16 preset frequencies can be programmed into memory and automatically sequenced in the "frequency hop" mode. This makes the unit ideal for repetitive test applications such as amplifier performance checks, or production environments. Tone bursts can be generated using the external trigger/gate feature, while internal linear/log sweep is available across the entire frequency range. The 2003 offers the user the ability to enter data via the keypad directly or tuning style with the rotary encoder. This dual method of tone setup allows the engineer or technician the method most convenient to him/her. The 2003 is fully synthesized for accurate, stable signal generation. The 32 character 2 line display allows the user to input up to 10 digits and allows for 0.001Hz of resolution. Frequency stability is guaranteed at ± 10 ppm. The 2003 provides 5 selectable output waveforms and 6 operational modes for maximum versatility. The 2003's exceptional features and specifications represent a tremendous value when compared to other available synthesized function generators. The 2003 is the ideal addition to any design laboratory, test bench, classroom or production test environment. Applications for the 2003 include testing audio amplifier rolloff, filter response curves, transmission characteristics, telephony, speech processing, D/A and A/D systems, analog and digital control circuit design, servicing video recorders, video games and troubleshooting communication circuits.

Quick Test Sockets and Bus Strips

Universal solderless breadboarding system includes Quick-Test sockets and bus strips. Socket terminals are arranged with two rows of five pre-constructed tie points running crosswise. Bus strip terminals are arranged in two rows of five pre-connected tie points running lengthwise. Base is molded of high-temperature plastic. Contacts are pre-stressed, spring loaded, nickel silver alloy. **Wire sizes:** .015" to .032". Units feature snap-lock mechanism for mating two or more units together.

Experimenter Breadboarding Sockets

Solderless breadboarding sockets accept DIPs, transistors, LEDs, resistors, capacitors, and most of all types of discrete components, as well as AWG22-30 solid hookup wire. An interlocking system permits boards to be snapped together. Sockets are molded of durable, abrasion resistant material and feature pre-stressed, nickel-silver contacts. A vinyl plastic backing prevents shorts when sockets are mounted on metallic surfaces. Tie-points are alphanumerically identified for faster wiring and circuit tracing. Sockets can be used loose or fastened to a mounting surface.

PB-503 Plus PB-503C ProtoBoard Trainers

Global's professional Proto-Board® design station puts a workbench full of circuit design tools on your desktop. The PB-503 offers you .1 to 100KHz function generator with sine, TTL square and triangle outputs. Triple voltage +5V, and variable ±5-15 VDC power supplies. Large solderless breadboard areas. Ideal for all types of circuits both analog and digital. 6"H x 13"W x 11.5"D. **Weight:** 7 lbs.

The PB-503-C is a complete design work station, including instrumentation, breadboarding, and a rugged DC regulated triple power supply. The instrumentation features a 100KHz function generator with sine, square, and triangle waveforms, plus a TTL output for generating clock pulses. Add to this two digital pulsers operated by debounced push-button switches, and eight logic state indicators which operate as individual logic probes.

The Breadboarding area has a total of 2520 uncommitted tie points, enough space for circuits containing 24 ICs of 14 pins or equivalent. The Breadboarding sockets have an unlimited lifetime guarantee. The power supply offers three DC regulated supplies, one fixed at +5VDC and two variable from 5 to 15VDC. All three supplies are short-circuit protected, automatically current limiting the output to a safe level.

Micro-LC™ Oscilloscope Probes

- Fast Rise Time and Low Overshoot
- Low Capacitance
- High Accuracy With Laser Trimmed Components
- Ergonomic Design, Made Possible With DMS Usage
- Wide Compensation Range
- 1.2 Meter Cable
- Replaceable Gold Plated Test Tip
- Accessories Included

Top performance — high bandwidth and low capacitance — in a small, narrow-line body. Meets IEC 1010 safety standards.

Flexible Maxigrabber® Set. Maxigrabber has pincer type contact.

885-5910. Model 5910.....EACH 17.00

Flexible Test Lead Sets

Sets contain one black and one red lead. Plugs fit Wavetek and Fluke Multimeters.

Right Angle to Straight Plug Set. Right Angle Sheathed Banana Plug to Straight Sheathed Banana Plug on 62" long, silicone wire.

885-5907. Model 5907.....EACH 12.00

Straight Sheathed Set. Straight Sheathed Banana Plug on each end of 62" long, silicone wire.

885-5908. Model 5908.....EACH 12.00

Right Angle Sheathed Banana Plug Set. Right Angle Sheathed Banana Plug on each end of 62" long silicone wire.

885-5909. Model 5909.....EACH 12.00

High Voltage Probes

Model HV6

6 K VDC or VAC and a 10 KHz bandwidth. Slide switch on handle to select between 1 M Ω and 10 M Ω input impedances. 1.2 meter cable has two 4 mm retractable sleeve DMM plugs. **Accuracy:** DC — $\pm 1\%$; AC — $\pm 1\%$ to 3 KHz, $\pm 5\%$ to 5 KHz; Output derated with frequency typically —30% at 10 KHz. **Temperature Coefficient:** <200 ppm/ $^{\circ}$ C. **Operating Temperature:** 0 $^{\circ}$ to 50 $^{\circ}$ C. **Bandwidth:** DC to 10 KHz. **Max. Input V (DC + Peak AC):** 6000 V. **Input Resistance:** 50 M Ω . **Voltage Division Ratio:** 1000:1. **Altitude:** Derate voltage by 1%/100 m ASL. **Accessories:** Domed tip, hook tip. Noted specifications are only achievable when connected to instruments having 1 M Ω or 10 M Ω input impedances, having accuracy of $>0.25\%$.

885-3793. Model HV6.....EACH 95.00

Model HV40B

Designed for high voltage applications with instruments having an input resistance between 1 M Ω and 22 M Ω . Rated at 40 KV DC + peak AC to 300 Hz, (-3 dB). 2.0 meter cable has two 4 mm retractable sleeve DMM plugs. **Temperature Coefficient:** ≤ 200 ppm/ $^{\circ}$ C. **Operating Temperature:** 0 $^{\circ}$ to 50 $^{\circ}$ C. **Bandwidth:** DC to 300 Hz. **Max. Input V (DC + Peak AC):** 40,000 V. **Input Resistance:** 1000 M Ω . **Voltage Division Ratio:** 1000:1 $\pm 2\%$ when terminated by 10 M Ω ; 1000:1 $\pm 5\%$ when terminated by 22 M Ω ; 2000:1 $\pm 5\%$ when terminated by 1 M Ω . **Altitude:** Derate voltage by 1%/100 m ASL. **Accessories:** Domed tip, hook tip.

885-3794. Model HV40B.....EACH 95.00

Pop Jack DMM Kits

Silicone insulation is a special quality feature on 6 kits. Won't be burned by the bump of a soldering iron. Remains flexible in cold weather. Reliably attach different probes or clips to the same lead because "pop jack" holds tight.

Standard Replacement Test Lead Kit. Contains 2 Test Probe PVC Leads, one black and one red. 885-5519. Model 5519.....EACH 9.00

Extendable Tip Test Lead Kit. Contains Extendable Test Probe on 48" Silicone Lead, Medium Alligator and Pop Jack Silicone Lead in a clam shell case.

885-5671. Model 5671A.....EACH 21.40

Low Cost Test Lead Kit for Electronics. Contains 2 each: Test Probe leads on PVC insulated 18 AWG wire, one black, one red; slide-on extended tips and alligator clips, one black and one red. Banana plugs on meter end have no sleeve. Comes in a reusable plastic case.

885-5672. Model 5672.....EACH 21.19

Heavy Duty Kit for Electrical Work. This versatile kit provides the right test accessories for demanding electrical tests. Contains 2 each: Probe Handles, Extended Slide-on Tips, Medium Alligators, Heavy Duty Alligators, Minigrabber Leads, Minipincer Leads, Slide-on IC Tips, Pop Jack Leads and Couplers, one black and one red.

885-5673. Model 5673A.....EACH 37.90

Maxi Kit. Kit features the very best in quality and performance. All silicone insulated leads. Contains 2 each: Extendable Probe Tip Leads, Replaceable Tip Probe Handles, Extended Slide-on Tips, Medium Alligators, Heavy Duty Alligators, Minigrabber Leads, Minipincer Leads, Slide-on IC Tips, Pop Jack Leads and Couplers, one black and one red. Also includes 2 each: Spade Lugs, Dog Leg Micro-Tips, Needle Tips, Shouldered Micro Tips and 4 each: Standard Brass Tips. Supplied with a nylon pouch.

885-5677. Model 5677A.....EACH 79.90

Alligator Sets

Each clip has sheathed 4 mm (.16") receptacle to accept Pomona Flexible Leads or Fluke Multimeter Leads. One black and one red clip.

Extra Large Jaw Alligator Clip Set. Fully insulated clip with 25.4 mm (1.0") jaw opening.

885-5914. Model 5914.....EACH 7.50

Heavy Duty Large Alligator Clip Set. Fully insulated clip with 9.65 mm (.38") jaw opening.

885-5915. Model 5915.....EACH 7.75

Medium Alligator Clip Set. Fully insulated clip with 7.11 mm (.28") jaw opening.

885-5916. Model 5916.....EACH 6.50

Probe Lead Sets

Test Probe with Stainless Steel Tip. Probe to Right Angle Plug on 48" long silicone wire, one black and one red.

885-5898. Model 5895.....EACH 8.00

Test Probe with Caged Banana Plug Tip. Probe to Right Angle Plug on 48" long silicone wire, one black and one red.

885-5897. Model 5897.....EACH 9.00

Test Probe Handle Set. Test Probe with caged banana plug tip and sheathed Banana Jack in handle, one black and one red.

885-5906. Model 5906.....EACH 12.00

Test Clips

Material: Contact: Gold plated beryllium copper. **Finish:** Glass plated. **Insulation:** Glass filled nylon. **Rating:** +102°C (+216°F) max.

Clamp-On Multimeters

MX220

MX1200S

These meters help cut electric power costs significantly. Custom microprocessor supports current, voltage and frequency measurements with greater accuracy. Models MX200 and MX1200S feature True RMS current readings. Monitor inverter and frequency converter operations with MX210 and MX215. Meters feature large, easy-to-read LCD readouts, a full menu of eight functions, all autoranging and auto switch-off. Meet VDE 0411 safety standards.

Model 700 Series Power Supplies

All Model 700 Series Single Output Power Supplies feature constant voltage and current modes of operation. Coarse and fine adjust controls for both voltage and current enhance setability and accuracy of the digital meters. The 3 1/2 digit red LED displays are a half inch high and easy to see. All nine models have excellent specifications of ripple and noise including line and load regulation to maintain clean, stable output even under adverse conditions. Standard reverse polarity protection and fast overload recovery protect both the supply and the unit under test. **Specifications:** Output Voltage: 718-3D, 718-5D, 718-10D, 718-20D — 0-18V; 730-3D — 0-30V; 730-5D — 0-60V; 730-10D — 0-120V; 730-20D — 0-240V. **Constant Voltage:** Ripple Voltage rms: 718-3D, 730-3D — <0.5 mV rms; 718-5D, 718-10D, 718-20D, 730-5D, 730-10D, 730-20D — <1 mV rms. **Regulation Line:** <0.01% +3 mV. **Regulation Load:** 718-3D, 730-3D, 760-3D, 7110-3D — <0.01% +3 mV; 718-5D, 718-10D, 718-20D, 735-10D, 775-5D, 7110-3D — <0.02% +3 mV. **Recovery Time:** <100 μ s. **Constant Current:** Ripple Current: 718-3D, 730-3D, 760-3D, 7110-3D — <0.5 mA rms; 718-5D, 718-10D, 718-20D, 735-10D, 775-5D, 7110-3D — <1 mA rms. **Regulation Line/Load:** <0.2% +3 mV. **Metering:** Voltmeter/Ammeter: 3 1/2 digit 0.5 LED $\pm$ (0.5% of rdg +2 dgt). **Insulation:** Chassis and Terminal: 718-3D, 718-5D, 718-10D, 730-3D, 760-3D, 7110-3D, 730-5D, 730-10D, 775-5D, 7110-3D — >100 M Ω , 1 kVdc. **Size (H x W x D):** 718-3D, 718-5D, 718-10D, 730-3D, 760-3D, 7110-3D — 10 x 5.7 x 11.2; 718-20D, 735-10D, 775-5D, 7110-3D — 11 x 5.7 x 11.2. **Weight:** 718-3D, 718-5D, 718-10D, 730-3D, 760-3D, 7110-3D — 11 lbs.; 718-20D, 735-10D, 775-5D — 25.3 lbs.; 718-20D, 735-10D, 775-5D — 40.7 lbs.; 7110-3D — 29.7 lbs. **Power Requirements:** 100V, 220V, 240V ac $\pm$ 10%, 50/60 Hz User Switchable.

Triple Output DC Power Supplies

These are triple output DC power supplies that can be either half rack mounted or used on the test bench. The LPS-152 current ranges are 0 to 6 A and 0 to 1.2 A; the LPS-151 current ranges are 0 to 3.5 A and 0 to 0.6 A. The metered output voltages are adjustable. 0 to 6 volts (5-amp max.), 0 to +25 volts and 0 to -25 volts (1-amp max.), making this model ideal for computer subassembly, circuit board, semiconductor and system built-in test applications. All three outputs have independent adjustable current limiting with an auto recovery feature which allows the output voltage to return to normal when the short or overload condition is removed. Also featured is a tracking output mode which allows an adjustable ratio of positive vs. negative voltage between the 25 volts outputs. The adjustable range is from 100%-100% to 50%-100%. Ripple is less than 3 mVp-p and output stability is rated at less than 3 mV for $\pm$ 10% input line voltage variation and 0 to 100% load variation. Power supply carries manufacturer's 2-year warranty. 8.5 x 5.2 x 14.2". **Power:** 100, 120, 200, 220, 240 VAC; 50/60 Hz. **Weight:** LPS-152 — 18.5 lbs; LPS-151 — 15 lbs.

Precision Audio Generator

The LAG-120B is a precision audio generator. It is used for designing, testing, and servicing audio equipment. Also suitable for providing general purpose signals in a laboratory setting, this generator is a reliable source of low distortion sine waves or fast rise time square waves. **Specifications:** Frequency Range: 10 Hz to 1 MHz in 5 decade ranges. **Sine Wave Level:** 3 VRMS, 600 Ω . **Square Wave Output:** Level: 3 V P-P, 600 Ω . **Rise Time:** 200 nS. **SAG:** 5% or less on all ranges. **Overhoot:** 2% or less at maximum output. **External Synchronization:** $\pm$ 1% of dial frequency per volt RMS of input signal. **Max. Input:** 10 VRMS. **Output Impedance:** 600 Ω $\pm$ 1% unbalanced. **Amplitude Control:** Output attenuator provides up to 50 dB of attenuation in 10 dB steps. A continuously variable control is also provided. **Power:** 100/120/220/240 VAC, 50/60 Hz, 6.5 VA. **Size:** 5 1/4" x 6 1/4" x 9 1/4" (Inches). **Weight:** 6.5 lbs. **Supplied Accessories:** Instruction manual, 600 Ω terminator.

10 MHz Sweep/Function Generator

- Sine, Square, Triangle, Ramp and Pulse Output
- Adjustable Symmetry for All Waveforms
- CW, Triggered, Gate, Burst Plus Linear and Log Sweep Modes

The LFG-1310 is a feature-packed sweep/function generator with outputs that include every required waveform: sine, square, triangle, ramp and pulse. Five different operating modes enable the LFG-1310 to be used as a source for general and specialized measurement techniques. Output controls enable all types of signal conditions to be established, including different bias levels for amplifier work. The output may also be frequency or amplitude modulated by an external signal. The LFG-1310 is housed in a compact metal enclosure. **Power Requirements:** 100, 120, 200, 220, 240 VAC $\pm$ 10%, 50/60 Hz. **Size:** 12 x 4 x 12" (300 x 100 x 300 mm).

843Q1310. LFG-1310	EACH 1245.00
--------------------	--------------

2-MHz Sweep/Function Generator

LFG-1300S is a general-purpose signal source with a broad range of research, design and service applications. Outputs include sine, square, triangle, ramp and pulse signals. Pulse symmetry is variable over 9:1 range. Changing the symmetry does not appreciably affect the output frequency. Linear and logarithmic sweep frequency outputs available with sweep widths up to 1000:1. Output level is controlled by a calibrated 70 dB attenuator (10 dB/step) with continuous adjustment between steps. The output may be frequency or amplitude modulated by an external signal. A level control also provides suppressed carrier outputs. Sturdy metal housing with front panel for convenient operation. **Size:** 250W x 125H x 250 mmD. **Weight:** 9 lbs. **Power Req.:** 100, 117, 200 or 234 VAC, 50-60 Hz.

All other external horizontal deflection specifications are identical to vertical deflection specifications. **Internal Horizontal Deflection Sweep Mode:** Time Base: 0.5 μ s/div to 0.5 s/div in 19 calibrated ranges, 1-2-5 sequence, continuously variable between steps, 1 mV/div by X5 magnifier to 5 MHz. **Accuracy (0-40°C):** $\pm$ 3%, $\pm$ 5% with X5 MAG. **Input Impedance:** 1 M Ω $\pm$ 2%, 28 pF approx. **Maximum Input:** 250 V (dc plus ac peak). **Display Modes:** CH-1, CH-2, Alternate, Chop (250 kHz approx.), Add, Subtract (CH-2 invert). **Crosstalk:** -40 dB or less (1 kHz sine wave). **Output:** CH-1 output on rear panel of 50 mV/div of deflection on CRT (into 50 Ω). **External Horizontal Deflection, X-Y Mode:** Input: Via CH-2 vertical amplifier. **Bandwidth (-3 dB, 6 div):** dc — dc to 500 kHz, ac — 10 Hz to 500 kHz. **Phase Shift:** <3° at 50 kHz. All other external horizontal deflection specifications are identical to vertical deflection specifications. **Internal Horizontal Deflection Sweep Mode:** Time Base: 0.5 μ s/div to 0.5 s/div in 19 calibrated ranges, 1-2-5 sequence, continuously variable between steps. **Magnifier:** X10 magnifier extends maximum horizontal sweep rate to 50 ns/div. **Accuracy:** $\pm$ 3% ($\pm$ 5% with X10 MAG). **Triggering Sources:** Vert. CH-1, CH-2, line, External. **Modes:** Auto, Triggered, Coupling: AC, TV-V, TV-H. **Slope:** + or -. **Sensitivity Normal:** Frequency Range — 10 Hz-10 MHz, Internal — 1 div, External — 0.2 Vp-p; Frequency Range — 10 Hz-20 MHz, Internal — 1.5 div, External — 0.3 Vp-p; Frequency Range — 30 Hz-20 MHz, Internal — 1.5 div, External — 0.3 Vp-p; Frequency Range — 30 Hz-20 MHz, Internal — 1.5 div, External — 0.3 Vp-p. **TV:** Frequency Range — TV-V, TV-H, Internal — 1 div, External — 0.2 Vp-p. **Power Requirements:** 100, 120, 220, 240 V ac $\pm$ 10% 50/60 Hz, 29 W. **Physical Size (W x H x D):** 11 1/2" x 5 1/2" x 15 in. (290 x 150 x 380 mm). **Weight:** 15.4 lbs., 7 kg. **Operating Temperature:** 0-40°C, 85% RH or less.

843-8020. Model 8020	EACH 525.00
----------------------	-------------

Model 8020 20 MHz 2-Channel Oscilloscope

An ideal, and very economical, choice for applications where very wide bandwidth is not a factor, Model 8020 fits into a wide range of general purpose, education and service uses. Solid performance is ensured with 1 mV sensitivity, time bases as fast as 50 ns/div, and TV sync separators. CH1 output makes the scope a pre-amp to drive frequency counters and for other uses.

Specifications: Vertical Deflection. **Bandwidth (-3 dB, 6 div):** dc — dc to 20 MHz, ac — 10 Hz to 20 MHz. **Rise Time:** 17.5 ns (70 ns 1 mV/div and 2 mV/div). **Deflection Coefficients:** 5 mV/div to 5 V/div in 12 calibrated steps, 1-2-5 sequence, continuously variable between steps, 1 mV/div by X5 magnifier to 5 MHz. **Accuracy (0-40°C):** $\pm$ 3%, $\pm$ 5% with X5 MAG. **Input Impedance:** 1 M Ω $\pm$ 2%, 28 pF approx. **Maximum Input:** 250 V (dc plus ac peak). **Display Modes:** CH-1, CH-2, Alternate, Chop (250 kHz approx.), Add, Subtract (CH-2 invert). **Crosstalk:** -40 dB or less (1 kHz sine wave). **Output:** CH-1 output on rear panel of 50 mV/div of deflection on CRT (into 50 Ω). **External Horizontal Deflection, X-Y Mode:** Input: Via CH-2 vertical amplifier. **Bandwidth (-3 dB, 6 div):** dc — dc to 500 kHz, ac — 10 Hz to 500 kHz. **Phase Shift:** <3° at 50 kHz. All other external horizontal deflection specifications are identical to vertical deflection specifications. **Internal Horizontal Deflection Sweep Mode:** Time Base: 0.5 μ s/div to 0.5 s/div in 19 calibrated ranges, 1-2-5 sequence, continuously variable between steps. **Magnifier:** X10 magnifier extends maximum horizontal sweep rate to 50 ns/div. **Accuracy:** $\pm$ 3% ($\pm$ 5% with X10 MAG). **Triggering Sources:** Vert. CH-1, CH-2, line, External. **Modes:** Auto, Triggered, Coupling: AC, TV-V, TV-H. **Slope:** + or -. **Sensitivity Normal:** Frequency Range — 10 Hz-10 MHz, Internal — 1 div, External — 0.2 Vp-p; Frequency Range — 10 Hz-20 MHz, Internal — 1.5 div, External — 0.3 Vp-p; Frequency Range — 30 Hz-20 MHz, Internal — 1.5 div, External — 0.3 Vp-p. **TV:** Frequency Range — TV-V, TV-H, Internal — 1 div, External — 0.2 Vp-p. **Power Requirements:** 100, 120, 220, 240 V ac $\pm$ 10% 50/60 Hz, 29 W. **Physical Size (W x H x D):** 11 1/2" x 5 1/2" x 15 in. Test Leads and Kits

Multiple Feature Test Prods offer adaptability for test lead requirements. Prod handle (4") features molded flame-retardant ABS plastic (V-0 rated) with anti-slip ribs for a sure grip. Nickel-plated 8-32 threaded brass insert (alloy 360) with stainless steel (type 410) needle accepts accessory options. Banana Plugs feature nickel-silver spring to mate with .165" diameter jack for positive contact with minimum resistance. **Hook-Up Wire:** 65/36 #18 AWG tinned copper with 90°C. EPR rubber insulation, 1 red, 1 black per set. **Each Complete Kit Contains:** Two 48" Test Leads — 1 red, 1 black and the following accessories — two No. 207 Clippers (plunger-type clips), 1 red, 1 black; two No. 225 Spade Lugs, 1 red, 1 black; two No. 230 Insulator Extensions to cover tip of Test Prod, 1 red, 1 black; two No. 60-TBO Clips; two No. 62 Insulators, 1 red, 1 black.

"Clipper" Plunger-Type Test Clip

"Clipper" test clips make difficult IC test connections fast and easy. Spring-loaded hook attaches to delicate component leads and terminals to free hands while troubleshooting and circuit testing. Beryllium copper for maximum heat dissipation. Designed for connection over component leads up to .060 inches in diameter (1.52 mm). Stainless steel compression coil.

HHM1 Audible Multimeter/Thermometer

- ▶ Reports Measurements Audibly
- ▶ Measures AC/DC Volts, Amps, Ohms
- ▶ Selectable °F Or °C Temperature Display
- ▶ U.S. and International Patents
- ▶ Speech Chips Available In: English, Spanish, German, French, Japanese; Consult Allied For Details

Model HHM1

Measure volts, amps and ohms without ever looking at the display. HHM1 multimeter/ thermometer annunciates measurements on command or continuously. Measures AC and DC volts up to 1000 V. AC/DC current up to 4 A. Resistance measurements to 40 mΩ. **Temperature Input Range:** -200 to +1372°C with °F or °C display. For higher accuracy the HHM1A is ±1°C. Both units include carrying case, fuses, 2 beaded wire thermocouples, custom test leads, English voice chip, earphone, 9 V battery, 110 VAC adapter and operator's manual.

Auto-Ranging Analog Tester

Combines easy reading, trend-spotting capability of an analog display with the convenience of auto-ranging. For common measurements, select the function and the tester sets the range automatically. LEDs light to indicate the range in use. Up and down pushbuttons select range automatically. Autopolarity protects the tester and gives valid readings if leads are connected to circuit in reverse. Continuity buzzer quick-tests fuses, wiring, switches and more. Millivolt and microamp ranges give accurate readings from low powered circuits. Measures decibels in six ranges. Check tester's batteries with no removal. Large $4\frac{1}{8}$ " scale is mirrored and color-coded for easy reading. Replaceable fuse. $6\frac{1}{16} \times 4\frac{11}{16} \times 1\frac{1}{16}$ ". Requires 4 "AA" batteries.

Auto-Ranging

Simplified controls make this tester the choice for automotive or household use. Select function — volts, current or resistance — and range is set. Has continuity buzzer, manual override, data hold to freeze display, overload alert, handy fold-out stand. $6\frac{1}{16} \times 2\frac{11}{16} \times 1\frac{1}{16}$ ". Requires 2 "A" batteries.

910-2221. Type 22-163.....EACH 49.99

0-15 VDC Panel Mounting Voltmeter

Model 270-1754. Perfect for vehicle electrical system monitoring or for monitoring the voltage of a power supply. Jeweled movement. **Specifications.** Accuracy: $\pm 5\%$ full scale. Measures 0 to 15 volts DC. Dimensions: $2\frac{3}{4} \times 2\frac{1}{4} \times 1\frac{1}{4}$ ". Requires a $1\frac{1}{8}$ " round mounting hole.

910-4754. Type 270-1754.....EACH 12.99

Versatile 5-Range Clamp-On AC Ammeter

- ▶ Measures AC Current Without Direct Connection to Circuit
- ▶ Measures Up to 600 Volts AC With Included Test Leads
- ▶ Includes Inductive Pickup/Multiplier

This versatile instrument lets you safely measure energy consumption of appliances and circuits. It's also helpful in balancing loads when you install AC wiring and breakers. Clamp jaws permit easy insertion in tight spaces. Lock switch freezes pointer position so you can remove the meter for easy reading. Plug-in inductive pickup/multiplier test devices with an AC cord and also provides $\times 10$ readings for low-current measurements. Measures up to 300 amperes AC in 5 ranges, and up to 600 volts AC in 2 ranges. Dimensions: $4 \times 2 \times \frac{3}{8}$ ".

910-2136. Model 22-161.....EACH 49.99

Pocket-Sized Tester with Switch-Selected Ranges

- ▶ Color-Coded and Mirrored Scale

Easy to use! It's the perfect beginner's VOM and also a great second meter for the car or toolbox. Measures to 1000 volts AC/DC, 6 ranges. DC current to 150 mA. Resistance to 100,000 ohms. 2" meter. "Off" position protects meter movement during transit. Dimensions: $3\frac{1}{2} \times 2\frac{1}{4} \times 1\frac{1}{16}$ ". Requires "AA" battery.

910-4527. Model 22-212.....EACH 14.99

PC Interface, 20-MHz Frequency Counter

This multimeter works alone, or can be connected to a PC-compatible computer for advanced uses such as unattended measurement recording with time logging. Memory can store 10 measurements for display or downloading later. Includes interface cable and Windows®/MS-DOS®-compatible software on $3\frac{1}{2}$ " floppy. Features include 20-MHz frequency counter, capacitance, transistor-gain measurement, and logic-probe function. Dual display allows simultaneous reading of AC voltage and frequency or DC voltage/logic-level and ripple. Handy continuity buzzer, diode-check, data-hold and min./max. functions. Bargraph. Autopower-off saves batteries. $7\frac{7}{8} \times 3\frac{7}{16} \times 1\frac{1}{16}$ ". With case. Requires 9 V battery.

910-2168. Type 22-168.....EACH 129.99

— NEW —

Fold-Up Digital

This basic auto-ranging meter folds to easily fit in a shirt pocket or purse. Perfect for home. Ranges for resistance, AC or DC volts are set automatically. Continuity buzzer checks wiring, fuses, cords. Diode-check. Low-battery indicator. Folds to just $4\frac{1}{4} \times 1\frac{3}{16} \times 2\frac{1}{4}$ ". Includes batteries.

910-2217. Type 22-179.....EACH 24.99

Right Angle Banana Test Leads

36" leads. Set of 2: One red and one black. 910-2140. 278-713.....PER PAIR 3.29

6-Foot Coiled Test Leads. Banana plugs and probes designed to fit most testers. Comes in set of 2.

910-0132. 278-750.....PER PAIR 5.99

Sound Meters

Analog-Display Sound Meter

Reads to 126 db SPL with slow or fast response for checking peak and average noise levels. Seven ranges. Electric mike. Requires 9 V battery. 910-2050. 33-2050.....EACH 31.99

Digital-Display Sound Meter

Provides precise readings when setting up stereo or PA system. Reads 60 to 120 db SPL, and has "A" or "C" weightings. Carry case. 910-2055. 33-2055.....EACH 59.99

SANTRONICS DC Detector

Applications

- ▶ Automotive
- ▶ Trucks/RVs
- ▶ Marine
- ▶ Heavy Equipment
- ▶ Telecommunications
- ▶ Industrial Controls
- ▶ Aviation
- ▶ Farm Equipment
- ▶ Office Equipment
- ▶ Any Other 6-50 DC Volt System

Advantages

- ▶ Buzzer — Provides Audio Indication Of DC Voltage
- ▶ LED Light — Will Never Burn Out
- ▶ Large Clip — Fits Ground Connection Points Small To Large
- ▶ Sharp Tip — Penetrates Fine And Heavy Wire
- ▶ Construction — Using The Finest Materials Available
- ▶ Stainless Steel Tip — Rust Proof
- ▶ Solid State Circuitry — Total Reliability
- ▶ Test Lead Wire — 20 Gauge Heavy Duty Heat Resistant
- ▶ Pen Sized — To Fit Comfortably In User's Hand
- ▶ 100% Manufactured In The U.S.A.
- ▶ Safe for Use on Computerized Vehicles

260 Series 8 VOMs

- Accuracy for the Lab, Rugged Construction for the Field
- Excellent for Adjustments Such as Nulling and Peaking
- Large Color Coded Scales
- AC Frequency Response to 100 KHz
- Zero RFI
- Standard and High Energy Overload Fusing
- Varistor Protected Meter Movement
- UL 1244 Listed
- Mirrored Scale
- Broad Range of Accessories and Probes
- Wide Range Capabilities
- Includes Test Leads and Batteries
- Overload Protection Circuits — Models 260-8P, 260-8PRT, 260-8XPI
- Audible Continuity Checking — Models 260-8P and 260-8PRT

Traditional design, rugged reliability and excellent performance keep the 260s on the bench of generations of engineers. The 260-8 series reflects commitment to provide the best combination of quality, technology and affordability. Needs no external power, avoids common mode problems, no interference or triggering of external sensitive circuits, no RF radiation. Offers reliable and rapid checks for semiconductor junctions and forward/reverse resistance tests. The 260-8 series is UL listed and continues the tradition of practicality and reliability which made the 260 the best known VOM of all time. All versions have mirror scale for parallax elimination, allowing you to make more accurate measurements.

Specifications. DC Volts. Range: 250 mV, 1 V, 2.5 V, 10 V, 25 V, 50 V, 250 V, 1000 V. Sensitivity: 20 K Ohms/Volt. AC Volts. Range: 2.5 V, 10 V, 25 V, 50 V, 250 V, 500 V, 1000 V. Sensitivity: 5 K Ohms/Volt. Resistance Range: x1, x100, x10K. DC Current Range: 50 μ A, 1 mA, 10 mA, 100 mA, 500 mA, 10A. AC Current Range: up to 250 A AC with amp-clamp accessory probe (not supplied). Decibels Range: -20 dB to +50 dB (5 ranges). Continuity Test (260-8P and 260-8PRT Only): Audible sound when a resistance of less than 150 ohms is measured between the probes. Meter Movement: taut band, self-shielding, annular, 100° arc, 4.2" length, color coded, mirror backed for parallax elimination. Direct reading amp-clamp scales. Overload Protection: Models 260-8 and 260-8PRT — one 1 A/250 V fuse and one 2 A/600 V fuse; Models 260-8P and 260-8PRT — resettable circuit breaker. Dimensions: 7"H x 5.5"W x 3.1"D. Weight: 3 lbs.

228 Leakage Current Tester

► Meets New ANSI Specifications C101-1992

Model 228 is a special purpose AC/DC milliammeter designed to measure hazardous currents (leakage currents, or touch currents) which may appear when a person touches the surfaces of electrical or electronic equipment. The 228 meets the guidelines set forth in: IEC-930, ANSI C101-1992, UL 1459, and IEC 1010-1. This unit has special networks for burn hazard, react response, and let go response. Measures leakage current and matches the human body's decreasing sensitivity to the sensation of electrical shock as the frequency increases. It has an integral RMS reading/measuring device and output for measuring peaks on non-sinusoidal waveforms.

Environmental Testers — Sound Level Meters

Meets ANSI S1.4-1983 (R1976) and IEC 651 specifications. Meters are type S2a. Solid state construction housed in rugged, high-impact plastic case. Model 884-2 offers 40-140 dB range, in 10 dB increments, and offers 'A' weighting. Model 886-2 offers 40-140 dB range, and has 'A-B-C' weightings, selectable by push-button. Model 899 is an impulse Sound Level meter, for more accurate monitoring of short duration sounds. All models have omnidirectional condenser, type L size microphones. All sound level meters shipped with carrying case, wind screen, batteries, calibration screwdriver, and operators manuals.

Environmental Testers — Microwave Leakage Tester 380-2

This battery-operated direct reading portable instrument meets the measurement requirements of the Federal Performance Standard for leakage from microwave ovens. Used for pre-testing by manufacturers and for in-the-field checking of commercial, industrial and institutional installations by professionals, this unit is completely self-contained with readings in mW/cm². It measures the amount of microwave frequency leakage at 2450 MHz. Specifications. Power Density Reading Ranges: 0-2.5-10-25-100 mW/cm². Fast — 1.2 sec. max.; Slow — 3.0 sec. max. Weight: 0.8 lbs. Power: One 9-Volt batteries. Supplied With: Probe, foam spacer, battery, owners manual, carrying case.

High-Performance Programmable Digital Oscilloscope

TDS 410A

TDS 420A

TDS 460A

TDS 410A

- ▶ 200 MHz Bandwidth
- ▶ Two Channels Each With MS/s Sampling Rate

Common Features

- ▶ 30 K Point Records Standard; 120 K Optional
- ▶ 1 mV To 10 V/div Sensitivity
- ▶ Hi-Res Mode For Up To 12 Bits Of Single Shot Vertical Resolution
- ▶ 8-Bit Vertical Resolution
- ▶ 10 ns Peak Detect Mode For Glitch Capture
- ▶ Pass/Fail Waveform Testing
- ▶ Roll and Triggered Roll Mode
- ▶ 25 Automatic Measurements

TDS 400A Series

The TDS 400A Series high-performance four-channel oscilloscopes (TDS 410A, two channels) are well suited to electromechanical and medical research, circuit design, electronic service, and manufacturing quality control. They offer wide dynamic range, fast overdrive recovery, flat response, 1 mV/div. sensitivity, and calibrated DC offset. Bandwidths of 200 MHz (TDS 410A and TDS 420A) and 400 MHz (TDS 460A) with 100 MS/s sampling rate — coupled with record lengths to 120,000 points — provide acquisition power and flexibility.

Workhorse Power

Many powerful features have been integrated into the intuitive TDS 400A Series user interface. At slow sweep speeds, Hi-Res mode provides up to 12 bits of vertical resolution on single-shot events. A zoom feature magnifies waveforms for analysis of small details. Template testing, roll mode, and 25 automated measurements make these products work for you.

The TDS 400A Series scopes have sensitive, wide bandwidth triggers with AC, DC, LF Reject, HF Reject, and Noise Reject coupling modes. The optional video trigger has positive and negative sync, line rates to 64 kHz, selectable fields, interlaced or non-interlaced video, and individual line selection.

Advanced Performance

At timebase settings of 50 ms/division or slower, newly-acquired points roll onto the screen from the right, making slowly varying signals easier to view. A unique Triggered Roll Mode allows the user to view pretrigger information, then capture a waveform record when a trigger event occurs.

Twenty-five automatic measurements eliminate the counting of divisions and manual cursor measurements. The user can set reference levels. In addition, measurement gating allows selection of a specific part of a waveform for measurement. The Snapshot feature simultaneously makes all 25 measurements on any single waveform. At slow sweep speeds, digitizing scopes reach a point where the available record length limits the number of samples than can be retained per second. Most scopes react by saving a point every few points and discarding the rest — missing high-speed waveform details. Peak Detect Mode employs proprietary hardware to retain data about those "extra" points and shows detail up to the maximum sample rate.

Variable Persistence allows waveform points to decay gradually through a 16-level gray scale, providing "z-axis" information about rapidly changing signals. Limit Testing compares waveforms against a template on-the-fly, automatically stopping acquisitions or saving the waveform whenever the template is violated. Templates can be created and adjusted from the front panel or imported over the GPIB interface and saved in non-volatile memory.

*These are 4 channel scopes. Two probes are supplied standard; for two more probes (to total a set of four), please order Option 22.

P5200 Differential Probe

- ▶ 1300 V Differential
- ▶ ± 1 kV to Ground (Each Channel)
- ▶ 50X/500X Attenuation
- ▶ 25 MHz
- ▶ Excellent Signal Fidelity
- ▶ Easy Connection to ICs and Bus Bars
- ▶ Safe for User and DUT
- ▶ UL Certified 1244
- ▶ IEC 1010 Certified

The P5200 enables users to safely make measurements up to 1300 V differential of floating circuits with their oscilloscopes grounded. The P5200 Active Differential Probe converts floating signals to low voltage ground referenced signals that can be displayed safely and easily on any ground referenced oscilloscope.

700-5200, Model P5200EACH 399.00

ADA400A

Differential Preamplifier

- ▶ Active Differential Preamplifier
- ▶ 10 pV/div. Sensitivity
- ▶ Typically 100 dB CMRR DC 10 KHz
- ▶ Integral Probe Power in TEKPROBE™ BNC

The ADA400A Differential Preamplifier allows direct oscilloscope measurements of very low amplitude voltages and signals which are not ground referenced. The high impedance of both inputs eliminates the need to add additional ground points in the DUT, thereby avoiding circulating currents which disturb the measurement or the circuit.

Digital Multimeters

CDM250

DM2510

DM2510G

CDM250

The CDM250 Digital Multimeter measures and displays voltage, current, and resistance using a 3 1/2 digit LED display. Sine wave alternating voltages and currents are displayed in RMS values. The CDM250 is safe and easy to use in the classroom and on the job. This meter has overload protection and is UL listed and CSA certified. Test leads are included.

DM2510 Programmable Digital Multimeter

The DM2510 is a programmable, six-function, autoranging digital multimeter. You can use it to measure DC and AC voltage and current, plus resistance and temperature. It has a NULL function to make measurements with an offset value, plus a HOLD mode and a TRIGGER function. COMPARE mode compares a measurement with user-selected high and low limits; a beeper can be set to sound when the measurement is beyond the specified limits.

DM2510G Programmable Digital Multimeter with GPIB Interface

The DM2510G is a programmable, six-function, autoranging digital multimeter with a GPIB interface for computerized programming or remote operation and data capture.

The DM2510 and DM2510G Programmable Digital Multimeters offer exceptional accuracy and speed, especially in repetitive testing situations. Other features of the DM2510G are the same as the DM2510.

Counters

CMC251

CDC250

CMC250

CFC250

CMC251

The CMC251 1.3 GHz Multifunction Counter measures the frequency of sine, square, and triangle waves from 1 Hz to 1.3 GHz. The CMC251 also provides period, totalize, and pulse width measurements. The counter has two input channels. Channel A is a standard 1 MΩ input for frequency measurements up to 100 MHz. Channel B is a 50 Ω terminated input for use in high-frequency systems. This counter is of interest to radio amateurs because of its ability to measure high-frequency systems. The temperature-compensated, crystal-controlled time base is stable to ±1 part per million per year.

CDC250

The CDC250 175 MHz Universal Counter measures frequency of sine, square, and triangle waves from 1 Hz to 175 MHz at input levels from 20 mV to 42 V peak. The CDC250 also provides period measurements, frequency ratio, time interval, and totalize measurement functions. The CDC250 has a ±1 ppm/year, temperature-compensated time base to ensure consistent accuracy. Service technicians will find the CDC250 useful as a standard for calibrating other equipment.

CMC250

The CMC250 1.3 GHz Multifunction Counter measures the frequency of sine, square, and triangle waves from 5 Hz to 1.3 GHz. The CMC250 also provides period measurements and totalize functions. Channel A is a standard 1 MΩ input for frequency measurements up to 100 MHz. Channel B is a special 50 Ω terminated input, prescaled to 1.3 GHz for easy RF measurements. The time base stability is ±10 ppm/yr.

CFC250

The CFC250 100 MHz Frequency Counter measures the frequency of sine, square, and triangle waves from 5 Hz to 100 MHz at input levels from 30 mV to 42 V peak. Students will enjoy the simplicity of using the CFC250. Applications include adjustment, testing, and repair of electronic items such as audio equipment, radios, televisions, computer clocks, and musical instruments.

Function Generators

CFG250

CFG253

CFG280

CFG250 and CFG253

Function Generators produce sine, square, and triangle waves, and TTL signals for testing amplifiers, filters, and digital circuits. Sweep function can be controlled internally or with an external signal. Duty cycle, DC offset, sweep rate, sweep width, and amplitude are all operator controlled. The CFG253, at 0.03 Hz to 3 MHz, has a wider output bandwidth than the CFG250, at 0.2 Hz to 2 MHz.

CFG280 11 MHz Function Generator with Counter

The CFG280 combines an 11 MHz Function Generator with a 1 Hz to 100 MHz Frequency Counter. The on board counter allows the operator to set the frequency output of the function generator precisely. This versatile instrument conserves both bench space and budget.

Surface Mount Device Interconnects

Applications

- Research and Design
- Manufacturing Test Of SMD Circuitry
- Servicing Of SMD Circuitry
- Prototype Debug and Design

SMG50/SMT KlipChip™ Kits

- Access To 0.050" Centers PLCC, SOIC, and Other Packages
- PQFP100/132 PQFP Adapter Clips
- 386SX Attachment With PQFP100
- 68020/68030 Attachment With PQFP132
- 350 MHz Bandwidth
- Small Low-Profile Design Fits In Tight Spaces

Surface Mount Device Probing and Interconnects

The increasing use of surface mount technology (SMT) brings many benefits to electronic circuit board (ECB) design and manufacture. Among these are increased circuit density, increased product reliability, and lower assembly costs.

Troubleshooting and device interconnection, however, have become more difficult due to decreased device size, tighter lead spacing and increased ECB densities. Tektronix' offering of the following SMT probing and inter-connect devices meets these demanding requirements.

SureFoot™ Probing 25 mil JEDEC, 0.65 and 0.5 mm EIAJ Packages

SureFoot® (patent pending) is an integral probe tip and miniature guide that enables fault-free "hands-on" probing of fine-pitch SMD packages. Guided by the IC's leads, SureFoot's miniature plastic tines align the probe before electrical contact is made. The tines also form a shield between IC leads, preventing the probe tip from shorting adjacent pins.

SureFoot® conforms to EIAJ (Electronic Industry Association of Japan) or JEDEC (Joint Electron Device Engineering Council) packaging standards, assuring quick and reliable probe contact with fine-pitch IC leads. Several color-coded versions of SureFoot® are available, addressing the most common SMD packages with leads spaced on 0.65 mm (EIAJ) and 25 mil (JEDEC) centers. A crystal orange version fits the tighter 0.5 mm lead spacing of several EIAJ packages.

Style for Tektronix SMD Probes

Tektronix probes have replaceable probe tips. The basic contact of the new SMD probe family is a 25 mil socket that accepts square or round pins. SureFoot® probe tips are available in styles to match each of these high-performance probe families.

- 10X — 200 MHz
- <11 pF Loading
- Readout

P6562AS

- 10X — 350 MHz
- <11 pF Loading
- Readout

The P6561AS and P6562AS are scaled for surface mount IC packages. Their low-mass probe bodies are only 1.5" long and 100 mils wide. Bundled in sets to match the oscilloscope's performance and channel count, these probes provide solutions for the most popular EIAJ and JEDEC surface mount packages.

Surface Mount Device Probing

While instrumentation improvements have provided a steady stream of digital troubleshooting tools, the physical challenges associated with probing small geometry ICs have gone unaddressed until now. SMD probes from Tektronix provide circuit designers the first complete, off-the-shelf solution for probing small geometry IC packages.

The basic contact of the SMD probe family is a 25 mil socket that accepts square or round pins. A variety of tip adapters permits convenient, non-destructive, temporary connection to the most popular EIAJ and JEDEC surface mount packages. Each SMD probe is designed to minimize capacitive loading on TTL, ECL, CMOS, FastCMOS, and BiCMOS circuits. The probe and oscilloscope form a measurement system optimized for circuit designers by providing fast transient response, high system bandwidth, and low capacitive circuit loading.

SMD Probe Characteristics. Probes Per Set: P6561AS — 2; P6562AS — 4. **Oscilloscope Series:** P6561AS — TDS300, TDS400; P6562AS — TAS400, 2400 and 11000. **Bandwidth** (—3 dB): P6561AS — 200 MHz; P6562AS — 350 MHz. **Rise Time (Typical):** P6561AS — <1.85 ns; P6562AS — <1.1 ns. **Uniform Signal Delay:** P6561AS — ±150 ps; P6562AS — ±125 ps. **Attenuation:** 10X. **Device Loading Capacitance (Typical):** <11 pF. **Device Loading Resistance:** 10 MΩ. **Maximum Non-Destructive:** 42 V. **Input Voltage:** (DC + peak AC). **Compensation Range:** P6561AS — 15 pF to 35 pF; P6562AS — 12 pF to 35 pF. **Replacement Probe:** P6561AS — P6561A; P6562AS — P6562A.

FlexLead™ Adapters

Fine Pitch Surface Mounted Devices

FlexLead™ Family

25 mil JEDEC 0.65 mm EIAJ
0.5 mm EIAJ

- Convenient Probing Of 25 mil Pitch and Smaller Packages
- Minimum Circuit Loading
- Adapts To Many Of The Most Common JEDEC and EIAJ Packages
- Compatible With Any Oscilloscope Or Logic Analyzer Probe Or Podlet
- 100 mil Interface For Easy Probe Connection

Surface and Device Probing

As the pitch and lead spacing on surface mount packages gets smaller, connecting a probe to these packages becomes increasingly difficult. At a pitch of 25 mils or smaller the leads will no longer mechanically support a probe without potentially damaging the package. At this fine pitch it also becomes difficult to hand hold a probe without shorting to adjacent leads or causing mechanical damage to the package. The Tektronix FlexLead™ Adapters make it possible to conveniently connect to fine pitch Gull-wing Leaded QFP (Quad Flat Pack) packages while reducing the risk of both mechanical and electrical damage to the part.

FlexLead™ Adapters

The FlexLead™ Adapters have a standard 100 mil. interface on one end, to which any oscilloscope probe or logic analyzer podlet will directly connect, both signal and ground leads. The opposite end of the adapter has a row of solder pads, matching the leads of the package, that are soldered to the package leads. After the necessary probing is complete the adapters are intended to be unsoldered and discarded. They are intended to be used only once and are priced low enough to make this practical.

Characteristics. Series Resistance: Less than 100 MΩ (typical). **Inductance:** Less than 100 nH (typical). **Capacitance:** Less than 2 pF (typical). **Maximum Voltage:** 42 V. **Maximum Current:** 750 mA.

Soldering Instructions Videotapes

These no-charge VHS videotapes describe the recommended procedure for soldering the FlexLeads.

TekScope™ THS 700 Series Handheld Digitizing Oscilloscopes

— NEW —

The First Handheld Oscilloscope/Digital Multimeter With Full 100 MHz Digital Real Time Performance

- Unmatched Troubleshooting Productivity and Confidence
- Usability Enhancements, Including An Intuitive Front Panel, Icon-Based Menu System and Back-Lit LCD
- The Ability To Trigger On and Capture A Wide Choice Of Events
- Superior Safety Features, Such As Tektronix' Isolated Channel™ Architecture That Enables Safe Probing On Two Channels, Floating Independently Of Each Other
- Versatility To Measure Various Signals With A Fully Integrated Digital Multimeters and 100 MHz Digital Scope In One Package

Tektronix designed the autoranging TekScope for use in field service and maintenance applications where portability is required. To that end, the TekScope oscilloscope/digital multimeter was designed from the ground up to withstand harsh environments, without additional bulk and weight. At a size of 8.5" x 7" x 2" and a weight of only three pounds, it is smaller than most PC notebooks, but it's rugged enough to handle the strain of portability in the field and on the factory floor. An internal shock cushion provides protection against falls; gaskets protect against dust and water.

Includes: Two P6113B probes, user manual, standard meter lead set, NiCd rechargeable battery pack, AC power adapter, soft carrying case, cable and adapter for RS-232 interface, and NIST-traceable certificate of calibration. **Features. Repetitive Or Single-Shot Bandwidth:** THS710 — 60 MHz; THS720 — 100 MHz. **Max. Sample Rate (Ea. Channel):** THS710 — 250 MS/s; THS720 — 500 MS/s. **Channels:** 2. **Digitizers:** 2. **Max. Record Length:** 2500 points. **Time/Div. Ranges:** THS710 — 10 ns/div. to 50 s/div.; THS720 — 5 ns/div. to 50 s/div. **Glitch Capture:** ≥ 8 ns. **Vertical Sensitivity:** 5 mV to 50 V per div. **Advanced Triggering:** Video and Pulse-width. **Ease-Of-Use:** Autorange +21 Measurements. **Memories:** 10 Setups +10 Waveforms. **DMM:** True RMS with datalogger. **Safety:** Isolated Channels™. **Certifications:** UL, IEC, CSA. **Warranty:** 3 yrs. **TekFax No.:** 40169.

Common Specifications. Digitizers/Channels: 2. Vertical Resolution: 8-Bit. Vertical Sensitivity: 2 mV to 10 V/div. Acquisition Modes: Sample, Envelope, Average, Peak Detect. Peak Detect/Glitch Capture: 10 ns. Record Length/Channel: 1 K. Signal Processing: Add, Subtract, Autosetup: Yes. Waveform Storage/References: Two 1 K records. Store/Recall: 10 front-panel setups. Automatic Measurements: 21. Trigger: Edge, Video. Display: Dot, Dot Accumulate, Vector, Vector Accumulate. Centronics-Type Printer Port: Yes, Opt. 14. GPIB/RS-232 I/O Interface: Yes, Opt. 14. VGA Monitor Output: Yes, Opt. 14. Warranty: 3 years. Safety Certification: UL, CSA.

Analog Simplicity, Digital Productivity

By balancing the use of on-screen menus with dedicated buttons and knobs, the user-friendly interface retains traditional analog simplicity yet gives quick access to the wide range of digital functions. Frequently used functions, like position and trigger level, are controlled directly with knobs; secondary functions are menu driven, eliminating the profusion of buttons found on most low-cost scopes.

This modern interface dramatically flattens the learning curve, appealing to users regardless of their digital experience. The TDS 300 Series interface simplifies scope operation without limiting the instrument's capabilities.

Communication Option

The I/O Interface (Option 14) includes GPIB, RS-232 I/O interface, and a Centronics-type parallel printer port. With this option you can use a remote computer to control the scope for automated testing, or to exchange waveform or measurement data for documentation and analysis. In addition, a VGA monitor output is provided for classroom viewing or other applications requiring a monitor. Interleaf (.img), TIFF, PCX, BMP, and EPS file formats allow screen captures to be placed directly into desktop publishing documents. Or, at the push of a button, a screen shot can be output directly to a variety of compatible printers. The Printer Pack, Option 3P, provides a single-handle solution to the portable printer problem. A quiet thermal printer, mounted in a pouch attached to the scope, makes clear four-inch hard copies while you continue working. Option 14 is included in Option 3P.

For service, education, and design work, the TDS 300 Series is without peer among low-cost DSOs.

Acquisition Power

With edge triggering and basic video triggering as standard features, the TDS 300 Series can capture the waveforms that designers and service technicians need to see. In addition to 21 automatic waveform measurements, the TDS 300 Series offers four acquisition modes: Sample, Peak Detect, Envelope, and Average. Sample mode provides real-time sampling and has the highest throughput rate. Peak Detect locates glitches as small as 10 ns and reveals aliasing. Envelope mode, by including the highest and lowest points over many acquisitions, shows variations in the signal over time. Average mode uses several acquisitions to calculate an average value for each waveform point, reducing random noise in repetitive signals.

HC220

- Direct Plots in About 90 Seconds
- Compact Size
- Laser Quality Printouts

Laser Quality Printer

The HC220 bubble jet printer offers high quality printing in a small package at an economical price.

Because it's an ink-jet printer, the HC220 has darker, denser, more consistent printing than most other printers. At 360 dots per inch (DPI), it is considered a laser quality printer. In addition, the printer uses plain paper.

DMM

DMM150/CMM150

Dmm 155/157

DMM353

DMM252/254

THM 420

DMM150 — Pen Meter; CMM150 — Current Meter

The DMM 150 is one of the smallest and most versatile DMMs on the market. Easy to use, easy to carry, it's great for indoor/outdoor use, one handed operation and making measurements in tight places. It measures AD/DC voltage, resistance, continuity (with beeper) and diodes. For ease of operation it has both auto and manual range capabilities and both a 3.5 digit digital display and 65 segment analog bargraph. It also includes data hold, auto power off, and a low battery indicator.

The CMM 150 turns the DMM 150 into a 300 A digital current meter. The CMM 150 has a non-intrusive range of .1 A to 300 A and a 30 mm jaw opening with a 29 mm conductor diameter.

Instead of carrying and purchasing a separate DMM and current meter use the CMM/DMM 150 combo. The DMM 150 provides all of the features of a rugged DMM, while the CMM 150 turns the DMM 150 into a 300 A non-intrusive current meter.

DMM155/157 — Pocket DMMs

The 155/157 are full featured high value auto ranging DMMs. They both measure AC/DC voltage, AC/DC current, resistance, continuity (with beeper) and diodes.

DMM247/249 — Personal DMMs

The 249 Series are rugged state of the art meters enclosed in dust and water resistant cases. They both measure AC/DC voltage, AD/DC current, resistance, continuity (with beeper) and diodes. The 249 also has True RMS measurement for accurate measurement in the presence of harmonics

DMM252/254 — Professional DMMs

The 250 Series are state of the art meters designed for the professional. Water, dust and impact resistant all measurements are made with a high degree of accuracy and resolution. The meters have many uses and functions including digital meter, analog meter, frequency counter, recorder and capacitance tester.

DMM353 — Component Checker

- 0.5% Basic Accuracy
- Resistance Measurement
- Capacitance Measurement
- SCR Go/No-Go Test

The DMM353 Component Checker is an indispensable tool for the electronic service technician. With several ranges for versatility, it tests transistors, diodes, LEDs, capacitors and batteries.

THM420 — DMM With Waveform Display

For those technicians and engineers who need to monitor signal characteristics such as noise, glitches or distortions in conjunction with a meter measurement, Tektronix offers the autoranging TekWaveMeter, a graphical multimeter with the ability to display a waveform in a low-cost, lightweight unit. The TekWaveMaster THM 420 model is a multipurpose tool designed for troubleshooting, maintenance, installation, calibration and repair of electric and electronic equipment. Because distorted waveforms may display correct voltage measurements in a DMM, equipment that also displays graphical waveforms is advantageous for troubleshooting power quality problems, manufacturing equipment failures and electronic component debugging.

All Tek Digital Multimeters are UL Listed and come with 3 year warranty.

TekLuma™ Color Photometers

J17

- Autoranging, Auto Zero
- RS-232 Interface (Output Only)

- Wide Dynamic Features

J18

- Real-Time Color Measurements
- Ten Memories For Storing Reference Colors (With J1810)
- RGB Bar Graph
- D6500 Kelvin Calibration

- Color Temperature Measurement
- Analog Output
- Full Control Of Measurements Plus Output Of Results (RS-232)

Common Features

- Interchangeable Pre-Calibrated Heads
- Accurate Spectral and Cosine Corrections
- Metric/English Conversions
- Large LCD With Backlight

- Rugged
- Handheld
- Adaptable To Many Light Measurement Needs

J17/J18 Photometers

The Tektronix J17 and J18 are handheld digital Photometers/Radiometers/Colorimeters for the laboratory, field, or production area. A J17/J18 System consists of a J17/J18 handheld meter and one of eight interchangeable heads. At the heart of the J17/J18 is a microprocessor capable of performing several functions: Metric-to-US conversion, auto-range, auto-zero, hold, and conversion between color coordinate systems. The J17/J18 can be used with a PC for automated testing and data recording. The J17/J18 are powered by a 9-volt battery. **Specifications. Interchangeable Pre-Calibrated Heads:** Yes. **Accurate Spectral and Cosine Corrections:** Yes. **Metric/English Conversions:** Yes. **Backlit LCD:** Yes. **Analog Output:** Yes. **RS-232 Digital Output:** J17 — No; J18 — Yes. **Programmable:** J17 — No; J18 — Yes. **RS-232 RGB Bar Graph:** J17 — No; J18 — Yes. **Reference Memories:** 10 with J1810 (J18 only). **Color TekMeter™ Measurements:** J17 — No; J18 — Yes. **D6500 Calibration (True White):** J17 — No; J18 — Yes.

- ▶ Measurement Cursors

- ▶ CRT Readout
- ▶ Channel 1 Output
- ▶ Video Trigger
- ▶ Direct Access Controls

Easy To Use Interface. The TAS series user interface simplifies scope operation. Both the TAS 400 and TAS 200 Series front panels are similar in operation and the important, frequently used functions are controlled directly with Knobs or Buttons. On the TAS 400 series a menu is used to access secondary functions. **Productivity Features.** The TAS 400 series offers Auto Setup to instantly deliver a triggered display. Pressing the AUTOSET button automatically adjusts the horizontal, vertical, and trigger controls so that a stable signal is displayed. In

TAS 400 Series

- ▶ CRT Readout
- ▶ Auto Setup; Store/Recall Setups
- ▶ Video Trigger
- ▶ Trigger/Ground Reference Indicator
- ▶ Combination Menu/Direct Access Controls

addition, the TAS 400 series front panel settings can be stored in up to four memory locations for easy recall. Both the TAS 200 and TAS 400 series provide measurement cursors and readouts to improve user productivity. Refer to the key specification selection chart and choose the analog scopes best suited for your performance needs. And buy with confidence that these scopes are backed by the leader in oscilloscope technology, Tektronix.

AM503S Current Measurement System

- ▶ AC/DC Measurements
- ▶ With A6302 Probe: DC To 50 MHz; 20 A Continuous/50 A Peak; Split Core; Clips On To Conductors Up To 0.15" Diameter
- ▶ With A6303 Probe: DC To 15 MHz; 100 A Continuous/500 A Peak; Split Core; Clips On To Conductors Up To 0.83" Diameter

Applications

- ▶ Switching Power Supplies
- ▶ Disk Drives
- ▶ Electronic Ballast
- ▶ Motor Drives
- ▶ Inverters
- ▶ All Mixed AC/DC Current Signals

The AM503S Current Probe System is the most versatile current measurement system available. Since the probes incorporate both a transformer and a Hall Effect device, broadband AC/DC current can be measured simultaneously. Depending on the probe used, current from DC to 50 MHz and up to 700 A can be measured by clipping the split-core probes around the conductor. The AM 503S is truly a system, consisting of an AM 503B Current Probe Amplifier, a TM 502A two-wide Power Module, an A6302 Current Probe and a handy plug-in tool box. Options enable you to add or substitute an A6303 Current Probe.

- ▶ Wide Compensation Range (7 To 49 pF)
- ▶ Heavy Duty Versatile Ground Lead and Clip

P6007

- ▶ DC To 25 MHz
- ▶ 100 X
- ▶ 1,500 VDC + Peak AC
- ▶ Low Capacitance — 2.0 pF

P6009

- ▶ DC To 120 MHz
- ▶ 100 X With Readout
- ▶ 1,500 VDC +

Peak AC

- ▶ Low Capacitance — 2.5 pF

Use Tek's 100X and 1000X high voltage probes to measure elevated voltages without damaging your probe, scope... or yourself. These high-performance probes provide low capacitance, high input impedance, and frequency response starting at DC. All Tektronix probes come with instruction manuals and the appropriate probe tips, ground leads, attachments and other accessories.

High Voltage Probe Feature Summary

Tek high voltage probes are compatible with a wide range of scopes. They can be used with any scope with nominal input capacitances of 12 pF to 47 pF and input resistance of 1 M Ω .

Stock No.	Mfr.'s Type	Nominal Length	Attenuation	Bandwidth	Rise Time	Loading	Max. Input V	In pF DC or RMS	Readout	EACH

Specialty Probes

Differential Probes, Logic Probe

P6408

- ▶ For TTL and TTL-Compatible Logic
- ▶ 17-Bits (16 Data Bits Plus Qualifier)
- ▶ Synchronous and Asynchronous Operation
- ▶ Easy to Use
- ▶ Simplifies Digital Troubleshooting and Debug

The P6408 is a 16-Bit word recognizer trigger probe for use with analog and digital storage oscilloscopes. It allows the oscilloscope to trigger on user-defined logic states (rather than on analog levels), thus extending the utility of the oscilloscope into digital troubleshooting and debug applications.

700-6408. P6408 EACH 570.00

P5200 Active Differential Probe

- ▶ 1300 V Differential
- ▶ ± 1 kV to Ground (Each Channel)
- ▶ 50X/500X Attenuation
- ▶ 25 MHz
- ▶ Excellent Signal Fidelity
- ▶ Easy Connection to ICs and Bus Bars
- ▶ Safe for User and DUT
- ▶ UL Certified 1244
- ▶ IEC 1010 Certified

The P5200 enables users to safely make measurements up to 1,300 V differential of floating circuits with their oscilloscopes grounded. The P5200 Active Differential Probe converts floating signals to low-voltage ground referenced signals that can be displayed safely and easily on any ground referenced oscilloscope.

700-5200. P5200 EACH 399.00

ADA400A Differential Preamplifier

- ▶ Active Differential Preamplifier
- ▶ 10 pV/div Sensitivity
- ▶ Typically 100 dB CMRR, DC to 10 kHz
- ▶ Integral Probe Power in TekProbe™ BNC

The ADA400A Differential Preamplifier allows direct oscilloscope measurements of very low amplitude voltages and signals which are not ground referenced. The high impedance of both inputs eliminates the need to add additional ground points in the DUT, thereby avoiding circulating currents which disturb the measurement or the circuit.

700-5205. ADA400A EACH 895.00

Active Probes

P6205

- ▶ DC to 750 MHz
- ▶ 2 pF Input C
- ▶ 1 M Ω Input R
- ▶ Low Price

The P6205 Low Circuit Loading Active Signal Acquisition probe with Active FET devices in its input provides very high input impedances. The P6205 provides a wide linear dynamic input range for accessing most digital device families using today's logic voltage levels.

700-6205. P6205 EACH 630.00

1103

The 1103 TEKPROBE™ Power Supply provides power for up to two P6205 Probes or other compatible probes. Also powers ADA400A Active Differential Probe.

700-1103. 1103 EACH 675.00

Power Supplies

CPS250

PS280/PS283

PS281/PS282

CPS250

The CPS250 Triple Output Power Supply is a versatile instrument with two variable outputs and one fixed output. Its attractive, compact design with tilt-handle takes up less bench space than most other power supplies. It meets most basic test and lab bench requirements.

PS281/PS282 DC Power Supplies

The Tektronix PS281/PS282 DC Power Supplies meet the requirements of laboratory, classroom and production environments. Output is continuously variable up to the rated voltage/current by means of coarse and fine potentiometers. The PS281 is rated at 30 V/3 A; the PS282 at 18 V/5 A max.

The PS281 and PS282 are designed to be connected in series to increase voltage output or in parallel for a higher current output. Serial and parallel tracking can be achieved by connecting a rear panel jumper between two or more units.

The compact case and multiple operating modes of the PS281 and PS282 offer convenience and flexibility for a space-limited engineering bench.

PS280/PS283 Power Supplies

The Tektronix PS280 and PS283 Laboratory DC Power Supplies are multifunction benchtop or portable instruments. These regulated power supplies provide fixed 5 V output for powering logic circuits and two variable outputs for a wide variety of test and experimental uses.

The PS280 and PS283 contain two identical, independently adjustable DC power supplies that can vary from 0 to 30 V, and 0 to 2 A in the PS280 or 0 to 1 A in the PS283. Front-panel switches select one of three modes of operation: independent, series, or parallel.

Programmable Benchtop Power Supplies

PS2510/PS2510G/PS2511/PS2511G

The single output PS2510/PS2510G and PS2511/PS2511G Power Supplies are especially suited to low-cost computer controlled systems. The PS2510/PS2510G provide a maximum of 36 V and 3.5 A. The PS2511/PS2511G are rated up to 20 V and 7 A.

The PS2510G and PS2511G are GPIB programmable. The GPIB command sets are SCPI compatible.

Each power supply features 100 memories to store voltage and current limits for instant recall via the front panel or GPIB.

PS2520/PS2520G/PS2521/PS2521G

The triple output PS2520/PS2520G and PS2521/PS2521G Power Supplies are versatile supplies suitable for many applications. The PS2520/PS2520G has a single supply providing a maximum of 6 V and 3 A and two supplies providing a maximum of 36 V and 1.5 A. The PS2521/PS2521G has a single supply providing a maximum of 6 V and 5 A and two supplies providing a maximum of 20 V and 2.5 A.

The supplies can be operated in one of three modes: independent, series, or parallel. In the independent mode, the output voltage and current of each supply are controlled independently. In the two tracking modes, the variable outputs are connected either in series or in parallel; the controls of the master power supply adjust the voltage or current of both power supplies.

The PS2520G and PS2521G are GPIB programmable. The GPIB command sets are SCPI compatible.

Each power supply features 100 memories to store voltage and current limits for instant recall via the front panel or GPIB.

TekMeter™ THM420, THM560 and THM565

THM Series TekMeter™

The TekMeter Series combines the power of a true RMS digital multimeter and a 25 MS/s autoranging digital storage oscilloscope in one compact, simple-to-use, rugged, battery-powered unit. Designed for a wide variety of industrial applications, the TekMeter measures and displays signals from a few millivolts to several hundreds of volts. Its unique, autoranging scope tracks the signal and adjusts the instrument automatically. There's no need to be an expert scope user to get immediate results.

The simple interface allows access to numerous powerful and time-saving features such as automatic measurements, capturing and time stamping AC-line faults, calculation of transformer harmonic derating factor (THDF), stable triggering on complex AC-motor drive signals, measuring true power, plus several other DMM252 and scope functions.

A Unique Multi-Function Display

Unlike a traditional DMM, the TekMeter's large display tells you everything you need to know about what you're measuring. In addition to the numerical and analog bar readout you're used to seeing on a DMM, the display shows Max., Min., Max-Min., Hold, and Δ Hold all at once. You get more information about the signal, all on a single display.

Switch to the scope mode and TekMeter provides a waveform display similar to a traditional oscilloscope. The scope-mode display is autoranging, so it automatically scales and tracks as the signal changes, giving you hands-free operation. You can concentrate on the measurement, not the instrument, making measurements easier and faster.

Lots of Power in a Small Package

Even though the TekMeter easily fits in your hand, it packs more power and features than instruments many times its size. Its simple interface allows quick access to a host of features such as cursors, automatic measurements, true power measurements, Transformer Harmonic Derating Factor (THDF), and spike detect — all of which will help you get to the source of your problem more quickly. TekMeter can do anything you're doing now, and more. You get measurable results that get the job done.

TekTools Accessories

WP200 Parallel Printer Interface

The Parallel Printer Interface allows the 200 Series Handheld Digitizing Oscilloscope to connect directly to an Epson-compatible printer. Just push a button and this battery-powered (9 V) unit instantly acquires and prints the displayed waveform. The interface automatically disconnects when not in use.

700-0200. Model WP200.....EACH 310.00

BAT200 Portable Battery Kit

The BAT200 Battery Kit provides extended measurement time for remote or on-site measurements with a 200 Series Handheld Digitizing Oscilloscope. Includes an extra battery, charger, cigarette lighter adapter, clamp-on hood, and two accessory pouches.

700-0205. Model BAT200.....EACH 295.00

CAT200 Remote Control Software

The CAT200 Virtual Instrument Software recreates the front panel of a 200 Series Handheld Digitizing Oscilloscope on an IBM PC- or PS/2-compatible computer monitor. You can remotely control the front panel of the 200 Series using either the keyboard or a mouse. Connect the scope via a 2400-baud modem and you can control scope operation and collect waveform data from across the room or across the country.

700-0210. Model CAT200.....EACH 430.00

P400 1X High-Voltage Probe

The P400 1X High-Voltage Probe plugs directly into the 200 Series Handheld Digitizing Oscilloscopes. The P400 is UL listed and was specifically designed for making safe power measurements using the completely isolated floating input channels of the 200 Series.

700-0215. Model P400.....EACH 110.00

P850 10X High-Voltage Probe

The P850 10X High-Voltage Probe plugs directly into the 200 Series Handheld Digitizing Oscilloscopes. The P850 is UL listed and was specifically designed for making safe power measurements using the completely isolated floating input channels of the 200 Series.

700-0225. Model P850.....EACH 120.00

A603 150 Amp AC Current Probe

This "clothes-pin" style clamp-on probe is a current transformer for digital multimeters having an mA input. The A603 can measure RMS AC currents ≥ 2 amps and peak currents up to 150 amps over a frequency range of 45 Hz to 1 kHz. It provides a 1 mA output for each amp measured.

700-0625. Model A603.....EACH 70.00

A605 500 Amp AC Current Probe

This "busbar" style clamp-on probe is a current/voltage transformer for digital multimeters and TekMeter. The A605 can measure RMS AC currents ≥ 4 amps and peak currents up to 500 amps over a frequency range of 48 Hz to 1 kHz. It provides a 1 mV output for each amp measured.

700-0630. Model A605.....EACH 80.00

A610 500 Amp AC/DC Current Probe

This "busbar" style clamp-on probe uses a Hall Effect current sensor to provide a voltage output to digital multimeters. The A610 can measure RMS AC currents ≥ 2 amps and peak currents up to 500 amps over a frequency range of DC to 440 Hz. It provides a 1 mV output for each amp measured.

700-0635. Model A610.....EACH 180.00

A620 2000 Amp AC Current Probe

This industrial style clamp-on probe is a current transformer for the 200 Series Handheld Digitizing Oscilloscopes. The A620 can measure RMS AC currents from 100 milliamperes to 1000 amps peak over a frequency range of 1 Hz to 50 kHz. It provides a 1 mV, 10 mV, or 100 mV output for each amp measured. The A620 provides safe, easy, floating current measurements with no danger to you or your equipment.

700-0645. Model A620.....EACH 370.00

A621 1000 Amp AC Current Probe/BNC

This industrial style clamp-on probe has a BNC connector and a shrouded banana plug adapter so it can be used on digital multimeters, TekMeter™, and scopes. The A621 can measure AC currents from 100 milliamperes to 2000 amps peak over a frequency range of 5 Hz to 50 kHz. It provides a 1 mV, 10 mV, or 100 mV output for each amp measured.

700-0640. Model A621.....EACH 365.00

A622 100 Amp AC Current Probe/BNC

This "long nose" style clamp-on probe uses a Hall Effect current sensor to provide a voltage output to oscilloscopes. It has a BNC connector and a shrouded banana plug adapter so it can also be used on digital multimeters and TekMeter. The A622 can measure AC/DC currents from 50 mA to 100 amps peak over a frequency range of DC to 100 kHz. It provides 10 mV or 100 mV output for each amp measured.

700-0622. Model A622.....EACH 390.00

THM5BAT Rechargeable NiCad Battery Pack

The Rechargeable NiCad Battery Pack is specially designed for the TekMeter. With 750 milliamp hours of capacity, the TekMeter Battery Pack has 50% more energy than regular NiCad batteries. Matched cells ensure that the battery pack delivers full power. Buy two battery packs and keep one ready to go with the THM5CHG charger.

THM5CHG Quick Charge Battery Charger

Never be without power! Charge your TekMeter THM5BAT NiCad Battery Pack in one hour or less. The smart charger senses when the battery pack is fully charged and shifts into trickle charge mode to keep it fully charged, maximizing the life of your battery pack. A wall-mount transformer and a cigarette lighter adapter are included.

700-0545. Model THM5CHG.....EACH 129.00

THM5AC AC Power Adapter

The AC Power Adapter allows continuous operation of the TekMeter from an AC power source. The specially designed wall-mount transformer supplies power directly to the TekMeter battery compartment while maintaining the 600 V/floatability specification.

700-0650. Model THM5AC.....EACH 45.00

THM5HCA Protective Transport Case

The Hard-Sided Transport Case provides heavy duty protection for transport of your TekMeter and all its accessories.

700-0610. Model THM5HCA.....EACH 67.00

THM5SCA Soft Case

The Soft Case has an adjustable neck strap which frees you to make measurements that require both hands. A thumbscrew holds your TekMeter securely in the padded case, so even if tipped upside down it won't fall out. The Soft Case is also a carrying case with handle. There's space inside for probes, probe attachments, and a pocket for notes or reference guides.

700-0605. Model THM5SCA.....EACH 67.00

THMCOM1 Communications Pack

The Communications Pack provides an AC/DC cigarette lighter adapter, RS-232 cable, PC-link software, and a flip-out stand.

700-0620. Model THMCOM1.....EACH 295.00

TXMDXPB Deluxe Probe Set

The Deluxe Probe Set consists of four high-temperature, silicone-insulated probe leads with matching attachments. Each set includes a very sharp test point useful for piercing conformal coatings or corrosion that might interfere with accurate readings. The set also includes two mini-plunger clamps for hands-free operation, one rad hook-style test clip, and one black wide-jaw alligator test clip for secure attachment to ground.

700-0600. Model TXMDXPB.....EACH 99.00

**Instrumentation
Adapter Kit**

**TPI 3000A Coax
Connector Kit**

The TPI 3000 Kit includes male and female connectors of all eight types. Any adapter can be created on the spot, in just seconds. Simply screw any combination of 24 connectors to one of the 6 Universal Interfaces. No soldering or crimping is needed so connectors can be used over and over again in different combinations. All contacts are gold plated. Connector bodies are silver plated, machined brass with teflon insulation. The zippered, soft leather case protects and organizes the collection. The TPI 3000A Kit contains: 2 male and 2 female types BNC, N and UHF; 1 male and 1 female types SMA, Mini, UHF, F and RCA; and 6 Universal Interface Connectors. Spare pieces can be ordered individually.

**TPI-4026 CELLUDAPT
Cellular Technicians
Adapter Kit — NEW —**

The most exciting new coaxial product introduced in the last five years. All of the Features that made UNIDAPT famous combined with all new CELLUDAPT adapters to fit the antenna outputs of practically every cellular radio/telephone made. Also included in this 22 piece kit is an inductive coupler for fixed antennas, which consists of three feet of cable terminated with the UNIDAPT universal connector. New adapters will be introduced to fit new cellular radios/telephones as they become available. Expansion slots are provided in the foam line case for those new additions. All CELLUDAPT sections are made of silver plated machined brass with a gold plated phosphor bronze center contact anchored in a Teflon dielectric.

Individual pieces are the same as the TPI 3000A described to the 6 ft. Kit includes 2 male and 2 female of each connector plus 4 Universal Interfaces—20 pieces in all.

**Repairable Oscilloscope Probes —
250MHz, 300 MHz**

These probes fit all oscilloscopes with BNC connectors. They are intended for use by professional engineers and technicians who need accuracy and durability at an economical price. Cables are thin and flexible so they bend for easy handling, but they don't break. Modular probes screw together without soldering for instant, on-site repair. Performance criteria such as 1.2 nanosecond risetime and less than 3 percent overshoot assure precise measurements. Model numbers ending with AP have the activator pin for readout or automatic scale factoring.

*Switchable Probe.

Differential Oscilloscope Probe

The TPI model ADF15 is an active probe for making differential measurements with any oscilloscope.

Features

- ▶ Bandwidth: DC to 15MHz
- ▶ Safe - make floating measurements with oscilloscope grounded
- ▶ Input Voltage: 700 V dc + peak ac max.
- ▶ Easy to use - small, light, with internal battery
- ▶ Economical - half the cost of wide brand probes
- ▶ Simple - needs no isolation amplifier
- ▶ X20-X200 switchable attenuation
- ▶ For power supply, large motor drives and similar applications

**High Voltage
Probe**
**Model
HV40B 150Hz**

Low frequency probe for use with any instrument having input resistance of 10 Mohms.

Specifications. Bandwidth: 150Hz. Max. Input V. (DC + peak AC): 40,000V. Input Resistance: 1000 Mohms. Voltage Division Ratio: 1000:1. Cable Length: 1.5 meters.

955-0045. Model HV40C.....EACH 85.00

Repairable Oscilloscope Probes — 100 MHz, 200 MHz

Design improvements provide superior performance in an economical probe. New circuitry gives faster risetime and sharp pulse response. A rubber seal around the compensations screw and silicone insulation on the circuitry seal out moisture. Soft, slotted strain reliefs and better crimping prolonging cable life. The SP150 switch has self-cleaning contacts for greater reliability.

Multimeter Silicone Rubber Leads

All cables are silicone-rubber insulated. Soft, flexible when cold and burn-resistant. Durable. Wrap right angle versions around meter for storage. **Max. Voltage:** 1000 VRMS. **Max. Current:** 10 A. STLS is the same as TLS series with spring-loaded safety sleeves shield without accessories. Plug-on accessories for TLS series include 2 standard probes, 2 hook probes, 2 alligator clips and spade lugs. TL1000 has banana plug on measuring tip to accept push-on accessories and is supplied with 2 deluxe insulated alligator clips. TL1500 has spring-loaded safety sleeves. Each probe tip has a radial notch for wire bus layover. LTL1000S has rubber sheathed plugs. **Suffix letter "R" indicates right angle plug.**

3000 A/D, 6000 A/D Series Power Supplies

General Specifications

Output Voltage: Zero to rated voltage continuously variable with front panel voltage knob.
Output Current: Zero to rated current continuously variable with front panel current knob.
Line Regulation: CV — $\pm 0.01\%$ +2 mV; CC — $\pm 0.01\%$ +2 mA. **Load Regulation:** CV — $\pm 0.01\%$ +2 mV; CC — < 10 mA at 100 W; < 15 mA at above 100 W. **Ripple and Noise:** CV — < 0.5 mVrms at 100 W; < 1 mVrms at above 100 W; CC — < 1 mArms at 100 W; < 3 mArms at above 100 W. **Transient Response:** < 100 μ S to within 0.1% of set voltage (50% to 100% load change). **Output Impedance:** < 2 m Ω +2 mH. **Operating Range:** 0 to 40°C ambient temperature. **Display Accuracy:** Analog Meter — 3% of full scale; Digital Meter — $\pm 0.1\%$ +2 digits. **Overload Protection:** Automatic crossover from CV to CC mode. **Series Connection:** Different models can be chained to increase output up to 240 VDC. **Parallel Connection:** Another same model can be paralleled to increase output to 24 amps. **Power Requirement:** 100/120/220/240 $\pm 10\%$ VAC, 50/60 Hz single phase. **Supplied Accessories:** Power cord, hook-up leads, instruction manual.

Model 6000 A/D Series Specifications

5 V/5 A Fixed Supply. **Regulation:** ≤ 10 mV. **Ripple and Noise:** ≤ 2 mVrms. **Output:** 5 V ± 0.25 V. **Tracking Accuracy:** $\pm 0.2\%$ +10 mV. **Operation Mode Switch:** Independent. Two fully independent variable supplies at rated voltage and current and a fixed 5 V/5 A supply. **Series:** One variable supply with 2X rated voltage output at rated current. Or, one dual polarity tracking supply with rated output and current. Plus a fixed 5 V/5 A supply. **Parallel:** One variable supply with rated voltage at 2X rated current and a fixed 5 V/5 A supply.

Power Supplies

The new generation of DC power supplies are now in constant current, constant voltage modes. These wide range of supplies are for use in laboratories, industries, schools and hospitals. Output voltage and current values are displayed on a three digit DPM with $\pm 0.1\%$ resolution. These highly reliable models are fully protected against continuous output short circuit and overload.

WP-702B

WP-78A

WP-715B

WP-775B

WP-710

DC Power Supplies: WP-773B — 0-30 Volts at 0-3 Amps, WP-775B — 0-30 Volts at 0-5 Amps and WP-710 DC — 0-16Volts at 0-10 Amps

In the WP-773B and WP-775B DC power supplies, Vector-Vid has achieved the ultimate balance between precision technology and rugged durability. The WP-773B and WP-775B are constant current/constant voltage DC power supplies. Voltage is continuously variable at 0-30 VDC. Current is switchable for HI/LOW, each continuously variable at 0-0.6 A DC (LOW) or 0-3 A DC (HI) for the WP-773B and 0-1.0 A DC (LOW) or 0-6 A DC (HI) for WP-775B. Coarse and fine adjustments for voltage output are standard. Two front panel analog meters monitor voltage and current. Other exciting features of both models include switchable main power 110-120 VAC or 220-240 VAC (50-60 Hz), and a detachable power cord. **Specifications. Output Voltage:** 0-30 VDC (continuous coarse/fine adjust). **Output Current:** WP-773B — high - 0-3 A DC (continuous adjustment), low - 0-6 A DC; WP-775B — high - 0-5 A DC (continuous adjustment), low - 2.5 A DC. **Load Regulation:** $\leq \pm 0.1\%$. **Line Regulation:** $\leq \pm 0.1\%$. **Ripple:** ≤ 5 mV RMS. **Load Protection:** Protected against reverse polarity (current limiting). **Meter Accuracy:** $\pm 2.5\%$. **Size (H x W x D):** $6\frac{1}{2}'' \times 9'' \times 11''$. **Weight:** 11 lbs. **Power Requirements:** 110-120 V AC or 220-240 V AC (50/60 Hz).

The WP-710 offers 0-16 volts at 0-10 amps constant current/constant voltage to meet the many needs of the electronics industry. Voltage and current outputs are monitored by two front panel mounted analog meters. Constant current and constant voltage models are indicated by two front panel mounted LED displays.

AC/RMS Digital Wattmeters

WD-766A and WD-767 Wattmeters

AC/RMS Digital Wattmeters. LED display and indicators. Measures RMS voltage and current, and apparent power. Operates directly from 120 VAC line. **Specifications.** Line Voltage Input: 105 to 150 VAC. Power Factor: .5 to unity. Amp Accuracy: $\pm 1\%$ ± 1 digit. Watt Accuracy: $\pm 1\%$ ± 2 digits. Frequency Response: 40 Hz to 5 KHz. Model WD-766A. 1 KW, 10 A. 3-digit display. Max. Current: RMS — 10 A; Peak — 20 A. Max. Power: 999 W. Volt Accuracy: $\pm 1\%$ ± 1 digit. Resolution: 1 V, .1 A, 1 W. Model WD-767. 2 KW, 20 A. 3.5-digit display. Max Current: RMS — 20 A; Peak — 35 A. Max Power: 1999 W. Volt Accuracy: $\pm .75\%$ ± 1 digit. Resolution: .1 V, .01 A, 1 W. Dimensions: $5.75 \times 5.8 \times 8.5"$ ($14.6 \times 14.9 \times 21.6$ cm). Weight: 4 lbs. (1.8 kg).

WD-768 Wattmeter

The WD-768 Wattmeter is designed to provide quick, accurate, and direct measurement of RMS voltage, current, and apparent power. The WD-768 combines measuring versatility and accuracy in a compact, low cost unit. This unit incorporates three discrete analog output channels, one each for volts, amps, and watts. This feature allows independent monitoring of all three functions without regard to the front panel display selection. The WD-768 is designed to operate directly from the 120 VAC line, and line voltage can be measured up to 150 VAC. The WD-768 measures RMS current to 20 A RMS and power to 1999 W.

901-0768. Model WD-768.....EACH 670.00

WP-26A Isotap

- ▶ 105-130 V, 50-60 Hz
- ▶ Low — 105 V; Medium — 115 V; High — 130 V
- ▶ Direct 500 VA/750 VA
- ▶ Isolated — 400 VA/450 VA
- ▶ $5\frac{1}{4} \times 5 \times 4"$
- ▶ 151 Lbs.

The WP-26A Isotap has both primary (auto-transformer) windings and isolated secondary windings. A switch provides for setting them to deliver low, medium, or high AC output voltages with input line voltage from 105 to 130 volts. They greatly facilitate service of transformerless AC-operated equipment, devices with intermittent troubles, and hazardous equipment. They are essential for safe servicing in the school, lab or shop. Isotap is protected by a 4 amp circuit breaker. Supplied with 3-wire AC cord.

901-5726. Model WP-26A.....EACH 295.00

WP-29B Monitor ISOTAP

- ▶ Variable 0 to 150 VAC
- ▶ Max. Output 450 VA
- ▶ 3 Amp AC Continuous
- ▶ $\pm 2\%$ Accuracy
- ▶ Measures: AC Line and Load Voltage; AC Load Current
- ▶ Overload Protection

Designed to provide isolated AC output from 0 to 150 volts continuous. Input and isolated output can be monitored on $3\frac{1}{2}$ taut band meter with $\pm 2\%$ accuracy. Two Isolated Outputs: Polarized 3-prong AC socket and two banana jacks. Power Rating (Resistive Load): 450 VA. Primary to secondary leakage is limited to less than 0.1 milliamperes — 5 times lower than limits established in ANSI spec C101-1-1971. AC Input: 110 to 130 VAC, 60 Hz. With WG-413A output cables. Weight: 15 lbs.

901-0029. WP-29B.....EACH 455.00

Decade Boxes

- ▶ Accuracy 1% or Better
- ▶ Light Durable Construction
- ▶ High Quality Resolution
- ▶ 5 Year Accuracy Stability

Vector-VID's line of decade boxes feature the highest quality, aged standard resistors and capacitors available, with a typical accuracy stability of five years.

WC-412B R-C Circuit Box

- ▶ 36 Resistor Values
- ▶ 18 Capacitor Values
- ▶ 10% Tolerance

Offers 36 standard resistor values from 15 ohms 10 M ohms. 1 W power rating; tolerance $\pm 10\%$, and 18 capacitor values from 100 pf to .22 μ f, 600 V rating tolerance $\pm 10\%$. Selections are available individually, in series, or in parallel RC combinations. Switchable high or low resistance. Comes with plug-in test leads. Dimensions: $7 \times 5\frac{1}{2} \times 2\frac{1}{2}"$ ($17.5 \times 13.7 \times 6$ cm). Weight: 28 oz. (340 g).

WP-30 Monitor ISO-V-AC II

- ▶ Variable Isolated AC Outputs
- ▶ Current Output to 10.0 A Continuous
- ▶ Audible Leakage Test
- ▶ Adjustable Current Limiting
- ▶ Primary to Secondary Current Leakage Less Than 0.2 mA
- ▶ Meets ANSI Specifications C101.1 for Leakage
- ▶ Ratings from 150 VA to 1300 VA

Provides isolated AC output variable from 0 to approximately 150 volts continuous. Supplies a continuous 5 amp output current to a maximum of 650 VA. Includes a power line leakage tester. Supplied with two $3\frac{1}{2}$ meters. One monitors output voltage and the other can display output current or leakage. Accuracy of the meters is $\pm 2\%$. Two parallel three prong AC sockets are provided. Input: 110 to 130 VAC, 60 Hz. Protection: Output-replay, input-thermal sensor. Temperature Rise: 10°C (30°F). Dimensions: $6" \text{H} \times 14" \text{W} \times 12\frac{1}{2}" \text{D}$. Weight: 25 lbs.

WP-32 Monitor ISO-V-AC III

- ▶ Variable Isolated AC Outputs
- ▶ Current Output to 10.0 A Continuous
- ▶ Audible Leakage Test
- ▶ Adjustable Current Limiting
- ▶ Primary to Secondary Current Leakage Less Than 0.2 mA
- ▶ Meets ANSI Specifications C101.1 for Leakage
- ▶ Ratings from 150 VA to 1300 VA

Designed to provide isolated power to equipment and to provide fixed or variable output voltages. Meter Accuracy: Voltage — $\pm 3\%$ FS; Current Leakage — $\pm 2\%$ FS. Load Protection: AC Input — fuse; AC Output — adjustable current relay with manual reset. Output Voltage: 0-150 VAC continuous. Dimensions: $7 \times 14 \times 12.5"$ ($17.8 \times 35.6 \times 31.8$ cm). Weight: 42.3 lbs. (19.2 kg). Features leakage meter and audible alarm.

HD Series 100 Heavy Duty Digital Multimeters

- ▶ Waterproof
- ▶ Shockproof
- ▶ Drop-Proof
- ▶ High Visibility Yellow

- ▶ Fused 600 V
- ▶ Meets MIL-T-2880, Style A, Class 2

General Specifications. Display: 3 1/2 digit LCD except HD140B 4 1/2 digit LCD. Dimensions: 7" x 3.9" x 2.0". Operating Temperature: 0°C to 50°C. Battery Type/Life: NEDA 1604 9 V/2000 hrs. Weight: 19 oz. Warranty: One year.

HD100. The HD100 measures DC voltage to 1500 V, AC to 100 V, AC/DC current up to 2 amps. It has a basic accuracy of 0.25% and overload protection on all ranges.

743-0100. Model HD100EACH 185.00

HD110. The HD110 has all features of HD100, plus it measures up to 10 amps AC or DC, and it comes equipped with an audible continuity beeper.

743-0110. Model HD110EACH 219.00

HD110T. In addition to the features of the HD110, the HD110T provides direct temperature readings using any type K thermocouple. Temp. Range: (-4°F to +1999°F).

CPM Series True RMS Power Meters — NEW —

- ▶ True Power to 2000 kW
- ▶ Apparent Power to 2000 KVA
- ▶ Power Factor (cos ϕ)
- ▶ AC/DC Current to 2000 A
- ▶ AC/DC Voltage to 750/1000 V
- ▶ Resistance to 400 k Ω
- ▶ Frequency to 1000 Hz
- ▶ Surge/Peak/Average
- ▶ Analog Output
- ▶ Three-Phase Adapter
- ▶ RS232 Interface
- ▶ Scope Meter (Harmonic Analysis)

The CPM Series Clamp-On Power Meters combine the capabilities of many meters into one easy-to-use handheld instrument for power measurement when installing, maintaining, and monitoring electrical systems with traditional and nonlinear loads. Both the CPM2000 and the CPM2100 operate as a Wattmeter, Voltampere meter, and Power Factor meter, as well as an autoranging DMM with data hold, continuity, and diode test. Measurements are displayed on a 4-digit/4000 count display with a bar graph. Hall-effect sensors and a clamp-on jaw allow measurements without interrupting the circuit. Scope meter shows harmonics.

Series 2000 Professional Digital Multimeters

- ▶ True RMS — AC or AC+DC
- ▶ Auto Min. Max. Avg.
- ▶ 2 MHz Frequency Counter
- ▶ Fault Finder™ Intermittent Detector
- ▶ Probe Hold

- ▶ Peak Hold
- ▶ Capacitance to 2000 μ F
- ▶ 0.01 Ω Resolution
- ▶ Backlight

General Specifications. Display: LCD quadruplex, 19999 counts, menu features and bar graph. Dimensions: 7.5" x 3.5" x 1.3". Operating Temperature: 0°C to 50°C. Designed To: UL1244, IEC348, IEC1010. Battery Type/Life: NEDA 1604 9 V/200 hrs. Weight: 20 oz. Warranty: Three years.

2020. The 2020 is a 4 digit autoranging meter which measures up to 1000 VDC, 750 VAC, AC/DC current to 10 amps (fused), frequency to 2 MHz, capacitance to 2000 μ F, 50 ns logic pulse detector, intermittent detector, 0.25% basic accuracy. Plus True RMS (AC or AC+DC coupled, switchable), fiber optic backlit LCD, and Peak Hold. Safety features include Overload Alert, hazardous voltage warning, automatic low-battery shutdown and wrong input connection warning. Includes protective holster.

DM10XL

DM2

Pocket-Sized Digital Multimeters

General Specifications. Display: 3 1/2 digit LCD, 1999 counts. Operating Temperature: 0° to 50°C. Battery Type/Life: NEDA 1604 9 V/300 hrs. alkaline (170 hrs., DM2). Dimensions: 6.1" x 2.8" x 1.3" (4.7" x 2.8" x 1", DM2). Optional Accessories (XL Series): VC20 Padded Vinyl Carrying Case; H10/H10Y Protective rubber holster with tilt stand (black/yellow).

Special Features (XL Series). Safety Tester™. Detects and displays the presence of AC or DC voltage levels (positive or negative) through a series of LEDs. This feature does not use the multimeter's battery which means you can always ascertain a voltage presence even if the meter battery is dead. (DM10XL only) Input Warning Beeper. This warning beeper indicates that the test lead is plugged into a current jack when the function switch is not set to a current range. A safety feature for both the meter and user. Safety Test Leads. Insulation on the test lead probe tips allows only 3/32 mm exposure of metal for making those measurements in dense component areas. Fused 10 A Current Jacks. A safety feature previously found only in expensive DMMs, provides protection against meter damage. (DM10XL and DM15XL).

DM15XL. The DM15XL features a 20 MHz logic detector and also offers 28 measurement ranges, including AC volts to 750 V, DC volts to 1000 V, AC/DC current to 10 A (fused), resistance to 2000 M Ω , diode testing and a continuity beeper. Basic accuracy is 0.5%.

743-0010. Model DM15XLEACH 62.95

DM10XL. The DM10XL provides 21 ranges, measuring AC volts to 750 V, DC volts to 1000 V, DC current to 10 A (fused), resistance to 20 M Ω , diode testing and a continuity beeper. Basic accuracy is 0.7%. Safety Tester™ quickly indicates live voltage levels with LEDs (6, 12, 24, 50, 110 and 220 V).

743-0015. Model DM10XLEACH 52.45

DM5XL. The DM5XL provides 17 ranges to measure AC volts to 500 V, DC volts to 1000 V, DC current to 200 mA, resistance to 2 M Ω , diode test and continuity beeper. Basic accuracy is 0.8%.

743-0020. Model DM5XLEACH 41.95

DM2. The DM2 is a smaller sized unit with full DMM capacity, measuring AC volts to 500 V, DC volts to 1000 V, DC current to 200 mA, resistance to 2 M Ω , and diode test. Basic accuracy is 0.8%.

Scopemate 2™ IC and Component Tester

- Fast Testing of Most Components
- In or Out-Of-Circuit Testing
- Works with X-Y Mode Oscilloscopes
- Generates Simple Scope Patterns
- One Year Warranty

The Scopemate 2™ IC and component tester appeals to the engineer and technician as well as field service personnel. It operates as a valuable tool for determining component failure while testing for shorts and opens as well as diode action and leakage in semiconductors. The Scopemate 2™ has the capability to test all types of analog and digital ICs with as many as 40 pins, in addition to resistors, capacitors, and diodes using an oscilloscope's X-Y mode. Testing can be handled in the field or on the bench and the unit comes complete with cables, leads and operator's manual. Extension cables are options available for in-circuit testing of 14, 20, 24 and 40 pin ICs.

FG2A Function Generator

- Five Outputs — Sine, Square, Triangle, Ramp, and TTL
- Seven Ranges — 0.2Hz to 2MHz
- VCF Input (Voltage Controlled Frequency)
- DC Offset Control
- Duty Cycle Control
- One Year Warranty

The FG2A, a versatile general purpose signal source, has five different outputs that can be modified with variable duty cycle and DC offset controls. The VCF input allows the frequency output to be controlled by a DC voltage. The FG2A is shipped with two test cables. Two switchable 20dB attenuators permit easy setting of low-amplitude signals.

UC10A Universal Counter

- Universal Counter From 5Hz to 100MHz
- Measures Frequency, Period, Frequency Ratio, Time Interval, Unit Count
- Large 8-Digit LED Display
- Self-Checking Capability
- Highly Accurate Readings
- One Year Warranty

The Model UC10A Universal Counter has six measurement functions and four gate time selections to make it a counter that's universal for a wide variety of applications. The UC10A has a large LED display, reset capability and signal attenuation. The UC10A is shipped with two test cables.

FG3B Sweep Function Generator

- Six Outputs — Sine, Square, Triangle, Ramp, TTL, and CMOS
- Seven Ranges — 0.2Hz to 2MHz
- Sweep Generator — Linear or Log Sweep
- Modulation — AM or FM
- Built-in 100 MHz/5 Digit Counter
- One Year Warranty

The FG3B with six different outputs, sweep generator, modulation, and built-in frequency counter is the bench top instrument that does it all. Any output can be modified with the variable duty cycle and DC offset controls. The FG3B provides logarithmic or linear sweep of any signal output, amplitude or frequency modulation with internal or external signals and a frequency counter that may be used as a stand-alone counter for measuring external signals up to 100 MHz. The FG3B is shipped with two test cables.

743-0810. FG3BEACH 489.95

FC130A High Frequency Counter

- 1.3 GHz Frequency Counter
- Measures Frequency, Period and Rate Per Minute (RPM)
- Large 8-Digit LED Display
- High Sensitivity and Resolution
- Built-in Self Diagnostics
- One Year Warranty

The Model FC130A is a microprocessor-controlled frequency counter that measures signals from 0.01 Hz to 1.3 GHz with up to 10 mV sensitivity. The FC130A is capable of monitoring transmitter output frequencies with a simple whip antenna due to its high sensitivity and broad frequency range. The FC130A is shipped with two test cables.

2% Accuracy Panel Meters

S Series Surface Mount. These clean-cut meters with straightforward design and pleasing aspect ratio are leaders of the line and will add distinction to any instrument or control panel. Meet or exceed performance required of ANSI C39.1-1981. **Accuracy:** $\pm 2\%$. **Tracking:** $\pm 1\frac{1}{2}\%$. **Repeatability:** $\pm 0.5\%$. **Response Time:** 1.5 seconds max. for all ranges except 0-50 μA which is 3.0 seconds max. **Scale Arc:** 100°. **Shielding:** self shielding — no special calibration needed for steel or nonferrous panel mounting, including iron vane meters. Specifications are percent of full scale. Custom scales and special inputs available as custom orders. Bezels available for window mount. Large quantity pricing available.

M Series Economy Moving-Magnet Panel Meter

OMS and MSQ Series

ME Series

3MAS Series

- Features 5% Accuracy of Full Scale
- Rectangular, Square, or Edgewise Configuration
- Flush or Surface Mount without Modification

- Precision-Molded Covers and Cases; UL Recognized Plastic Optional

Quality meters feature high-torque, powerful ballistic movements that permit mounting in steel panels without special calibration and production-engineered mounting and electrical connections. OMS and MSQ series square meters are 1 1/2" and 2 1/2" units with operating zero adjusters and scales printed on translucent plastic. ME series edgewise meters are 2" long units that are interchangeable with many d'Arsonval meters. Feature flush-to-panel covers — no disfiguring bulge. 3MAS series rectangular models are 3 1/2" meters with operating zero adjusters and scales printed on translucent plastic, permitting diffused lighting. All M-series meters operate in a temperature range of 0°C to +50°C.

Big-Little™ LCD Digital Panel Meters

BL series DPMs feature 3 1/2-digits that read 1999 full scale 1/2" high digits on high contrast liquid crystal display. **Accuracy:** $\pm (0.1\%, \pm 2 \text{ counts})$. **Resolution:** 1 part in 2000. Auto polarity (—) displayed. Type **BL-100** are surface/window mount with programmable decimal points. **BL-130** are bezel mount with user selectable decimal points. Both types have 13-pin terminals. **BL-176** are flat pack DPMs with solder pad connections. **176-BK** is bezel mounting kit for flat pack DPMs.

2000 Series Industrial Digital Panel Instruments

Fits industry standard 1/2 DIN panel cutout. Depth behind panel less than 1". Meets NEMA 4, 12, and IPC 55 requirements for splash-proof and hose down. Auto polarity. Overrange indication. Common mode rejection greater than or equal to 100 dB at 50-60 Hz. 7 segment, 0.5" high, back lit 3 1/2 digit LCD display is readable in sunlight or under bright lights. High impact resistant polycarbonate case. **Operating Temperature Range:** -20°C to +60°C. User selectable decimal point and built-in screw terminals. All units require 115 VAC power except Loop Powered Process Meters.

DC Volts and Amperes

Accuracy: $\pm (0.1\% + 1 \text{ count})$ typical. Green backlit background with dark numerals.

Big-Little™ Backlit Digital Panel Meters

The series BL300 have dark numerals on a green backlit background; the series BL500 have red backlit numerals on a dark background. They can be easily read in dark areas or in bright sunlight. These 3 1/2 digit, Liquid Crystal Display meters utilize LED backlighting; have an operating range of -20°C to +60°C; and read 1999 full scale. 0.5" high numerals; user selectable decimal point; and Autopolarity. The backlight power (isolated from meter) is 5 VDC and power consumption is 165 mADC (nominal) for the red backlighting and 115 mADC (nominal) for the green backlighting. Select between green or red backlighting and window or bezel mounting.

Genesis® Microprocessor Based Digital Controller

Powerful 16 bit microcontroller is ideally suited for process control. User adjustable parameters are stored in nonvolatile EEPROM. NEMA 4 meter requires 1/8th DIN panel cut-out with less than 5" depth behind panel. Illuminated alphanumeric LCD display is 0.5" high, four and one-half digit with dummy zero. Isolated input, outputs and power supply. Peak and valley hold; open sensor and over range indication. Power supply operates from 85-265 VAC or 90-300 VDC. Outputs include up to 4, Form C Relays (7 Amp/250 VAC) for alarm and/or control. Optional plug-in cards are available for proportionate voltage/milliamper output and data communications. User adjustable maximum resolution; dummy zero (0, 1 or 2); decimal point (5 places); security lockout; output configuration; hysteresis; and mode of on-off control. Temperature units offer the user the additional ability to select: degrees F or C; type J, K, or T thermocouple for temperature measurement from -450°F to 2500°F; RTD measurements from -328°F to 1472°F with 1.0° or 0.1° resolution. **Typical Accuracy:** DC voltage $\pm 0.005\%$ FS; DC current is $\pm 0.05\%$ FS; Tempco of RTD is 0.03°C. The GENESIS® meters are available with bright red numerals on a dark background or dark numerals on a green background.

Universal Selectable Industrial Digital Panel Instruments

This series of panel meters provide the ability for the user to switch select range and scale to display the input signal in engineering units. 1/8 DIN panel cutout. **Depth Behind Panel:** less than 1". NEMA 4, 12, and IPC 55 case for splash-proof and hose down applications. Built-in screw terminals. Impact resistant polycarbonate case. 7 segment, 0.5" high, backlit 3 1/2 digit LCD display is readable in sunlight or low ambient lighting conditions. Common mode rejection is greater than or equal to 100 dB at 50-60 Hz with an operating temperature range of -20°C to +60°C.

DC Volts and Amps

Factory calibrated to the input range and display shown, although they may be re-scaled to any DC amp or voltage inputs shown via changes in the switch settings. The zero range adjustment for either 4-20 mADC or 1-5 VDC is -1000 to +1500 counts. The zero range adjustment for non-offset inputs is -1500 to +1500 counts. Full scale span adjustment for all ranges is 0 to 2000 counts. All DC units require 115 VAC external power and have dark numerals on green backlit background.

Stock No.	Mfr.'s Type	Input Range	Display	EACH
229-6140	2133-3401-04	200 mVDC	0 to 199.9	183.60

229-6150	2133-3419-04	4-20 mADC	0 to 100.0	202.40

AC Volts and Amps

Feature True RMS measurement and have been designed for either POWER or INSTRUMENT applications. The POWER ranges are for full scale inputs from 20 to 250 volts AC or 2 to 5 amps AC. The INSTRUMENT ranges are for full scale voltage inputs of 200 mVAC to 20 VAC or full scale amperage inputs of 200 mAAC to 2 AAC. Both the POWER and the INSTRUMENT units can be re-scaled by the user to any input, within their designated range. The user need only to rest the DIP switches located on the rear of the unit to volts or amps. Span and offset adjustments are available via a 25 turn potentiometer. These universal AC units are available with dark numerals on a green backlit background or bright red numerals on a dark background. Both require external, user selectable, 115/230 VAC power.

BGE™ Elliptical Bargraph with Single or Dual Inputs

The BGE series elliptical LCD bargraph/digital panel meter utilize chip-on-board and surface mount component technology. Fast responding (25 times per second) 100 segment, 3 1/2" long bargraph gives trend information and follows a rapidly-changing input signal with a typical 1% accuracy. The independent 3 digit (± 999), seven segment, 0.34" height display (updated 2.5 times per second) gives accurate readout of a second signal input with 0.1% typical accuracy. The digital readout has a selectable, three position decimal point. The input signal to the bargraph and digital display is 0 to 200 mVDC with the resultant display of 999 digital counts and 100 segments of the elliptical bargraph displayed. The bargraph and digital display can monitor either two separate input signals or they can both be connected to monitor one input signal. By incorporating the dual displays into one unit, the BGE series is ideal for power supplies, UPS systems, or any application that monitors two perimeters. The backlit display allows readability in sunlight or low ambient lighting conditions. The dual displays share either 5 VDC or 9 VDC power. Typical power consumption is 165 mA (nominal) for red displays and 115 mA (nominal) for green displays. These units are available in three different display configurations: green segments on a dark background; red segments on a dark background; and a green background with dark segments. The standard labeling is 0 to 1000 units on the elliptical bargraph and no labeling on the digital readout.

*All back lighting required 5 VDC power.

ICN77000 Micro-Infinity™ Series 1/16 DIN Autotune Temperature/Process Controllers

- Companion Design Compliments INFINITY™ Series Indicators
- Extremely High Accuracy, $\pm 0.5^\circ\text{C}$; 0.03% Rdg. For Process Inputs
- Dual 4-Digit LED Display With Indicators For Output and Alarm Status
- Relay, SSR, DC Pulse, 0-10 V and 0-20 mA Output Types
- Ramp To Setpoint Feature Standard
- Universal Power Supply, VAC Or VDC (Optional 10-34 VAC Or VDC)
- Thermocouple, RTD Or Process Voltage/Current Input
- Single and Dual Output Models With Dual Alarm Capability
- Optional RS-232, RS-485, Analog Output Or Remote Setpoint Selection

3 Versions Available

- 1/16 DIN Bezel With Unique 1.75" Round Cutout, NEMA 12 Protection
- 1/16 DIN Cutout With 2.1" Square Bezel, NEMA 4 Protection
- 1/16 DIN Bezel and Cutout, NEMA 12 Protection

The ICN77000 Series meters feature a large, dual display, front panel configuration, and selectable temperature/process inputs. Available in single and dual output configurations, the ICN77000 meters are available with relay, SSR, DC pulse, analog voltage or current outputs. A single alarm is standard. Options include a second alarm, RS-232, RS-485, analog output or remote setpoint selection. Please specify options at time of order.

DRN Series DIN Rail Mount Signal Conditioners

- Manually Scalable Or Computer-Configurable Models
- Models Available For Thermocouple, RTD, Process, Strain, Frequency/Pulse, AC Voltage and Current
- 0-10 V, 4-20 mA Or 0-20 mA Analog Output

The DRN Series DIN rail mount signal conditioners represent state-of-the-art signal conditioning technology, ideal for all process and power monitoring applications. Models feature 3-way isolation, high accuracy input and programmable outputs. The signal conditioners are excellent front-end interfaces for programmable logic controllers or data acquisition systems. Models are available for thermocouples, RTDs, AC voltage, AC current, process voltage, strain, and frequency/pulse inputs. For maximum user-configurability, two designs are available: one with complete input-output scaling and calibration via an RS-232 link to any PC, and the other with manual configuration and calibration via DIP switches and buttons.

Stock No.	Mfr.'s Type	Description	EACH
544-0017	DRN-TC-C/N	Computer-configurable, J, K, T, E, R, S, B, J DIN input	325.00

Infinity™ C Series Indicators/Controllers

- 9 Models For Process, Thermocouple, RTD, Thermistor, Strain and pH Inputs
- Dual 7 A Relays and Analog Output Options Available At Time Of Order
- High Accuracy, 4-Digit LED
- Sleek 1/2 DIN Design
- 115 VAC Power Standard — 230 VAC, 10-32 VDC Or 26-56 VDC Power Also Available

INFCT Thermocouple Input Temperature Meter

Standard features include 0.1° or 1° resolution, °C/°F switchable.

Stock No.	Mfr.'s Type	Signal Input	Control Output	Analog Output	EACH
544-0038	INFCT-000	J, K, T or J-DIN	No	No	245.00
544-0039	INFCT-001		No	Yes	325.00
544-0040	INFCT-010		Yes	No	315.00
544-0041	INFCT-011		Yes	Yes	395.00

INFCS Strain Meter

Standard features include a wide selection of signal inputs, dual setpoints, peak reading, large offset capabilities for display in engineering units, front panel and remote tare, user selectable sensor excitation of 5,10,12 or 24 VDC.

544-0042	INFCS-000	0-100 mV, ±50 mV,	No	No	245.00
544-0043	INFCS-001	0-5 V, 1-5 V, 0-10 V,	No	Yes	325.00
544-0044	INFCS-010	±5 VDC, 0-20 mA,	Yes	No	315.00
544-0045	INFCS-011	or 4-20 mA	Yes	Yes	395.00

INFCP Process Meter

Standard features include a wide selection of signal inputs, dual setpoints, peak reading, large offset capabilities for display in engineering units, front panel and remote tare, user selectable sensor excitation of 5,10,12 or 24 VDC.

544-0046	INFCP-000	0-100 mV, ±50 mV,	No	No	245.00
544-0047	INFCP-001	0-100 mV, ±50 mV,	No	Yes	325.00
544-0048	INFCP-010	0-5 V, 1-5 V, 0-10 V,	Yes	No	315.00
544-0049	INFCP-011	or 4-20 mA	Yes	Yes	395.00

Infinity™ C True RMS Meter

- 4-Digit, 14-Segment Red LED
- High 0.1% Of Reading Accuracy
- AC Current and Voltage Ranges
- Smart Filtering Detects The Difference Between A Spike Or Process Change
- Front Panel Configuration
- Peak and Valley Detection and Memory

The INFCAC true RMS meter represents an advance in AC monitoring and control. The two models available are an AC voltmeter and an AC ammeter. The INFCAC has broad scaling capabilities for most applications. Easy plug-in rear panel connectors make installation/removal quick and easy. The range can be changed via the front panel or via the serial communications option. Security is provided by an internal hardware lockout.

INFCR RTD Temperature Meter

Standard features include a choice of 0.00385 or 0.00392 alpha curves, 2, 3, or 4 wire RTDs, 0.1° or 1° resolution, °C/°F switchable.

Stock No.	Mfr.'s Type	Signal Input	Control Output	Analog Output	EACH
544-0050	INFCR-000	0.00385 or 0.00392	No	No	245.00
544-0051	INFCR-001		No	Yes	325.00
544-0052	INFCR-010		Yes	No	315.00
544-0053	INFCR-011		Yes	Yes	395.00

INFCH Thermistor Meter

Standard features include accuracy of ±0.1°C, resolution of 0.1° or 1°, °C/°F switchable.

544-0054	INFCH-000	400 Series or 700 Series	No	No	245.00
544-0055	INFCH-001		No	Yes	315.00
544-0056	INFCH-010		Yes	No	315.00
544-0057	INFCH-011		Yes	Yes	395.00

INFCRP Proportional RTD Temperature Meter

Features time proportional relay and open-collector outputs, 0.1° or 1° resolution, °C/°F switchable, dual 6 A relay outputs and analog outputs.

544-0058	INFCRP-011	0.00385	Yes	Yes	395.00
----------	------------	---------	-----	-----	--------

INFCTP Proportional T/C Temperature Meter

Features time proportional relay and open-collector outputs, 0.1° or 1.0° resolution, °C/°F switchable, dual 6 A relay outputs and analog outputs.

544-0059	INFCTP-011	J, K, or T	Yes	Yes	395.00
----------	------------	------------	-----	-----	--------

INFCDR Differential RTD Temperature Meter

Accepts 2, 3, or 4 wire RTDs, a choice of 0.00385 or 0.00392 alpha curve, front panel selection of T1, T2 or T1-T2 indication, 0.1° or 1° resolution, °C/°F switchable.

544-0060	INFCDR-000	0.00385 or 0.00392	No	No	345.00
544-0061	INFCDR-010		Yes	No	415.00
544-0062	INFCDR-011		Yes	Yes	495.00

INFCDT Differential Thermocouple Temperature Meter

Features include front panel selection of T1, T2 or T1-T2 indication. 0.1° or 1° resolution, °C/°F switchable.

544-0063	INFCDT-000	J, K, T, or J-DIN	No	No	345.00
544-0064	INFCDT-010		Yes	No	415.00
544-0065	INFCDT-011		Yes	Yes	495.00

INFCPH pH Meter

544-0066	INFCPH-011	pH	Yes	Yes	395.00
544-0067	INFC-011	Conductivity	Yes	Yes	395.00
544-0068	INFCOR-011	ORP	Yes	Yes	395.00

*U.S. and International Patents and Pending Applications.

*Note: relay and analog outputs must be specified at time of order. 230 Vac, green display and serial communications available upon request.

Infinity™ Series 1/2 DIN Indicators/Controllers

- High Accuracy, 6-Digit, 14-Segment LED
- Optional 7 A Dual Relays
- Optional Scalable Analog Output
- Optional Serial RS-232 Or RS-485 Communications

High accuracy 6-digit panel meters allow user to select various input signal via front panel pushbutton and jumpers. NEMA-4 front panel, security lockout. For INFP and INFS units there is a choice of 10 or 24 VDC sensor excitation. Inputs can be scaled to engineering units. The INFs come with 4 programmable open-collector outputs for setpoint or alarms, read rates up to 13/sec, high accuracy, peak/valley detection with memory. Standard 1/2 DIN case panel cutout. Strain models have Auto Tare.

Infinity™ D Series Economical Meters For Process, Temperature Or Strain

IDP-0
(Shown With
HHCT-6 Milliamp
Calibrator/Meter)

- Thermocouple, Process and Strain Input Models
- 4-Digit Red LED Displays
- Front Panel Setup
- 115 VAC Power Standard
- User Selectable Inputs

Process Meter — Type IDP: Easily scaled to engineering units, -1999 to +9999 display, front panel and remote tare, peak or valley detection and memory.

Temperature Meter — Type IDT: °C/°F switchable, 1° and 0.1° resolution, min./max. recall, external display HOLD input.

Strain Meter — Type IDS: Ratiometric input, easy scaling, front panel and remote tare set and reset, min./max. recall, external display HOLD input.

Stock No.	Mfr.'s Type	Type	Input Types	Excitation	EACH
544-0093	IDP-0	Process	0-5 V, 1-5 V, 0-10 V, 4-20 mA	10 or 24 VDC	155.00
544-0094	IDT-0	Thermocouple	J, K, T, J DIN	N/A	225.00
544-0095	IDS-0	Strain	±20 mV to ±2.0 mV	5, 10 or 24 VDC	245.00
544-0096	HHCT-6	mA Calibrator	0-21 mA	0-21 mA	495.00

Handheld Infrared Thermometers

With a combination of powerful features, the new portable and rugged OS520 series infrared thermometers offer solutions for many non-contact temperature measurement applications. Emissivity range of 0.1 to 1.0 is adjustable in 0.01 increments, provides versatility when measuring a variety of surfaces. A custom backlit LCD display provides dual digital display of current and max. or min. temperatures simultaneously. This provides the user with more information at a glance. The OS520 also features a high alarm setpoint, providing both audible and visual indication of the alarm status. The standard 1 mV per degree analog output allows interfacing with data acquisition equipment, including chart recorders, dataloggers and computers. 1% rdg. accuracy standard.

Stock No.	Mfr.'s Type	Infrared Thermometer	EACH
544-0097	OS520-E	0-1000°F range, 10:1 distance to spot size ratio.	495.00
544-0098	OS521	0-1000°F range, 20:1 distance to spot size ratio. Low alarm, ambient target temperature compensation, RS-232 output, printer output.	895.00
544-0099	OS522	0-1600°F range, 30:1 distance to spot size ratio. Same features as OS521 with data storage and laser sight.	1295.00

Infrared Sensors With Thermocouple Or 1 mV/Degree Output

The OS-TAC Series handheld non-contacting infrared sensors feature a choice of either thermocouple or analog outputs. The OS-TAC-J offers Type J thermocouple output whereas the OS-TAC-K offers Type K thermocouple output allowing for simple connection to any thermocouple meter or controller. The OS-TAC-MV has a 1 mV/°C or 1 mV/°F switchable output which is compatible with a wide variety of voltmeters and process controllers. Both meters feature emissivity of 0.1 to 1.0 adjustable in 0.01 increments and a temperature range of -17 to 398°C (0 to 750°F). An additional feature is the convenient tripod mount for permanent and fixed position mounting. The output from the OS-TAC is compatible with temperature indicators designed for K or J thermocouples. HHMI digital thermometer sold separately. See page 963.

Stock No.	Mfr.'s Type	Description	EACH
544-0100	OS-TAC-MV	Infrared to analog converter, 1 mV/° output	199.00
544-0101	OS-TAC-K	Infrared to T/C converter, type K output	199.00
544-0102	OS-TAC-J	Infrared to T/C converter, type J output	199.00

Panel Meters and Test Equipment

PM Series Miniature Panel Meters — Voltage, Current, Ratio Meters

- Small Stackable Case
- Multiple Options
- 0.3" Red LED Display (Green and Yellow Option)
- Automatic Zero and Polarity Indication
- Special Scaling and Zero Offset Option
- Presettable Decimal Points

The PM Series full-functioned miniature digital panel meters are suited for Voltage (DC or AC), Ratio or Current applications. They feature DC reading (Model PM-352 has an AC reading option) as well as DC or AC power options. Highly accurate (from 0.1% to 0.02% full scale), with rapid update rates (three readings per second), these meters feature a presetttable decimal point. **Common Mode Rejection Rates:** 80 dB min. **Normal Mode Rejection Ratio:** 40 dB min. **Warm-Up to Rated Accuracy:** 10 seconds. Connector, if required, must be purchased separately.

Model PM-349 3 1/2 Digit LED Voltage Meter

RM-Series Panel Meters — Voltage, Current, Ratio, or Ohms

- High Accuracy (From 0.1% to 0.02% Full Scale)
- Optional 120 or 240 Vac Power Input
- Automatic Zero and Polarity Indication
- Special Scaling and Zero Offset
- Bright Red 0.56" LEDs (Green and Yellow Option)
- 0.6" LCD RM-351 and 0.4" LCD Display RM-451 and RM-453 Models
- +5 Vdc Power Standard (+5, 12, 24, 28 Vdc Isolated Optional)

Ideal for OEM and replacement applications. New large 0.8 inch LED display available on RM-350 model. 2000 variations, sized to industry standard case (1/8 DIN/NEMA cutout). Meter standard is DC powered and DC reading. AC power and/or AC reading option can be ordered. **Accuracy:** 0.1% to 0.02% full scale. **Update Rate:** 3 readings per second. **Common Mode Rejection Rates:** 80 dB min. **Normal Mode Rejection Ratio:** 40 dB min. A presetttable decimal point to any of 3 or 4 locations. **Warm-Up to Rated Accuracy:** 10 seconds. **Operating Temperature:** 0°C to 50°C ambient. MUX/BDC output on some models, choose Edge Connector (EC) or Terminal Block (TB).

X-Series Low Cost Digital Panel Meters DC Volt and DC Ammeters

- Short Depth, Only 1/2 Inch Behind Panel
- Accuracy from 0.2% to 0.1% Full Scale
- Automatic Zero and Polarity
- Bright Red 0.56" LEDs (Green or Yellow Option)
- Special Scaling and Zero Offset Available
- Pin Connector

The X series meters are low-cost, short depth that are ideal for shallow equipment. Select 100 mV to 1000 V ranges depending on the model, all meters have a presetttable decimal point, also a connection for external reference supply. **Update Rate:** 3 readings/second. **Power:** +5 Vdc ±5% (at 200 mA for X-32 and X-34, 6 mA for X-37). **Weight:** approximately 2 oz. **Operating Temperature:** 0°C to 50°C ambient. **Case Size:** 1.9H × 4W × 1.1D (0.5" behind bezel). Connector, if required, must be purchased separately.

Temperature Meters (3 1/2 Digits)

- Versatile, Low Cost Meters in 3 Case Sizes
- 3 1/2 Digit, Bright Red LED Display (Green or Yellow Option)
- Readout in Degrees for °F or °C
- Optional 120 or 240 Vac Power Supply
- DC Powered at +5 Vdc
- K Thermocouple Standard (J, T, or E are Optional, Specify With Order)

Accuracy: 0.1% F.S. **Resolution:** One part in 20,000. **Update Rate:** 3 readings per second. **Automatic Polarity Indication, Overload Indication, Warm-Up To Rated Accuracy:** 10 seconds. **Display:** 0.56" 3 1/2 Digit LEDs (1999 counts) (0.3" for PT series). **Case Size:** mini — (0.94"H x 2.88"W x 3.40"D); 1/8 DIN — (1.9"H x 4.0"W x 1.2"D); short depth — (1.9"H x 4.0"W x 4.5"D).

Strain Gauge/Millivolt Panel Meters

- 10 V Excitation Voltage Built-in
- Fully Adjustable Zero and Span
- Designed-In Excitation Voltage Compensation Circuits
- Automatic Overload Indication
- Presettable Decimal Point
- 120 Vac Power Supply Option

Counters

- Crystal Time-Base (PF-5 and RC-5)
- DC Powered at +5 Vdc
- Bright Red LED Display (Yellow and Green Option)
- Versatile Meters in Four Case Styles

Accuracy: ±1 count. **Input Signal Voltage:** +3 V to +15 V, +3 V to 700 V on model PF-5. Display hold, presettable decimal point, leading zero suppression. **Case Size:** mini — (0.94"H x 2.88"W x 3.40"D); 1/8 DIN — (1.9"H x 4.0"W x 1.2"D); Short depth — (1.9"H x 4.0"W x 4.5"D); LM — (1.9"H x 2.7"W x 4.0"D).

CM-1 TB Current Loop Meter

The NLS Model CM-1TB Current Loop Meter is a 3 1/2 digit panel meter packaged in a DIN/NEMA instrument case. Meter reads 4 to 20 mA or 10 to 50 mV loop. However, recalibration to display directly in various engineering units is readily accomplished in the field. The readout is a large 0.6 inch high liquid crystal display (LCD) suitable for outdoor or indoor viewing. Three programmable decimal points and large + and - signs are included. Polarity display for positive and negative loop currents is automatic. Overload indication is provided. Accuracy is ± (0.1% of reading + 1 digit). The popular DIN/NEMA instrument case uses a retaining spring so that no tools are needed for quick installation and removal. Weight is a mere 5 ounces. In single loop systems it provides improved resolution, fewer errors and more operator convenience. In multiloop systems the CM-1TB is an excellent monitor which can be used for trend sensing without interrupting the process control system. CM-1TB is a modern digital current loop meter which converts standard loop currents to engineering units without any source of power other than the current loop input.

TR-2 Circuit/Component Analyzer

The TR-2 Tracer is a versatile, low-cost, compact circuit/component analyzer. This small, lightweight portable tracer measures impedance, inductance, and capacitance. It provides two switch-selectable signal frequencies (150 Hz and 2 kHz). Three switch-selectable peak voltages (2.5 V, 12.5 V, and 50 V) provide three test ranges (0-100 phms, 100-100 K ohms, and 500-500 K ohms). Besides testing isolated components, this bench-type tracer allows in-circuit testing. The large (2.5" diagonal length) green phosphor screen and two input channels make it easy for an operator with only minimal training to tell at a glance how a test component compares to one that's known to be good. Features manual or automatic switching between channels. An easy-to-read LED indicator tells which channel is in operation. **Power Source:** Operates continuously from 115 VAC source, 50 to 400 Hz when connected to battery charger or battery operated. **Operating Temperature:** 0 to +40°C. **Size:** 2.9"H x 6.4"W x 8.0"D. **Weight:** Less than 3 lbs.

667-7302. TR-2. Battery Powered.....EACH 1020.00

Portable Dual Trace Miniscope

- 30 MHz Bandwidth
- Battery or Line Operation

Model MS-215. Features dual trace — 2 channel; separate, chopped or alternate modes. 30-megahertz bandwidth. External and internal trigger. Battery (rechargeable) or line operation (115 VAC, 50-400 Hz). **Input Impedance:** 1 megohm in parallel with 50 pF. **Maximum Input Voltage:** 350 V(DC and Peak AC). **Slope:** + or -, switch selectable. **Sensitivity:** less than 1 div. for internal trigger and less than 1 volt for external trigger. **Calibrator:** a square-wave signal of 1 volt p-p is provided. Voltage accuracy is ±5%, frequency is approximately 1 kHz. **Display:** CRT, bluish-white phosphor, medium persistence. **Operating Temperature:** 0° to 40°C. **Size:** 2.9"(73.66)H x 6.4"(162.56)W x 8.6"(218.4)D. 3.6 lbs. (1.59 kg) with batteries. Includes two shield input cables with BNC connector and alligator clips, three mini-banana plugs and battery charger.

Model MS-215 Portable Dual Trace Miniscope

- Dual Trace — 2 Channels
- Chopped or Alternate Modes

Model MS-215. The miniscope may be small but it delivers a big performance. Features automatic or line sync modes, battery or line operation, external and internal trigger, and 15-megahertz bandwidth. **Time Base:** 0.1 µSEC/div to 0.5 SEC/div in 21 calibrated ranges. **Input Impedance (Vertical and Horizontal):** 1 megohm in parallel with 50 pF. **Maximum Input Voltage (Vertical and Horizontal):** 350 V (DC and Peak AC). Power consumption is less than 15 W. Comes with two shielded input cables with BNC connector and alligator clips, three mini-banana plugs and battery-charger. **Size:** 2.9" x 6.4" x 8.5" (73.7 x 162.6 x 203.2 mm). **Weight:** 3 lbs. (1.36 kg) with rechargeable batteries.

Model 850 Rectangular Panel Meters

Model 850. $2\frac{1}{2}$ inch rectangular panel meters have snap-on plastic crystal and an accuracy of $\pm 5\%$ of full scale. DC types have moving magnet (bridge-type) design. AC types double-vane repulsion jeweled bearing. To order conventional panel meters which mount in $2\frac{1}{2} \times 2\frac{1}{2}$ inch hole, replace "X" in stock no. with an "8". To order behind the panel meters, replace "X" in stock no. with a "6". (Note: These meters may be mounted either in front of the panel thru a $2\frac{1}{2} \times 2\frac{1}{2}$ inch hole or from behind the panel thru a rectangular cut-out.) Behind the panel mounting hardware not supplied. *External current transformer required.

Model 750 Rectangular

Model 750. Accuracy within $\pm 5\%$ of full scale. DC movements have moving magnet design. AC types have high torque repulsion vane design. Both AC and DC types have jeweled bearings. Polystyrene meter fronts. To order conventional panel meters which mount in $2\frac{1}{2} \times 2\frac{1}{2}$ inch hole, replace "X" in stock no. with "7". To order behind the panel meters, replace "X" in stock no. with "5". (Note: These meters may be mounted either in front of the panel thru a $2\frac{1}{2} \times 2\frac{1}{2}$ inch hole or from behind the panel thru a rectangular panel cut-out.) Behind the panel mounting hardware not supplied.

Hawk™ Temperature On-Off Controllers

- ▶ J, K, R, and S Type Thermocouple Inputs Available
- ▶ RTD Pt100 and Ni100 Sensor Inputs Available
- ▶ Standard 120 VAC Power Supply
- ▶ Optional 9-32 VDC Power Supply Available
- ▶ Optional 24 or 48 VAC Power Supply Available
- ▶ Optional Relays and Analog Outputs Available
- ▶ Two-Piece Screw Terminal Connector
- ▶ Scaling/Programming Via Buttons on Front Panel
- ▶ HK45 Has 4 1/2 Digit Display, in Degrees Fahrenheit

Hawk II™ Voltage/Current Controllers

1/8 DIN Controllers, with Nema 4 Front Panel

- ▶ DC Voltage, DC Current, and DC Process Ranges
- ▶ AC Voltage, AC Current, and Resistance Ranges
- ▶ Standard 120 VAC Power Supply
- ▶ Optional 24, 48, or 220 VAC Power Supply
- ▶ Nema 4 Rated Front Panel
- ▶ Optional Relays and Analog Outputs Available
- ▶ Optional Excitation Outputs (12 or 24 VDC)
- ▶ Screw Terminal Connector
- ▶ Scaling/Programming Via Buttons on Front Panel
- ▶ 3 1/2 Digit Display, 0.56" High Digits
- ▶ Direct 5 A Input for AC and DC Current Ranges

Century Panel Meters

2 1/2" Models

3 1/2" Models

Century meters have phenolic cases with glass windows with distinctive case styles and are UL Recognized. All Century DC rectifier type meters have self-shielding movement (calibration is not

affected by stray magnetic field or magnetic mounting). The listed AC meters have the iron-vane type movements and are calibrated at 60 Hz. Other meter sizes and ranges and type available.

Round Panel Meters

NOTE: *Model 55 Barrel Length 1.41

These meters have phenolic cases with glass windows with distinctive case styles and are UL Recognized. All DC rectifier type meters have self-shielding movement (calibration is not affected by stray magnetic field or magnetic mounting). The listed AC meters have the iron-vane type movements and are calibrated at 60 Hz. Other meter sizes and ranges and types available.

Controllers, Meter Relays

3 1/2" Model 3323AIXA

Model 3344AIXA

Used for a wide variety of control, alarm, and limit applications. Photo conductor sensing eliminates all interference with the indicating meter. These relays incorporate an amplifier input which drives a rugged high torque pivot and jewel or taut-band meter. All voltage ranges are 20,000 Ω /volt and all current ranges have 50mV drop. Metal cased "Rugged Seal" construction and glass window withstands rigorous environmental

conditions. High-gain transistor switch circuit provides accurate switching with a "dead band" of no more than 0.5% fs. Fail safe circuitry opens output relays in the event of power failure. 50-1000 Hz frequency response. Latching function can be enabled independently for each relay by removing jumpers on terminal block. DPDT relay contacts for each control point rated at 5 amps, 115 VAC. Meter power is 108-132 VAC, 50-400 Hz.

Portable Shunts For DC Ammeters

These shunts are adjusted for a 50 millivolt drop for use with analog and digital panel ammeters where external shunts are required. Portable shunts have phenolic bases and accept up to 200 amperes. **Accuracy:** $\pm 1\%$. 5-foot leads (0.065 ohms) are included.

Current Transformers and Transducers

Current Transformers are similar to Donut Current transformers, except that the Transformers have terminals instead of secondary leads. These are ideal for use with a digital AC Ammeter, and can be conveniently mounted to a panel or fixture.

Current Transducers monitor high AC Current signals and emit a 4-20 mA signal. This signal can be sent over long distances (up to 1000') to a digital Process Indicator in a remote location.

PI-35A and SI-35A

PI-35A

SI-35A

CR-100

- ▶ Instant Two-Way Communication with Master Station
- ▶ Color Coded for Easy Operation

These models are handsome, executive-style units designed to serve the high-power intercom paging requirements of business, industry, school, and institutions. Both have built-in 20-Watt intercom and 35-Watt program amplifiers, enabling instant communication with any station without interrupting program distribution to others. Calls from a remote station equipped with the CA-10 Call-in switch are announced by light annunciation and tone signal. These models are enclosed in compact consoles, finished in an attractive simulated walnut veneer. **Specifications. Output:** Balanced 25 VCT line. **Power Requirements:** 120 V, 60 Hz AC; 100 W maximum.

- ▶ Instant EMERGENCY/ALL ROOM Announcements
- ▶ Separate 35-Watt Program Channel

Model PI-35A. Provides facilities for communication with up to 25 remote locations equipped with loud speakers. Capable of distributing program material from external sources such as microphones, tuner, cassette player, or "piped in" background music sources.

Model SI-35A. Provides communication, paging and program distribution serving 25 to 75 remote speakers and custom flexibility in a space-saving design.

CM205M

CM211M

Administrative Intercom System

The CM-Series Administrative Intercoms are versatile intercommunication devices designed to operate as an all-master system, or as a single-master/multiple remote system. Each station in an all-master system can selectively call any other station(s). The single-master/multiple remote configuration lets the master station call any remote and any remote call the master station. All-master systems use the Model CM-206M or CM211M master station for capacity of up to 6 or 11 stations, respectively. Each master has push-on/push-off call buttons to select a station and sound an electronic call tone. A privacy feature alerts the parties when their conversation has been joined by sounding the call tone at both stations. A single power supply (Bogen Model RF-12A) is required for each installation.

Stock No.	Mfr.'s Type	Description	Dimensions	EACH
733-0206	CM-206M	Master Station (6)	5.46 × 7.09 × 1.67	165.00

Selective Ring-Common Talk Interphone/Paging System

The TP-6AP and TP-12AP are selective ring, common talk interphones providing two-way and conference call communication, and all-station paging in systems of 6 and 12 stations, respectively. Each interphone has a push-button keypad to select and ring the desired station(s). Paging is easily defeated at any station where this feature is not desired. A two-position high/low switch is provided at each station to control the volume of page announcements and the electronic calltone. Each station has a built-in amplifier, permitting the addition of an external loudspeaker (such as the Bogen IH-8A) to any station. A single power supply (Bogen Model RF-24A) is required for each installation.

Classic Series

— NEW —

The Bogen Classic Series Models C10, C20, C35, C60, and C100 are latest evolution of the long line of popular C Series of amplifiers from Bogen Communications. They surpass previous models in both performance and flexibility, and include new features and sleek 1990s styling. The models are rated at, 10 watts, 20 watts, 35 watts, 60 watts, and 100 watts.

Each Classic Series amplifier offers a choice of inputs — 2 Lo-Z balanced microphone inputs and 1 AUX input, or 1 Lo-Z microphone and 2 AUX inputs. A TEL input is also provided to permit paging from a telephone. A built-in microphone preamplifier circuit lets you mute the AUX 2 channel with the use of a customer-supplied switch. This lets you mute background music from a tuner, CD or cassette player when you make a public address announcement. Independent volume controls are provided for each input. Treble and bass controls offer tonal balance.

Output screw terminal connections are provided for 8 and 16 ohm balanced and 4 ohm unbalanced systems, and also for 25-volt and 70-volt constant-voltage speaker systems. Output jacks let you patch into a tape recorder or an additional (booster) amplifier. An accessory transformer, Bogen Model WMT-1A, can be installed to allow output-matching to a telephone line.

The amplifiers operate from a 120 VAC, 60 Hz source and are equipped with thermal breaker, electronic overload and electrical circuit breaker protection.

Gold Seal Series Amplifiers

— NEW —

The Gold Seal Series amplifiers offer a combination of features. These features include the Apex Aural Exciter circuit and a true contour control. The Apex Aural Exciter enhances intelligibility, increases presence and perceived loudness while reducing listener fatigue. The contour control provides a boost (at 100 Hz and 10 KHz) at low listening levels. Also included is a Bogen-exclusive dual-function equalizer for feedback control or full range EQ, variable muting, remote volume control, precedence circuitry and a lo-cut filter.

Each Gold Seal amplifier provides four electronically balanced low-impedance microphone inputs (MIC 1-4), with rear-panel

female XLR-type connectors. Phantom power is built-in for use with condenser-type microphones. A switch selected MIC 5/TEL input accepts either a balanced low-impedance microphone or 600 ohm telephone paging input, via screw terminal connections. The TEL input includes an ALC circuit to maintain a constant paging level, a VOX sensitivity control, and a music muting circuit which automatically mutes AUX 1 or 2 during a page, restoring musing gradually following the page. A switch selected MIC 6/AUX 1 input accepts either a balanced low-impedance microphone or high-impedance auxiliary input source, via screw terminals (for microphone) or RCA jack (for the AUX source). The AUX inputs include a true variable loudness contour switch, which provides a boost of +8 dB at 100 Hz and +4 dB at 10 KHz, at low volume levels. Input/output connectors include an RCA jack for a booster amp, Power In/Preamp Out jacks, a Tape Output jack and provisions for a Bogen WMT-1A matching transformer. The amplifiers provide a 500/600 ohm line matching transformer output (with accessory transformer WMT-1A), as well as balanced or unbalanced outputs at 8 ohms, 25 V, 25 VCT, 70 V, or 100 V. A direct, unbalanced 4 ohm output is also provided.

The Gold Seal amplifiers operate from a 120 volt AC source (the unit can be adapted for 240 volt operation). The output stage is protected by a thermal breaker. Electronic overload protection and a resettable circuit breaker are also included.

CTS Series

- Mix Up to Five Inputs — Microphones or a Combination of Microphones and Auxiliary Inputs
- Built-In Microphone Precedence Circuit
- Input- and Output-Matching to a Telephone Line, Using WMT-1A Accessory
- Ten Frequency Equalizer Filters with Slide Controls Provide Antifeedback and Tone Control Circuit
- Phantom Power Supply for Condenser Microphones
- Integral Automatic Level Control (ALC)

The Bogen Models CTS-1035, CTS-1060, and CTS-1100 are public address amplifiers designed for use in high-quality sound systems. They combine advanced solid-state design with versatile operating features and the flexibility to meet a wide range of application requirements.

Each CTS-Series amplifier mixes five input signals, either five low-impedance microphones, or a combination of microphone and auxiliary inputs. Microphone input is via screw terminal strips; standard Hi-Z phono jacks for the

auxiliary inputs accept a tuner, tape/cassette player, line-matching transformer, or tone generator. Switches are used to select MIC 4/AUX 1 and/or MIC 5/AUX 2 operation. An internal jumper configuration activates a phantom power supply for condenser microphones.

Precedence circuitry is provided for the MIC/AUX channels (requires customer-supplied contract closure). The RVC-CTS accessory permits remote volume control of the master output level from distances up to 2000 feet without loss of gain or tone quality. Automatic Level Control (ALC) circuitry compensates for differing microphone techniques and assures a uniform output level. A 2 1/2-octave equalizer permits boosting or attenuating any of 10 selected frequencies to provide antifeedback and tone control circuit.

Mixer/Preamplifier

Add all the microphones you need, easily and economically with Bogen's Mixer/Preamplifiers. Model CAM offers four microphone inputs, plus master volume control. It also has one auxiliary input with individual volume control. Its units may be interconnected for more MIC inputs. Plus it has integrated circuits, and an illuminated, calibrated VU meter. Model CDM provides six transformer-isolated inputs, each preceded by a switch-selectable attenuator pad to allow channels one through four to accept 0 dBm, 600 ohm line or microphone level inputs. A built-in circuit provides precedence over channel five and six, it may also be used for remote control.

Stock No.	Mfr.'s Type	Outputs	Dimensions Inches	Shipping Weight (Lbs.)	Power Consumption	EACH

Power Amplifiers

The BPA and HTA Series are designed to fulfill power amplification requirements with high quality and reliability. Inputs are high impedance, unbalanced, convertible to low impedance, balanced or unbalanced, with optional TL600 transformer. Designed for continuous heavy-duty operation. The amplifiers are thermally protected to prevent damage due to excessive temperatures. Accessory rack panel kits permit mounting in a 19-inch equipment rack. (RPK-53, RPK-54 for BPA-60, BPA-125, respectively).

TPU-A and TPU-B Series Amplifiers

- Built-In Telephone Line Input Transformers
- Screwdriver Adjustable Controls

► Wall or 19" Rack Mounting

Four models and power levels available: TPU-15A — 15 watts, TPU-35B — 35 watts, TPU-60B — 60 watts, and TPU-100B — 100 watts. Inputs for 600-ohm balanced telephone line, LO-Z balanced microphone, and background music source. **Choice of Outputs:** 16-ohm, 25 VCT, 25 V, 70.7 V, or 100 V outputs, balanced or unbalanced. Choice of RCA jack or screw terminals for Music source (unbalanced). Volume controls for Tel channel, MIC, Music, and Ringer. Ringer circuit activated by contact closure or 90 V ring signal. Variable music mute with adjustable Mute level control. Signal-activated paging channel with VOX sensitivity and ALC adjustments. Aphex Aural Exciter® Circuit with on/off switch and effect adjustment. Bridging jacks supplied to a double number of inputs and outputs. Output (RCA jack) to line-matching transformer (WMT-1A).

Amplified Speakers and Horns

Amplified speakers eliminate the need for a centralized amplifier and provide individual volume adjustment of each location. They are easy to install and interface with any phone system, via the SAM or PAM access modules.

Model AS-1. 8", 45 ohm cone speaker with compact IC amplifier and volume control. 1 Watt output and operates on 24 VDC. **Weight:** 2 lbs.
733-2325 EACH 31.00

Model ASWB-1. For wall mounting, consists of the AS-1 in the attractive WB8 baffle. **Weight:** 8 lbs.
733-2335 EACH 55.49

Model ASWG-1. For recessed ceiling installation. Features an aluminum baffle finish in white enamel. **Weight:** 3 lbs.
733-2330 EACH 42.43

Model AH-5A. Amplified horn speaker for use outdoors or in high noise locations. 5 Watts output, operates on 24 VDC and is equipped with a volume control and mounting bracket. **Dimensions:** 8 x 8 x 9". **Weight:** 4½ lbs.
733-2435 EACH 110.98

GA-2 Music-On-Hold Amplifier

Compact, reliable, 1½ Watt amplifier. Excellent for feeding "music-on-hold" to a telephone system. It has a high-impedance input that is available at both a phono jack and screw terminals. 8 Ohms or 600 Ohms output. Only 50 mV input is required for full output. **Power Consumption:** 4 W, 120 V, 60 Hz. **Dimensions:** 5½ x 4½ x 2¼". **Weight:** 1 lb.

733-1113. Model GA-2 EACH 94.66

Model MMT Digital "Message-On-Hold" Announcer

Turn waiting time into selling time! Bogen's MMT-34, MMT-68 and MMT-1216 are completely automatic. Drop in a cassette containing message...the MMT does the rest! It automatically downloads the cassette into digital memory, automatically switches to the playback mode, and

automatically reloads the program after any power failure.

Available in switchable ¾, ½ or ¼ minute capacity (lower time limit uses higher sampling rate for improved performance). To change the message, simply drop in a new cassette, which automatically erases the old one.

No controls to operate, no continuous tape wear, no moving parts in digital circuitry to break down or wear out. The MMT utilizes advanced digital technology to deliver the message to every caller "on hold", more easily and dependably than conventional tape equipment. Three-year warranty on both materials and workmanship. **Dimensions:** 7½" x 6½" x 2½". **Shipping Weight:** 3¼ lbs.

733-5301. Model MMT-34 EACH 408.00

Microphone and Line Plug In Transformers

WMT-1A

TM-200A

WMT-1A may be used as input-matching transformer to connect telephone systems to aux. input of most Bogen public address amplifiers for telephone paging. It may also function as output-matching transformer in feeding special program material over 500/600 ohm telephone line for transmission to a local broadcast studio. May be used with any amplifier having a 25-Volt output terminal. **TM200A** will provide a low impedance microphone input for CHS-A or CT series amplifiers.

733-1107. Model WMT-1A EACH 27.74
733-1108. Model TM-200A EACH 44.25

Power Supplies

Bogen power supplies can be plugged into any convenient 120 VAC/60 Hz electrical outlet. Up to ten AS-1s can be driven by a single PRSASA Power Supply. For larger systems, or those which incorporate amplified horns or zoned paging, the PRS-624DA Power Supply is recommended.

Model PRSASAC. Provides 24 VDC regulated and filtered output at .5 amps. U.L. listed. **Dimensions:** 2¾ x 4½ x 2½". **Weight:** 2 lbs.
733-2300 EACH 75.07

Model PRS624DA. Provides 24VDC at 4 amps, also includes separate 250 mA talk battery supply. U.L. listing pending. **Dimensions:** 4¾ x 6¾ x 6¼". **Weight:** 10 lbs.

120 Watts RMS P.A. Amplifier

- Features**
- Heavy duty heat sinks
 - 4 microphone inputs with lock-in cannon connectors. Can be used with balanced or unbalanced, high or low impedance microphones
 - 2 aux. inputs
 - 1 magnetic phone input
 - 1 equalizer input
 - Separate volume control for each microphone and aux. input
 - Master volume control
 - Separate bass and treble control
 - 4, 8, 16 ohm outputs, screw terminals
 - 25 and 70 volt outputs, screw terminals
 - 2 RCA speaker outputs
 - 1 booster/tape output
 - Built-in priority paging
 - Separate on/off switch

Specifications
Power: 120 watts RMS @ less than 50% distortion. **Frequency Response:** 50 Hz to 15 KHz. **Noise:** Mic—60 dB, Aux.—75 dB. **Sensitivity:** Mic—0.3 mV, Aux.—0.3V. **Tone Controls:** Bass—±15 dB @ 100 Hz, Treble—±15 dB @ 10 KHz. **Power Req.:** 120 VAC, 50-60 Hz, 230 W. **Dimensions:** 4 1/4" (H) x 17 1/4" (W) x 11 1/2" (D). **Weight:** 33 lbs.

Megaphones for Emergency, Public Address and Marine

ER-360

ER-370

ER-380

ER-390

Model ER-360 Lightweight Portable Megaphone. Solid state megaphone features pistol grip w/press to talk switch, volume control and wrist strap. Made of weatherproof ABS plastic. Operates on AA batteries (not supplied). **Specifications:** Length: 12 3/4". Bell Diameter: 7 1/2". Weight: 2.2 lbs. without batteries. **Wattage:** 10 watts max. **Effective Range:** 500 ft.

958-8766.....EACH 90.00

Model ER-370 Deluxe Megaphone With Siren. Powerful solid state megaphone. Features a built-in switch-selectable electronic alarm siren, pistol grip press to talk switch, volume control and shoulder strap. Durable weatherproof construction. Operates from 6C cells (not supplied). **Specifications:** Length: 15". Bell Diameter: 8 1/4". Weight: 3 1/2 lbs. without batteries. **Wattage:** 16 watts max. **Effective Range:** 800 ft.

958-8009.....EACH 124.95

Model ER-380 Marine Megaphone With Siren And Fog Horn. Powerful solid state megaphone. Features a switch-selectable electronic alarm siren and fog horn, a pistol grip push to talk switch and shoulder strap. Durable weatherproof construction. Operates from 8C cells (not supplied). **Specifications:** Length: 14 1/4". Bell Diameter: 9 1/8". Weight: 3 1/2 lbs. without batteries. **Wattage:** 20 watts max. **Effective Range:** 1,200 ft.

958-8770.....EACH 179.95

Model ER-390 Delux Megaphone With Detachable Microphone And Siren. Powerful solid state megaphone. Features a built-in switch-selectable electronic alarm siren, a push to talk detachable microphone with volume control, shoulder strap and table stand. Durable weatherproof construction. Operates from 8C cells (not supplied). Length: 13 1/8". Bell Diameter: 9 1/8". Weight: 3 1/4 lbs. without batteries. **Wattage:** 25 watts max. **Effective Range:** 1,400 ft.

958-0390.....EACH 150.28

State-of-the-Art Video Doorphone

For home or office, CCD camera, auto iris, infrared lens, 4" Braun picture tube.
95808820. VDP-2000.....EACH 538.42

Amplified Extension Speaker

Model AES-4. Amplified Communications Speaker. An economical extension speaker with 10 Watts of amplified power. Ideal for mobile or base 2-way. ABS plastic enclosure with soft-padded grille and all-angle swivel bracket. Includes 10' cord and 3.5 mm mini plug. **Specifications:** Voltage: 12VDC. Input Impedance: 4 to 80. **Wattage:** 10 W Amplified.

958-8036.....EACH 42.82

10-Watt 70-Volt Line Transformer With Color-Coded Leads

Type T-7010. 10-watt primary. Taps at 10, 5, 2.5, 1.25, and .62 watts. **Secondary Impedance:** 4 or 8 Ohms. For driving speakers at various power levels from the same 70-volt line, simply change the transformer taps to achieve the power level you desire. 1.6 x 1.6 x 1.0". **Shipping Weight:** 1 1/2 lbs.

958-0013.....EACH 5.75

Ready-to-Install, Quality 8" Speakers

Model G810CPP. 25-Watt, 10-oz. Magnet.

- Weatherproof 8"
- Polypropylene
- With 3" Tweeter
- Air Suspension Coaxial

Pre-drilled for easy line transformer installation. **Specifications:** Frequency Response: 50-50,000 Hz. Magnet Weight: (ceramic) 10 oz. **Power:** 25 W max. **Voice Coil:** 1" high-temp. **Impedance:** 8 Ohms.

958-8043. 1-19.....EACH 25.55 20-Up.....EACH 23.46

8" and 12" Speaker with Line Transformer and 12" Grille

Model G86FT70GW. 8" speaker with line transformer and grille— assembled and wired. 6 oz. dual cone, 70V, 10 Watt transformer, white metal grille. (10 oz. dual cone, air susp. and coaxial in 70V and 25V also available upon request.)

958-8018. 1-9.....EACH 22.81

Grilles. Fit within 12" ceiling tile for an attractive flush-mount speaker assembly. Fit 8" speaker.

Model G12WD. 12" white, round metal grille. Hardware furnished.

Voice Powered Communication Systems

Headsets Requiring No External Power, Batteries or Electricity

H5030 Headset With Acoustic Boom. Boom allows hand-free operations. The symmetrical design allows the headset to be worn with boom on either side of head. Recommended for noise levels to 100 dB. MSHA Approval Number 9B-67.

535-0185. Model H5030 **EACH 266.00**

H5040 Headset With Acoustic Boom. Behind-the-head version of model H5030. Has soft, adjustable over-head strap that fits under safety cap. Recommended for noise levels to 100 db. MSHA Approval Number 9B-67.

535-0380. Model H5040 **EACH 266.20**

H5090 Headset With Acoustic Boom. Single ear version of model H5030. Recommended for noise levels to 80 db.

535-0400. Model H5090 **EACH 187.00**

Voice Powered Communication Kit

Ready-to-use, easy-to-store, two-man Communication System. Complete with carrying case, kit includes two H5040 headsets, two C5401 Adapter Cords and a C52-50 Jumper Cord. Ideal for use in pulling and pairing wires, continuity checks (ringing out wires), calibrating instrument readings, etc.

535Q6025. Model K5501. Six Piece Kit **EACH 661.00**

Carrying Case. Headset carrying case (case only) available as a separate item.

535-6020. Model 9143P-26 **EACH 67.00**

AC Powered Communication System

Noise Attenuating Headsets for Use with Series 3400

H3330 Headset/Microphone
Over-the-Head style with boom mounted noise canceling microphone. For Noise levels to 125 db.

535Q7040. Model H3330 **EACH 257.00**

H3340 Headset/Microphone
Behind-the-Head style with boom mounted noise cancelling microphone. For noise levels to 125 db.

535-7045. Model H3340 **EACH 254.00**

H3391 Headset/Microphone
Single ear version with boom mounted noise canceling microphone. Not to be used in noise levels above 85 db.

535-7050. Model H3391 **EACH 225.00**

H3140 Headset/Microphone
Behind-the-Head style with throat microphone for use with breathing mask.

535-3140. Model H3140 **EACH 364.00**

Belt Station required for each headset. All headsets shown are interchangeable throughout system.

Typical Series 3400 Applications

Two to Four Headsets

Five to Six Headsets

Accessories

Extension Cords

Two conductor cords with phone plug and phone jacks. Extension cords are used to extend distance from jumper cord, jack plate or junction box. May be coupled for longer length. Number after dash indicates cord length.

535-0012. C51-12	EACH	52.00
535-6005. C51-25	EACH	68.00
535-0074. C51-50	EACH	90.00
535-0075. C51-100	EACH	142.00

Jumper Cords

All that is needed to complete a two-man VOICE POWERED System. It is a two conductor cord with 2 phone jacks to plug into each headset. For longer systems, extension cords may be added. Number after dash indicates cord length.

535-0059. C52-12	EACH	52.00

535-0064. C52-50	EACH	90.00
535-0065. C52-100	EACH	142.00

Jack Plate

Two outlets with C-11 jacks. Receives plug from headset or extension cord. Two outlet faceplate has weatherproof covers and fits standard electrical box. Can be used for permanent, multiple station installations. Electrical box not included.

535-0040. Model M5002 **EACH 54.00**

Six Plug Junction Box

Heavy duty metal box has weatherproof covers and takes up to six plugs from headsets or extension cords.

535Q6015. Model M5006 **EACH 163.90**

Amplifier/Belt Station

For use with Models H5030, H5040 and H5090 headsets. The amplifier increases the volume of transmission from the user's headset by up to 30 dB. Includes an adjustable talk level and a Push-To-Amplify switch. Completely portable (comes with self contained 9 V battery). Adapter cord assembly included.

535-6110. Model M5410 **EACH 375.99**

Series 3400

This System operates on standard 110 VAC current and can easily be converted to 220 VAC. Up to 32 Headsets may be connected at one time using belt stations and remote junction modules. Four conductor shielded cables provide shielding from electrical and radio frequency interference.

U3400 Master Station

The heart of the Series U3400 Communication System. It contains the power supply, amplifier and impedance selector in a single, sturdy metal box. There are four output connectors, 12 ft. grounded power cord, roll bar/carry handle, master volume control, and system On/Off switch. Belt Stations connected to four outputs form a four-man communication system. See Application No. 1 below. Remote Junction Modules connected to these outputs may further expand the system. See Application No. 2 below. **Specifications.** Input: 110-125 VAC, 60-50 Hz. Output: 24 VDC. Max. Current: 1/2 amp. Dimensions: 4 3/4 x 9 1/2 x 4 3/4".

535Q7000. Model U3400 **EACH 763.54**

U3401 Remote Junction Module

Used for additional Belt Station connections. Will provide three Belt Station connections or two Belt Station connections plus another Remote Junction Module or extension cord. Your system arrangement will accommodate a maximum of 32 headsets. See Application No. 2 below.

535Q7005. Model U3401 **EACH 235.00**

U3410 Belt Station

Serves as a preamplifier and interfaces between Headset and system. EVERY HEADSET MUST BE PLUGGED INTO A BELT STATION. Belt Station then connects to a Master Station or Remote Junction Module, either directly or via extension cords. Unit features headset jack, individual earphone volume controls, push-to-talk or lock microphone button, belt clip, 12 ft. cord with connector.

535Q7010. Model U3410 **EACH 213.40**

V3412 Vox Belt Station

May be used in place of U3410 Belt Station. No buttons to press for hands-free operation. Voice activated start/stop transmission. Has Vox sensitivity control, headset jack, listening volume control, Vox override push to talk button, belt clip, 12 ft. cord with connector.

535Q7015. Model V3412 **EACH 326.00**

C34 Extension Cords

With screw-on-type connectors. Four conductor oil resistant cords are used to connect all components: Master Station, Remote Junction Modules and Belt Stations. Number after dash indicates length in feet.

FM Wireless Intercoms

- ▶ Two Way "Hands-Free" Voice (VOX) and Manual Operation
- ▶ Operates Room-to-Room or Between Houses on Same AC Electrical Wiring; No Installation Is Required
- ▶ Any Number of Stations May Be Operated on Same Line
- ▶ Each Intercom Unit Is Plugged into an AC Outlet and Uses the House or Office Electrical Wiring as a Message Path
- ▶ Ultra-Sensitive FM Circuitry with Separate Microphone and Speaker Provides Dependable Clarity of Voice Transmission
- ▶ Instant "ON" Operation Assuring Dependable Service; No Warm-Up Time Required
- ▶ All Stations Are Equipped with "Call" Button for Signaling, Lock Buttons for Continuous Monitoring of Baby, Sickroom, etc.
- ▶ All Models Are Fully Compatible with Each Other
- ▶ Can Be Used on Desk, Table, Counter or Wall Mounted
- ▶ Cabinets Are of High Impact Plastic with Woodgrain and Charcoal Brown Colors — 6"W x 5"D x 2"H; Weights 1 lb.

External Drive Piezo Buzzers

Because of their low profile housings, these INTERVOX devices can be easily mounted in limited space designs. Their clear, penetrating sound quality enables them to be used in virtually any application.

Electronic Buzzers

These INTERVOX devices are designed to eliminate arcing and Rf noise commonly found in electro-magnetic type buzzers. They provide a low frequency sound that is easily recognized making them ideal for applications such as

Industrial Controls, Auto Warning Devices, Test Apparatus, Appliance Timers, Intrusion Alarms.

Electro-Acoustic Transducers

These INTERVOX devices are small and lightweight enabling them to be used in equipment where space is extremely limited. Many of these types are sealed with removable tabs for designs requiring wave solder and washing

operations. In addition the BST1811P series is available with a carrier tube suitable for automatic insertion. Typical applications include Pocket Pagets, Counters, Monitors, Scanners, Computer, Peripheral equipment.

Miniature Speakers

General Purpose

These INTERVOX devices were designed with a wide frequency range. Available in both low profile samarium magnets and alnico V magnets, these products are suitable for applications such as computer, modems, Digital Communication, queuing annunciators and intercom.

Low Leakage Flux

General Purpose and Commercial

Low Leakage Flux Speakers - Ferrite Magnet - For Computer and Television Monitors

These units prevent picture distortion as well as color shearing normally associated with magnetic fields. They are available in Oval, Square, and Round designs.

Compact Sonalert II Audible Signal

Miniature piezo audible signal uses standard printed circuit mounting. Has low power consumption. Suitable for fire alarm, call buzzers, car alarms, clocks, and cash register applications. Will accept from 3VDC to 20VDC at 16 mA (max). Units are available with optional wash label sealed for wave soldering on special order. Manufacturer literature is available upon request. **Frequency:** 3.4 ±0.5 kHz. **Sound Pressure, dB at 2 ft.:** 75 dB min. at 12 VDC. **Input DC Voltage:** 3-20 VDC. **Current (mA) at 12 VDC:** 16 mA max. Sealed for wave soldering on special order.

Volume Control for Mallory Sonalerts

A cost effective volume control for all Mallory SC Sonalerts using the classic screw neck. Unit consists of three component parts. The baffle plate snaps into the Sonalert's grill. The shutter is easily mounted with a screw (provided) and has flanges that can be gripped to adjust the volume of the Sonalert. The screw is tightened to hold the shutter in position. This unit allows the output of the Sonalert to be controlled. It can be assembled to the existing Sonalerts in the field while they are mounted.

854-9300, SCVC

EACH .50

PC Board Mounted Sonalert Signal

Low profile pin mounted signal. Suited for insertion and soldering into printed circuit boards. May be hand or wave soldered. Audible signal is 2900 Hz medium loud and is available as continuous tone, fast pulse, or slow pulse.

Sonalert® Solid-State Audible Warning Device

Emits penetrating signal at min. current. Solid-state circuit — no arcing — no RF noise, no mechanical wear, lowest failure rate with max. efficiency. Compact, lightweight, versatile — consumes less current than normal indicator light. Ideal for use as safety device. Alerts to mechanical malfunctions in cars, communications, computers, fire signals, medical electronics, etc. Sonalert signals may be powered by many electrical sources ranging from single cell batteries to industrial power lines. Little electrical power is required making them ideally suitable for portable battery operated equipment. This low power feature allows the Sonalert signal to be turned on or off with a low power transistor, SCR, or integrated circuit. Completely solid state with no moving parts, no arcing, and mechanical wear, the Mallory Sonalert signals should give you many years of trouble-free service. **Temperature Range:** -20°C to +65°C. Self-extinguishing black nylon case, 1.687" dia. (lgh. in table). **Weight:** 8 oz.

These rugged handheld/jobsite radios are productivity builders for such typical applications as: security, plant/property maintenance, warehouse operations, construction, property management, athletics and wherever job coordination is desirable.

Each radio comes complete with antenna, removable belt clip, rechargeable battery, battery charger, operator manual, FCC licensing information and features transmit/battery status indicator and automatic squelch.

Range: 1 watt-up to 2 miles, 2 watt-up to 2.25 miles (flat terrain with few obstructions). **Durability:** Pass 5 year accelerated life and 4 foot drop to concrete tests. **Battery Charge Life:** VHF-13 hrs., UHF-8 hrs. based on 90/5/5 usage. **Frequency:** VHF models — SV10, SV11, SV11C-Blue DOT, V32C-Blue/Green DOT; UHF models — SU21, SU21C-J DOT, J=467.7625, K=467.8125. **License:** FCC license required (information furnished with radio). **Warranty:** 1 year (limited) replacement.

Spirit 2-Way

2-Way SV10

Each Spirit 2-way Radio comes fully equipped and ready for use. Each Spirit 2-Way radio has:

- ▶ 1 Watt of Transmit Power in the VHF Frequency Range
- ▶ 1 Channel
- ▶ Open Squelch (Convertible to Coded)
- ▶ 10-Hour Charging Adapter
- ▶ Transmit Battery Status Indicator
- ▶ Removable Belt Clip
- ▶ Rechargeable Battery
- ▶ 6.2" x 2.5" x 1.2"
- ▶ 11.1 Ounces

590T Transistor Amplified Dynamic SHURE

This rugged handheld microphone features a Shure dynamic cartridge. Tailored frequency response provides optimum voice articulation while it discriminates against other sounds. The 590T is ideally suited to a wide range of mobile installations. The unique replaceable Modulink cordset system makes the 590T a workhorse that is easy to service. The microphone itself is designed to provide trouble-free service even under the harshest conditions.

Specifications. Frequency Response: 200 to 4,000 Hz. **Impedance (at 1kHz):** 200 ohms (non-amplified mode). **Recommended Load:** Greater than 500 ohms. **Non-Amplified Output Level (at 1 kHz):** 1.58 mV (-36.0 dB-1 V/100 microbars). **Amplified Output Level (at 1 kHz):** 0.32 V (-10 dB, 0 dB=1 V/100 microbars) for a DC Supply Current of 2.5 ±0.25 mA. **PTT* Switch:** Million-Cycle Plus™ leaf-type. **Cable Type:** Detachable 5-conductor, 1-shielded, coiled, with 8-conductor (6 used) modular telephone type connector. **Cable Length:** 1.2 m (4 ft). **Replacement Parts:** 90A4056 Cartridge, 90A4040 Printed Circuit Board Assembly, 90A3543 Switch Assembly. **Optional Accessories:** RK6MB Mounting Bracket. *Push to talk.

885TT — Quality That's Affordable SHURE

- ▶ Continuous-Tone Dialing
- ▶ Illuminated Keypad
- ▶ Positive Tactile-Feel Keys and Audible Confirmation Tone to Help Make Number Entry Easy and Accurate
- ▶ Externally Adjustable Audio and DTMF Levels for Easy Installation
- ▶ Tailored Frequency Response and Top-Talk Sound Channels™ Provide Optimum Clarity and Intelligibility
- ▶ Million-Cycle Plus™ Leaf Switch — a Shure Exclusive, Giving You Longer Trouble-Free Use
- ▶ Virtually Indestructible Armo-Dur® Case

The new 885TT gives you an unbeatable combination of economy, dependability, audio quality, and ease of use. It's a manual-dial DTMF microphone that sets new standards for quality and economy.

Specifications. Frequency Response: 200 to 4,000 Hz. **Output Level (at 1 kHz):** -5.0 dB (0 dB=1 volt per 100 microbars) for a DC Supply Current of 2.3 mA. **DTMF Output Level:** 1.1 volts peak-to-peak. **PTT* Switch:** Million-Cycle Plus™ leaf-type. **Cable (optional):** Detachable, 1.4 (48 in.) 5-conductor (1 shielded) modular telephone type connector. **Optional Accessories:** RK6MB Mounting Bracket (3 in kit). *Push to talk.

562 Noise-Canceling Dynamic

Designed to withstand abnormal moisture and temperature conditions, the 562 is perfectly suited for high-noise environments found in some mobile dispatch operations, such as numerous dispatchers in close quarters — even in situations where there is so much noise the dispatcher cannot hear himself talk. Excellent voice reproduction, highly intelligible speech communication and ruggedness. The 562 fits Shure goosenecks (not supplied) with 5/8" diameter.

Specifications. Frequency Response: 100 to 6,000 Hz. **Impedance (at 1kHz):** 180 ohms. **Recommended Load:** 1,000 ohms. **Output Level (at 1 kHz):** 0.06 mV (-84.0 dB, 0 dB=1 V/microbars). **Cable Type:** 2-conductor shielded. **Cable Length:** 1.2 m (4 ft). **Switch:** Requires external switch (not supplied). **Dimensions:** 67 mm L x 34.6 mm Dia. (2 5/8 x 1 3/8 in.). **Weight:** 128 grams (8.5 oz). **Supplied Accessories:** No. 4 Allen Wrench. **Replacement Parts:** 70A292 Cable, R90 Cartridge, RK1836 Screen/Grille Assembly, 31A1238A Case. **Optional Accessories:** A1WS Windscreen, A12 Mounting Flange, A13HD Heavy-Duty Mounting Flange, Any length Shure 5/8" gooseneck.

944-0562, Model 562EACH 67.27

404B Low-Impedance Controlled Magnetic

The classically styled 404B is a workhorse designed for extreme ruggedness, reliability and clear, natural voice response. It features a Million-Cycle Plus™ push-to-talk leaf switch with an extra contact for either shorted or open circuit. It is recommended where extreme operating conditions are the norm. The 404B has a rugged impact-resistant case and durable neoprene cable.

Specifications. Frequency Response: 200 to 4,000 Hz. **Impedance (at 1 kHz):** 200 ohms. **Recommended Load:** 1,000 ohms. **Output Level (at 1 kHz):** 22.5 mV (-33.0 dB, 0 dB=1 V/100 microbars). **PTT* Switch:** Million-Cycle Plus™ leaf-type. **Cable Type:** 4-conductor, 2 shielded, coiled. **Cable Length:** 1.5 m (5 ft). **Supplied Accessories:** RK6MB Mounting Bracket. **Replacement Parts:** C14C Cable, RK7S PTT Switch, RK1C Case R5E Cartridge. *Push to talk.

Noise Censor Series

W6-UNI-K-NC

Noise Censor
"NC-1"
G-Style Replacement Mic

W6B-NC

Noise Censor is a family of noise-cancelling products designed for telephones that are located in noisy or hard-to-hear areas. The W6-UNI and W6B are compatible with virtually all telephones. The W6-UNI and W6B replace all K-style handsets with modular connection. The NC-1 is a noise-cancelling microphone replacement for carbon mics in "G" style handsets.

CAT Communication Headset for Computer Audio and Telephony Applications

Now there is a lightweight, portable, and private alternative to PC microphones and speakers. Plantronics CAT (computer audio and telephony) headsets enable you to work with computer telephony integration (CTI), voice recognition, personal conferencing, business audio, and multimedia applications. Plantronics H132 communication headset is extremely lightweight and can be put on and off in seconds. Instead of broadcasting personal messages or other sound files by playing them over speakers, you can use Plantronics headsets for private communications. Our CAT series of products reduce disruptive noise pollution and eliminate the desktop clutter that comes from PC speakers and microphones.

The H132 is a high-performance headset featuring a boom-mounted, noise-cancelling microphone that dramatically reduces background noise for clear CTI or personal conferencing communications. With the H132 you get high performance in a sleek, lightweight design.

grip on work again. The Plantronics FreeHand™ is uniquely designed to let you work the way you want. Use the computer, take notes, look for papers with both hands while you're on the phone. It's comfortable, looks and sounds great. And the FreeHand is a breeze to put on, take off — and hooks up to your phone in a moment. There's no headband, no earplug — nothing to get in the way of your work. When you're ready to make or answer a call, just slip the cushioned earbud receiver on the outside of your ear. It's that easy and fast. Now you'll have both hands free to take notes, refer to documents or work at your computer. Sound quality you've got to hear to believe. The Plantronics FreeHand boasts sound equal to your regular phone. Only you will know you're using it. And it's better than an annoying speakerphone. Plus it's private. The Plantronics FreeHand is compatible with all major business phones and plugs in instantly with a modular adapter (included). It comes complete with volume control, handset/headset switch and a mute button.

SP™ Modular Headsets for Standard Telephones

SP-02

SP-04

SP-05

The SP™ Modular Headset makes time on the telephone in your office or home a lot easier. It frees both hands so you can write, type, or perform household chores while talking on the phone. SP™ headsets are made by the world's largest supplier of modular headsets for standard telephones. Each headset is user-installable and works with traditional style touch-tone or rotary desk telephones with modular handsets. These phones normally have "bell" rather than electronic tone ringers. All headsets feature single, lightweight earpad, adjustable headband and boom-mounted microphone. SP™ gives you superior comfort and performance at low cost.

Model SP-02. Designed for use with electronic telephones.
888-9261. Model SP-02.....EACH 79.95

Model SP-04. Headset with dial pad. Telephone headset. Last number redial, mute/hold. Operates with tone or pulse service. Plugs directly into single line modular phone outlet.
888-9264. Model SP-04.....EACH 99.95

Model SP-05. Telephone headset works with all telephones, single or multi-line. Transmit/receive volume control, headset/handset switch; mute switch.
888-9265. Model SP-05.....EACH 89.95

Efficient Piezo Buzzers and Elements

A. Pulsing/Continuous Piezo Buzzer. Great for alarm systems, vehicle backup alerts. May be panel mounted. Three screwdriver terminals, one is common positive. Negative terminals select mode. Approx. 2800 Hz pulsed at 1.2 Hz. Output: 90 dB at 12 VDC. 4 to 28 VDC, only 10 mA at 12 VDC. Fits 1/16" diameter hole. With threaded mounting ring. **910-2105. Type 273-068.....EACH 8.49**

B. Pulsing Piezo Buzzer. Approx. 2800 Hz. 90 dB. 3 to 28 VDC; 12 mA at 12 volts. Mounting hole centers 1 1/16" apart. **910-2104. Type 273-066.....EACH 4.29**

C. Piezo Buzzer With Leads. Piercing 3.6 kHz signal. 4 to 28 VDC; 5 mA at 12 V. Mounting hole centers 1 3/4" apart. **910-2101. Type 273-060.....EACH 3.29**

D. PC Board-Mount Piezo Buzzer. 3 to 20 VDC. 1/16" x 9/16" dia. **910-2103. Type 273-065.....EACH 2.49**

Fixed-Frequency Piezo Element. Three-wire type. Up to 90 dB at 6.5 kHz. Requires external driver circuit. 1/16" mounting centers. With data. **910-2102. Type 273-064.....EACH 1.79**

Mini DC Buzzers

Small enough to hide, loud enough to demand attention! 1/16" mounting centers. With leads. DC Voltage: 1.5 to 3.

Monitors

Black and White Monitors

UL and DHHS listed. FCC RFI compliance video monitors offer high resolution and solid state circuitry. Flip-open control cover, DC restoration switch, Hi Z-Lo Z termination switch, video input bridging, and a regulated power supply with isolation transformer, all encased in a rugged metal cabinet. Optional rack mounts are available to mount in standard EIA 19" space. **Controls:** On-Off, Brightness, Contrasts, H-Hold, and Impedance. Also features quick start without pre-heating and recessed hand grips for portability. **Specifications. Input Signal Range:** 0.5 to 2.0Vpp. **Horizontal Resolution:** 900 lines, nominal. **MTBF (Less CRT):** 15,000 hours. **Light Output:** 25FL Min. **Geometric Distortion:** 2.0% Max. **Connectors:** 2 BNC Video In, Video Out. AC-3 pin UL approved plug.

Color Monitors

High resolution CRT with comb filter reproduces (VMC7508) 330 horizontal lines of resolution (VMC7514 450 horizontal line). Metal cabinet construction reduces interference from outside noise. Automatic Degaussing yields minimal magnetic build-up for superior performance. 75 ohm bridge termination for self termination or video loop through operation.

Pan/Tilts and Accessories, Indoor/Outdoor

Light Duty Pan/Tilt

PT175-24P. Light duty, indoor/outdoor pan/tilt engineered to handle camera/lens combinations weighing up to 20 lbs. (9.08 kg) and is capable of auto/random scan operation when used with the MPTA24DT control.

913-0175. PT175-24PEACH 1077.00

PT270-24P. Measures only 7 3/4" high, 8" wide, and 4 1/2" deep. Ideally suited for indoor operation, use where space is at a minimum, or for discreet enclosure applications.

913-0270. PT270-24PEACH 682.00

Pan/Tilt Control

MPT240T. Control is designed for use with PELCO 24 VAC, pan tilts. An 8-position joystick controls the up, down, left, right movements of a single pan/tilt. Movements can be controlled individually or simultaneously (i.e., left/down, left/up, etc.) by positioning the joystick diagonally between the two desired functions.

913-0024. MPT240TEACH 262.00

Scanner and Lens Control

MPTA24DT. Integrate pan/tilt, scanner and motorized zoom lens functions into one desk top control and are for use with 120 VAC, 230 VAC, and 24 VAC pan/tilts or scanners.

913-0025. MPTA24DTEACH 548.00

Environmental Enclosures

EH3512 Series. Designed for use with 2/3" and 1/2" format cameras and fixed focal length lenses or motorized zoom lenses with or without auto-iris operation.

913-3500. EH3512EACH 103.00

EH3512-2. Same as above except with 24 VAC heater/blower, 40 watts.

913-3505. EH3512-2EACH 265.00

EH4718 Series. Designed to accept CCD cameras with either fixed focal length lenses or motorized zoom lenses (up to 10X). 19" long.

913-4718. EH4718EACH 171.00

EH4718-2. Same as above except with 24 VAC heater/blower, 40 watts. 2". 20"-50" long.

913-4719. EH4718-2EACH 354.00

Enclosure Mounts

EM22. Designed and engineered for use with various PELCO enclosures. The EM22 mounts to a wall or other vertical surface and features a cast aluminum wall arm which minimizes undesired horizontal movement.

913-0022. EM22EACH 85.00

Camera Mounts

CM1700. Light duty, universal mount primarily designed for ceiling or pedestal mounting of CCTV cameras, but can also be used as a wall mount.

913-1700. CM1700EACH 45.00

TB1700. Specifically engineered for attaching the mount to the "T" rail found in most false ceiling installations.

913-1705. TB1700EACH 45.00

Sequential Switcher

VS5004/VS5008. The VS5004 is a low cost desktop, sequential switcher designed to manually or automatically switch four (4) cameras to one (1) monitor and respond automatically to alarm inputs. The VS5008 is an 8-position sequential switcher with dual output and alarm function.

913-5004. VS5004EACH 302.00

913-5008. VS5008EACH 405.00

VS5104/VS5108. Same features as the VS5004/VS5008 except they are homing switchers having one (1) monitor output and no alarm capability.

913-9835. VS5104. 4 PositionEACH 176.00

913-9840. VS5108. 8 PositionEACH 295.00

Computer Filters

3M Privacy Filters

- Keep On-Screen Data Confidential, Even in Open Office Areas
- Help Prevent Casual Viewing of On-Screen Data
- Ideal for Correspondence, Personnel Information, Financial Records and Other Confidential Data
- Provide Excellent Screen Contrast
- Standard Glare Reduction Feature Plus Optional Radiation Protection
- Two Sizes to Fit Most Popular Computer Monitors

Your business is nobody else's business. That's why 3M created a privacy filter that protects on-screen data. Once your 3M privacy filter is installed, its special microlouver technology allows computer data to be viewed only from directly in front of the monitor. People viewing from the side see a blank, dark screen.

3M Anti-Glare/Radiation Filters

- Reduce Glare and Radiation From Computer Monitors
- Virtually Eliminate Screen Glare to Help Prevent Eye Discomfort or Strain
- Block 99.9 Percent of ELF/VLF E-Field Radiation
- Stop Static Charge and Dust Buildup
- Provide Good Screen Contrast, Even in Brightly Lit Areas
- Two Sizes to Fit Most Popular Computer Monitors

Diskettes

- State-of-the-Art Manufacturing Equipment and Production Processes Ensure Data Integrity and Diskette Life
- Specially Selected Substrates Form a Smoother, More Consistent Oxide Coating That Helps Prevent Errors by Minimizing Debris Generation
- Proprietary Burnishing Process Reduces Head Wear for Greater Reliability and Optimum Performance
- Meets ISO and ANSI Storage and Operating Standards

- 5 1/4" Diskette's 10 Mil Jacket Minimizes Jamming and Bending
- Stringent Testing and Certification Procedures Mean 3M Diskettes Will Perform to the Highest Standards
- Diskettes are Packaged in Compact, Durable Storage Boxes to Provide a Flexible, Affordable Storage Alternative
- Available in 3 1/2" and 5 1/4" Sizes in IBM Formatted and Unformatted Types

Dorio Single-Session Terminal

- ▶ 16 Terminal Emulations, Including WYSE®, Digital, ADDS, Televideo
- ▶ Support For Over 30 Operating Systems, Including UNIX®, Pick®, Multiuser DOS, OpenVMS
- ▶ Industry Standard Connectors And Protocols
- ▶ Serial And Centronics® Parallel Printer Ports
- ▶ Mini-DIN Keyboard Connector (PS/2®-Compatible)
- ▶ All Keys Remappable To Eight Levels
- ▶ Supports 25 Country Languages
- ▶ Cartridge Slot For Firmware Enhancements

- ▶ Simple, Windows-Like Setup In Five Languages: English, French, German, Italian, Spanish
- ▶ Programmable Banner
- ▶ Easy-On-The-Eyes Display Features
- ▶ Desktop Productivity Tools, Such As Clock (2 Alarms) And Calculator, Local Copy And Paste, Built-in Character Sets
- ▶ Horizontal And Vertical Scrolling
- ▶ Text Windowing Via Rectangular Area Operations
- ▶ Host Access To Terminal's Unique Serial Number

The Dorio single-session text terminal (VGB-10) brings new meaning to the word VALUE for organizations around the world. That's because it offers quality, reliability, ergonomic design, and plug-and-play compatibility — all at a very low price.

Just what does plug-and-play compatibility mean? It means that the Dorio terminal works in all computing environments where popular ASCII, ANSI, and PCTerm terminals are used today. It means that it emulates 16 popular text terminals and supports more than

30 different operating systems. You can be confident that it will work in your environment — totally independent of platform and application preferences.

What's more, every Dorio terminal is built and backed by a world-leading terminal manufacturer and service organization. It comes with a no-hassle, 30-day money-back guarantee, plus a comprehensive three-year warranty. Your Dorio purchase decision is risk-free!

Dorio Multi-Session, Monochrome Text Terminals

- ▶ Split Screen Viewing of Any Two Sessions
- ▶ Session Borders with Session Labeling, Status Indicators
- ▶ ANSI/ASCII/PCTerm Protocols
- ▶ 17 Different Terminal Emulations
- ▶ Support for More than 30 Operating Systems

— NEW —

With Digital's multi-session terminals, it's like having four terminals in one. With either the VT520 or Dorio 20, you can create four independent sessions over a single wire via software, or you can access your applications via the three connectors provided on the terminal. Dorio multi-session terminals utilize the same keyboards as the Dorio single session terminal.

VT500 Text Terminals

The VT500 family terminals are compatible with Digital's VT420, VT320, VT220, VT100, and 52 other ANSI terminals. Plus, they emulate 17 ASCII terminals, including WYSE 50, 60 and 160 text. VT500 text terminals utilize the same keyboards as the Dorio single session terminals.

The VT510 features an anti-glare 14-inch flat surface with overscan. It can replace virtually any text terminal, so users have the flexibility to change desktop configurations. Three year warranty.

Color, Multi-Session Text Terminals

These terminals provide all the features of the multi-session products, with the added plus of color display. Each of the four sessions offers sixteen colors per session, with a 4096 color palette. Both support ANSI color protocol and ASCII color emulation. Four independent sessions, each with independent color capabilities. Split screen viewing of any two color sessions.

DECwriter 90ip Personal Printer

— NEW —

- ▶ Thermal Inkjet Technology
- ▶ 100 cps Performance at 300 dpi
- ▶ Prints on Plain Paper and Transparencies, with a 15 Sheet Automatic Feeder
- ▶ Resident Fonts — Courier, Letter Gothic, Times Nordic, Linear
- ▶ Ships with MS Windows 3.1 Driver
- ▶ Optional Car Lighter Adapter
- ▶ Small Footprint — 11.6" x 5.1" x 2.5"

Not everyone works at their desk, or in an office, or even in the same place every day. Digital can provide the perfect printing solution for your personal printing needs — the DECwriter 90ip Personal Printer. It prints where you work — at home, on the road, or in the office. A low-cost portable printing option, the DECwriter 90ip runs on AA batteries (and has an AC/DC adapter) with print speeds up to two pages per minute.

Weighing only 2.4 lbs., the DECwriter 90ip is truly portable, but sacrifices nothing in quality and features.

DECwriter 95

- ▶ A Perfect Companion To Any Personal Computer
- ▶ Quiet Enough For Home Or Office At 43 dBA
- ▶ Versatile Paper Handling — Including Labels And Envelopes
- ▶ Quarter Page Printing — Prints Four Pages Of Text Onto One
- ▶ Simple Setup Through Front LCD Panel
- ▶ Windows 3.1 Printer Driver Included
- ▶ Auto Parking/Loading Features
- ▶ Top, Rear, and Bottom Paper Paths
- ▶ An Affordable Output Solution For PC Users
- ▶ Crisp Text And Superb Color Graphics — 360 x 360 dpi
- ▶ Epson LQ570 (with ESC/P 2) And IBM Proprinter X24e Emulations
- ▶ 13 Resident Fonts For Professional Looking Documents
- ▶ Color Capable — Through Optional Color Kit

The affordable DECwriter 95 provides quality, presentation style output for even the most discriminating PC user. The DECwriter 95 includes state-of-the-art features such as built-in scalable fonts in type sizes from 8 to 40 points, automatic emulation sensing, ultraquiet operation at 43 dB (decibels), easy setup through its top LCD control panel, and added features like Quarter Page Printing (allows you to print four page images onto one page) and Memory Recall to automatically recall the printer setups of the software that you use most often. Optional features of the DECwriter 95 include a Color On Command™ Kit, Serial Interface Card, Memory Expansion Cartridge, Automatic Sheet Feeder, and Desk Stand.

Compatible with the Epson LQ570® and IBM® Proprinter X24e® emulations, the DECwriter 95 comes standard with a Windows™ 3.1 printer driver, allowing seamless printing from all Windows-based software applications.

Computer Data Transfer Switches

Data Switches

Data switches permit computer users to share printers, modems, etc., providing economy by decreasing the amount of equipment needed. All GC data switches are data-transparent and all lines are switched "straight-through". This permits using an A/B switch to a printer with two computers, or using two printers with one computer, and so forth.

This series of switches is built in sturdy steel cases for excellent shielding characteristics and durability. Switches are sealed and contacts employ precious metals. For use with printers, modems, plotters, etc.

Switch Types. Standard switch types...one printer may be switched between two (A/B) or more (A/B/C/D) computers (or vice versa). X-Switch — Two computers can share two different printers (or any peripherals) and connections are changed with a flip of a knob.

*Centronics is a registered trademark of Centronics Data Computer Corp.

**IBM is a registered trademark of International Business Machines Corp.

*Apple is a registered trademark of Apple Computer, Inc.

Automatic A/B Data Switch

Types 45-2090 and 45-2091. Automatically switches between two computers sharing a single printer. Requires no external power. Manual override switch is available. DB-25 connectors

Network Communications

Modular IDC Connectors — Category 5

► Category 5 Transmits Up to 100 Megabytes of Information Per Second

Insulation displacement contacts for 22 to 26 AWG wire. Allows for convenient termination of twisted pair cable. 50 microinches of gold plating or modular contacts. Complies with IEEE standards 802.3 (10BaseT) and 802.5 (Token Ring). These connectors are designed to snap into patch panels and wall plates. A variety of colors allows flexibility in wiring configurations. TIA and AT&T wiring schemes are easily accepted by these connectors.

Motorola ISG

28.8 Desktop Modems

LifeStyle

- ▶ True V.34 Technology
- ▶ Fax Error Correction
- ▶ On-Screen Help Utility
- ▶ Caller ID Support
- ▶ Enhanced Access Security
- ▶ Compatibility with all Popular Communications Software

Power Series

- ▶ Software Downloadable Architecture
- ▶ Distinctive Ring
- ▶ Enhanced Password and Callback Security
- ▶ Remote Configuration — Load or Modify Modem Setting from Remote Location

The LifeStyle 28.8 data/fax desktop modems are targeted at home and first time IBM-compatible PCs and Apple Macintosh users. They are ideal for applications such as, information retrieval via on-line services, interactive electronic game-playing and electronic shopping and banking. The Power series modems, support advanced features intended to serve the needs of business and professional users which tend to be more advanced in their computing requirements.

14.4 Modems

LifeStyle

- ▶ Cellular Upgradeable
- ▶ Software Downloadable
- ▶ On-Line "Help" Screen
- ▶ Low Power Consumption
- ▶ High Speed Fax Modem

Power Series

- ▶ Low Power Consumption
- ▶ High Speed Fax Modem
- ▶ Direct Connect to Motorola MC MicroTAC Cellular Phones
- ▶ Remote Configuration for Unattended Remote Modems

The LifeStyle 14.4 PCMCIA was designed for wireline operation. This product is upgradeable to cellular by purchasing a Motorola cellular upgrade kit. This allows consumers to purchase a PCMCIA modem today, for typical wireline operation, at the lowest price possible without the worry of obsolescence if they later need cellular capabilities. The Power 14.4 PCMCIA is a wireline/cellular modem. This is an ideal product for the mobile user needing to access critical information wherever they are. Both provide data and fax communications from laptop or palmtop PCs supporting PCMCIA class 2 slots.

3Com Network Adapters

EtherLink

- ▶ Unmatched Speed
- ▶ Unsurpassed Ease-of-Use
- ▶ Powerful Management
- ▶ Low Price
- ▶ Strong Family Ties
- ▶ Extensive Compatibility
- ▶ Reliability

TokenLink

- ▶ Easy Installation
- ▶ Full Management
- ▶ Low-Cost IBM Solutions
- ▶ Choice of Buses and Wiring
- ▶ Extensive Software Compatibility
- ▶ Reliability
- ▶ Best Value

3Com offers leading adapters for all network environments — Ethernet and Token Ring. For all types of buses — ISA, EISA, MCA, and PCMCIA and for any kind of media — unshielded twisted pair (UTP), shielded twisted pair (STP), coaxial, and fiber wiring. All 3Com Ethernet and Token Ring adapters are SNMP manageable with 3Com Transcend SmartAgent™ software that lets you easily see and control PC network activity. 3Com adapters are designed to work with Novell® NetWare®, and are fully compatible with over 90 other network operating systems and utilities, including MS LAN Manager, MS Windows NT, Banyan® VINES, and IBM LAN Server. TokenLink III adapters come with AutoLink software that lets you complete your adapter installation — including downloading of NetWare client files — in about three minutes. Completely software configurable, TokenLink III adapters also include an on-board universal boot PROM so you can easily download drivers from the most popular network operating systems. LEDs verify insertion into the ring and let you effortlessly see ring speed.

Allied transformers are specially built to Allied Electronics' high standard for quality, stability and long-term performance. Laminated cores of silicon iron electrical grade steel. Insulation is non-corrosive Class A. Temperature rating 105°C continuous operation. Superior permeability at high inductances, with low coil loss. Coils of high

quality film insulated copper magnet wire. PVC leads are fast stripping and provide protection from oil, ozone and abrasion. Cold rolled steel covers provide protection to coils. Finished in semi-gloss enamel for good appearance. Compare prices and specifications and you will find that Allied transformers are your best buy.

Allied's Own Power Transformers

For new equipment or replacement use. All types listed are shielded except those indicated by †. Have 6" flexible color-coded leads for easy installation. Plate windings are center-tapped except *half-wave type. 6.3 volt windings are center-tapped except †

not center-tapped. All have primaries for operation from 110-120 volt, 50/60 Hz AC, except for **60 Hz AC only.

Machine Tool Control Transformers

These control transformers are designed to meet the temporary inrush current of electromagnetic components such as contractors, relays, timers, etc. They feature a high impact, molded integral terminal block, copper wire and vacuum varnish impregnation to seal/bond the unit. These units operate from 50/60 Hz AC power and are listed by both UL and CSA. The molded terminal blocks allow for easy primary or secondary fusing to meet UL 508 requirements (see optional fusing table below).

Primary 240/480 Secondary 120 V

PC Mount

TRIAD power transformers from MagneTek are offered in a wide selection of plug-in types to meet the needs of PC board and solid state power supply designs. These transformers can satisfy power as well as control and instrumentation applications. The transformers are available in single or dual primary and dual center tapped secondary configurations. **Specifications. Primary:** 115/230 V; 50/60 Hz.

Telephone Coupling

Telephone Coupling Transformers

TRIAD telephone coupling transformers from MagneTek are designed for use in work areas where several telephones are connected to a single incoming — outgoing line. The TY Series is adaptable for hybrid, bridging or coupling applications. These coupling transformers provide a correct means of impedance matching and balancing through close coupling and isolation — all parameters must be considered so that existing lines are not degraded. **Specifications.** **Frequency Response:** 300-3,500 Hz ± 0.5 dB. **Longitudinal Balance:** 45 dB min. **Return Loss:** 26 dB min. **Distortion:** 0.5% max. **Impedance Matching:** $\pm 10\%$ over the frequency range. **Power Level:** -45 dBm to +7 dBm. Complies with FCC Rules Part 68.

Plug-In Printed Circuit Audio Transformers

MagneTek produces a wide assortment of TRIAD audio transformers for use in printed circuit designs. These transformers fill a broad application spectrum in the audio industry. TRIAD audio printed circuit transformers are used in line matching, telephone coupling, pulse trigger, driver, interstage, output, isolation and input applications. **Specifications.** **Frequency Response Ranges:** 200-15,000 Hz. **Impedance Matching:** 10% over frequency range.

Audio Transformers

MIL-T-27E

TRIAD high reliability audio transformers from MagneTek provide the durability and precision required in today's demanding designs. These transformers are available for a wide variety of applications. The line of Red Spec audio transformers is designed and constructed to meet the rigid requirements of MIL-T-27E. These transformers feature an epoxy molded case, gold plated leads and exceptional operation from 300 Hz to 150 kHz. **Specifications.** **Frequency Response Ranges:** 300 Hz to 150 kHz.

Inductors

TRIAD chokes are manufactured in a wide variety of inductance values and physical configurations. MagneTek produces two styles of TRIAD filter reactors (chokes): smoothing and swinging. Smoothing chokes are power supply filter chokes having a core with an air gap which prevents saturation at maximum direct current. Swinging chokes have cores with little or no air gap, therefore, exhibiting high inductance at low current and low inductance at high current. This inductance, which swings under conditions of varying load current, permits use of a high resistance bleeder resistor. Swinging chokes improve regulation of high voltage power supplies and prevent DC voltage from rising to the maximum peak AC rectifier input by providing a swinging input reactance. **Specifications. Inductance Ranges:** .005 to 50 H. **DC Current Ranges:** 10 Ma to 22.5 A. **Resistance Ranges:** .06 to 3500 Ohms.

Power Transformers

Chassis Mount — Control

TRIAD control transformers from MagneTek supply secondary voltages that are commonly utilized in various electronic, electro-magnetic and electrical control conditions. These include such applications as use with relays, solenoids, small motors, speed changers, pumps, heating elements, control valves for fluids and gases, fans and blowers, electronic tubes, automatic assembly equipment, recording devices, elevators, door openers, and low voltage lamps. **Specifications. Primary:** 115/230 VAC. 50/60 Hz. **VA Range:** 12 to 192. **Secondary:** 6/12/24 VAC.

Low Frequency CSE187-L

Designed to monitor current in low frequency applications. This MagneTek part may be used to monitor current from .1 to 30 amperes at frequencies from 50 Hz to 400 Hz. **Technical Notes. Turns Ratio:** Primary to sense 1:500. **Suggested Burden Resistor:** 60 ohms. **Typical Output:** 110 mV/Amp. **Primary DCR:** 250 μOhms max. **Sense DCR:** 21 ohms max. Constructed with UL recognized materials (Class B, 130°C).

967-1100 EACH 2.89

Chassis Mount

Figure A

Figure B

MAGNETEK Chassis Mount World Series transformers are designed to meet U.S. and international standards including CSA, IEC, VDE and UL requirements. The transformers consist of a dual bobbin design positioned inside an insulating shroud, and constructed with UL approved high temperature material. This design eliminates the need for electrostatic shielding since there is minimal capacitance between coils when using a dual bobbin configuration. The primary and

secondary are both electrically isolated from each other, and from the core itself. Chassis Mount World Series transformers are available in sizes ranging from 25 VA to 175 VA, and are equipped with convenient "quick connect" terminations. **Technical Notes:** 1. Hi pot tested at 4000 RMS. 2. Both primary and secondary coils may be connected as either series or parallel, but both must be used simultaneously. **Specifications:** Primary: 115/230 V, 50/60 Hz.

PC Mount

MAGNETEK PC Mount World Series transformers incorporate a dual bobbin construction with an insulating shroud, both made of a high temperature material that exceeds UL flammability requirements. These units are designed with very high isolation between the primary and secondary, and also, between each winding and the core. Since the dual bobbin construction effectively reduces capacitance, electrostatic shielding is not required. PC Mount transformers are available with ratings from 2.5 VA to

56.0 VA and have dimensionally accurate pin placement for through hole PC board mounting. All World Series transformers meet U.S. and international standards including CSA, IEC, VDE and UL requirements, and, therefore, have universal application. **Technical Notes:** 1. Hi pot tested at 4000 RMS. 2. Both primary and secondary coils may be connected as either series or parallel, but both must be used simultaneously. **Specifications:** Primary: 115/230 V, 50/60 Hz. **Variances:** 2.5 to 56.0.

Autotransformers and Transformers

Step-up/Step-down Autotransformers

TRIAD autotransformers are single winding transformers in which the primary coil is a fraction of the entire winding for voltage step-up or the secondary coil is a fraction of the entire winding for voltage step-down. (See Technical Notes for an equivalent circuit diagram). In ordinary double wound power transformers, the primary and secondary are isolated and all the power is transferred by induction. In autotransformers, part of the power is transferred conductively through the windings. TRIAD autotransformers come in a variety of configurations, case types and output watts (VA) ratings in excess of 2000 watts. A universal isolation/autotransformer/voltage control model is available with up to a 4000 output watts rating when operated as an autotransformer

Δ Has 3-wire plug, cord and socket. Mounting hole sizes: (3)= 3/8 x 3/16", (1)= 3/16".

Isolation

Isolation transformers are power transformers for isolating equipment from direct connection to the power line. They are offered in a variety of voltage and case types. TRIAD isolation transformers are also offered in a hospital type (designated with an MD suffix) which are designed and constructed to meet the low leakage current requirements for today's medical equipment. The transformers are constructed with nonconcentrically precision-wound coils. The primary and secondary are precision wound on separate arbors, then assembled on a laminate core side by side separated by insulation. This prevents electrical connection, under normal or overload conditions, between the primary and secondary windings. These hospital type units are offered with a resettable circuit breaker, providing protection from overload and short circuit conditions.

967-9506	N-66A	250	115-230 ϕ	115	2.17	A(3)	Leads	2	4 5/8	3 15/16	4 5/8	3	3 7/8	11.0	62.16

ϕ Split winding. Mounting hole sizes: (3)= 3/8 x 3/16", (1)= 3/16".

Technical Notes: 1. Leakage current from primary to secondary is rated at less than 50 micro-amps and is typically measured at less than 10 micro-amps. 2. Line cord, plug and receptacle are U.L. listed and verified to meet federal specifications. 3. Connections are by leads, plugs and sockets. 4. Hi-pot tested at 1500 VRMS. 5. All units have static shields, except those marked with an asterisk.

Wall Plug-ins

Figure A

Figure B

Figure C

Figure D

(All UL/CSA)

MAGNETEK'S prepackaged wall plug-in power supplies decrease product design time. These plug-in power sources eliminate the need for internal power supply cooling devices, thereby reducing the noise level, size and weight of the end product. In addition, these compact power sources keep heat away from sensitive circuits, and supply a safer lower

power output to the end product. Wall plug-in power sources are completely enclosed to prevent tampering. And since they carry many required agency listings, their use aids in gaining agency approvals. Offered in a wide range of popular voltages, the plug-in power sources are available in AC-DC unregulated models with generous foot cord lengths.

Power Transformers

MagneTek offers a full choice of TRIAD power supply transformers for direct use or in transformer, rectifier, or filter circuits. Other available secondary voltages include control, filament and low level signaling in standard values. The transformers are single primary with single and multiple secondaries in standard size and weight configurations.

60 cycle operation. ‡ Static Shield. † Tapped primary to produce lower voltages. CT = Center Tap. Mounting hole sizes: (1) = 3/16", (2) = 5/16" x 3/16", (3) = 3/8" x 3/16".

Flat Pack

The Triad Flat Pack power transformer from MagneTek is designed to meet the needs of low clearance PC board and solid state power designs. These units can also be used for control and instrumentation applications. Voltages and currents were chosen for widely used power applications. It is offered in a dual primary and dual secondary configuration. **Specifications. Primary:** 115/230V, 50/60 Hz. **Low Profile:** allows 3/4" card spacing for 2.5VA units, allows 1" card spacing for 6VA units, allows 1 1/4" card spacing for 12VA units.

Power Transformers

Single and Dual Primary Transformers

Quick Pack Series small power transformers offer a significant size and weight reduction for a given VA rating. Features quick-connected or solder terminals. Available in 6 sizes for a wide variety of applications. Bobbin wound for small size. Split bobbin non-concentric winding for a higher HiPot testing (2500V rather than 1500V); also eliminates need for electrostatic shielding. Class B insulation for maximum total temperature of 130°C continuous. Available as single 115V or dual 115/230V primary, rated 50/60Hz. UL Recognized.

Note: Terminals to be quick-connect (1.87) or solder lug terminals. Dielectric Strength: 2500V.

Our formal quality assurance system verifies that your specifications are consistently met or surpassed. We maintain accurate statistical process controls on our product and test all incoming components. Continued inspection of wire, core, insulation and other components, combined with our supplier quality assurance program, virtually eliminates imperfections.

Common Mode Inductors

- Hi-Pot Tested at 2,500 VRMS
- DC Resistance at 20°C ±10%

Highly dependable TRIAD common mode EMI suppression inductors manufactured by MagneTek are used in various types of power supplies to eliminate noise common to all lines. These units also provide effective differential mode filtering. Meeting VDE, IEC, UL,

- Inductances are Minimum Measured at 10 Gauss
- Current Ratings for Approximately 40°C Temperature Rise

and CSA requirements, they minimize AC line transmitted interference often created by high frequency switching power supplies. Normally placed close to the input power source, these compact inductors are constructed with UL rated 130°C materials.

Current Sense Inductors

- Derate ET Product by 32% for 50 kHz, 52% for 100kHz and 50% for Unidirectional Operation
- Rated Primary Current Renders Approximately 40°C Temperature Rise
- CST-206 Models Have Maximum Recommended Terminating Resistance of 1 Ohm Per Turn

Designed for switching power supply applications, TRIAD current sense inductors from MagneTek are used to detect the current passing through a conductor. These inductors are very reliable and operate effectively over the frequency range of 20-200kHz. They are constructed of UL rated 130°C materials. Both models are available with a center tap option.

Rod Core Inductors

► Rated Current 10 Amps per Pin Max

► Rated Current Renders @ 40°C Temp. Rise

TRIAD high current rod core inductors from MagneTek provide cost effective energy storage. By conditioning the output signal, the inductor smooths out the current waveform to provide a more stable current. These low cost inductors are designed to be compatible with automated P. C. B. installation.

High Current DC Filter Inductors

► DC Resistance ±15%

► Inductance ±10%

TRIAD output filter inductors from MagneTek are used in output circuit applications to provide a more constant current source by storing energy. These inductors have exceptional performance characteristics across the entire specification range with their primary storage function being energy storage. As opposed to other output filter inductor designs offering only a single winding, these devices offer design flexibility so that several outputs can be fed through different windings on the same core.

Toroidal Filter Inductors

► Nominal Inductance Values are Typically 10% Higher Than Minimum Rating

► Operation at Rated Current Yields @ 40°C Rise Over 20°C Ambient

► Biased Inductance Measured at Rated DC Amps

TRIAD toroidal filter inductors from MagneTek are specially designed to minimize transients. These devices store energy, and therefore, condition the output signal by leveling out the current waveform providing a more stable current supply. Generally used in high frequency circuits, our standardized design provides an economical solution for use in differential mode applications or as an output filter inductor.

A FIT-KIT is available which includes one of each of the above listed components.

PCA/PCD Series

Ohmitrol Power and Motor Speed Controls are solid state units which provide an infinitely smooth power control over their entire voltage range. An integral internal trimmer allows customization of the control voltage to be set to a specific starting voltage by a simple turn of a screwdriver. The on-off switch is actuated at the counterclockwise end of the control knob rotation. The recommended optional knob is 5150 (sold separately). The PCA series has an AC output that can be used for applications to control heaters (both resistive and infrared) and motors such as universal and shaded pole.

The PCD with a DC output can be used to control shunt and series wound, universal, compound and permanent magnet motors, magnetic clutches, brakes, etc. The PCD models have two DC outputs, one output from an AC source is rectified DC at approximately full line voltage, the other output is variable DC. The DC units have rear terminals which accept quick-connectors. On the PCD models, 500 mA is the minimum for proper operation. For use of either control under full power output conditions, the face of the control must be in contact with a metal panel. For optimum heat dissipation a thermal-conducting compound must be applied to the face of the power control before mounting.

SCE SERIES

POWER CIRCUIT SCHEMATIC

OPEN CHASSIS DIMENSIONS

SCA SERIES

Infinitely variable voltage power controls for AC voltage to constant resistance loads and shaded pole motors. All solid-state construction with short circuit protection. Integral heatsink chassis means no thermal derating. Applications include replacing variable transformers, mercury relays, saturable core reactors, electromechanical contactors, for electric heater controls, light dimming, hot-wire cutting, heat sealing and packaging plastic molding and extruding and food preparation equipment. Power Triacs replace contacts and brushes to control electric power without moving parts. When operated within their stated

ratings for current, voltage, and temperature, they have no known MTBF or life expectancy rating. The power circuit is a power Triac with parallel R-C circuit for dv/dt protection and current-clamping 2 millisecond fuse for short-circuit protection. The R-C network control circuit with variable-resistance potentiometer adjusts firing capacitor into bilateral diode connected to power Triac gate for stable full-range control. **Output Voltage:** 0-95% of input. **Overall Efficiency:** 99%. Manual input control via variable potentiometer.

Industrial Control Transformers

— NEW —

SBE Series Industrial Control Transformers

- Cooler Operating Temperature (50° to 55° C)
- 10-20% More VA Capacity
- Superior Voltage Regulation
- UL Listed and CSA Certified
- Rated for 50 or 60 Hz Use
- Epoxy Encapsulated Design
- Quantity Pricing Always Available

SBE transformers are encapsulated to permit more efficient heat dissipation for cooler operation and higher VA capacity. The higher rated capacity provides you the opportunity of meeting high inrush electromagnetic load requirements for either 50 or 60 Hz applications, with smaller transformers and less cost per VA.

SBE-3PB Industrial Control Transformers

- Simplifies Compliance with NEC and UL Specification 508 Fusing Requirements
- Eliminates the Time and Cost of Buying Separate Fuse Blocks
- Saves Panel Space with Molded-in Fuse Holders Mounted on the Top Surface
- Exceeds NEMA, ANSI, NBMTA, JIC and Automotive Electrical Requirements
- Rated for 50 or 60 Hz use
- UL Listed and CSA Certified

120 × 240 Volt Primary, 24 Volt Secondary with 3PB Fuse Block

- Free Shielding
- Fast, Easy Installation
- UL-3R Enclosures
- Highly Versatile

Hevi-Duty General Purpose Transformers are the industry's workhorses. Typical applications include shopping centers, apartment buildings, high rise buildings, institutional buildings, hospitals, office buildings, industrial plants, schools and commercial buildings.

Buck-Boost Transformers

- Low Cost
- UL-3R Listed
- Ideal for Low Voltage Lighting and Control Applications
- Compact Size
- Dual Voltage Primary and Dual Voltage Secondary

Hevi-Duty buck-boost transformers are the ideal solution for economically changing line voltage by small amounts. Buck-Boost transformers are small, single phase, dry-type distribution transformers, designed and shipped as insulating/isolating transformers. The most common use is to buck (lower) or boost (raise) the supply voltage a small amount, usually ±5 to 2000%.

Motor-Driven Models

For applications requiring remote or automatic voltage control, a driving motor can be added to all models of the 501 through 6010 series. Standard motor speeds available are 5, 15, 30 and 60 sec-

onds of travel and are designated by the prefix: "5M, 15M, etc.". Example: 30M1510. Available by special order.

Portable Models

Prefix "3PN" indicates 3-prong cord, plug and receptacle; "V" suffix indicates voltmeter. "A" suffix indicates ammeter. All models are housed in a rugged steel enclosure and supplied with input linecord and plug with matching receptacle, on-off switch, fuse, pilot light. Available for 120 Volt AC or 240 Volt AC input.

Fully Enclosed Variable Voltage Controls

All holes have been eliminated to prevent entry of small items. The front panel is recessed to help minimize accidental shut-off or unintentional readjustment. Designed to minimize voltage variation from no-load current conditions, thus reducing the need to readjust the output voltage as the load current changes. Much higher currents, up to 10 times the specified rating, can be drawn for a short period of time for surge current applications. These controls can operate up to 2000 Hz with virtually no loss in output current.

Rectifier, Control and Filament Types

With single secondary: all primaries 50/60 Hz (may be operated from a 400 Hz source with no change in output ranges). Useful in all power and control applications such as relays, pilot lamps, small motors, pumps, speed changers and many other mechanical and electrical devices. Many units are center tapped for most efficient and economical rectification application, enabling the designer broader selection and versatility. All types have lead wire terminations and 117 volt primary except P-8551 which is 115 volts. Twice allowable RMS working voltage plus 1000 volts.

* Insulation Test voltage. †60 Hz only.

Control Transformers

Primaries 115/230 Volts 50/60 Hz (may be operated from a 400 Hz source with no change in output ratings). Solder lug termination, dual secondary windings. U.L. Recognized. **Typical applications:** automatic assembly equipment, relays, speed changers, pumps, etc.

* By connecting primaries in series (for 230 volts) but using only 115 volts input, a series of half voltage output ratings becomes available at the full rated current from each secondary.

Filter Chokes

High current chokes. Inductance measured at 1 volt 60 Hz. **Insulation Test RMS volts:** TC-1 and TC-2, 1000; all others, 1500. Type C-2692 has self lead termination; all others have lead terminations.

Auto Transformers

All of these items have Class "A" insulation and are rated to have a maximum operating temperature limit of 105°C. These units may be used with rectifiers but the form factor should be observed for various combinations of rectifier circuits and types of load following the rectifier.

These items are made with our standard N.E.M.A. plugs and receptacles, primarily for use in this country. However, if used overseas where different types of plugs are necessary, an international adapter plug below can be used or our plug can be removed and a foreign plug attached to the end of the line cord.

Step-Down Auto-Transformers. 230/115 volts, 50/60 Hz. May be operated from a 400 Hz source with no change in output rating. Case and core internally connected to third conductor of NEMA standard cord and receptacle for safety. **RMS Test Voltage: 1500.**

International Adapter Plugs

A new line of grounding adapters, ideal for use on electrical/electronic equipment exported to countries that have standardized on the CEE-7 SCHUKO outlet configuration. The use of these adapters reduces the need for expensive and difficult-to-obtain foreign type power cords and cord sets, as they provide a fast, easy means of connecting equipment to European outlets.

American to European - Fig. A

Allows interface from NEMA 6-15P plugs to CEE-7 SCHUKO grounding outlets.

928-9951. ADT-30100. 1-9 EACH 13.98

European to American - Fig. B

Allows interface from CEE-7 SCHUKO plugs to NEMA 6-15R grounding outlets.

928-9952. ADT-30120. 1-9 EACH 26.63

European to United Kingdom - Fig. C

Allows interface from CEE-7 SCHUKO plugs to U.K. 13A, 250V receptacles.

928-9953. ADT-30140. 1-9 EACH 24.34

Low Boy™ Low Profile Transformers

Explanation of Low Boy Interconnections. Because of the toroidal effect, two identical coils are connected in series or parallel, but one of the coils must be connected in reverse in order to get correct polarity and voltage.

The Low-Boy Power Transformer is designed to surpass competitive market offerings in cost, size and versatility to the designer. Applicable to low clearance, stacked printed circuit board and solid state power designs, the Low-Boy will allow closer board stack spacing at lower power levels (down to 200mA at 10 volts). Semi-toroidal construction reduces radiated magnetic fields and results in balanced windings. Non-concentric winding provides isolation by design, eliminating the need for an electrostatic shield. Allow 3/4" card spacing for 2 and 3, VA units; 1" for 4, 5, and 6VA; 1 1/4" for 12VA units. Dual Primaries — 115/230V, 50/60 Hz. Allows standard hi Pot — 2000 volts. Precision spaced p.c. terminals.

Telephone Coupling Transformers

Style A

Style F

Style H

Style K

Stancor's TTPC series transformers are designed to meet the high performance requirements of today's phone interconnect and instrumentation applications. Stancor has the broadest range of units for general use in impedance matching, circuit isolation, line balancing or bridging, and hybrid applications. TTPC transformers are ideal for use in voice and data interconnect networks such as modem terminal connection to telephone lines. Stancor's units will handle 1500 volts dielectric withstand and meet FCC Part 68 requirements. See below for the highest quality and broadest selection of styles.

NECESSARY EXTERNAL CONNECTIONS; SHORT 2A-2B, 6A-6B

Side Winder

Side Winder applications include electronic game systems, computer peripherals, medical electronics, and switching power supplies. Split bobbin winding and low capacitive coupling design

eliminates electrostatic shielding requirement and expense. High isolation, 2,500 V rms. Hi-Pot testing. PC pins, precision spaced, insert directly into PC boards. Class B insulation, 130° C.

POWERSTAT® Variable Transformers

POWERSTAT® Variable Transformers with patented POWERKOTE® Coils provide a simple rugged method of controlling electrical voltage current and power. They take in utility line voltage and provide continuously adjustable output voltage. Most frame sizes are available with a boost option to allow operation up to 17% above input nominal. Open construction models have letter U suffix in the style

number and have the shaft extending from the end of the assembly for panel mounting. All plug-in models have input cord-plug sets, output receptacles, switches and fuses and are connected for clockwise knob rotation. Other models, including motorized are also available. Call Allied for details.

*Call your local Allied office, 1-800-433-5700, for NEMA 1 Enclosures and Motor Drive Options.

Power Supplies and Power Cords

Foreign Power Supplies and Power Cords

- Four Convenient Power Sizes
- IEC Input Port For Foreign Cords
- Operates On 50 Hz and 60 Hz Input With Safety*
- Isolated Output Receptacle
- Convenient On-Off Switch
- Circuit Breaker
- Voltage Selector
- Power For Photographic/TV Crews Abroad
- Power For International Trade Shows
- Conversion for U.S. Appliances in Foreign Use

*Note: Unit does not change frequency. Use only for equipment that can be operated on 50 Hz only, 60 Hz only or 50/60 Hz.

Universal Voltage Converters — Converts 100/120/220/240 V to isolated 120 V with optional foreign power IEC input cords to suit your use location.

Condensed For Power Series

Dimensions are for reference only. Should not be used for specification purposes.

The CFP Series include a grain oriented core for high saturation density, lower core loss, and less steel and copper use; split bobbin for non-concentric winding (lower capacitance, high isolation, better insulation) no cross-overs of primary and secondary leads; bobbin wound for reduced size. **Specifications. Primary Ratings:** Single 115 V (to 120 V) or dual 115/230 V, 50/60 Hz. **2500 V RMS Hipot:** Class S (130°C) rated. **Special Terminal:** Solder or quick-connect.

VA Size	L	W	H	A	B	ML	Wt. (Lbs.)

Mini-ISO-Mites

The Mini-ISO-Mites are low voltage, plug-in, power transformers. 8-pin dual 115/230 V primaries and secondaries are wound non-concentrically meaning, side by side. This construction results in smaller units and eliminates the need for costly electro-static shielding. Highly isolated units with 2500 HIPOT standard and are built to MIL-T-27 specifications.

VA Size	H	L	W	X	A	B	C	Wt.

Flat Compact Series

Use where space is critical. For single or dual output DC supplies and isolated control circuits and reference supplies. Incorporates non-concentric windings which means the secondary is located next to the primary instead of being wound directly over it. Dual primaries for 115/230 VAC, 50/60 Hz, 1500 V (RMS) HIPOT. Hum-bucking (semitoroidal) construction diminishes radiated magnetic field and balanced windings.

Heat Shrinkable Tubing

FP-301 Multi-Purpose Flexible Polyolefin Heat Shrink Tubing

FP-301 offers an excellent balance of physical, electrical and chemical properties for protecting a wide variety of electronic, electrical, and mechanical applications, such as cable splices, wire marking, harness covering, strain relief, and component packaging. Meets UL/CSA requirements for flame retardance (except Clear), 2:1 shrink ratio, rated for -55°C to +135°C (+275°F) and 600 V continuous operation. Meets MIL-I-23053/5 Class 1 or 2 requirements. **Minimum Shrink Temperature:** 121°C. **Colors Available:** 1-Black, 4-Clear (available in all put-ups), 2-Red, 3-White, 5-Yellow, 6-Blue, 7-Green (available in selected sizes of 4-foot lengths and in color assortments). Insert the color number where N appears in the stock number. UL E39100, CSA LR38227.

3M FP-301 Heat Shrink Tubing Kit

Kit contains over 66 feet of tubing; total of 133 pieces of 6 inch lengths. Seven different colors: Black, red, white, yellow, blue, green, and clear. Kit contains the following sizes: 3/32" (5 of each color), 1/8" (4 of each color), 3/16" (3 of each color), 1/4" (3 of each color), 3/8" (2 of each color), 1/2" (2 of each color).

617-8800. FP301 Tubing Kit. EACH 53.14

FP-301VW Highly Flame Retardant Flexible Polyolefin Heat Shrink Tubing

FP-301VW offers the same physical, electrical, and chemical properties as FP-301 with an additional level of flame retardant to meet the requirements of UL VW-1, CSA OFT, and MIL-I-23053/5 Class 3. Black only. Comes printed with UL/CSA information. UL E39100, CSA LR38227.

VFP-876 Very Flexible Low Shrink Temperature Polyolefin Heat Shrink Tubing

VFP-876 offers the same physical, electrical, and chemical properties as FP-301 with two additional features: 100°C shrink temperature (versus 121°C) to minimize damage on temperature sensitive components, and extra flexibility for insulating flexible wire bundles. Meets MIL-R-46846 Type V. Black only. UL E39100, CSA LR38227.

SR-350 Semi-Rigid Polyolefin Heat Shrink Tubing

SR-350 offers superior cut through and abrasion resistance as well as excellent physical, electrical, and chemical properties. Used for strain relief and insulating mechanically weak or susceptible points such as solder joints, wire splices and terminations. Printed easily, 2:1 shrink ratio, UL recognized for flame retardance and 600V, -55°C to +135°C continuous operating temperature, meets MIL-I-23053/6. Black only. UL E39100.

EPS-200 Adhesive Lined, 2:1, Flexible Polyolefin Heat Shrink Tubing

EPS-200 features one step environmental protection of electronic, electrical, automotive and marine wiring. As the flame retardant, flexible polyolefin outer wall shrinks to a skin-tight fit, the hot melt adhesive is pushed into voids and crevices. Upon cooling the adhesive solidifies and bonds to form a permanent moisture proof barrier. 2:1 shrink ratio, jacket meets UL 224 all tubing flame test, -55°C to +100°C continuous operating temperature, meets MIL-I-23053/6 Class 2. Black only.

MW Adhesive Lined, 2.5:1, Semi-Rigid Polyolefin Heat Shrink Tubing

MW encapsulates and seals in one step in the same way as EPS-200. Semi-rigid outer wall gives superior abrasion and cut-through resistance. 2.5:1 shrink ratio, -55°C to +100°C continuous operating temperature, meets MIL-I-23053/6 Class 1. Black only.

EPS-300 Adhesive Lined, 3:1, Flexible Polyolefin Heat Shrink Tubing

The meltable inner wall of EPS-300 forms a moisture proof barrier in one step in the same way as EPS-200, making it the product of choice for outdoor, automotive, or marine applications. The 3:1 shrink ratio helps to seal uneven surfaces such as connectors and components. Jacket meets UL 224 all tubing flame test, -55°C to +110°C continuous operating temperature, meets MIL-I-23053/6 Class 3. Black only.

EPS-400 Adhesive Lined, 4:1, Semi-Rigid Polyolefin Heat Shrink Tubing

EPS-400 provides one step environmental protection in the same way as EPS-200, but a thicker meltable makes it ideal for sealing multiple wire bundles. The 4:1 shrink ratio helps seal uneven surfaces such as in-line components. A heavy outer wall provides tough mechanical protection. -55°C to +110°C continuous operating temperature. Black only.

Communications Wire and Cable Duct

This duct has an easily installed one-piece design with a unique top-opening hinge that can be opened and closed thousands of times with no stress cracking or discoloration. The modern symmetrical design means fewer components and hides the self-locking latch. Constructed of 94V-0 UL Listed material, with strong foam-backed acrylic adhesive. 3M wiring duct is available in three sizes and has numerous accessories. Brown and grey are also available from 3M.

Duct Accessories

3M duct accessories are constructed of 94V-0 UL Listed materials, snap into place and eliminate special cuts to speed installation.

Heat Shrinkable Tubing and Wire and Cable Duct

Kynar* Modified Polyvinylidene Fluoride (PVDF) Heat Shrink Tubing

Kynar is an excellent insulation for extremes in temperature or environment. Kynar is flame retardant and is rated for continuous operation from -55°C to +175°C. PVDF fluoropolymer makes it resistant to corrosive chemicals, solvents and oils, as well as mechanically tough for cut-through and abrasion resistance. Rigidity and transparency make it a good choice for strain relief and identification. 2:1 shrink ratio, UL recognized for VW-1, meets MIL-I-23053/8. Clear only. UL E39100. *Kynar — Pennwalt Chemical.

NST Modified Polychloroprene (Neoprene*) Flexible Heat Shrink Tubing

NST is particularly useful for fabrication and repair of flexible rubber harnesses, wire bundles, and for hydraulic couplings. Its superior cut-through and abrasion resistance allow use in heavy duty applications such as drop lines, drag lines, and industrial equipment cable. Excellent oil resistance make it ideal for automotive, aircraft, and construction equipments. Maintains its flexibility and resistance to vibration at temperatures down to -70°C and up to +121°C. 2:1 shrink ratio, meets MIL-I-23053/1 Class 1 and 2, and MIL-R-46846 Type 1 Class 1. Black only. *Neoprene — E.I. Du Pont.

Round, Jacketed, Flat Cable with Shield

The inner 3365 Series gray flat cable has repeating areas of split and unsplit lengths to accommodate discrete or flat cable terminations. The flat cable is folded, wrapped with an aluminum/polyester film foil and then enclosed in a round, tinned copper braid for complete EMI/ESD protection. The outer jacket is flexible PVC. Combines the flexibility of round cable with the labor/cost efficiency of flat cable.

.050" Shielded/Jacketed Flat Cable

Meets external wiring requirements of National Electrical Code, Article 725 (CL2). CSA Certified AWM for external wiring. Flat jacket and expanded copper mesh shield provides durability, superior EMI and ESD protection. Provided better signal integrity and grounding than aluminum/mylar shielded cables. Jacket imprinted for flat section identification. **Jacket Material:** Polyvinyl chloride (PVC). **Color:** Black. **Primary Material:** PVC. **Conductors:** 28 AWG 7 x 36 (7 x 0.127) tinned stranded copper. **Shielding:** Expanded copper.

Hook-Up Wire

Hook-Up Wire Dispenser Kits

- Convenient, Wire Dispensing System
- Five Assorted Hook Up Wire Colors
- Includes Cut and Strip Tool

Each kit contains five spools of hook-up wire in a unique, rack mounted, transparent dispensing tube. The tube and rack system can be mounted on a bench or wall or used as a tote for portability. Uses standard Alpha hook-up wire spools when refills are required. Includes a cut and strip tool. Available in military or UL/CSA applications. Come with a 100' colors white, black, red, green and blue 22 AWG.

Kynar® Insulation for Wire Wrap UL 1422, UL 1423

Solid silver-plated, oxygen-free high conductivity (OFHC) copper conductor, extruded kynar (polyvinylidene fluoride) insulation. Extremely tough, high cut-through resistance. Self-extinguishing, will not support combustion. Excellent ultra-violet and weathering resistance. Temperature rating through 125°C continuous (U.L. rated at 105°C). **Nominal Wall Thickness:** .005". **Colors Available:** 1 — White, 2 — Black, 3 — Red, 6 — Blue. *Trademark of Pennwalt.

Color-Coded Twist-To-Flat Cable 0.050" Centers — UL 20184

Description

- 28 AWG 7/36 Stranded Tinned Copper Conductors, PVC Insulation
- 10 Standard Color Repeat With Tan as the Common Color in Each Pair
- Overall Cable Thickness .037" Males With all 0.50" IDCs
- High Stability .007" Laminated Film is Needed to Increase Dimensional Stability
- Twisted Length 18", Flat Length 2"
- UL Recognized. Style 20184 (Internal Use Only)

Application

- Ideal for Situations Where Reduced Crosstalk is Necessary Such as High Speed Data Transmission in Computers, Cash Registers, and Communications Equipment

Flat Cable — 100' Coils Gray Flat Cable 0.025" Centers — UL 2678

Description

- 30 AWG, Solid Copper Conductors on 0.025" Centers
- Gray PVC Insulation With Red Strips on Leading Edge
- UL Recognized Style 2678
- Resists Acids, Alkalis, Oil, Moisture, Solvents, Ozone and Fungus
- Passes UL VW-1 Flame Test

Application

- Easy Termination to 0.025" IDC Connectors
- Low Cost Alternative to Fluorocarbon Transmission Cables
- For New Generation of Surface Mounted Connectors With Reduced Contact Spacing

BNC Crimp Connector and Tool Kit

AT-Kit-1

This kit includes all the tools necessary to complete the connectorization process of Alpha RG-58 and RG-59/62 coaxial cables. Tools are packed in a carrying case for protection and portability. **Kit Contains:** 5 CMC-3001 RG-58 connectors, 5 CMC-3002 RG-59/62 connectors, 1AT-140/3 coaxial cable stripper, 1 AT-330 coax ratchet crimp tool, 1 Alpha BNC crimp connector selection guide.

Commercial Grade Thin-Net Coaxial Cable 10 MBPS

Alpha offers economical commercial grade LAN cable alternatives. These cables are designed around the IEEE specifications, but utilize cellular (foam) dielectric to reduce size and material while still offering equivalent electrical and environmental performance. Because a cellular dielectric is used, the diameter must be reduced to achieve the same

electrical performance. This has an added benefit of reducing the cost of materials. However, it does not strictly meet the diameter (4.9 mm ±0.3 mm diameter for PVC or 4.7 mm ±0.3 mm for fluoropolymer jacket) required by the IEEE 802.3, 10Base2 specification. Therefore, we call it commercial grade.

PVC Plenum Rated Multi Conductor Foil Shielded NEC Article 800, 725

PVC Plenum rated cables provide an economic alternative as compared to Fluorocopolymer based products. The flexible construction allows for ease of installation and meets UL Type CMP or CL2P and CSA FT6 requirements. Bare copper with PVC Plenum insulation and jacket.

PVC Plenum Rated Multi Pair Cable Foil Shielded NEC Article 800, 725

Meets UL Type CMP or CL2P and CSA FT6 requirements. All part numbers have overall foil shield, bare copper, and PVC plenum insulation and jacket except for part numbers (noted with *) which have individual shields, tinned copper, FEP insulation and PVC plenum jacket.

Multiconductor Foil Shield 300 Volts

UL2092, 2093, 2094, NEC type CM, CSA PCC FT4

Conductor: Stranded tinned copper. Insulation: Color coded polyethylene .016". Shield: Aluminum/polyester tape (100% coverage). Jacket: Gray polyvinylchloride. Operating Temperature Range: +60°C.

Multiconductor, Foil Shielded

Choose Xtra•Guard 1 For

- Unsurpassed Flame and Moisture Resistance
- Fast, Easy Stripping of Insulation and Jacket
- UL Recognized and UL Listed
- Flexible Cable Routing Requirements

Xtra•Guard 1 Use Examples

- EIA RS 232C Interface
- High Technology Applications in Controlled Environments

- Medical Electronics
- Point-Of-Sale Equipment
- Computer Peripherals
- Industrial Process Controls

Conductor: Stranded tin coated copper. **Conductor Styles:** 24 and 22 AWG — UL 1061, CSA AWM SR-PVC; 20, 18 and 16 AWG — UL 1007, CSA AWM PVC. **Insulation:** Color coded, 80°C premium polyvinylchloride. **Shield:** Aluminum/polyester (25% overlap, typical), foil facing in plus stranded, tinned copper drain wire equal in size to insulated conductors of cable. Nylon rip cord for ease of jacket stripping. **Cable Styles:** UL type CM, AWM 2464, CSA PCC FT4. **Operating Temperature Range:** -20°C to +80°C AWM (75°C — CM). **Jacket:** Premium polyvinylchloride in gray or black; stocked in gray. **Cable Style:** UL 2464.

300 Volt UL Type CM, AWM 2464 CSA PCC FT4

Multiconductor, Unshielded

Choose Xtra•Guard 1 For

- Unsurpassed Flame and Moisture Resistance
- Fast, Easy Stripping of Insulation and Jacket
- UL Recognized and UL Listed
- Flexible Cable Routing Requirements

Xtra•Guard 1 Use Examples

- EIA RS 232C Interface
- High Technology Applications in Controlled Environments
- Medical Electronics
- Point-Of-Sale Equipment
- Computer Peripherals
- Industrial Process Controls

Conductor: Stranded tin coated copper. **Conductor Styles:** 24 and 22 AWG — UL Style 1061, CSA AWM SR-PVC; 20, 18 and 16 AWG — UL Style 1007, CSA AWM-PVC. **Insulation:** Color coded, 80°C premium polyvinylchloride. **Core Wrap:** Clear polyester (25% overlap, typical). Nylon rip cord for ease of jacket stripping. **Cable Styles:** 24 and 22 AWG — UL type CM, AWM 2464, CSA-PCC FT4. **Operating Temperature Range:** -20°C to 80°C — AWM, 75°C — GM. Passes UL vertical tray flame test. **Jacket:** Premium polyvinyl

- ▶ UL Listed Under Subject 13
- ▶ Complies With NEC Article 725 — Type PLTC, NEC300 and NEC340
- ▶ ULVW-1 — 300 Volt Rated Cables Pass UL Vertical Flame Test
- ▶ CSA Certified — 300 Volt
- ▶ IEEE383 — Both 300 Volt PLTC and 600 Volt Tray Cables Pass IEEE 70,000 BTU — Vertical Flame Test

105°C 300V PVC

- ▶ Stranded Bare Copper Conductors
- ▶ Extruded PVC Insulation
- ▶ Paired Construction Color-Coded — One Black, One White; Triple Constructions Color-Coded Black, White and Red
- ▶ All Pairs and Triples Twisted To Minimize Magnetic Noise
- ▶ Each Conductor (Multi-Pairs and Multi-Triples) Printed with a Pair or Triple Number at 1" (25.4 mm) Intervals for Easy Identification
- ▶ When Shielded, Aluminum Polyester Shield Tape and Tinned Copper Drain Wire Provided for Maximum Electrostatic Noise and Cross Talk Rejection
- ▶ Nylon Rip Cord Under Jacket to Simplify Stripping
- ▶ Extruded Black PVC Jacket Meets IEEE 383, 70,000 BTU Flame Test
- ▶ Temperature Range: -20°C to +105°C (UL) Static Conditions
- ▶ Voltage Rating: 300 Volts (UL)
- ▶ An Economical, General Purpose, Flame Retardant Construction with Excellent Chemical and Abrasion Resistance
- ▶ UL Listed Under Subject 13
- ▶ Complies With NEC Article 725, Type PLTC
- ▶ Available in Long Continuous Lengths
- ▶ Multi-Pair (-Triple) Constructions Include No. 22 AWG Communications Wire Color Coded Orange

Single Pair Shielded (Fig. A)

90°C 600V PVC/Nylon

- ▶ Standard Bare Copper Conductors
- ▶ Extruded PVC Insulation with Nylon
- ▶ Paired Constructions Color-Coded — One Black, One White; Triple Constructions Color-Coded Black, White and Red
- ▶ All Pairs and Triples Twisted To Minimize Magnetic Noise
- ▶ Each Conductor (Multi-Pairs and Multi-Triples) Printed with a Pair or Triple Number At 1" (25.4 mm) Intervals for Easy Identification; Numbers Are Printed Alternately and Inverted
- ▶ Nylon Jacketing of Each Conductor Provides Increased Dielectric Strength
- ▶ When Shielded, Aluminum Polyester Shield Tape and Tinned Copper Drain Wire Provided For Maximum Electrostatic Noise and Cross Talk Rejection
- ▶ Nylon Rip Cord Under Jacket to Simplify Stripping
- ▶ Extruded Black PVC Jacket Exceeds Test Criteria Established By Underwriters Laboratories Tray Fire Test, Based On IEEE Standard 383, 70,000 BTU Flame Test
- ▶ Temperature Range: -20°C to +90°C (UL +90°C) — Static Conditions
- ▶ Voltage Rating: 600 Volts (UL)
- ▶ PVC/Nylon Construction Results in a 600 Volt Small Diameter Cable that Saves Space
- ▶ Nylon Permits a Slipping Action Between Conductors that Relieves Stresses Developed When Cable is Flexed
- ▶ Listed as Tray Cable Under UL Subject 1277 and NEC Article 340 (Article 725 Class 1)
- ▶ Available in Long Continuous Lengths
- ▶ Multi-Pair Constructions Include No. 22 AWG Wire Color Coded Orange
- ▶ Commonly Utilized For In-Plant Process Control

American manufacturers are automating to meet world-wide competition. However, the vital functions of measurement and control of manufacturing and process operations is dependent on the electronic circuitry and instrumentation cable used in these control networks. Alpha's instrumentation cable provides you with minimal interference and maximum durability in full compliance with all industry standards.

Tinned Copper Flat Braid

- Flexible Ground Strips
- Connect Moving Parts

- Retrofit Applications
- Bonding Straps

Woven tinned copper braid rolled to specific width. Meets requirements of Fed. Spec. QQ-W-343E Type S and ASTM-B-33. *Values shown are for bare cable in free air at 30°C and intended as a reference guide only. Actual values will depend on permissible temp. rise, permissible voltage drop and other conditions of service.

Copper Shielding Tape

- UL Standard 510
- MIL-Standard 202C
- ASTM-D-1000
- Highly Conductive Pressure Sensitive Adhesive
- Oxidation Resistant Conductive Particles in Adhesive Produce Very Low Resistance Through Tape
- UL Recognized

Provides a low impedance connection between metal connector backshell and the braided cable shield in molded cables. An effective EMI/RFI shielded cable assembly can be achieved without soldering the tape to the braid or backshell (a tin-plated backshell is recommended). Provides electrical contact to surfaces that cannot be soldered such as conductive plastic. EMI/RFI shielding of cables by wrapping the tape around the cable. (Recommend 40-50% overlap). Provides electrical continuity in seams of EMI/RFI shielded rooms. Draining of static charges. Bus bar application. **Specifications. Tensile Strength:** 21 lbs./in. **Adhesion:** 40 oz./in. **Thickness:** .003 in. **Flammability:** Flame retardant per UL Standard 510. **Electrical Resistance Through Tape:** .003 ohms/in. **Shielding Effectiveness:** 50 dB.

FIT® 221 — Irradiated Polyolefin

► UL Subject 224†, CSA Standard 198† MIL-I-23053/5A, AMS 3636 (Colors), AMS 3637 (Clear)

FIT-221 is the most widely used general purpose heat-shrinkable tubing. It is flexible, flame-retardant, self-extinguishing and fungus-proof. The tubing shrinks a minimum of 50% of supplied diameter at 121°C longitudinal shrinkage, ±3% (UL224). **Operating Temperature:** -55°C to +135°C. **Tensile Strength:** 1800 psi nominal. **Colors Available:** 1-Black, 2-Red, 3-White, 4-Clear*, 5-Yellow, 6-Green, and 7-Blue. Insert the color number where N appears in the stock number. †UL and CSA require surface marking for identification. Material from stock is unmarked. If marking is required please specify when ordering.

50'-100' FIT 221 Spools

FIT 221 is now available in 50' or 100' spools where noted. These shorter length spools are perfect for on-site installation needs. The spool is easily stored on any rack. Preprinted instructions are located right on the spool. The spool is packaged in a clear bag. Available in black, clear, and colors.

FIT® 221V — Highly Flame Retardant Polyolefin

A radiation cross-linked polyolefin heat-shrinkable tubing designed for a wide range of applications requiring a highly flame retardant material. **Typical Applications:** for use where UL recognition with VW-1 is needed; harness bundling; electrical insulation; cable jacketing; lightweight harmless jackets; terminal insulation; wire strain relief; general purpose component packaging. **Specifications. Color:** Black. **Operating Temperature:** -40°C to +125°C. **Shrinkage Ratio:** 2:1 at 121°C. **Tensile Strength:** 1800 psi, nom. **Longitudinal Shrinkage:** ±3% (UL224). **Dielectric Strength:** 500 V/mil. **Volume Resistivity:** 1014 ohm/cm. CSA Standard 198. Fit-221V is surface marked in accordance with UL and CSA requirements.

- Flame Retardant: Passes UL VW-1 Flame Test
- UL Recognized and CSA Certified

FIT® 105 — Flexible Irradiated Polyvinylchloride

UL Recognized/CSA Certified†, MIL-I-23053/2C*

FIT 105 features high mechanical strength and excellent flexibility. It will not cold flow or melt and will not split — even over sharp edges. It is flame-retardant, self-extinguishing, and does not support fungus growth (MIL-I-7444). The tubing shrinks to 50% of supplied diameter at 175°C, longitudinal shrinkage 10% nominal. **Operating Temperature:** -35°C to +105°C. Tensile strength 2600 psi nominal. Stocked in black; gray also available. 2" available by special order. †UL, CSA require that FIT 105 be surface marked for identification. Material from stock is unmarked. If marking is required please specify when ordering. *MIL-I-23053/2C is inactive for new design and is no longer used by the Department of Defense except for replacement purposes.

FIT® 300 — Surface Irradiated Polyolefin

MIL-I-23053/4B, Class 1 AMS-3634

When heated, the outer jacket shrinks and the inner wall melts and flows. The result is semi-rigid tubing with an inner wall that seals and provides tough mechanical protection. The tubing shrinks to 15% to 40% of the supplied diameter depending on the size at 135°C. Longitudinal shrinkage is 10% nominal. Non-flame retardant. Does not support fungus growth. **Operating Temperature:** -55°C to +110°C. **Tensile Strength:** 2500 psi nominal. All sizes available in black, but only one additional color is available for each size (see right). For 6" lengths, insert "5" where N appears in the stock number. For 4" lengths, insert "7" where N appears in the stock number.

FIT® 621 High Shrink Ratio Tubing

Adhesive-lined, polyolefin shrink tubing that shrinks up to 1/6 of the supplied diameter at 120°C. Superior moisture protection. Excellent for field repair of indoor-outdoor cables rated to 1000V. Suitable for direct burial. Conforms to odd shapes and sizes. **Operating Temperature:** -40°C to +125°C. **Color:** Black. **Package:** 3-6" lengths.

Heat Shrinkable Identification System FIT®-PRINT

Polyolefin tubing with a shrink ratio of 3:1 at 125°C. Smear-resistant, permanent identification. The sleeves feed directly into standard typewriters or dot matrix printers. For best results use a ribbon with a high carbon content and for write-on convenience a standard ball point pen may also be used. Flame retardant. 250 markers per spool.

FIT® WRAP

Alpha's new and innovative FIT® WRAP sleeves redefine the FIT® shrinkable tubing concept! FIT® WRAP permanently repairs damaged or split cables without cutting or disconnecting them from equipment. A fast and easy solution that eliminates costly downtime!

Meets MIL-I-23053/15A requirements. Oxygen Index (min.): 27.5. Resists de-icing and hydraulic fluid, JP-4, diesel and lubricating oils and 5% NaCl. Non-corrosive, outer wall self-extinguishing. **Operating Temperature:** -55°C to +110°C. **Shrinkage Ratio:** 3:1 at +121°C, depending on size. **Physical Properties. Tensile Strength:** 1200 psi. **Ultimate Elongation:** 200%. **Specific Gravity:** 1.4. **Low Temperature Flexibility:** no cracking after four hours exposure at -55°C.

FIT® 321...High Shrink Ratio (3:1) Polyolefin

- ▶ 3:1 Shrink Ratio
- ▶ Flame Retarded Outer Wall
- ▶ Water Resistant (0.5% Maximum Absorption)

When heated, inner wall melts and fills all crevices and interstices of the covered object while outer wall shrinks. Upon cooling, the entire mass becomes a tough molding that provides excellent environmental protection. **Specifications. Operating Temperature:** -55°C to +110°C. **Shrink Ratio:** 3:1 at 125°C. **Tensile Strength:** 2500 psi, nominal. **Ultimate Elongation:** 400% nominal. **Longitudinal Shrinkage:** 15%, nominal. MIL-I-23053C/4B Class 3.

FIT® 421...High Shrink Ratio (4:1) Polyolefin

Stands up to your toughest tests. FIT 421 is a tough, irradiated polyolefin with a 4:1 shrinkage ratio that solves the problem of covering and protecting the connections between cables and bulky connectors. **Applications:** Insulation and protection for connector-to-cable terminations; harmless jacket sleeving repair; coverage of irregular shapes not possible with 2:1 shrink ratio material. **Specifications. Operating Temperature:** -55°C to +135°C. **Shrinkage Ratio:** 4:1 at 121°C. **Tensile Strength:** 1800 psi. **Longitudinal Shrinkage:** 50% maximum. MIL-I-23053/5A Class 1 overexpanded. AMS 3636D. Non-corrosive; self-extinguishing. **Color:** Black.

FIT® 350 Irradiated Kynar®

UL Subject 224† CSA Standard 198† MIL-I-23053/8A AMS 3632 FIT-350 is transparent, thin-wall, high temperature, flame-retardant tubing which is excellent for installations requiring high resistance to abrasion and cut-through. Allows easy inspection of covered components. The tubing shrinks to 50% of supplied diameter at 175°C, longitudinal shrinkage 5% nominal. Semi-rigid, chemical resistant and self-extinguishing. Does not support fungus growth. **Operating Temperature:** -55°C to +175°C. **Tensile Strength:** 8000 psi, nominal. 4' lengths are available by special order.

*TM Pennwalt. †UL and CSA require FIT-350 to be surface marked for identification. Material from stock is unmarked. If marking is required, please specify when ordering.

FIT® FLEX

FIT® FLEX provides strain relief, terminal insulation, cable jacketing and wire harnessing protection in applications where flexibility and durability are mandatory. Most flexible heat shrink tubing product in the industry. Passes the UL VW-1 flame test. **Operating Temperature:** -75°C to +200°C (UL). **Shrink Ratio:** approximately 1.7:1 at 125°C. Non-corrosive. **Water Absorption:** 0.4%. 1 year shelf life. Stocked in gray.

FIT® 100

► Flame Retardant, Low Shrink Temperature PVC

► Non-Irradiated

Passes UL VW-1 and CSA OFT flame test. Low shrink temperature (100°C) speeds production time. UL Recognized, CSA Certified. Resistant to most chemicals, greases, oils, lubricants chlorinated cleansers, gasoline and salt water. **Operating Temperature:** -20°C to +105°C. **Shrinkage Ratio:** 2:1 at 100°C. **Tensile Strength:** 3000 psi. **Chemical Properties:**

Flammability — self extinguishing does not support combustion; Fungus resistant — does not support growth. UL Standard 224, VW-1. CSA Standard 198, OFT ASTM P3150 Type 1. MIL-I-23053/2 Class 2. Stocked in black.

Alpha BNC Connectors

BNC Plug

Alpha BNC connectors provide highly reliable, quick connect/disconnect coaxial connections. A quick coupling device for plug and jack connectors is accomplished by rotation of a cam operating device designed to bring the two halves together. Alpha's hex terminations insure high conductivity, low resistance and high pullout values.

Zipper Tubing

Expandable Braided Polyester Sleeving

Lightweight, expandable woven polyester sleeving. High flexibility; high resistance. Open weave for wide range of expansion of the sleeving diameter for easy installation and gripping action. An ideal protective sleeve for wire bundles, harnesses, wire and cable, pneumatic hoses, flat cable, hydraulic lines, and highly polished or threaded machine parts. **Specifications. Operating Temperature:** -70°C to +125°C (UL). Rot-Free, Fungus Proof Per MIL-STD-810B-Method 508. Not affected by most chemical environments and common solvents.

*50' Coils are also available from Alpha.

UL Standard 224*, UL VW-1, CSA 184-N-90

Saves time and labor in making prototype cables. Adds extra jacketing protection to existing cable assemblies without need to disconnect or tape wrap. Ideal for cable repairs or modification — no need to disturb or disconnect existing connections. Zipper tubing is manufactured from the highest quality, high-temperature, stabilized PVC. **Temperature Range:** -36°C to 105°C. *ZIP-60 CSA Certified Only.

Spiral Wrap Tubing

Wire harnessing, cabling and bundling work is simplified with the use of Alpha's SW series spiral wrap tubing. SW tubing clings tightly to the wire and cable being bundled, yet is flexible and simple to apply. All types maintain flexibility, even when bent around sharp edges or subjected to repeated handling. Breakouts or tapoff connections may be made through the openings of the wrap.

Federal Spec. LP390, MIL-I-631D, MIL-P-26692

PVC-105 All Purpose Tubing*

U.L. recognized, CSA certified ASTM D-876, D-922, MIL-1-1631D Passes UL VW-1 Flame Test

Superior thermal, mechanical and electrical properties with economical cost. Compounded with highest quality, non-migratory resinous type plasticizers—stabilizers and modifiers added. Flexible, resistant to heat, oil, abrasion, fungus and chemical corrosion. **Operating Temperature:** -20°C to +105°C. Furnished in black and clear in 100' lengths. Other colors and lengths available by special order. *U.L. requires that PVC-105 be surface marked for identification. Material from stock is unmarked. If U.L. or CSA marking is required please specify when ordering.

Twisted Lacing Cord and Flat Braid Lacing Tape

Nylon and Dacron Flat Braided Lacing Tape. All types are nylon. All types are designation MIL-T-43435 with variations for type, size, and finish. **LC-132** has a finish of synthetic rubber-like resin with non-mercuric fungicidal properties. Melting point is above 190°F. Softens at 140°F but doesn't flow. **LC-134** and **LC-136** have a finish of micro-Crystalline wax with a melting point above 130°F, compounded with a fungicide containing neither copper nor mercury. Soft, pliable and easy to tie. Also meets MIL-T-713 Type P, Class 2. **LC-140** has a finish of a special continuous coating of fungistatic synthetic rubber. Knots tied with this finish will not slip. Extremely pliable and soft. **LC-143** has a thermoplastic synthetic resin with a melting point above 350°F for use where a "wax free" type is specified. Dry, non-flaking finish. Available in white and black: Insert 1 (white) or 2 (black) where X appears in Stock Number, table below.

Alpha's pre-terminated FDDI fiber optic cable assemblies can be precisely manufactured to your customized specifications — delivered fast and on time!

Save Installation Time

Sensitive tolerances make installing fiber optic connections more critical and difficult than electrical connector termination procedures. Factory-mounted connectorized assemblies save aggravation.

Lowest Loss Means Highest Reliability

Each and every assembly is 100% rigorously pre-tested as it leaves the factory to insure the tightest tolerances within the less than or equal to .5 dB/km loss range. A test inspection is included with each assembly shipped with 100% traceability. Alpha's quality

FDDI 62.5 μ m multi-mode jumper assemblies are 100% guaranteed and backed by knowledgeable people to assist you.

Manufactured to Meet or Exceed Industry Standards

State-of-the-art equipment and tools are utilized in Alpha's manufacturing process. Each connector style is terminated, crimped and polished using installation procedures and the exact tool specified by each connector manufacturer. This ensures error-free field installation.

Precise epoxy-secured fiber in the connector will prevent pistoning in the environment in which it is installed. Ceramic ferrules, the "heart" of the connector, allow a high degree of precision as compared to metal.

Hook-Up Wire and Kits

PVC Insulated Hook-up Wire

All hook-up wire has either tinned copper conductor insulated with extruded PVC or stranded silver-coated conductor insulated with extruded TFE Teflon®. PVC is flame and ozone resistant, as well as being inert to most chemicals, oils, and solvents. Teflon® is a fluorinated thermoplastic with outstanding thermal, physical, and electrical properties.

UL Style 1007 300V, 80°C Passes VW-1 Vertical Wire Flame Test

Rated 80°C, 300V. Rated 600V peak for electronic circuits, and internal wiring of electronic and electrical equipment.

High Temperature Teflon Insulated Hook-Up Wire

All hook-up wire has either tinned copper conductor insulated with extruded PVC or stranded silver-coated conductor insulated with extruded TFE Teflon®. PVC is flame and ozone resistant, as well as being inert to most chemicals, oils, and solvents. Teflon® is a fluorinated thermoplastic with outstanding thermal, physical, and electrical properties.

Hook-Up Wire Dispenser Kits

Ideal for R and D labs, engineers and technicians. Choose kits containing five 100' spools or eight 25' spools of popular hook-up wire; each spool a different color. Spools come in portable dispenser rack, convenient for field work, for work bench or wall mount use. Passes VW-1 Vertical Wire Flame Test.

Standard Flat Cable

All flat cable types on this page are 28AWG (7 x 36) stranded and feature 0.050" conductor spacing. PVC insulated, except where noted, and rated 300 V, 105°C. **Voltage Rating:** 300 Vrms. **Dielectric Withstanding Voltage:** 2000 Vrms. All will terminate to any standard IDC flat cable connector. See Product Index for complete selection. Passes VW-1 vertical wire flame test. UL recognized.

9L280XX Series 0.050" Pitch Unshielded

Tinned copper conductors. Gray PVC insulation with red polarity stripe. CSA certified T1.

.050 Pitch PVC Vari-Twist® Flat Cable

214-2693
105°C 300V VW-1
and/or
214-2697
80°C 300V VW-1

Tinned copper (.050 conductor spacing in flat section). PVC preinsulated twisted pairs laminated to a Clear PVC substrate. Standard twist length is 18 inches followed by a 2-inch flat section. Each adjacent pair is twisted in an opposite direction. 28 Gauge, Stranded 7 x 36. Passed VW-1 vertical wire flame test.

Standard-Profile Socket Connectors

MIL-C-83503 compatible. 0.100" (2.54mm) grid contact/terminal spacing. Insulated stainless steel strain relief strap. Gas-tight termination and daisy-chainable. Pre-assembled cover for easy termination. Temperature Range: -55° to +125°C. Current Rating: 1 A max. per contact. UL Voltage Rating: 125 VDC. Phosphor-bronze contacts with selective gold plating. UL recognized, CSA certified.

D-Subminiature Connectors with Metal Face and EMI/RFI Shield

Accepts standard 0.050" conductor center space flat cable without special cable preparation. No special alignment tools required. Accepts jacketed and shielded cable without need for a backshell. Temperature Range: -55° to +125°C. Current Rating: 1 A DC per contact. UL Voltage Rating: 125 VDC. Phosphor-bronze contacts with selective gold plating. UL recognized, CSA certified. Order type DSO0001 locator plate separately below.

Belflex™ Premium PVC Jacket and Portable Cordage

- Remains Flexible in Cold Temperatures
- Exceptional Oil Resistance
- Excellent Retractile Properties

Belden® Belflex™ is a premium PVC jacket compound (Class 43) that is superior to standard PVC for flexibility and durability. Belflex cordage and cords offer a superior feel and appearance and are ideal for any number of applications where resiliency, ruggedness, and appearance are key considerations. It's a breakthrough jacketing compound that is an outstanding value. Twelve standard Belflex portable cordage products are now offered. Each features a matte black finish, as opposed to the normal glossy appearance of PVC, and is available in 250 ft. lengths. Custom power cords are also available using the new Belflex cordage. **Insulation Thickness:** .030" (.76 mm) except for 19502 and 19505 which are .045" (1.14 mm).

UL and CSA Approved For Outdoor Use. These Belflex jacketed cordage items have a UL and CSA temperature rating of 105°C and are suitable for outdoor use. Belflex also passes the VW-1 Vertical Wire Flame Test. These constructions are approved as water and oil resistant.

Test Prod Wire

Stranded tinned-copper conductors, separator wrapping, red or black rubber insulated. Type 8899 is PVC insulated and UL recognized. Working voltages listed in table below are AC rms values and for intermittent-duty only. Type 8897 is manufactured per MIL-W-13169B specs; 8890 is miniature type wire.

Shielded Data Cables

These cables provide interconnections for communication systems including PC keyboard interconnects, computer and computer peripherals, instrumentation equipment, and medical electronics. These rounded shielded data cables are UL 2464 rated (300 V, 80°C). Passes the UL VW-1 Vertical Wire Flame Test. Featuring 26 AWG stranded (7 × 34) tinned copper conductors and drain wire, these cables are shielded with Belden's aluminum-polyester-aluminum laminate Duofoil shield design. The multiconductors are PVC insulated with a black PVC jacket.

Conformable® Coax Cable For Microwave and High Frequency Video Applications

- Low VSWR Up To 20 GHz (50 Ohm Cables)
 - Exceptional Phase Stability
 - Patented Copper Foil Tape and Tin-Filled Composite Shield Provides Unmatched and Electrical Stability and Shielding Performance
 - Longest Flex Life Of Any Hand-Formable Product On The Market
 - Retention Of Shape After Bending, No Buckling When Reforming Or Flexed
 - Reduced Equipment Spec Drawing Requirements and Shortened Design Time
 - Reduced Labor, Purchasing, Manufacturing, and Packaging Expenses
- Microwave Applications
- 1671A — RG-405 Type 50 Ohm With .085" O.D.
 - 1673A — RG-402 Type 50 Ohm With .138" O.D.
- High Frequency Video Applications
- 1672 — 75 Ohm With .087" O.D. For High Frequency Video Applications

50 Ohm Microwave Cables

Silver coated copper covered steel conductor, TFE Teflon insulation, and patented copper foil tape and tin-filled braid composite shield. -70° C to 200° C. Nominal Impedance: 50 ohms. Nominal Vel. of Prop.: 69.5%. Nominal Capacitance: 29.5 pF/ft. (96.8 pF/m). Copper-tin composite shield. 100% shield coverage.

High-Flex, Low Capacitance Multi-Pair Audio Snake Cable

Maintains high flexibility in cold weather. Each pair is individually shielded and PVC-jacketed for ease of termination. Eliminates need for overall crosstalk shield and allows for longer cable runs. 22AWG, 7x30 stranded tinned copper, high-density polyethylene-insulated twisted pairs. Each pair is Beldfoil® shielded with Belden Z-Fold™. **Nominal capacitance:** 19pF/ft. between conductors. **Nominal impedance:** 70 ohms. Black PVC outer jacket. Rated 150V, 60°C.

CM Rated Multi-Pair Audio Snake Cable

Multi-channel snake cable meets NEC requirements for in-wall installation. 24 AWG, 7 x 32 stranded tinned copper, polyethylene insulated, twisted pairs. Each pair is individually shielded with Beldfoil® aluminum-polyester shield and a Z-Fold™ for greater interference elimination. Black outer PVC jacket with nylon ripcord. **Nominal impedance:** 50 ohms. **Nominal capacitance between conductors:** 31 pF/ft. Rated 300V, 60°C.

Bundled Coaxial Composite Cable

► Developed to SMPTE Standards

Cable Delivers sharp, clean images from low loss video signals and offers wide bandwidth capabilities. 26AWG, 7 x 34 stranded bare copper conductors. Feature Duobond® II shields, crush-resistant Datalene®, color-coded PVC inner jackets, black PVC outer jacket. Suited for video equipment in SMPTE stranded RGB systems, RGB telecommunication systems with separate inputs, CAD/CAM applications and other graphic enhancing systems.

Paired Beldfoil® Shielded Tray Cable — UL Subject 13 and 444

Overall Shielded

Individually Shielded

Tinned copper stranded conductors, PVC insulated pairs, except types 9328-9333, 9368, 9388-9391 which are twisted pairs. All with Beldfoil® shield and tinned copper drain wire. Chrome sun-resistant PVC jacket. Multi-pairs are numbered at one-inch intervals; conductor pairs are color-coded black and red. Meets UL Subject 13 (NEC Article 725 Type CL3) for use as tray cable; 300V, 105°C. Meets UL Subject 444 (NEC Article 800 Type CM) for use as communication cable. Meets CSA, PCC and FAS90.

Multi-Conductor Unshielded Fire Alarm and Tray Cable

Types 9576, 9577 and 9584 have tinned copper solid conductors cabled, PVC insulated. Black PVC jacket. Type 9596 has one solid conductor tinned copper; one conductor bare; parallel. Red PVC jacket. Types 9571 and 9580 have bare copper solid conductors cabled, PVC insulated. Red PVC jacket. Types 9571, 9580 and 9582 have solid bare copper conductors, PVC insulated. Red PVC jacket. All are NEC Type FPLP; power limited fire protective signaling circuit cable for use in accordance with NEC Article 760 power limited circuits. Suitable for use as a power limited circuit cable in accordance with NEC Article 725 Class 2 or 3 circuits, when marked as suitable for appropriate tray cable installations. 300 V, 105°C. Component Recognized UL 2464, 300 V, 80°C.

Multi-Conductor Beldfoil® Shield Tray Cable — UL Subject 13 and 444

Tinned copper conductors cabled, PVC insulated. Beldfoil® tape shield with tinned copper drain wire. Sunlight-resistant PVC jacket. Tri-rated cable meets UL Subject 13, 300 V, 105°C; CSA PCC and/or FAS90. Also meets Article 725 of NEC, Class 2 and 3 requirements. Types 9341 and 9342 feature same construction with PVC insulated nylon overcoat and are UL listed under Subject 1277 for use as Tray Cable in accordance with NEC Articles 318, 340 and 501, Class I 600 V, 90°C. Suitable for outdoor use and direct burial. All are NEC Type CM except Types 9341, 9342, which are NEC Type TC, and Types 9364, 9366, 9367, which are NEC Type CL3.

DataTray™ Cables for UL-1277 Tray Applications

Belden® DataTray™ cables provide excellent performance for a variety of data transmission applications in industrial environments where UL-1277 is desirable. This includes control systems such as PLCs and DCSs, as well as intercom systems, RS-232, RS-422 and RS-485 interfaces. The Belden® DataTray™ series of cables utilizes one pair of 18 AWG tinned copper conductors, with tight lay lengths to minimize 60 Hz interference. These cables feature low-attenuation FRPO insulation, and a 100% coverage tinned copper braid shield. The jacket is dark blue "sun resistant" PVC. DataTray™ cables are available in 78, 100 and 124 ohm impedance. AWG Stranding: 18 AWG (7 x 26) .046" tinned copper, 6.92 Ω/m; 22.7 Ω/km. Nom. Vel. of Prop.: 64.5%.

Multi-Conductor Unshielded Tray Cable — UL Subject 13 and 444

Tinned copper stranded conductors cabled, PVC insulated. Chrome sunlight resistant PVC jacket. Tri-rated cable meets UL Subject 13, 300 V, 105°C; Appliance Wiring Material style 2464, 300 V, 80°C; CSA Appliance Wiring Material standards. Also meets Article 725 of NEC, Class 2 and 3 requirements. All are NEC Type CL3 except types 9491 and 9493 which are NEC Type CM.

Multi-Conductor Overall Foil/Braid Shielded Computer Cable — Datalene® Insulated

Low capacitance cables for EIA RS-232, EIA RS-423 and CAD/CAM applications. Tinned copper, Datalene® insulated, multi-conductor cable with overall Beldfoil® aluminum-polyester plus 85% tinned copper braid shield. 24 AWG stranded tinned copper drain wire. Chrome PVC jacket. Rated 30 V, 80°C. UL recognized. Datalene insulation features low dielectric constant and a dissipation factor for high-speed, low-distortion data handling. Physical properties include good crush resistance and light weight.

Multi-Conductor Shielded Broadcast, Audio and Instrumentation Cable

Tinned copper stranded conductors cabled. Polyethylene insulated except type 9770 which is polypropylene and has a paper wrap, and type 9418 which is S-R PVC insulated. All have Beldfoil® aluminum-polyester shield with stranded tinned copper drain wire except type 8729 which has 3 solid tinned copper-coated steel drain wires. All have PVC jackets. NEC type CM except type 8729, which is NEC type CL3. All UL recognized except type 9770.

Multi-Conductor Beldfoil® Shielded Fire Alarm and Tray Cable

Solid bare copper conductors cabled with Beldfoil® aluminum-polyester shield. Stranded tinned copper drain wire. Red PVC jacket. NEC Type FPLR; power limited fire protective signaling circuit cable for use in accordance with NEC Article 760 power limited circuits. Suitable for use as a power limited circuit cable in accordance with NEC Article 725 Class 2 or 3 circuits, when marked as suitable for appropriate tray cable installations. 300V, 105°C. UL recognized 2464, 300V, 80°C.

Plenum Coaxial Cable For Computer, Instrumentation, And Broadcast Uses

All are single solid conductor except **Type 89259**, which is single 7 x 30 stranded, **Type 89907** (thinner, 10 base 2), which is single 19 x 32 stranded and **Type 89555** which is dual solid conductor. All are NEC type CL2P; **Types 89108** and **89120** are also NEC type CATVP NEC article 725, class 2 circuits, UL listed. All are 200°C.

Paired Shielded Plenum Cable for Instrumentation, Computers and P.O.S.

Tinned copper conductors, Teflon insulated and jacketed. Beldfoil® shield overall. 200°C. Non-conduct. All are NEC Article 800, Type CMP and rated 300Vrms except **Type 89182**, which is Duofoil® individually shielded computer, control, instrumentation cable for low capacitance applications-NEC Article 725 and 800, Type CL2P and rated 150Vrms. All are UL listed and CSA PCC FT4/FT6 rated.

Datatwist™ High Performance Twisted Pair Data Cable

For data speeds up to 20 Mbs. in any computer application which supports twisted pair cabling. Type 1455A cable CSA certified FT4 and compatible with DEC 17-01313-01 system. Type 1456A cable CSA certified FT1 and compatible with DEC 17-01286-01 system. Types 1457A and 1458A cable CSA certified FT4, FT6. Meets IEEE 802.3 10 Base T, IEEE 802.5 specs. Meets and exceeds EIA/TA 568 commercial building wiring standard. Larger pair sizes available; contact your local Allied branch.

Magnet Wire

SP—Single Polyurethane Class A, Type T-1

Specification: MIL-W-583B. Readily solderable, adaptable to automatic soldering and winding operations. Round bar copper single conductor covered with Polyurethane film. Proved to have physical and electrical properties equal or superior to those of the oleoresinous and polyvinyl acetal films. 105°C. **Weight:** 1 lb. (gross).

Lacing Tapes and Twine

Designed to meet and exceed MIL-T-713, Type P and MIL-T-43435 Types I and II also AMS 3815, AMS 3816, AMS 3817.

Finishes and Coatings

W — Wax, MIL Spec "B". A microcrystalline fungicidal wax which exceeds military specifications, provides excellent knot retention and is suitable for either lacing or spot ties.

G — Synthetic Rubber, MIL Spec "C"

A special continuous coating of fungicidal synthetic elastomer (rubber) which exceeds MIL Spec requirements, ties easily and exhibits outstanding knot holding characteristics.

A — Synthetic Resin, MIL Spec "E"

A synthetic rubber-like resin formulated with fungicidal ingredients. Handling characteristics are excellent, knot retention is outstanding; meets or exceeds MIL Spec requirements.

Operational Temperature Ranges: -67°F to +250°F on all items.

Nylon Lacing Tape MIL-T-43435 Type-I

Flat braided high tenacity nylon yarn impregnated with microcrystalline fungicidal wax or impregnations to meet military specifications.

Multi-Conductor Overall Alumylar™ Shield and 65% Braided Tinned Copper Shield

OSHA

VW-1

22 AWG, 7/30 stranded tinned copper conductors with color-coded semi-rigid PVC insulation. Conductors are cable with two overall shields. **Shields:** primary shield — overall Alumylar™ shield (100% coverage); secondary shield — braided tinned copper (65% coverage). Jacket chrome PVC. **Temperature Range:** -20°C to +80°C. **Voltage Rating:** 300 volts. Computer applications for EIA RS-232 and CAD/CAM application. Recognized under the components program of Underwriters' Laboratories, Inc. UL Style 2464. Passes VW-1 Vertical Flame Test. CSA S-R PVC approval. OSHA Acceptable. NEC type CL2. 24 and 28 AWG sizes available, contact your local Allied branch for ordering.

Multi-Paired Individually Alumylar™ Shielded Cable

22 AWG stranded tinned copper conductors, insulated with color-coded PVC. **Shield:** Alumylar™ shield over each pair with stranded tinned copper drain wire. **Jacket:** PVC. **Temperature Range:** 105°C. **Voltage Rating:** 300 volts. Suitable as tray cable for Class II and III circuits. UL subject

13, Power-Limited Circuit Cable. UL 70,000 BTU Flame and Tray Test. Meets NEC Article 725, 105°C, 300V. Recognized under the components program of Underwriters' Laboratories, Inc. UL Style 2464, 80°C-300V. Passes VW-1 Vertical Flame Test. CSA TR-64 Approval. OSHA Acceptable. **Color Code:** Pairs are color-coded black and red. On multi-paired cable, each pair is numbered.

HIX Irradiated Flexible Polyolefin

HIX is the most popular, general purpose heat-shrinkable tubing used for insulating, jacketing, bundling, and identification. It is mechanically tough, will not cold flow, never melts, and will not split when shrunk over sharp or irregularly shaped objects. **Applicable Specifications:** MIL-I-23053B/5, Classes 1, 2; AMS 3636B, AMS 3637B. **Operating Temperature Range:** -55°C to 135°C (-67°F to 275°F). **Shrink Ratio:** 2 to 1 (50%). **Shrink Temperature:** 121°C (250°F).

ICO-FLEX Expandable Sleeving

- Lightweight
- Flexible
- Easy To Install
- Abrasion Resistant
- Removable For Repair
- Flame Retardant

ICO-FLEX is a lightweight, self-fitting, polyester, monofilament sleeving, designed to encapsulate and protect cable bundles and wire assemblies. ICO-FLEX expandable sleeving adjusts to irregular surfaces and contours providing abrasion resistance and protection with a minimum of bulk and weight. Sleeving is marked with Flame Retardant Identification tracers.

Type E. Single conductor stranded silver plated copper, extruded TFE Teflon insulation. -65°C to +200°C. Voltage Rating: 600 V. Resistant to acids, alkalis, oil, flame, moisture, solvents, and fungus.

U.L. Style 1007. CSA Style TR-64 MIL-W-76B. 300 V, 80°C. Stranded tinned copper, color coded, medium wall polyvinylchloride insulation. -40°C to +105°C. Resistant to acids, alkalis, oil, flame, moisture, and fungus.

U.L. Style 1015. CSA Style TEW. 600 V, 105°C. Stranded tinned copper, color coded, polyvinylchloride insulation. -55°C to +105°C. Resistant to acids, alkalis, oil, flame, moisture, and fungus.

Bus Bar. Pure electrolytic, soft-drawn solid copper properly annealed and tinned. Used for coil windings, antennas, component leads, bus bar, ground wire, and point-to-point wiring. MIL-W-3861, QQ-W-343-Type S. ASTM-B-33 specs

High Temperature Lead Wire

Type TGGT — UL Style 5251, CSA Type C3; 250°C, 600 Volts

► UL Listed and CSA

Flexible, stranded, 10% nickel-plated copper conductor. Teflon® (TFE) tape wrapped, ceramic tape insulation. Teflon impregnated glass braid jacket (tan), optional colors available on request. The ceramic tape insulation combines high dielectric strength with excellent flexibility and ease of stripping to achieve a lead wire of superior resistance to high temperatures, abrasion, chemicals and moisture. For internal wiring of heating equipment and heat producing appliances in domestic, industrial and cooking applications. **Nominal Thicknesses.** TFE Tape: All sizes .015". Insulation: 24-8 AWG .010", 6-4/0 AWG .015". Jacket: 24-08 AWG .005", 6-2 AWG .0075", 1-4/0 AWG .010".

Type MG — UL Style 5107; 450°C, 600 Volts

► UL Listed, CSA Applied For

Flexible, stranded, 27% nickel-plated copper conductor. Glass reinforced mica tapes insulation. Glass braid jacket impregnated with high temperature finisher (tan), optional colors available on request. Superior resistance to high temperature and the effects of radiation, insulating materials retain their integrity after exposure to 10¹² Roentgens of radiation. For wiring in ovens and other high temperature equipment where temperatures do not exceed 450°C. **Nominal Thicknesses.** Insulation: 24-8 AWG .025", 10-4 AWG .030", 2-4/0 AWG .035". Jacket: 22-12 AWG .007", 10-4 AWG .015", 2-4/0 AWG .020".

Retractable Cords

Unshielded Neoprene Jacket Power Cords

- Retracted Lengths 1, 2 and 4 Feet
► Extended Lengths 5, 10 and 20 Feet

Long-lasting service is assured with this quality multiconductor power cord. Each conductor is stranded copper, with rubber insulation, and a rugged weather and oil resistant neoprene jacket overall. Used on electric tools, portable drills, soldering irons; electrical appliances, household appliances, etc., to eliminate loose hanging wires and to prevent wires from tangling and twisting. **Suggested Operating Temperature:** -20°C to +60°C. **Conductor Color Code:** 1 — Black; 2 — White; 3 — Green; 4 — Red.

* If all four conductors normally carry current, amp rating is as shown. If one lead is used as a ground, amp rating is the same as 2 and 3 conductor cords. † Voltage Rating: 300. ‡ Voltage Rating: 600.

Thermocouple Wire and Extension Wire

A thermocouple is made by the joining together of two dissimilar metal conductors. When the temperature changes at the joint between the two conductors, a voltage is generated. By transmitting that voltage to a special meter, those temperature changes may be monitored and, if desired, recorded. This process is most useful in process instrumentation where monitoring is essential.

ISA Standards

Wire Type	Calibration Temperature	Standard Limits of Error	Wire Type	Calibration Temperature	Standard Limits of Error
J	0° to 530°F	±4°F	E	0° to 600°F	±3%
	530° to 1400°F	±3/4%		600° to 1400°F	±1/2%
K	0° to 530°F	±4°F	JX	400°F	±4°F

Computer Cables — Type CM

For your Computer requirements. U.L. style 2464 (300 V) CSA S-R PVC. Available in both single conductors and twisted pairs. Both are 24 gauge (7 x 32), tinned copper, vinyl insulated, overall aluminum mylar shield, 24 AWG stranded tinned copper drain wire, and chrome vinyl jacket. Passes the VW-1 (FR-1) vertical flame test.

Multi-Paired Overall Shielded Cables Type CL2

ULAWM Style 2448 and UL 2919. Passes VW-1 (FR-1) vertical flame test. **Temperature Rating:** -20°C to +60°C. Twisted pairs of polyethylene insulated 24 AWG, seven strand tinned conductors, cabled with overall aluminum/mylar shield with 22 (7) AWG tinned copper drain wire. Jacketed with flame retardant gray PVC, .032" nominal wall thickness. Nominal mutual capacitance 12.5 pF/FT.

Overall Shielded Paired Cable

- UL Subject 13
- UL Listed, 300 V and UL 2464 AWM
- CSA Certified, CSA TR-64 Appliance Wiring Material

Tinned copper, vinyl insulation, conductors cabled, overall aluminum mylar shield and drain wire, chrome vinyl jacket. **Color Code:** conductor pairs are color coded black and red. Multipairs are numbered at one inch intervals. Meets Article 725 of the NEC. Also marked as Tray Cable suitable for class 2 and 3 circuits. Passes the UL 70,000 BTU Flame and Tray Cable test which is comparable to the IEEE 383 Flame Test, Sunlight Resistant. Passes the VW1 vertical flame test.

FP Heat-Shrinkable Tubing

FP221 Irradiated Polyolefin (M23053/5)

FP221 is a general purpose heat-shrinkable tubing. Its features are flexibility, flame retardant, self extinguishing and fungus proof. This tubing has a max. shrink rate of 50% of supplied diameter. **Operating Temperature:** -55°C to +135°C. **Colors Available:** 1 Black, 2 Red, 3 White, 4 Clear. Insert the color number where N appears in the stock number.

Unshielded Audio Cable

Applications

- Unbalanced Intercom Systems
- Low Voltage Relay Control Cable
- Electronic Computer Cable
- Interconnecting Cables
- PA Systems
- Remote Control Circuits
- Telephone and Telemetering Connecting Cable

UL
2464

Temperature Rating: -20°C to +80°C. Stranded 7/30 tinned copper. Vinyl insulation conductors twisted 22 AWG. Gray vinyl jacket overall. **Suggested Working Voltage:** 200.

Electrical Tapes

Scotch® Super 33+ Vinyl Electrical Tape

33+ tape stretches easily and sticks aggressively to hold in all temperature conditions (0°F/-18°C to 220°F/105°C). 33+ tape provides excellent resistance against flame, abrasion, moisture, alkalies, solvents, oils, ultraviolet rays and many acids while maintaining its full electrical and mechanical properties. (7-mil thick).

617-4725. 33+. 3/4" x 66'.....PER ROLL 3.43
617-4730. 33+. 3/4" x 20'.....PER ROLL 1.34

Scotch® Super 88 Vinyl Electrical Tape

Heavy-duty 8.5-mil thick tape particularly well-suited for cold weather applications. It remains flexible under cold conditions and works well even on small wires. Resists abrasions, salt, alkalies, acids and ultraviolet rays.

617-4735. 88. 3/4" x 66'.....PER ROLL 3.83

Tem Flex™ Series Tapes

1700 Vinyl Electrical Tape. Economy-grade, general purpose vinyl electrical tape. 7-mil tape that is UL listed and CSA certified for 176°F and 80°C.

617-4736. 1700. 3/4" x 60'.....PER ROLL .64

1755 Friction Tape. Tape features a high grade cotton cloth with an electrical grade adhesive. Designed to provide abrasion protection in wire and cable splicing and connection insulation applications.

617-1755. 1755. 3/4" x 60'.....**— NEW —** PER ROLL 1.95

2150 Rubber Electrical Tape. The 2150 tape is designed for insulating and sealing in low voltage applications.

617-1756. 2150. 3/4" x 22'.....**— NEW —** PER ROLL 3.84

Scotch™ 35 Vinyl Electrical Tape

Color coding tape, 7-mil flame retardant and weather resistant tape. Meets requirements of U.L. 510 and CSA.

617-4902. 35. Red (3/4" x 66').....PER ROLL 3.34

617-4903. 35. Green (3/4" x 66').....PER ROLL 3.34

EMI/RFI Foil Shielding Tapes

Copper foil electrical tapes provide an easy-to-apply, timesaving, cost-effective way to shield against EMI/RFI radiation. Foil tapes are conductive through the adhesive and offer mechanical, electrical and thermal values to meet your shielding effectiveness and frequency requirements.

Scotch™ Adhesive Transfer Tape

9703
Scotch 9703 Conductive Adhesive Transfer Tape is an effective time-saving, cost-reducing product for use in numerous electronics assembly applications. It features anisotropic electrical conductivity, i.e. conductivity only through the adhesive thickness and not along the plane of the tape. Moreover, for bond performance you can depend on, it offers consistent caliper and high ultimate bond strength with moderate high temperature performance. And bond strength increases substantially with natural or accelerated aging.

9882 Fully-Cured Acrylic Pressure Sensitive Adhesive

Say "yes" to new Scotch brand Thermally Conductive Adhesive Transfer Tapes and you get an advanced alternative for thermal management in electronics bonding and assembly.

Scotch™ 130C Linerless Rubber Splicing Tape

Scotch™ 130C Electrical Tape is a highly conformable, linerless Ethylene Propylene Rubber (EPR), high-voltage insulating tape formulated to provide excellent thermal dissipation of splice heat. The tape is designed for use in splicing and terminating wires and cables. Rated up to 90°C continuous operating temperatures and short term 130°C overload service. The tape will meet industry specifications for flame retardance and has excellent physical and electrical properties which provide immediate moisture seals and void-free buildups. This product can be used for low- and high-voltage (through 69 kV) applications. **Color:** Black. **Roll Length:** 30 ft.

Acrylic Adhesive Foam Tapes

A-30 Series

A-30 is a firm acrylic pressure sensitive adhesive system. It features high ultimate bond strength, very good high temperature performance and solvent resistance, and high shear holding power. Bond strength increases with natural aging. These products are designed for general purpose mounting and joining, and may offer one piece removal. Surfaces and conditions in question for removal should be tested. The high degree of conformability of these tapes make them well suited for joining rough mis-matched surfaces, and the closed-cell foam makes excellent water and air seals. **Roll Size:** 1" x 36 yds.

Pronto™ Instant Adhesives

CA40 Instant Adhesive

- Sets in 1-30 Seconds
- Water Thin (2 to 10 cps) Viscosity Penetrates and Locks Pre-Assembled Parts
- Bonds Difficult to Adhere Plastics, Rubber, Etc.
- Conforms to Mil-Spec A-46050C

CA40 works where other adhesives will not. CA40 bonds difficult-to-bond materials, including EPDM rubber.

CA50 Gel Instant Adhesive

- Good Void and Gap Filling Properties
- Slower Setting Rate (20-70 Seconds) Allows for Repositioning
- Excellent for Wire Tacking and Coil Terminating Jobs
- Multi-Purpose Application Bonds All Types of Materials
- Bonds Difficult to Adhere Plastics, Rubber, Etc.

CA50 Gel provides a gel consistency that doesn't sag and isn't surface sensitive. Can be used on vertical surfaces.

Pronto CA40 and CA50 Gel Instant Adhesives provide the right combinations of bond strength, cure time and viscosity to match your bonding requirements. All you need is a single drop per square inch to quickly bond plastics, rubber, metal, etc. Pronto Instant Adhesives are clear, one-part cyanoacrylate products which cure rapidly at room temperature to form bonds with tensile strengths up to 5,000 psi. Curing requires no expensive equipment or fixturing devices. CA40 and CA50 Gel Instant Adhesives can be cured without expensive equipment or fixturing devices, and reach handling strength in seconds. Both CA40 and CA50 Gel can be applied right from their containers making them useful in or out of the field. Both products are 100% solids. No solvents are involved.

Scotchmate™ brand Hook and Loop Fastening System

- Operating Temperature: -20°F to 120°F Continuous, -20°F to 158°F Intermittent
- Adheres To Most Smooth Surfaces
- Backing Attachment: Pressure Sensitive Rubber Adhesive
- Pack Contains 8 Mated Pcs. (8-5J3526 Mated with 8-5J3527)

When the two sides of a Scotchmate Hook and Loop Fastener are pressed together, hundreds of tiny, stiff hooks mesh with a surface of pliable loops. You simply press together to fasten and pull apart to open. And do it thousands of times during the life of your product. For use in environments where temperatures climb to levels difficult for some adhesives.

Hot Melt Adhesive System

The Polygon TC Applicator is a real work-horse that delivers Jet-melt™ adhesive quickly and economically. 3M has drawn from its years of leadership in hot melt hand-gun technology to produce the ultimate low-cost applicator.

Easy Operation. The convenient cartridge holder speeds reloading and features "touch control" with special non-fatiguing thumb operation and precise, even adhesive flow. Applicator is ready to go after a brief 5-minute warm-up.

High-Speed Application. Does bigger jobs faster, dispensing industrial grade Jet-melt adhesives at flow rates that are 50% higher than comparably sized handguns. A single loading applies over 89 inches of 1/8" adhesive bead in one uninterrupted application.

ScotchWeld™ Adhesive System

The Scotch-Weld EPX Applicator System is a fast, convenient way to simultaneously meter, mix and apply two-component adhesives and potting compounds. The system features handy Duo-Pak cartridges that snap quickly into the durable, lightweight EPX applicator. For dispensing, a slight squeeze on the trigger advances the plunger into the cartridge. You're assured of accurate measurement and the mixing nozzle provides thorough mixing and precise placement of material. It's the ideal system for assembly, maintenance and in-field service. Now to meet the specialized needs of the electronics industry, 3M offers three unique new two-part epoxy formulations in Duo-Pak cartridges. These Scotch-Weld products are electrolytically noncorrosive to copper — a vital consideration where long-term reliability of electronic components is a factor.

Electronics Vacuum Cleaner, Tool Case Vacuum Cleaners and Filters

▶ 3 Year Warranty

Features

- ▶ **Stretch Hose** — The stretch hose extends from 32" to seven feet long. Long enough to reach into large machines without lifting the vacuum, yet compact for easy storage.
- ▶ **Disposable Filters** — A choice of three conveniently disposable filters to fit your specific applications.
- ▶ **Roomy Storage Compartment for Attachments** — Attachments and power cord are easily stored inside the cover and held securely in place with an internal door.
- ▶ **Replaceable 1 HP Motor** — A replaceable one-horsepower motor gives you all the cleaning power you need and is easy to service.
- ▶ **Strong Resilient Case** — High impact plastic case is tough all over for years of hard work.
- ▶ **Two Durable Latches** — Two sturdy latches keep the lid on tight and the attachments inside during transit.
- ▶ **Current-Limiting Attachments** — Technician safety is increased because 3M's current-limiting attachments, which include a crevice tool, a wand to reach hard-to-get-at-places and a brush to loosen toner and dust particles.
- ▶ **Detachable Power Cord** — Power cord is detachable for effortless storage.

The 3M Service Vacuum Cleaner, the professionals' choice, is a powerful unit developed for high efficiency cleanup of most business equipment. Designed to be easier to use than ever, this portable vacuum makes even difficult jobs a breeze. And with a high-quality filtration system and advanced safety features, it's the only service vacuum designed specifically with the professionals' needs in mind. Convenience, quality and safety make the 3M Service Vacuum Cleaner far and away the professionals' choice for cleaning office equipment. Transporting the 3M Service Vacuum Cleaner is easier, too. A replaceable handle, two replaceable latches and new hinges mean it travels well. The case is made of high impact plastic, so it's tough on the job or on the road. The new 3M Service Vacuum Cleaner features a hose assembly, wand and crevice tool made with a new plastic that slows down the flow of electricity and drains away static, dramatically reducing potential for shock. These important current-limiting features help to protect customer engineers from the potential danger of contact with electrical power and the annoyance of electrostatic discharge (ESD). They also reduce the risk of shock damage to sensitive electronic components.

Specifications. Electrical: 115 VAC, 50/60 Hz, 5.0 amps. **Dimensions:** Length — 17.80" (45.2cm); Width — 7.75" (19.7cm); Height — 9.25" (23.5cm); Weight — 9 lbs., 14 oz. **Certification:** U.L. listed, CSA listed. **Motor:** Continuous duty rated with one sealed ball bearing and one sleeve bearing lubricated for life. Thermally protected with automatic reset. Conducted RFI filtered (reduces EMI to be below FCC requirements). Comes complete with hose, 32" - 10

ft., wand, crevice tool, crevice tool brush, dusting brush, needle nozzle, 3 year warranty.

Tool Case Vacuum: The Tool Case Vacuum comes with pallet for tools. Comes with: 25'-10" stretch hose, wand, crevice tool, creative tool brush, dusting brush and needle nozzle. Three year warranty.

WSU Series Hand Wrapping, Stripping and Unwrapping Tools

Model WSU-30M performs the work of three separate tools. Wraps/unwraps 30 AWG (0.25 mm) wire onto standard .025" (0.6 mm) square DIP socket posts and strips 30 AWG wire nick-free. Makes a "modified style" of wrap, in which approximately 1 1/2 turns of insulated wire are wrapped in addition to the bare wire for added mechanical stability. All metal construction for years of dependable service. Model WSU-30 offers same design, quality, and workmanship but will wrap lengths of stripped wire only.

Stock No.	Mr.'s Type	Use With	EACH
825-2224	WSU-2224	22-24 AWG on standard .031" x .06" and .045" square posts	32.00

Socket-Wrap I.D. Plastic Panels

Don't get stuck with unmarked pins. Identify pin numbers on wire-wrapping sockets with these socket-sized plastic panels with numbered holes in pin locations. Simply slip on the socket before wrapping to greatly simplify both initial wire-wrapping and troubleshooting or repair. Can also be written on for easy identification of location. IC part numbers, function, etc.

Wire Cut-and-Strip Tools

A revolutionary new concept for easy and clean stripping of wires for wire-wrapping. Easy to operate — place wires (up to 4) in stripping slot with ends extending beyond cutter blades — press tool and pull — wire is cut and stripped to proper "wire-wrapping" length.

Surface Raceway

Shape Electronics offers a full line of Wiremold® plastic surface raceway to simplify any new or existing wiring or cabling job. Wiremold raceway systems are ideal for smoke detectors, burglar alarms, fire alarms, additional receptacles and switches, ceiling fans, telecommunication systems or computer networking. These systems offer a flexible organized method to run power or data cabling over walls or on the floor and most models can be painted to match the surroundings. Adhesive backing speeds installation and snap-on fittings provide easy access for changes or future additions. Wiremold raceway protects electrical wiring for a safer installation.

Uniduct™ Ivory 1 Piece Raceway

Uniduct

Device Box

Uniduct is a single piece latching raceway designed to secure and protect low-voltage (50 volts or less) wires and communication cables. The easy open and snap-close flexible hinge allows for quick installations and changes.

Portable Wire Marker Printer

Internal Ni-Cad batteries require 10-12 hours charging time to print approximately 3 rolls of markers without adapter. 120VAC, 60Hz power required for use with adapter. Storage capacity for 100 labels and jobs lists. Can print a directory of entries. Prints up to 16 Alpha, numeric, and special symbols on a single line. Keyboard includes special symbols for marking electrical wires or panel boards. Sequences infinitely. Multiple sequence quantity up to 99, select marker quantity up to 99. Automatic shut-off with recall of last legend. Includes wall adapter, 1 roll of WPR-125A labels, 1 cartridge ribbon, an instruction manual, a marker removal tool and a carrying case for the printer and accessories.

Premium Grade Wire Pulling Lubricant

- ▶ Preferred Wax Base Formulation
- ▶ Retains Lubricating Properties and Will Not Separate up to 200°F
- ▶ Will Not Separate After Frozen
- ▶ Superior Adherence to Cable
- ▶ Recommended for use on all Commonly Used Wire and Cable Including High Voltage Cable
- ▶ Dries to Slick, Waxy Film
- ▶ Non-toxic, No Silicones, Non-staining, Easy Clean Up
- ▶ UL Listed E43782

Fixed Spring® Wire Connectors

- ▶ Five Space Efficient, Color-Coded Sizes
- ▶ Deep, Wide Connector Entry
- ▶ Wire Range #22-10 AWG Copper Only
- ▶ Plated Steel, Square Wire Springs
- ▶ Flame Retardant Thermoplastic Shells
- ▶ U.L. Listed E17010 and CSA Certified LR6541
- ▶ Rated 105°C (221°F)

For making branch circuit wire or fixture wire connections on numerous combinations of solid and/or stranded copper wire.

Fiber Fishing Rod System

- ▶ Best Combination of Rigidity, Flexibility and Strength Available in any Fish Tape
- ▶ Easily Negotiates Multiple Bends, even in Flexible Conduit
- ▶ All Non-metallic Construction with High Dielectric Properties, Reduces Personal Hazards Around Hot Circuits
- ▶ Tighter Bending Radius than Conventional Fish Tapes, Only 1/4 the Pulling Effort
- ▶ Field Repairable if Broken

Color-Keyed® Installing Tools

Model TBM20S — Fig. F. Terminates code copper lugs and connectors from #8 to #2. Features color-keyed dial that operator rotates to match color-coded connectors. Equipped with "Shure Stake" mechanism. 534-3620. Model TBM20S.....EACH 209.24

Model TBM5 — Fig. G. Terminates copper conductors from #8 to 250 MCM lugs, splices joints and taps. Includes dies. 534-3625. Model TBM5.....EACH 364.62

Model TBM5-S — Fig. G. Type TBM5-S installs same range of wire and cable as TBM5 above but is provided with "Shure Stake" feature to insure positive compression. 534-3630. Model TBM5-S.....EACH 483.36

Color-Keyed® One Hole Lugs for 600 V Applications

Color-keyed connectors and die assure complete compression. Connections are permanent, with high pullout value and low resistance. Made of high conductivity copper, tin plated.

*Not U.L. listed.

Electric Heat Gun. Dual speed. Temperature: 450-1000°F. 1400 watts. Requires 12-18 amp outlet.

534-1400. Model WT1400.....EACH 114.75

XTRAFLEX™ System — Conduit and Fittings

Smooth Liquidtight Nonmetallic Conduit Type B

- ▶ Industrial Grade UL/CSA Listed
- ▶ Black Color Standard
- ▶ Lightweight
- ▶ Liquidtight
- ▶ Fast Installation — Even In Tight, Cramped Spaces
- ▶ Smooth Inner Diameter Allows Easy Wire Pulling
- ▶ Smooth Outer Jacket — Uses Material Approved for Outdoor Use, Is Sunlight Resistant and Oil Resistant
- ▶ Temperature Range: -18°C to +105°C (-2°F to +221°F)
- ▶ Market at One-Foot Intervals for Fast, Easy Measuring and Cutting

Recommended Industrial Applications

- ▶ Machine Tools
- ▶ Motor Hookups
- ▶ Food Processing Equipment
- ▶ Extensions from Wireways
- ▶ Sensor and Microswitch Wiring Found in Control Consoles
- ▶ UL Listed, UL File No. E95745
- ▶ CSA Certified, CSA File No. LL80349

Corrugated Flexible Nonmetallic Tubing

- ▶ OEM Grade UL Recognized
- ▶ Maximum Flexibility in Tight Applications
- ▶ Extremely Fast Installation
- ▶ Liquidtight with Specified Fittings
- ▶ Good Tensile Strength Provides Excellent Pullout Protection
- ▶ Smooth Inner Diameter Allows Easy Wire Pulling
- ▶ Broad Operating Temperature Range: -18°C to +60°C (-2°F to +140°F)

Recommended Industrial Applications

- ▶ Protection of Fiber Optic Cable
- ▶ Installation of Instrumentation and Control Cable
- ▶ Indoor/Outdoor Lighting
- ▶ Packaging Equipment
- ▶ Marine and Shipboard Wiring
- ▶ Flexing: Component Wiring Protection on Robots, Graphic Arts Equipment, etc.
- ▶ UL File No. 96548
- ▶ CSA File No. 067241

Plastic Bullet® Liquidtight Fittings for T&B LTC Nonmetallic Liquidtight Conduit Type B and T&B EFC Flexible Tubing

- ▶ U.L. Listed (File # E23018)
- ▶ CSA Certified (File # LR52391)
- ▶ CSA 22.2 #227.2 and CSA 22.2 #227.3
- ▶ ANSI/UL514B-1988
- ▶ Federal Standard H28 (NPT Threads)

- ▶ Watertight Requirements of NEMA Type 4 and NEMA Type 6 Enclosures
- ▶ Suitable for Hazardous Locations: Class 1 Div. 2; Class II Div. 1 and 2; Groups E, F and G; Class III Per NEC; Article 501-4, 502-4 and 503-3

Connector assemblies to conduit without disassembly and is designed to be installed with a positive installation criteria (gland bottoms on body shoulder). Performance of connector unaffected by exposure to detergents, cleaners, and sanitizers commonly encountered in food processing plants and typical industrial environment; also unaffected by cutting fluids, wiring pulling compounds and Marine environment. The connector meets industry standards for cold impact and simulated hammer blow.

Standard Material/Finish. Body Gland: Weather stabilized thermoplastic (black). **"O" Ring:** Nitrile (blue). **Locknut:** Steel/electro zinc plated. **Material Temperature Rating:** Thermoplastic — -40°C to 105°C. **Material Flammability Rating:** UL94-V2.

Power Cable Connectors

Liquidtight Strain Relief Connectors

A liquidtight connector to connect flexible cord or power cable to a box or enclosure and provide adequate strain relief. **Standard Material. Gland, Body:** Steel, malleable iron, zinc die cast. **Retaining Ring:** Thermoplastic, stainless steel. **Bushing:** Neoprene. **"O" Ring:** Buna N. **Standard Finish:** Electro zinc plated and chromate coated. **UL Listed File No.:** E-13938. **CSA Certified:** LR-589, LR-4484. **Conforms to** UL 514, CSA 22.2 No. 18, ANSI C33.84, NFPA 70-1978 (ANSI).

Hand Tools and Marking Pens

Hand Tools

Pistol-type easy tension adjustment. Cuts tails off flush. Type WT 193A for .094" to .184" width ties.

534-2600. WT193A. .094"- .184" width ties.....EACH 137.31

534-2605. WT197. .184"- .301" width ties.....EACH 256.85

Compact hand tool made of high impact plastic. Pre-set tension. Cuts off flush. Lightweight and economical.

534-2610. Type WT1-TB. .094"- .184" width ties.....EACH 27.58

534-2615. Type WT2-TB. .184"- .301" width ties.....EACH 36.93

Nylon Marking Pens

New fine tip marking pen for use with identification ties.

534-2620. WT163M-1. Black.....EACH 10.76

534-2625. WT163M-3. Red.....EACH 10.74

Cable Ties, Tensioning Tools and Nylon Mounting Bases

Wire Ties

Tying wire bundles and cables is easy and seconds-fast with these speed binding and harnessing wire ties. Their rounded ends and flexibility enable you to slip them easily under and around cables and harnesses. Gradually tapered tail inserts readily into self-locking head. Uniform serrations along the length of the tie permit easy "pull-through" right down to the wire bundle — ready for final tensioning and cut-off for a neat, tight harness. One-piece molded of self-extinguishing, fungus-inert 6/6 Nylon, the wire tie remains continuously serviceable to 185°F (85°C). There are no loose heads and no metal barbs. Packed in moisture-tight bags of 100 and 1000. Meet all applicable Military Specifications and are QPL listed. Standard color is natural, but ties are available in a variety of colors and materials; including Halar which is approved for use in plenum spaces, radiation and chemical-resistant Tefzel and heat-stabilized black for outdoor applications. Identification cable ties have a large flat area for imprinting or writing the required information.

Tensioning Tools

Mark 7 and Mark 9

- ▶ Reduce Operator Fatigue and Speed Installation
- ▶ Quick Infinite Adjustability for Flush Cut-Off
- ▶ Long Service Life

Unique 1" stroke decreases tensioning cycles. Ergonomic design fits operator's hand, while hand grip ensures comfort. Roller bearing mechanism reduces return spring tension for smooth stroke. Lightweight; only 9 1/2 oz. Inner cam knob sets to 3 variable tension levels. Outer cam knob "fine tunes" within the tension ranges. Easy to read digital display speeds adjustment and verification. Durable, high impact, glass reinforced nylon casing. Double-wall linkage for added strength. Tough chromium steel components. Roller bearing mechanism assures low friction between mechanical components. Used to install Tyton ties T18 through T50 series.

805-0101. Model Mark 7 EACH 145.54

The Mark 9 tool has all the ergonomic design features of the Mark 7, but it can be used to install every Tyton tie, from the T18 Series to the T150 Series. The Mark 9 weighs 11 1/2 ozs. and has a spare blade compartment.

805-1290. Model Mark 9 EACH 242.33

Mark 5

The Mark 5 tensioning tool is made from a polycarbonate material. It features a short squeeze stroke and a positive cut-off feature which ensures consistently flush, burr-free edges. Can be used to install Tyton ties T18 through T50 Series.

805-0005. Model Mark 5 EACH 103.90

Nylon Mounting Bases (For Wire Ties Above)

MB-2.5A. 5/8" square; adhesive back; or use two #3 screws. For T18 ties.
805-2002. MB2.5A PER PKG./100 16.00

MB-3A. 3/4" square; adhesive back; or use two #4 screws. For T18-T30 ties.
805-2003. Natural PER PKG./100 26.50
805-2013. Black PER PKG./100 23.85

MB-4A. 1 1/8" square; adhesive back; or use two #8 screws. For T18-T50 ties.
805-2004 PER PKG./100 30.35

Cable Tie Kit

Tyton's cable tie kit contains ties, mounts, and a Tytontwyster Tool in a convenient case. The case is made from a durable polypropylene, and it keeps items in separate compartments for easy access and organization.

Each Kit Contains: 100 18 lb., 4" ties (T18R), 100 18 lb., 5 3/4" ties (T18I), 100 50 lb., 8" ties (T50R), 50 4 way adhesive mounts (MB-4A), 1 Tytontwyster Tool (TWT-1)

805-1011. TMK1 EACH 63.94

Tytontwyster Cable Tie Tool

The Tytontwyster is a pocket sized, installer controlled, tying tool. Model TWT cuts tail off flush. Made of high visibility, colored, high impact engineering resin. You control the tensioning and cut-off. TWT-1 (orange) installs Tyton ties T18 through T50 Series. TWT-2 (blue) installs Tyton ties T120 Series.

805-0102. Model TWT-1 EACH 22.33
805-1295. Model TWT-2 EACH 26.45

Wiring Duct and Covers

Slotted sidewall style is the popular choice of panel builders. Features restricted slot openings, scored sidewalls for corner and T junctions, breakaway fingers to provide additional access for wire leads, and smooth edges. Buffed edges on slotted wall fingers help prevent worker hand injury during installation and pressure sensitive adhesive backing can be utilized for either temporary positioning or permanent mounting. 1" width duct is provided with 1/2" adhesive strip along centerline. 2", 3" and 4" widths have two 1/2" or 3/4" adhesive strips along their length. Duct must be mounted on a clean, oil-free panel surface. Wiring Duct Covers with their non-slip plastic lining ensure that the covers will remain in place under vibration. Duct and cover sold separately. Packaged 30 feet (carton of 5 6-foot lengths). Manufactured from rigid PVC. UL Recognized, UL Flame Rating of 94V-0, CSA Certified.

High Density Wiring Duct

— NEW —

- ▶ 2 to 1 Finger Ratio
- ▶ Versatile Mounting Hole Design
- ▶ Covers Are Flush With the Side of the Duct
- ▶ Manufactured from Rigid PVC
- ▶ Duct and Covers Sold Separately in Six Foot Lengths
- ▶ UL Recognized
- ▶ CAS Certified
- ▶ UL Flame Rating of 94V-0
- ▶ Made in the USA

Tyton High Density Wiring Duct incorporates many of the features of its standard wiring duct but features narrow slotted wall fingers. These slotted wall fingers equal a 2 to 1 finger ratio compared to standard slotted wiring duct. The narrow fingers reduce the fanning of wires to terminal blocks for a neater appearance and to accommodate more compact designs. Tyton's versatile mounting hole pattern on the high density duct lines up with DIN rail, as well as numerous other mounting designs. Also, the mounting hole rows are consistent with Tyton's standard wiring duct, so the two ducts can easily be interchanged. Tyton's standard wiring duct cover can also be interchanged with the high density duct, eliminating the need to order additional cover inventory. Tyton's high density wiring duct with pressure sensitive rubber based adhesive backing. The adhesive backing can be utilized for temporary positions or permanent mounting. Color: Gray.

Lightguide Enclosure System

The Lightguide Enclosure System is designed to route and protect fiber optic cable. The system prevents accidental cuts, kinks, and associated signal loss. The Lightguide Enclosure System consists of connectors and protective channel. The connectors provide a 2" bend radius which ensures effective signal transmission while utilizing minimum space. Complete lay-in capability allows ease of access to the cable. Over 35 components in different sizes with various horizontal and vertical transitions are available. Call Allied for part numbers and more information. Available from factory only. Not stocked at Allied.

Surface Raceway

- ▶ A Special Flexible Hinge Allows for Numerous Openings Without Creating Discoloration or Stress Cracking
- ▶ The Self-Locking, Hidden Positive Latch Allows for Quick Re-Entry As Well As Secure Installation of Wire and Cable
- ▶ The Adhesive is an Acrylic Pressure Sensitive Foam Tape with High Ultimate Bond Strength, Which Conforms to Any Surface
- ▶ Ivory Is The Standard Color, White Is Available Upon Request And Both Are Paintable With A Latex-Based Paint

Raceway Dimensions

Tyton Surface Raceway is a one-piece latching duct designed to contain, route, and protect wire and cable when it is not feasible to run it within the wall.

Surge Protectors, Tubing, Spiral Wrap

Category 5 Surge Protection

— NEW —

Preserve your hardware and prevent business suspension with Tyton CATEGORY 5 surge protection products. Tyton's SECTORGUARD series consists of state-of-the-art modular Plug-In AC/Data Communication/Telco protection, providing the ultimate protection at the wall outlet level for today's complex workstations. The units are available in three styles, three outlet plug-in, three outlet plug strip and the seven outlet plug strip. The Category 5 Snap-On modules are used in conjunction with this series for computer workstations, LANs, copiers, facsimile machines and other electronic equipment that often require special telecommunications interfaces. When applied to the SECTORGUARD, the unit provides total protection for any remote network. Tyton also provides an effective shield between incoming surges and sensitive I/O ports with the SECTORSHIELD. It is a DIN rail mounting module suited for the protection of intelligent hubs or situations where many ports require protection. The SECTORSHIELD is state-of-the-art protection for Category 5 applications by providing a solution to every configuration, whether it is DC to Category 5, Dial-Up to T1, single port or multi-port. All Category 5 models are equipped with modular jacks for both the Line (incoming unprotected) and the Load (equipment protected) side and they protect all eight wires of the connector. UL Certified CATEGORY 5, UL listed communication circuit accessory, UL94-5V flame retardant material. EIA/TIA compliant per specification TSB 40A. **Modular:** Port-by-port protection. **Maximum Surge Rating:** 2 kV/1 kA per wire (IEC 801-5). **Maximum Clamp Voltage:** 10 Volts (measured between a pair during the common mode application of 2 kV (1.2/50 μ s) 1 kA (8/20 μ s) wave form). **Wires Protected:** Eight. **Series Resistance:** None. **Attenuation:** Better than -33 dB at 100 MHz. **N.E.X.T.:** Worst pair, better than -43 dB at 100 MHz.

Spiral Wrap

A range of Spiral Wrap in four materials for neatly harnessing cables. The range of materials covers all applications and conditions. Spiral Wrap is a versatile form of protection enabling cables to be led out at any point. Furthermore, because of its flexibility, it will follow any route taken by cable. **Spiral Wrap is stocked by Allied in the following material:** Non-flame retarded polyethylene (Spirathene Ref. NFP). **Color:** Natural. **Operating Range:** -60°C to +70°C. Also available on special order in the following materials: P.T.F.E. (Spiratemp Ref. P). **Color:** Natural. **Operating Range:** -60°C to +250°C (300°C for intermittent use). Nylon (Spiralon Ref. N). **Color:** Natural. **Operating Range:** -55°C to +95°C (135°C for intermittent use). Flame retarded polyethylene (Spirathene Ref. FRP). **Color:** White. **Operating Range:** -50°C to +70°C. **Standard Packs:** Spiralon and Spiratemp are supplied in 3 meter lengths, in polyethylene envelopes. Spirathene (flame retarded and non-flame retarded) are supplied in 30 meter lengths, in polyethylene envelopes.

Tagprint Labeling Software

Tyton Corporation offers two versions of Tagprint labeling software for efficient computer generated labeling. Tagprint for Windows and Tagprint II are both ideal for creating labels for wire and cable marking, PC boards and components, terminal blocks, and almost any industrial identification application. Tagprint for Windows and Tagprint II are IBM compatible. Both versions of Tagprint can be used with dot matrix and laser printers, as well as Tyton's TT1000 thermal transfer printer. Call Allied for more information on Tyton's thermal transfer labeling system, which incorporates Tagprint software. Easy to use, Tyton's software speeds production, while offering many labeling options. Bar coding, serialization, label sets, and text choices are just some of the capabilities of Tyton's Tagprint software.

Tagprint for Windows — NEW — Labeling Software

Tagprint for Windows provides many features for labeling versatility and efficiency. **WYSIWYG:** "What You See Is What You Get" label creation. The label is shown on the screen for easy editing and proofing. Graphic images appear, as well as representations of type styles, sizes and placement. **Preview:** View a sheet of labels at one time. **Serial Numbers:** Alpha and numeric options include decimal, octal, and hexadecimal capabilities. Most serial configurations increment automatically. Custom options are available to meet special requirements. **Random Access:** Allows easy data entry for labels that have different information on each label. **Graphics:** Windows-created graphics can be printed. **Bar Codes:** Code 39, Interleaved 2/5, UPC-A, and EAN standard bar codes are offered. All bar code dimensions can be altered to fit on various sized labels and printed with or without text. High density bar codes with sharp, clear imaging can be produced when using a laser printer or Tyton's TT1000 thermal transfer printer. **Fonts:** Uses the Windows true type fonts for a wide choice of sizes. **Label Sets:** Prints multiple sets for group repetition. **External Field:** Separate ASCII data bases can be accessed. Both fixed and free formats are read. **Time/Date Functions:** If desired, Tagprint for Windows prints time and date of label printing. Time and date are continually updated during the printing process, so there is no need to stop for changes. **Complete Storage Capacity:** Once a label is created, it can be stored in any directory or file and is automatically sorted for easy recall. **Printers:** Prints to laser and dot matrix printers, along with Tyton's TT1000 thermal transfer printer. **Unlimited Label Stock Sizes:** All standard Tabtag label sizes appear on Tagprint for Windows, but non-standard sizes can easily be added to the label data base. **Customer Support:** The software comes with a user's manual and toll-free number for friendly, knowledgeable customer support. **Requirements:** IBM PC, PS/2 or compatible with at least a 286 microprocessor. Microsoft DOS 3.3 or higher and Microsoft Windows 3.1 or later. IBM VGA or other graphic adapter supported by Windows. Mouse support by Windows. At least 4 MB of RAM. At least 2 MB of free space on the local hard disk. A 3.5" disk drive for installation. A printer with device driver for Windows 3.1. A 368 or 486 processor is preferred.

Tagprint II — NEW — Labeling Software

Like Tagprint for Windows, Tagprint II software offers labeling efficiency and versatility. Tagprint II runs on any IBM compatible computer with DOS 2.1 or later. Easy to use, no prior computer experience is needed to create, save, and store label files. As in Tagprint for Windows, Tagprint II offers: WYSIWYG ("What You See Is What You Get") Label Creation, Graphics, Label Sets, External Field, Time/Date Functions, Complete Storage Capacity, Unlimited Label Stock Sizes and Customer Support. Tagprint II also provides other features. **Serial Numbers:** Alpha and numeric options include decimal and hexadecimal capabilities. Most serial configurations increment automatically. Custom options are available to meet special requirements. **Bar Codes:** Five bar codes are offered on Tagprint II, including Code 39, Interleaved 2/5, UPC, Codabar, and EAN standard. All bar code dimensions can be altered to fit on various sized labels and printed with or without text. High density bar codes with sharp, clear imaging can be produced when using a laser printer or Tyton's thermal transfer printer. **Various Text Sizes:** Six standard sizes can be printed, from 5 characters per inch (c.p.i.) to 17 c.p.i. With the smaller text sizes, greater amounts of information can be placed on the small labels. Larger text size can make the label readable from a distance. **Automatic Centering:** Inputted information is automatically centered on the Tabtag label. Information can also be moved to very specific coordinates on the label. **Mouse Support:** Tagprint II can be used with or without a mouse. **Printers:** Prints to laser and dot matrix printers, along with Tyton's TT1000 thermal transfer printer.

Tabtag and Handi-Labels Computer Printable Labels

Tabtag Labels

Computer-printable Tabtag labels are available in self-laminating and blank styles for nearly any labeling application. Self-laminating Tabtags are manufactured with a clear, flexible vinyl film which overwraps the legend to provide protection against moisture, chemicals, and abrasion. Blank Tabtags are used to flag wire and cable and identify terminal blocks, printed circuit boards, E-Proms, ICs and other components. Used for bar coding and other industrial identification purposes, Tabtags resist harsh chemicals and extreme temperatures, while providing smudge-resistant identification. Additional stock sizes are available, and custom labels can be designed to meet specific requirements. Standard label color is white. Yellow and grey are available upon request.

Handi-Labels

Tyton now offers Handi Cards for computer printing using Tagprint II software. **Label Dimensions:** .235" W x 1.5" L, 32 labels across the pages. Each section of labels is perforated so that it can be separated into individual cards after printing. This makes it possible to print custom legends on a standard Handi-Card size product. Handi-Labels come in packages of 2500 markers. The material is a white, conformable vinyl with a rubber based, permanent adhesive. **Temperature Range:** -40°F (40°C) to +175°F (347°C).

Patch Panels, Outlets and Networking Frames

Tyton 110 Series — Category 5 Performance Patch Panels

The Tyton 110 Series Patch Panel features PC board construction for optimum system performance, modular design, and offers the installer the option to terminate trunk or station lines directly to an AT&T 100 punch or Krone block mounted on the rear of the panel. The Tyton 110 Series Patch Panel is available in 12-, 24-, 48-, or 96-port versions and is configured to the AT&T 258A (EIA-T-568B) standard or EIA-T-568A configuration.

Tyton Surface Mount Outlet for Category 5 Performance

The Tyton-Connect high speed information outlet is designed for all voice and data communications networks. It provides high bit-rate performance for use with all categories of building wiring up to 100 Mbps (Category 5). This fully modular outlet features PC board technology. It is ideal for applications where moves, adds, and changes will take place. Tyton-Outlet can be configured to either EIA-T-568A or EIA-T-568B.

Modular Networking Frames and Data Communications Accessories

Tyton offers modular networking frames and data communications accessories for rack mount needs. The frames and accessories are ideal for mounting Tyton patch panels and other telecommunications equipment.

Modular Networking Frames

- ▶ 19" EIA Rack Mount Width
- ▶ Available with 10/32" or with 12/24" Tapped Holes
- ▶ Mounting Holes Are on both Front and Rear Flanges Per EIA Universal Hole Spacing
- ▶ Comes with Double Top Angle and Two Symmetrical Bases
- ▶ Comes in Aluminum (Mill) Finish
- ▶ Meets UL Standards 1459 and UL 1863

Flush Mount Outlets Category 5 Performance

Tyton's high speed information outlet system offers snap-in inserts and connector for installation versatility. This design allows outlets to be retrofitted at the workstation, if desired. With choices of single, dual, triple, or quad face plates, ports may be added in the future without making the existing outlet obsolete. Used with the RJ45, 110 block connectors, Tyton information outlets exceed Category 5 requirements. This system is UL and CSA Certified to meet EIA/TIA 568, TSB40-A specification for attenuation, NEXT, and return loss. It provides high performance with all categories of building wiring to 100 Mbps. Printed circuit board technology is used for impedance matched performance. Tyton face plates are manufactured from ABS plastic and meet requirements for UL rated 94V-0.

Surface Mount Connectors

AMP

Low Insertion Force, Low Profile Surface Mount PLCC Sockets

New to the Amp family of Low Profile Plastic Leaded Chip Carrier (PLCC) sockets for surface mounting is this line of Low Insertion Force Sockets. A unique contact design allows the PLCC device to be easily inserted into the socket. Sockets will accommodate plastic "J"-leaded devices made to JEDEC Specifications MO-047AA-AH (square packages and MO-052-AE (rectangular packages).

AMPMODU 50/50 Grid Surface-Mount Connector System

With Standard Holdowns

The AMPMODU 50/50 Grid Connector System features polarized surface-mount headers and receptacles on a .050 x .050 (1.27 x 1.27) centerline grid. Board-to-board stack heights of .250 (6.35), .320 (8.13) and .390 (9.91) are available. This

system is ideal for parallel stacking applications for computers, computer peripheral equipment, communication systems, medical instrumentation and environmental control systems as well as other high density applications.

AVX Ceramic Chip Capacitors

AVX ceramic surface mount capacitors, available in NPO, X7R and Z5U, have historically been one of the most reliable electronic components available. NPO and Z7R have temperature coefficients of -55°C to +125°C. NPO is the most popular formulation of the "temperature-compensating" EIA Class I ceramic materials. They show little capacitance change with frequency and dielectric absorption is typically less than 0.6% which is similar to mica and most films. The X7R is the most popular intermediate dielectric-constant formulation that is called "temperature-stable" in ceramics and fall into EIA Class II materials. Capacitance for X7R varies under the influence of electrical operating conditions such as voltage, frequency and time (approximately 5% change in 10 years). Z5U formulations are "general purpose" ceramics which are meant for use in limited temperature applications where small size and cost are important. They provide the highest capacitance density possible in a given size for the three most popular formulations. They show wide variations in electrical operating conditions. Despite their capacitance instability, Z5U formulations are very popular because of their small size, low ESL, low ESR and excellent frequency response. These features are particularly important for decoupling applications where only a minimum capacitance value is required.

Size	Dimensions (mm)

AVX Tantalum Chip Capacitors

AVX offers solid tantalum capacitors in a wide range of sizes, styles and ratings to meet any design needs. The four case sizes offered here are the most popular and conform to EIA standard EIA-535BAAC. The TAJ Series is qualified as MIL-style CWR11. The TAJ Series is temperature rated at -55°C to +85°C.

How to Order (Commercial):

TAJ Mfr.'s Type	B Case Code	335 Cap Code	M Tol. %	016 Volt DC	R Packaging	
Case Code	Dimensions					
	L	W	H	W1	A	S (min.)
A	3.2	1.6	1.6	1.2	0.8	1.1
B	3.5	2.8	1.9	2.2	0.8	1.4
C	6.0	3.2	2.6	2.2	1.3	2.9
D	7.3	4.3	2.9	2.4	1.3	4.4

W1 dimensions applies to the termination width for "A" dimension area only.

PLCC Sockets

The plastic leaded chip carrier sockets (PLCC) are designed to carry JEDEC type A chips on 1.27 mm (.050") centerlines. They are available in surface mount and through mount configurations of 20, 28, 32, 44, 52, 68, 84, and 100 position. The socket's low profile design minimizes overall height. Contacts are tin-lead plated phosphor-bronze.

CONAN™ 1.0 mm Pitch Connector System

► **Product Users:** Manufacturers of Pagers, Cellular Phones, Notebook Computers, and Add-In Memory Boards

Low-profile, surface-mount connectors for close stacking of parallel circuit boards. Options available for 4.15 mm, 4.5 mm, 5.0 mm, 6.0 mm, or 7.0 mm mated connector height. Connectors feature reliable selectively-plated, blade-on-beam contacts on 1.0 mm pitch. **Current Rating:** 1 A per contact. UL recognized, CSA certified.

RIB-CAGE™ II 0.050" (1.27 mm) Surface-Mount Connectors

High-density, double-row Rib-Cage™ II surface-mount, vertical shrouded headers mate with surface-mount vertical receptacle assemblies. Both are 0.050" x 0.050" (1.27 x 1.27 mm) centerline systems. Black LCP housing, rated UL 94V-0. Hold-downs maintain proper alignment to PC board. Standoffs prevent entrapment of cleaning solutions. Compatible with vapor-phase and infrared reflow soldering processes. Contacts selectively 30 µ minimum gold plated in contact area and 100 µ tin/lead on solder tails. **Current Rating:** 1 A DC. **Withstanding Voltage:** 800 VAC. **Temperature Rating:** -55° to +130°C. UL recognized, CSA certified.

Compatible with all surface mount soldering processes and all popular vacuum pick-and-place equipment. Meets EIA/EIAJ/IPC/VRCA SMD standard outline dimensions. Top or side actuated. **Current Contact Rating:** 100 mZ max. **Max. Voltage:** 24 V. Switch is normally open type. **Operating Temperature Range:** -55°C to +125°C.

754-0250. 7914G-1-000E.....	PER PK./100 83.00
754-0252. 7914J-1-000E.....	PER PK./100 83.00

RECOMMENDED PCB LAYOUT

Miniature industrial rotary selector switch. Vertical adjust. Rugged surface mount design. Switch is SP9T, break-before-make timing. "O" position is off with no contact made. Withstands 260° soldering heat for five seconds. **Max. Current Contact Rating:** 100 mA. **Max. Voltage:** 24 V. **Operating Temperature Range:** -55°C to +125°C.

754-0265. 7643J-1-010. 1-99 EACH 2.29
100-499 EACH 1.90

Compatible with all surface mount soldering processes and all popular vacuum pick-and-place equipment. Meets EIA/EIA/JIPC/VRCI SMD standard outline dimensions. **Max. Current Contact Rating:** 100 mA. **Max. Voltage:** 24 V. **Operating Temperature Range:** -55°C to +125°C. **Rotational Life:** 50 cycles. Non-shorting contact timing. Switch is single pole double throw type. Withstands 260° soldering heat for 10 seconds.

754-0255. 7814G-1-051E	PER PK./100 160.00
754-0257. 7814J-1-051E	PER PK./100 160.00

Figure 1: Dimensions and Recommended PCB Layout for the 100-pin DIP package. The figure includes a top view of the package with dimensions: 3.5mm width, 3.5mm height, and an adjustment slot (0.51 wide x 1.93 long x 0.51 deep). It also shows a side view with a 0.15mm thickness. A recommended PCB layout is shown with dimensions: 1.6mm pin pitch, 0.65mm pin width, 0.9mm pin height, 2.25mm body width, and 2 PLCS (lead clearance) on each side.

This low level signal switch is compatible with all surface mount soldering processes. Withstands 260° soldering heat. **Rotational Life:** Type 7813J-1-051E — 50; Type 7813J-1-023E — 2000 cycles. **Max. Current Contact Rating:** 100 mA. **Max. Voltage:** 24 V. Non-shorting contact timing. Switch is single pole double throw type. **Operating Temperature Range:** -55°C to +125°C.

Sealed Low Profile DIP Switches, LD Series

- R Three Surface Mount Terminal Styles — .100" Terminal Spacing
- R Process Compatible — Withstands IR and Vapor Phase Reflow Soldering and Cleaning Processes High Temperature Materials (UL 94V-0)
- R Sealed Construction — Internal Actuator O-Ring, Epoxy Base Seal
- R Tin-Lead Alloy Coats All Sides Of Terminals For Joint Integrity
- R New Two Pole Model — Same Size As Single Pole Switch
- R Available On Tape and Reel For Automated Placement

Contact Rating: 0.4 VA max. @ 20 V AC or DC max. Mechanical and Electrical Life: 40,000 make-and-break cycles at full load. Contact Resistance: Below 50 milliohms typ. initial @ 2-4 V DC, 100 mA. Insulation Resistance: 10⁹ ohms min. Dielectric Strength: 500 V RMS min. @ sea level. Operation Temperature: -30°C to 85°C. Solderability: Per MIL-STD-202F method 208D, or EIA RS-186E method 9 (1 hour steam aging). Housing and Base: Glass filled nylon 4/6, flame retardant, heat stabilized (UL 94V-0). Actuator: Glass filled nylon 6/6, flame retardant, heat stabilized (UL 94V-0), with standard internal o-ring seal. Switch Support: Brass, tin plated. Movable Contact: Phosphor bronze with gold plate over nickel plate. Terminals: Copper alloy, with tin-lead alloy over nickel plate. Terminal Seal: Epoxy. All terminals insert molded.

Vitramon Monolithic Ceramic Chip Capacitor Kits

- ▶ NPO, X7R, Z5U, High Q Dielectrics
- ▶ Nickel Barrier Termination Construction
- ▶ Extended Capacitance Ranges
- ▶ Unique Wet Build-Up Process Eliminates Micro Cracks In The Chip Capacitor Body With Less Porous, Denser Structure And Better Electrode Plate Registration

To determine the values contained in each kit, compare the value codes in Chart 1 with the value codes in Chart 3. Example: All part numbers in Chart 3 with the letter "C" in the value code are contained in the kit which has the letter "C" as its value code in Chart 1.

To determine the characteristics of each capacitor, compare the three letters and number in the characteristic code in Chart 3 with the characteristic code explanation in Chart 2.

CEC-123
General Purpose SMD Electrolytic
Capacitor Kit

- ▶ (SMD) Electrolytic Capacitors
- ▶ Surface Mounting Mountable Construction
- ▶ Miniaturized Down to 5.5 mm Heights
- ▶ Load Life of 2000 hrs at 85°C
- ▶ Operating Temperature Range -40 to +85°C
- ▶ Voltage Range: 4 V to 50 V
- ▶ Capacitance Tolerance: ±20% @ 120 Hz, 20°C
- ▶ Total of 120 Capacitors
- ▶ Case Size: 8" W x 11 1/4" H x 4" D (All Kits on This Page Supplied in This Case)

Capacitance Values Contained in the CEC-123 Kit

Capacitance	Quantity	Voltage	Tolerance

CEC-62
Tantalum Chip Capacitor Kit (SMD)

- ▶ (SMD) Highest Quality Tantalum Chip Capacitors
- ▶ Ultra-Small Case Sizes
- ▶ High Soldering Heat Resistance
- ▶ Greater Reliability
- ▶ 12 of the Most Requested Capacitance Values
- ▶ Easy to Read Label Clearly Shows Capacitance, Voltage, and Tolerance
- ▶ Sturdy, Clear, See-Through Plastic Case With 12 Individual Compartments
- ▶ Total of 60 Capacitors

Capacitance values contained in the CEC-62 Kit

Capacitance	Quantity	Voltage	Tolerance
68.0 MFD	5	4	±20%

777-0062.....EACH 67.92

CC-540-12 Multi-Layered Ceramic Chip Capacitor Kit. 10 pieces each — 43 values. Ultra-miniature size, light in weight and thin body thickness. Highest reliable performance. 9" x 7.5" x 1.6" styrene case with chip types clearly marked. Includes: EIA 1206 case sizes, NPO, X7R and Z5U types, 10pF — .1 MFD capacitance ranges at 50 volts.

777-5412, CC-540-12.....EACH 174.95

TC-150 Tantalum Chip Organizer Kit. 9" x 7.5" x 1.6" styrene case with 150 pieces. Kit Features Include: Highest quality tantalum chip capacitors in Ultra small case sizes. High soldering heat resistance: 30 values of tantalum chips. 4V-35V, .047-68 MFD, x8/x16 magnifying glass and specially designed Chip tweezers.

777-1500, TC-150.....EACH 156.40

CC-540-08 Multi-Layered Ceramic Chip Capacitor Kit. 10 pieces each — 43 values. Ultra-miniature size. Thin body thickness, light in weight with highly reliable performance 9" x 7.5" x 1.6" styrene case with see thru locking lid, and clearly marked chip types. 10pF-1mF capacitance ranges at 50 volts. EIA 0805 case size, NPO, X7R, and Z5U types.

777-5408, CC-540-08.....EACH 184.45

CEC-360 Surface Mount Kit. One of a kind organizer kit containing 120 pieces of surface mount electrolytic capacitors. 4-50 VDC; 0.1-220 MFD. Packed in compartments in clear plastic polystyrene case.

777-0360, CEC-360.....EACH 140.25

CEC-112 Surface Mount Wound Chip Inductor Kit. Surface mount inductor chips designed for hybrid circuits, high-density circuits and microelectronic devices. Kit offers 7 pieces each of 16 popular values. Kit includes x8/x16 magnifier and special tweezers. All supplied in molded styrene case. 1.0pH-820pH.

777-0112, CEC-112.....EACH 138.55

CEC-181 SMD Ceramic Chip Capacitor Kit. EIA 1206 size multi-layer ceramic chip capacitors. 10pF-1mF capacitance ranges at 50 volts. 5 pieces each — 18 values. NPO, X7R and Z5U types. 8" x 1 1/4" x 4" styrene case with chips clearly marked.

777-0181, CEC-181.....EACH 44.20

CEC-182 SMD Ceramic Chip Capacitor Kit. EIA 0805 size multi-layer ceramic chip capacitors. 10pF-1mF capacitance ranges at 50 volts. 5 pieces each — 18 values. NPO, X7R and Z5U types. 8" x 1 1/4" x 4" styrene case with chips clearly marked.

777-0182, CEC-182.....EACH 44.20

Call Allied For Replacement Parts

Miniature Molded-Case Tantalum Chip Capacitors, Type 293D, 10% Tolerance

Part Numbering System

293D 105 X0 010 A 2

Termination. 2 = Solderable Coating (Standard).

Case Code. See Ratings and Case Code Table.

D-C Voltage Rating, at +85°C in volts. Preceded by zero's if needed to complete the three digit block.
A decimal point is indicated by an "R" (6R3 = 6.3 volts)

Capacitance Tolerance. X0 = ±20%, X9 = ±10%, X5 = ±5% (Special Order).

Capacitance Code. Expressed in picofarads. The first two digits are significant.
The third is the number of zeros following.

Sprague Type Numbers. Identifies the basic capacitor design.

Dimensions in Inches

Case Code	EIA Size	L Length	W Width	H Height	Terminations		
					P ±.012	TW ±.004	TH Min.
A	3216	.126 ±.008	.063 ±.008	.063 ±.008	.031	.047	.028

*14 Pin series only.

Rugged, molded epoxy case construction is compatible with automatic surface mounting equipment. Uniform performance characteristics. Highly stable thick film element. Leads are tin-lead plated copper alloy. 0.050" lead spacing. 0.090" maximum seated height. Reduces total assembly costs. Bussed style typically used in pull-up/pull-down applications and digital pulse squaring. Isolated style typically used in pull-up/pull-down circuits, line termination and impedance balancing. ±100PPM. 2% tolerance. **Power Rating:** For bussed style, 0.08-watt; for isolated style, 0.16-watt. **Operating Temperature:** -55°C to +125°C.

Series 7002X and 7008X

- Non-Diffused
- Package Color: Clear
- Viewing Angle: 120°
- Rated Current: 10 mA
- Premium Brightness in Miniature Chip-Type LED Assemblies
- Ideally Suited for Applications Such As Telecommunications, Data Processing Peripherals and Networking Units As Replacements for Through-Hole Products
- Also Ideal for Backlighting or Light Pipe Applications
- Integral Reflection Cup Maximizes Output
- Compact Size: 3.5 mm Wide × 2.8 mm Deep × 2 mm High
- Compatible with Full Range of IR and Vapor Phase Reflow Processes, and Conductive Adhesives, to Facilitate High-Speed Board Loading
- Packaged for Automatic Component Placement in Pocketed Anti-Static Tape Reels.

*Sold in 100 piece multiples. Full reels available; 7002X supplied 2,000 parts per 7" reel and 7008X supplied 8,000 parts per 13" reel.

Series CMD113 Surface Mount LED Lamps

Single and dual surface mount LED Lamps are designed to be compatible with today's state-of-the-art surface mount technology. Packaged on an 8 mm tape allowing for easy automated placement. All have clear lenses.

Series 6200 Sub-Miniature 1.65 mm Right Angle Block Assembly

U.S. PATENT #4,781,960
ALL DIMENSIONS ARE IN INCHES (MM).

Designated the model 6200 series, these devices position LEDs for easy visibility, particularly in applications where boards are mounted in parallel close to one another. 6200 series surface mount LEDs are available in red, amber, green, and yellow colors, in standard and low-current versions, and in both standard and low-current 5 volt resistor-included versions. 6200 series LEDs are designed and packaged to meet the requirements of automated surface mount production lines. These devices will withstand processing temperatures of either IR or vapor-phase reflow, and are compatible with most common fluxes and cleaning agents. **Housing:** Black Polyphenylene Sulfide, UL 94V-0.

*Sold in 100 piece multiples only.

Series 6255T Surface Mount Circuit Board Indicator

Full surface mount reflow compatibility. Wide view angle and super brite output. Direct optics, no bends or losses. Ideal drop-in replacement for Dialight 591 Series Prism. Black housing provides high contrast. UL 94V-0 rated housing.

Nano²™ Very Fast-Acting Type

Recognized under the Components Program of Underwriters Laboratories and Certified by CSA. Approved by MITI from 1 through 5 amperes. **Operating Temperature:** -55° C to 125° C. **Shock:** MIL-STD-202, Method 213, Test Condition 1 (100 G's peak for 6 milliseconds). **Vibration:** MIL-STD-202, Method 201 (10-55 Hz, .06 in. total excursion). **Salt Spray:** MIL-STD-202, Method 101, Test Conditions B (48 hours). **Insulation Resistance (after opening):** MIL-STD-202, Method 302, Test Condition A (10,000 Ohms minimum). **Resistance to Soldering Heat:** MIL-STD-202, Method 210, Test Condition B (20 sec. at 260° C). **Thermal Shock:** MIL-STD-202, Method 107, Test Condition B (-65° to 125° C). **Moister Resistance:** MIL-STD-202, Method 106, High Humidity (90-98 RH), Heat (65° C). **Materials:** Ceramic Body/Tin-Lead Alloy Plated Brass Caps. **Soldering Parameters.** Wave solder: 500° F (260° C), 10 sec. **Infrared:** 500° F (260° C), 30 sec. **Solderability:** MIL-STD-202, Method 208. **Voltage Rating:** 125. **Agency File Numbers:** UL E10480, CSA LR 29862.

PICO SMF® Very Fast-Acting Type Fuse

Recognized under the Components Program of Underwriters Laboratories and Certified by CSA. **Interrupting Ratings:** 50 amperes at 125 VAC, 300 amperes at 125 VDC. **Operating Temperature:** -55°C to 125°C. **Shock:** MIL-STD-202, Method 213, Test Condition 1 (100 G's peak for 6 milliseconds). **Vibration:** MIL-STD-202, Method 201 (10-55 Hz, .06 inches total excursion). **Salt Spray:** MIL-STD-202, Method 101, Test Condition B (48 hours). **Insulation Resistance (After Opening):** MIL-STD-202, Method 302 (10,000 Ohms minimum at 100 volts). **Resistance to Soldering Heat:** MIL-STD-202, Method 210, Test Condition F (10 sec. at 260°C). **Thermal Shock:** MIL-STD-202, Method 107, Test Condition B (-65° to 125°C). **Moisture Resistance:** MIL-STD-202, Method 106, High Humidity (90-98 RH), Heat (65°). **Materials:** Molded thermoplastic body plated copper terminal. **Soldering parameters:** Wave solder: 500°F (260°C), 10 seconds, max. Infrared: 500°F (260°C), 30 seconds max. Vapor Phase: 420°F (215°C), 120 seconds max. **Solderability:** MIL-STD-202, Method 208. **Voltage Rating:** 125. **Agency File Numbers:** UL E10480, CSA LR 29862.

ALF SMF Very Fast-Acting Type

Recognized under the Components Program of Underwriters Laboratories and Certified by CSA. **Interrupting Ratings:** 50 amperes at 32 VDC. **Operating Temperature:** -55°C to 125°C. **Vibration:** Withstands 10-55 Hz per MIL-STD-202F, method 201a and 10-2000 Hz at 20 G's per MIL-STD-202F, Method 204D. **Condition D.** **Insulation Resistance (After Opening):** Exceeds 20 megohms. **Resistance to Solder Heat:** Withstands 60 seconds above 200°C up to 260°C, maximum. **Thermal Shock:** Withstands 5 cycles of -5° to 125°C. **Materials:** Glass Body/ Nickel/ Solder Coated Terminals. **Soldering parameters:** Wave solder: 500°F (260°C), 10 seconds, max. Infrared: 500°F (260°C), 30 seconds, Max. **Voltage Rating:** 32. **Agency File Numbers:** UL E10480, CSA LR 29862.

PICO SMF® Slo-Blo® Type Fuse

Recognized under the Components Program of Underwriters Laboratories and Certified by CSA. Approved by MITI from 1 through 5 amperes. **Interrupting Ratings:** 50 amperes at 125 VAC, 50 amperes at 125 VDC. **Operating Temperature:** -55°C to 125°C. **Shock:** MIL-STD-202, Method 213, Test Condition 1 (100 G's peak for 6 milliseconds). **Vibration:** MIL-STD-202, Method 201 (10-55 Hz, 10 G's peak). **Salt Spray:** MIL-STD-202, Method 101, Test Condition B. **Insulation Resistance (After Opening):** MIL-STD-202, Method 302 (10,000 Ohms minimum at 100 volts). **Resistance to Soldering Heat:** MIL-STD-202, Method 210 (3sec. at 260°C). **Thermal Shock:** MIL-STD-202, Method 107 (-65° to 125°C). **Moisture Resistance:** MIL-STD-202 Method 106, High Humidity (90-98 RH), Heat (65°). **Materials:** Molded Thermoplastic body plated copper terminals. **Soldering parameters:** Wave solder: 445°F (260°C), 3 seconds, max. Infrared: 445°F (230°C). **Solderability:** MIL-STD-202, Method 208. **Voltage Rating:** 125. **Agency File Numbers:** UL E10480, CSA LR 29862.

Dual-In-Line Sockets

Mill-Max surface mount socket insulators are molded from high temperature PCT polyester. HDT @ 264 psi= 254°C (490°F). This material is suitable for all forms of soldering including infra-red reflow and vapor phase. The pins are screw-machined brass

(QQ-B-626), plated 200 μ tin-lead (Sn-Pb 93/7) over 80-120 μ nickel. The contact (clip) is stamped beryllium-copper (QQ-C-533) heat treated, plated 30 μ gold or 200 μ tin-lead (Sn-Pb 93/7) over 80-120 μ nickel. **Operating Temperature:** -55°C to +125°C.

Gull Wing Open Frame

- For Infra-Red Reflow And Vapor Phase Soldering
- Gull Wing Terminals For Maximum Strength And Easy In-Circuit Test
- Hi-Rel, 4-Finger #30 Clip
- Recognized Under The Component Program Of Underwriters Laboratories Inc., File E 135165
- Contact (Clip) Is 30 μ Au

Kits

These kits are specifically designed to aid the design engineer in prototyping applications. Each kit contains a wide selection of commonly used values and sizes that meet a variety of circuit design requirements.

Standard Chip Inductors

These subminiature chip inductors are wound on a special ferrite core using an automatic winding technique. With high Q at high frequencies and low DC resistance, these inductors are perfect for enhancing the performance of electronic circuits in video, communications and audio equipment. -25°C to +85°C operating temperature.

Ferrite Chips

This new series of solid ferrite chips for surface mount applications is designed to reduce the possibility of spurious oscillations in high frequency amplifying circuits and to operate effectively from several MHz to several hundred MHz. Because of their small size, they are mountable on 2.5 mm c-c pitch thus saving considerable PCB space. There is no stray capacitance to 1 GHz. Nickel barrier for solder heat resistance. Suitable for both flow and reflow soldering applications. Temperature range is -55°C to +125°C.

NFM40R Series Surface Mount EMI Suppression Filters

The NFM40R series is a miniature chip-type EMI suppression filter. It is well suited for EMI suppression in digital circuit boards or in I/O lines of digital equipment where high density mounting is used. Nickel barrier for solder heat resistance. Wide frequency range of operation of several hundred MHz. Tape and Reel option available as custom order. Call for price and delivery.

NFM61R Series Surface Mount EMI Suppression Filters

This T-type chip EMIFIL is a 3 terminal capacitor capable of carrying the large currents (2A) required for use in DC power circuits. The chip consists of a T-type filter circuit incorporating a ferrite bead inductor for the purpose of suppressing undesirable oscillation. These filters can be used at temperatures between -25°C and +85°C. High solder heat resistance. Either flow or reflow soldering can be used. Additional parts and specifications available as custom orders. Call for pricing and delivery.

Solid Tantalum Chip Capacitors

Low DF and DC leakage. Chips are temperature stable and compatible with all soldering techniques and compatible with all tape-fed automatic pick and place systems. Soldering temperatures up to 260°C for 10 seconds. Chips have the highest capacitance per case size. Operating Temperature Range: -55°C to +125°C.

GRM Series Chip Capacitors

Non-polarized and miniature size chip capacitors have uniform dimensions and configuration. Flow and reflow solderable. Nickel barrier termination is highly resistant to metal migration. They have minimum series inductance.

RW Series Wirewound Surface Mount Resistors

- Rectangular Shape Allows Vacuum Pick-and-Place
- Save Labor
- Improve Reliability
- Eliminate Need For Leaded Resistors
- Reduce Chance Of Solder-Joint Breakage

These surface mount power resistors enable engineers to integrate power resistors into designs that reduce circuit board real estate. Application is easy because the rectangular shape allows for vacuum pickup by pick-and-place equipment. In addition, the design saves labor and improves reliability, because one surface mount power resistor can replace a series of lower wattage chip resistors. Flexible J-bend terminations eliminate the need for leaded components and reduce the chance of solder-joint breakage due to greater area for placement adhesives and are ideal for wave soldering. Recessed foot mount design decreases board contact, which lowers board temperature, and makes reflow soldering clean-up easier. Fourth character in manufacturer's part number specifies either recessed or standard. Tape and reel supplied as special order item. Film and power film SMD resistors also available in higher ohm values as special order. Other resistance values available. Call for price and delivery info.

Resistor Assortment

Each cabinet contains the most popular resistance values, including "Mil" specified resistors. Each cabinet is an organized system designed for research and development, prototype laboratory work, education instruction, maintenance and replacement. All cabinets are labeled to identify the resistor series contained and all the drawer compartments identify the resistance values. The cabinets have interlocking bases and tops which permits stacking and helps conserve space. Cabinet models composed of two or more cabinets are stacked and reinforced with metal braces which allow mounting onto walls or pegboards. Each individual cabinet is 9" wide x 4 1/4" high x 5 1/4" deep.

FD-1001 Fluid Dispensing System

Dispense precise amounts of solder paste, adhesives and other fluids in manual and timed modes. Features solid-state timer with precision rotary control, pressure gauge and compact, ESD-safe housing. Automatic vacuum pull back eliminates tailing. This 150-volt ac dispenser includes foot pedal, stand for barrel storage, 25 needles and controller. Shop air required. Accessories are optional.

Modular Soldering Stations for Hand Soldering and Touch-Up

These user-configurable, digital, ESD-safe soldering stations are ideal for QFP removal plus SMT hand soldering and touch-up. Choose micro or macro soldering iron versions with variable temperature control. Each contains a 115-volt input power base and a soldering iron holder. These soldering stations feature digital, variable, tri-temp and fixed temperature controls. The temperature range is 600-800°F.

BTR-1101-V Thru-Hole and SMT Rework Station

This self-contained desoldering system provides maximum application flexibility, high thermal demand desoldering plus standard and SMT soldering removal. With the highest power closed-loop system available, it meets military specifications. Use it for standard and multi-layer desoldering. This station provides efficient and consistent results particularly for high thermal demand

boards. A self-contained vacuum has a powerful internal pump. Includes 115-volt input power base, variable temperature module, desoldering tool and holder.

PLCC Comp.

BQFP/QFP

Focused Convection Rework with Vacuum

System Includes

- Base Controller with Pump, Temperature, Time and Air Flow Controller
- Mode Selection/Heater Timer Module
- Handpiece with Vacuum, Cord and Connector (FCT-2228)
- Dual Footswitch for Vacuum and Heater Activation
- Handpiece Holder
- Multiple Nozzle Holder
- N-D25 Nozzle
- 10 Piece High Temperature Silicone Rubber Vacuum Pads
- Nozzle Removal Tool

- Vacuum Pad Removal Tool
- Instruction Manual
- RTS-A Adjustable Handpiece Stand with Z Axis Control and Stainless Steel Base Plate (WSA Systems)
- RBH-A Adjustable Board Holder (WSA Systems)

The all new FCR-2200 Series is a focused convection SMT rework system with vacuum pick-up. Utilizing a self-contained air source, the FCR-2200 regulates air flow and temperature to rework a wide range of components from discretes to PLCC and QFP. Its unique three-mode operation provides manual or semi-automatic control for component removal or replacement.

- Manual Mode: Continuous Hot Air Flow or On-Demand Air Flow (Via Footswitch); On-Demand Vacuum (Via Footswitch)
- Auto Remove Mode: Sequenced and Timed — Hot Air > Hot Air with Vacuum > Hot Air Shut Off > Vacuum Release
- Auto Replace Mode: Sequenced and Timed — Vacuum > Hot Air > Hot Air Shut Off

The FCR-2200 handpiece has a spring loaded vacuum tube which virtually eliminates mechanical stress when contacting the component. Additionally, the vacuum tube length is adjustable; the operator may extend it for better viewing during placement, retract it to allow the nozzle to "encapsulate" the component during reflow. The nozzles are designed to focus heated air on the component leads while impeding heat flow to adjacent areas. **Specifications. Input Voltage:** FCR-2201 — 115 VAC, 50/60 Hz; FCR-2202 — 230 VAC, 50/60 Hz. **Heater:** Resistive, 300 W, 28 VAC. **Heater Control:** Closed loop, thermocouple sensor feedback. **Air Source:** High efficiency diaphragm pump. **Air Flow:** Variable, 3 to 20 l/min. **Output Temperature Range:** 392° to 932°F (200° to 500°C). **Modes:** Manual/Auto Place/Auto Remove. **Heater Timer:** 0-180 seconds, utilized with Auto Place or Auto Remove modes.

Model FCR-2201. Forced convection SMT rework system with vacuum and heater timer, 115 VAC.

Focused Convection Rework

- Removes and Replaces Discrete, SOIC, PLCC and QFP Components
- Closed-Loop, Variable Temperature Control
- Variable Air Flow Adjusts to Thermal Demands of the Board
- Self-Contained Air Source Provides Easy Set Up
- Fully Grounded and Static-Safe System
- Over 40 Nozzles Available

System Includes

- Air Flow Meter/Temp. Control Module
- Handpiece, Cord, Connector (FCT-2128)
- Footswitch for Hot Air Activation
- Power Base with Pump
- Handpiece Holder
- Multiple Nozzle Holder
- N-D25 Nozzle
- Nozzle Removal Tool
- Instruction Manual

The FCR-2100 Series is a low-cost hot air rework system with closed loop temperature control and air flow control. Unlike the FCR-2200 Series it does not have vacuum or timer. **Specifications. Input Voltage:** FCR-2101 — 115 VAC, 50/60 Hz; FCR-2102 — 230 VAC, 50/60 Hz. **Heater:** Resistive, 300 W, 28 VAC. **Heater Control:** Closed loop, thermocouple sensor feedback. **Air Source:** High efficiency diaphragm pump. **Air Flow:** Variable, 3 to 20 l/min. **Temperature Range:** 392° to 932°F (200° to 500°C). **Modes:** Continuous hot air or On-demand hot air via footswitch.

Series G6G, Surface Mount Relay

- Can be Soldered by VPS, IRS, and DWS Methods
- Choice of "L" or "J" Modified Gullwing Leads for Surface Mounting
- Small Size 16 (W) × 10.2 (L) × 8 (H) mm (.63" W × .40" L × .315" H)
- Surge Withstand Voltage Meets FCC and CCITT Rules
- Unique Moving-Loop Armature Reduces Relay Size, Magnetic Interference, and Contact Bounce Time

Contact Data. Contact Ratings: 110 VAC, 0.2 A; 24 VDC, 1 A. Contact Material: Ag (Au clad). Carry Current: 2 A. Maximum Operating Voltage: 125 VAC, 125 VDC. Maximum Operating Current: 2 A. Maximum Switching Capacity: 50 VA, 60 W.

Coil Data (% of Rated Voltage). Pickup Voltage: 75% max. Dropout Voltage: 10% min. Set Voltage: 75% max. Reset Voltage: 75% max. Maximum Voltage: 200% at 40°C max.

Characteristic Data. Initial Contact Resistance: 50 mΩ max. Operate Time: 5 ms max. (typ. value approx. 2.0 ms). Release Time: 3 ms max. (typ. value approx. 1.8 ms). Set Time — Latching: 5 ms max. (typ. value approx. 2.6 ms). Reset Time — Latching: 5 ms max. (typ. value approx. 1.2 ms). Insulation Resistance: 1000 MΩ min. (at 5000 VDC). Ambient Temperature: -40°C to 85°C. Construction Data. Termination: PCB terminals. Construction: Filly-sealed. Weight: .09 oz. (2.5 g).

Dielectric Strength. Between Coil and Contacts: 2000 VAC, 50/60 Hz for 1 minute. Between Contacts of Different Polarity: 2000 VAC, 50/60 Hz for 1 minute. Between Contacts of Same Pole: 1000 VAC, 50/60 Hz for 1 minute. Between Set and Reset Coils (Dual-Winding Type Only): 250 VAC, 50/60 Hz for 1 minute.

Service Life. Mechanical: 50,000,000 operations min. Electrical: 100,000 operations min. at 1 A, 30 VDC.

Non-Latching. L — Lead Sealed

Series G6H High-Sensitivity Relay-Compact, with Low 5 mm Profile

- Low Power Consumption (140 mW)
- Low Thermoelectromotive Force
- Low Magnetic Interference Enables High-Density Mounting
- Utilizes Omron's Moving Loop Design
- Highly Stable Magnetic Circuit for Latching Endurance and Excellent Resistance to Vibration and Shock
- High Sensitivity with Low Nominal Power Consumption

Contact Data. Contact Ratings: 125 VAC, 0.5 A; 30 VDC, 1 A. Contact Material: Ag (Au clad). Carry Current: 1 A. Maximum Operating Voltage: 125 VAC, 110 VDC. Maximum Operating Current: 1 A. Maximum Switching Capacity: 62.5 VA, 33 W.

Coil Data (% of Rated Voltage). Pickup Voltage: 75% max. Dropout Voltage: 10% min. Set Voltage: 75% max. Reset Voltage: 75% max. Maximum Voltage: 200% max.

Characteristic Data. Initial Contact Resistance: 50 mΩ max. Operate Time: 3 ms max. (mean value approx. 2.0 ms). Release Time: 2 ms max. (mean value approx. 1.0 ms). Set Time-Latching: 3 ms max. (mean value approx. 2.0 ms). Reset Time-Latching: 2 ms max. (mean value approx. 1.0 ms). Insulation Resistance: 1,000 MΩ max. (at 500 VDC). Surge Withstand Voltage: 1,500 V 10 × 160 μs (conforms to FCC Part 68). Ambient Temperature: 40°C to 70°C.

Dielectric Strength. Between Coil and Contacts, and Between Contacts of Different Polarity: 1,000 VAC, 50/60 Hz for 1 minute. Between Contacts of Same Polarity: 750 VAC, 50/60 Hz for 1 minute.

Service Life. Mechanical: 100 million operations min. Electrical: 100,000 operations min. at 1 A, 30 VDC.

Model ST-3

Sealed to allow for automatic processing. Precious metal alloy contact. Chip style designed for compact size. **Resistance Range:** 10 Ω to 1 M Ω . **Resistance Tolerance:** $\pm 20\%$ standard. **Temperature Coefficient of Resistance:** 10 Ω to 50 Ω : ± 250 ppm/ $^{\circ}\text{C}$, 100 Ω to 1 M Ω : ± 100 ppm/ $^{\circ}\text{C}$. **Power Rating:** 0.125 W at 70 $^{\circ}\text{C}$. **Operating Voltage:** Maximum is at 200 V DC or power rating, whichever is less. **Wiper Current:** Maximum is at 100 mA or power rating, whichever is less. **Electrical Angle:** 210 $^{\circ}$ nominal. **Electrical Continuity:** Continuous over full mechanical range. **End Resistance:** 1% or 2 Ω , whichever is greater. **Resolution:** Essentially infinite. **Contact Resistance Variation:** 1% or 3 Ω , whichever is greater. **Operating Temperature Range:** -55 $^{\circ}\text{C}$ to +125 $^{\circ}\text{C}$. **Insulation Resistance:** 1000 M Ω minimum at 500 V DC. **Dielectric Strength:** 500 V AC rms, 1 minute, 1 mA maximum. **Mechanical Angle:** 240 $^{\circ}$ nominal. **Operating Torque:** 50 gram-cm maximum. **Stop Strength:** 200 gram-cm minimum. **Rotational Life:** 100 cycles.

Model ST-4

Miniature Outline: 4.5 x 5.0 mm/0.177 x 0.197 inches. **Low Profile:** 2.3 mm/0.091 inches. Sealed with an O-ring for immersion cleaning processes. Withstands high temperature soldering processes. Packaged for automatic insertion. Manufactured with robotics for outstanding quality and uniformity. **Resistance Range:** 10 Ω to 2 M Ω . **Resistance Tolerance:** $\pm 20\%$. **Power Rating:** 0.25 W at 70 $^{\circ}\text{C}$, 0 W at 125 $^{\circ}\text{C}$. **Maximum Input:** 200 V. **Wiper Current:** 100 mA maximum. **Electrical Angle:** 210 $^{\circ}$ nominal. **End Resistance:** 1% of resistance value or 2 Ω , whichever is greater. **Contact Resistance Variation:** 1% of resistance value or 3 Ω , whichever is greater. **Operating Temperature Range:** -55 $^{\circ}\text{C}$ to +125 $^{\circ}\text{C}$. **Temperature Coefficient of Resistance:** Maximum is 10 Ω to 50 Ω : ± 250 ppm/ $^{\circ}\text{C}$, 100 Ω to 2 M Ω : ± 100 ppm/ $^{\circ}\text{C}$.

Monolithic SMD® Chip Capacitors

► Monolithic Construction

Monolithic ceramic capacitors consist of alternating ceramic (15 to 30 microns) onto which metal electrodes are printed. The stacked layers, cut into individual chips, are then sintered at a very high temperature to form a monolithic device. Alternating electrode layers are connected to end terminations completing the functional unit. **Temperature Characteristics:** COG — 0 ± 30 ppm/°C, -55°C to +125°C; X7R — $\pm 15\%$ ΔC , -55°C to +125°C; Y5V — $+22\%$ to -82% ΔC , -30°C to +85°C; Z5U — $+22\%$ to -56% ΔC , +10°C to +85°C. **Termination:** B — Ni/Sn. **Packaging:** B — T&R 7" reel; 2 — 7" paper tape. **Marking:** 0 — no mark.

Series 9C Commercial SMD Chip Resistors

The surface mounted chip resistor consists of a glass passivated thick film resistive paste screened onto a high purity alumina ceramic substrate. The nominal resistance value is achieved by varying the composition of the paste prior to the screening process and by laser trimming the film after it has been screened on. To insure mechanical and environmental integrity, the chip is covered with a silicon based "procoat." The conductive layer consists of a precious metal and a wrap around termination is deposited at each end to allow mechanical and electrical attachment. These chip resistors are adaptable to high speed automated mechanization assembly. They allow excellent printed circuit board density as well as utilization of both board sides. Zero ohm jumper available as custom order in full reels only.

Series 9B Precision MELF Surface Mount Resistors

The MELF resistor consists of a high alumina core on which metal film is deposited. A cap is applied at each end and the resistor is spiralled to value. The resistor is then coated, color coded, and end caps treated to facilitate soldering. Zero ohm jumper available as custom order in full reels only.

SEI Kits

Surface mount thick film chip resistor design kits for RMC-1/8 (1206 size) in 5% and 1% tolerances, RMC-1/10 (0805 size) in 5% and 1% tolerances and RMC-1/16 (0603 size) in 5% tolerance only. Kits have 30 samples per value. 5% kits have 60 values (E24) and 1% kits have 120 values (E96). Kit includes product specifications, packaging guidelines, performance data and the chip samples. Replacement parts available in 1000 piece bulk packaging or 5000 piece tape and reel. Packaged in plastic notebook pages in three-ring binder.

PLCC-SMT Series Surface Mount Plastic Leaded Chip Carrier Sockets

High-density, low profile 0.200" (5.08) maximum height. Open frame design allows for visual inspection of solder joints. Footprint matches device. Phosphor bronze contacts with tin-over-nickel plating. High-temperature, black polyphenylene sulfide insulator, rated UL94V-0, is compatible with IR reflow and wave soldering. **Insertion Force:** 180g/pin maximum. **Withdrawal Force:** 28.35 g pin minimum. **Contact Resistance:** 20 m Ω **Current Rating:** 1 A. **Temperature Range:** -55°C to +105°C. For automatic assembly. Available with or without location posts.

PAK-8 Hermaphroditic Connectors

The PAK-8 Hermaphroditic body consists of high temperature plastic. Contacts and brackets are copper alloy. The flammability rating is UL 94V-0. The plating is 0.2 µm (8 pinch) gold on contact area, 2.03 µm (80 pinch) tin/lead on terminal area. **Insulation Resistance:** 1000 MΩ. **Dielectric Withstanding:** 250 V DC. **Contact Resistance:** 60 Ω maximum. **Current Rating:** 0.5 A per contact. **Rated Voltage:** AC, DC 60 V. **Ambient Temperature Rating:** -50°C to +85°C. The peak soldering heat resistance is 245°C; 300°C within 5 seconds; 350°C within 3 seconds. **Durability:** 50 cycles 50 Ω maximum.

Surface Mount Device Interconnects

- Applications**
- Research and Design
 - Manufacturing Test Of SMD Circuitry
 - Servicing Of SMD Circuitry
 - Prototype Debug and Design

- SMG50/SMT KlipChip™ Kits**
- Access To 0.050" Centers PLCC, SOIC, and Other Packages
 - PQFP100/132 PQFP Adapter Clips
 - 386SX Attachment With PQFP100
 - 68020/68030 Attachment With PQFP132
 - 350 MHz Bandwidth
 - Small Low-Profile Design Fits In Tight Spaces

Surface Mount Device Probing and Interconnects
The increasing use of surface mount technology (SMT) brings many benefits to electronic circuit board (ECB) design and manufacture. Among these are increased circuit density, increased product reliability, and lower assembly costs.

Troubleshooting and device interconnection, however, have become more difficult due to decreased device size, tighter lead spacing and increased ECB densities. Tektronix' offering of the following SMT probing and inter-connect devices meets these demanding requirements.

SureFoot™ Probing 25 mil JEDEC, 0.65 and 0.5 mm EIAJ Packages
SureFoot™ (patent pending) is an integral probe tip and miniature guide that enables fault-free "hands-on" probing of fine-pitch SMD packages. Guided by the IC's leads, SureFoot's miniature plastic tines align the probe before electrical contact is made. The tines also form a shield between IC leads, preventing the probe tip from shorting adjacent pins.

SureFoot™ conforms to EIAJ (Electronic Industry Association of Japan) or JEDEC (Joint Electron Device Engineering Council) packaging standards, assuring quick and reliable probe contact with fine-pitch IC leads. Several color-coded versions of SureFoot™ are available, addressing the most common SMD packages with leads spaced on 0.65 mm (EIAJ) and 25 mil (JEDEC) centers. A crystal orange version fits the tighter 0.5 mm lead spacing of several EIAJ packages.

Style for Tektronix SMD Probes
Tektronix probes have replaceable probe tips. The basic contact of the new SMD probe family is a 25 mil socket that accepts square or round pins. SureFoot™ probe tips are available in styles to match each of these high-performance probe families.

Stock No.	Mfr.'s Type	Package Lead Spacing	Package Standard	Color Code	PER PKG./12

 - 11000 Series

- P6561AS**
- 10X – 200 MHz
 - <11 pF Loading
 - Readout

- P6562AS**
- 10X – 350 MHz
 - <11 pF Loading
 - Readout

The P6561AS and P6562AS are scaled for surface mount IC packages. Their low-mass probe bodies are only 1.5" long and 100 mils wide. Bundled in sets to match the oscilloscope's performance and channel count, these probes provide solutions for the most popular EIAJ and JEDEC surface mount packages.

Surface Mount Device Probing
While instrumentation improvements have provided a steady stream of digital troubleshooting tools, the physical challenges associated with probing small geometry ICs have gone unaddressed until now. SMD probes from Tektronix provide circuit designers the first complete, off-the-shelf solution for probing small geometry IC packages.

The basic contact of the SMD probe family is a 25 mil socket that accepts square or round pins. A variety of tip adapters permits convenient, non-destructive, temporary connection to the most popular EIAJ and JEDEC surface mount packages. Each SMD probe is designed to minimize capacitive loading on TTL, ECL, CMOS, FastCMOS, and BiCMOS circuits. The probe and oscilloscope form a measurement system optimized for circuit designers by providing fast transient response, high system bandwidth, and low capacitive circuit loading.

SMD Probe Characteristics. Probes Per Set: P6561AS — 2; P6562AS — 4. **Oscilloscope Series:** P6561AS — TDS300, TDS400; P6562AS — TAS400, 2400 and 11000. **Bandwidth (–3 dB):** P6561AS — 200 MHz; P6562AS — 350 MHz. **Rise Time (Typical):** P6561AS — <1.85 ns; P6562AS — <1.1 ns. **Uniform Signal Delay:** P6561AS — ±150 ps; P6562AS — ±125 ps. **Attenuation:** 10X. **Device Loading Capacitance (Typical):** <11 pF. **Device Loading Resistance:** 10 MΩ. **Maximum Non-Destructive:** 42 V. **Input Voltage:** (DC + peak AC). **Compensation Range:** P6561AS — 15 pF to 35 pF; P6562AS — 12 pF to 35 pF. **Replacement Probe:** P6561AS — P6561A; P6562AS — P6562A.

FlexLead™ Adapters

Fine Pitch Surface Mounted Devices

- FlexLead™ Family**
25 mil JEDEC 0.65 mm EIAJ
0.5 mm EIAJ
- Convenient Probing Of 25 mil Pitch and Smaller Packages
 - Minimum Circuit Loading
 - Adapts To Many Of The Most Common JEDEC and EIAJ Packages
 - Compatible With Any Oscilloscope Or Logic Analyzer Probe Or Podlet
 - 100 mil Interface For Easy Probe Connection

Surface and Device Probing
As the pitch and lead spacing on surface mount packages gets smaller, connecting a probe to these packages becomes increasingly difficult. At a pitch of 25 mils or smaller the leads will no longer mechanically support a probe without potentially damaging the package. At this fine pitch it also becomes difficult to hand hold a probe without shorting to adjacent leads or causing mechanical damage to the package. The Tektronix FlexLead™ Adapters make it possible to conveniently connect to fine pitch Gull-wing Leaded QFP (Quad Flat Pack) packages while reducing the risk of both mechanical and electrical damage to the part.

FlexLead™ Adapters
The FlexLead™ Adapters have a standard 100 mil. interface on one end, to which any oscilloscope probe or logic analyzer podlet will directly connect, both signal and ground leads. The opposite end of the adapter has a row of solder pads, matching the leads of the package, that are soldered to the package leads. After the necessary probing is complete the adapters are intended to be unsoldered and discarded. They are intended to be used only once and are priced low enough to make this practical.

Characteristics. Series Resistance: Less than 100 MΩ (typical). **Inductance:** Less than 100 nH (typical). **Capacitance:** Less than 2 pF (typical). **Maximum Voltage:** 42 V. **Maximum Current:** 750 mA.

Soldering Instructions Videotapes
These no-charge VHS videotapes describe the recommended procedure for soldering the FlexLeads.
068-0320-04 — NTSC Version
068-0320-06 — PAL Version
068-0320-07 — SECAM Version

The FlexLead™ Adapters are packaged eight per package

Stock No.	Mfr.'s Type	Package Type	EACH
700-0700	PJ25X16	JEDEC, 25 mil, 64 leads (16 × 16)	145.00
700-0701	PJ25X17	JEDEC, 25 mil, 68 leads (17 × 17)	140.00
700-0702	PJ25X20	JEDEC, 25 mil, 80 leads (20 × 20)	150.00
700-0703	PJ25X21	JEDEC, 25 mil, 84 leads (21 × 21)	165.00
700-0704	PJ25X24	JEDEC, 25 mil, 96 leads (24 × 24)	165.00
700-0705	PJ21624	JEDEC, 25 mil, 80 leads (16 × 24)	160.00
700-0706	PJ25X25	JEDEC, 25 mil, 100 leads (25 × 25)	170.00
700-0707	PJ25X30	JEDEC, 25 mil, 120 leads (30 × 30)	175.00
700-0708	PJ22030	JEDEC, 25 mil, 100 leads (20 × 30)	165.00
700-0709	PJ25X33	JEDEC, 25 mil, 132 leads (33 × 33)	185.00
700-0733	PJ25X41	JEDEC, 25 mil, 164 leads (41 × 41)	200.00
700-0711	PJ25X49	JEDEC, 25 mil, 196 leads (49 × 49)	220.00
700-0712	PJ25X52	JEDEC, 25 mil, 208 leads (52 × 52)	230.00
700-0713	PJ25X60	JEDEC, 25 mil, 240 leads (60 × 60)	250.00
700-0714	PE50X20	EIAJ, 0.5 mm, 80 leads (20 × 20)	170.00
700-0715	PE50X25	EIAJ, 0.5 mm, 100 leads (25 × 25)	185.00
700-0716	PE50X26	EIAJ, 0.5 mm, 104 leads (26 × 26)	190.00
700-0717	PE50X36	EIAJ, 0.5 mm, 144 leads (36 × 36)	200.00
700-0718	PE50X38	EIAJ, 0.5 mm, 152 leads (38 × 38)	210.00
700-0719	PE52638	EIAJ, 0.5 mm, 128 leads (26 × 38)	200.00
700-0734	PE50X40	EIAJ, 0.5 mm, 160 leads (40 × 40)	220.00
700-0721	PE50X52	EIAJ, 0.5 mm, 208 leads (52 × 52)	265.00
700-0722	PE50X60	EIAJ, 0.5 mm, 240 leads (60 × 60)	270.00
700-0723	PE50X64	EIAJ, 0.5 mm, 256 leads (64 × 64)	285.00
700-0724	PE50X75	EIAJ, 0.5 mm, 300 leads (75 × 75)	330.00
700-0736	PE50X76	EIAJ, 0.5 mm, 304 leads (76 × 76)	340.00
700-0726	PE65X20	EIAJ, 0.65 mm, 80 leads (20 × 20)	145.00
700-0727	PE65X28	EIAJ, 0.65 mm, 112 leads (28 × 28)	175.00
700-0728	PE65X36	EIAJ, 0.65 mm, 144 leads (36 × 36)	190.00
700-0729	PE65X40	EIAJ, 0.65 mm, 160 leads (40 × 40)	215.00
700-0737	PE65X46	EIAJ, 0.65 mm, 184 leads (46 × 46)	205.00
700-0731	PE65X52	EIAJ, 0.65 mm, 208 leads (52 × 52)	210.00

Active FET Probes For TekProbe™ BNC Interfaces

- P6204**
- DC To 1 GHz
 - 1.9 pF Input C
 - 10 MΩ Input R
 - DC Offset
 - Identity Button

The P6204, P6205 and P6217 are designed with FET devices for their inputs, which allows very high input resistance values and low input capacitances.

700-0732. P6204	EACH 1675.00

Olympic WIRE & CABLE CORP.

Olympic's new **ENDURO** series is designed to meet the increasing demands of special applications in the wire and cable industry.

Olympic's **ENDURO** series offers a cost-effective alternative to what is currently available as a standard product.

ENDURO series' special applications include:

- General Purpose/Indoor

- Outdoor
- Direct Burial
- High/Low Temperature
- High Temperature/
Chemical Resistance
- Robotics

Olympic will also manufacture to your requirement where a standard product does not satisfy your needs.

1 Madison Road, Fairfield, NJ 07004-9990

Product Index

Prototyping

Boards	821, 823, 824, 825, 829
Conductive Epoxy	848
Conductive Grease	848
Conductive Pen	848
Euro Card Subracks	825
Evaluation Boards	700, 809
Extender Cards	822, 824
ISA PC Bus Backplanes	824
Metric Extender Cards	825
Multi-layer Boards	825
Overcoat Pen	848
PC Bus Plug Boards	823
PCB Connectors	822
PCI Developers Kit	827
PCI Extender Cards	822, 827
PCI Prototyping Boards	827
PCMCIA Test Extender	827
Quick Bond Kit	848
Surface Mount Adapters	822
VME Backplane Spacer Strips	829
VME Backplanes	822, 826
VME Extender Cards	829
VME Microracks	829
VME Portable Towers	827
VME Prototyping Boards	825
VMEExcel Backplanes	829
VMEExcel Monolithic Backplanes	829
Wire Wrap Pins and Terminals	822, 828

Publications	729, 778, 806, 819
Punch Down Tools	157
PWM Controller ICs	811
PWM Motor Controller and Driver ICs	810

R

Raceways	1061, 1119, 1127
Radios/Remotes	1007, 1014
Rackmount	
UPS	527
Receptacles (Section 9)	
AC	509, 512
AC Power Inlets and Outlets	509, 512
AC Power Inlets and Outlets with Fuseholder	510, 512
IEC Connector	510
NEMA 5-15R	509, 512
PCB Mount	509

Rectifiers

Rectifiers	685, 686, 687, 688, 693, 706, 763, 764, 781, 782, 789, 808
------------	--

Reference ICs, Voltage	747, 769, 805
-------------------------------	---------------

Regulators	745, 746, 770, 771, 772
-------------------	-------------------------

Regulators, Voltage	518, 531
----------------------------	----------

Relay/Peripheral Driver ICs	788
------------------------------------	-----

Reflective Skanners	611
----------------------------	-----

Relampable Indicator Lights and Sockets	372
--	-----

Relays (Section 10)

Section Index	536
AC/DC Solenoids	572
Accessories and Sockets	537, 538, 546, 547, 574, 575, 578, 580, 588, 593, 601
Armature	606
Automotive Relay	591, 593
Bracket Mount	580, 588, 592, 603
Coaxial	567
Contactors	602
Control	555, 563, 564
DIP/SIP	538, 547, 548, 549, 550, 579, 594, 595, 597, 607
Dry Reed	549
General Purpose	537, 546, 571, 574, 580, 582, 583, 584, 585, 587, 588, 589, 590, 591, 592, 603
I/O Module Racks	562, 570
I/O Modules	552, 553, 554, 556, 562, 570, 586, 599
Latching	582, 598
Mercury	547, 548, 550, 551, 581
Miniature	537, 538, 579, 584, 585, 593, 596
PC Board	537, 538, 550, 551, 571, 579, 587, 589, 590, 594, 595, 596, 597
Power	538, 547, 555, 557, 574, 582, 584, 585, 587, 593
Power Modules	564, 565, 568, 569
Reed	548, 549, 551, 563, 579, 597

Reverse Control	582
Sequencing	582
Solid State	544, 545, 548, 551, 555, 557, 558, 559, 560, 561, 562, 564, 568, 569, 574, 576, 581, 585, 599, 606, 607
Surface Mount	1150
Time Delay	539, 540, 541, 542, 543, 544, 573, 575, 576, 577, 578, 581, 597, 598, 600, 604, 605

Remote Control ICs

Removable Hard Drives

Resistors (Section 8)

Adjustable	447, 454, 460, 461
Aluminum Housed	448, 450, 460, 464
Bracket Mount	447, 449, 453, 454, 461
Carbon Composition	455, 467
Carbon Film	440, 446, 455, 463, 465, 467
Ceramic	458, 459, 465
Chassis Mount	448, 450, 460, 464
Chip (SMD)	441, 442, 446, 451, 452, 455, 459, 463, 466, 468, 1140, 1148, 1153, 1156
Decade Box	455
Hardware	447
Kits	446, 451, 455, 1140, 1148, 1153
Metal Film	441, 446, 451, 455, 463, 467
Metal Oxide	440, 465
Networks	
DIP	442, 443, 452, 1134, 1135, 1140
SIP	444, 445, 452
Power	445, 446, 447, 448, 449, 450, 453, 454, 456, 457, 458, 459, 460, 461, 462, 464, 465
Radial Leads	445, 458
RN Series	451
Silicone	448, 449, 450, 453, 459, 462, 464
Surface Mount	441, 442, 446, 451, 452, 455, 459, 463, 466, 468, 1140, 1148, 1153, 1156
Tubular	447, 449, 453, 454, 461, 462
Vitreous	447, 448, 453, 454, 446, 457, 461, 462
Wirewound	446, 447, 448, 449, 450, 453, 454, 455, 456, 457, 458, 459, 460, 461, 462, 464, 465
Zero Ohm	468
Resistance Decade Box	424, 455
Retaining Clips, Connector	509
RF Amplifier ICs	787
RF Communications ICs	741, 742
RGB to NTSC/PAL Encoder ICs	681
Rheostats	404, 423, 431, 434
Dials	404, 431, 434
Knobs	404, 431, 434
RMS to DC Converter ICs	681

S

Sample and Hold Amplifier ICs	698
Screwdrivers — See Tools	
Screws — See Hardware	
SCRs	765, 781, 808
SCSI Active Terminator ICs	809
Security Systems, DC Back-Up	475
Semiconductors (Section 11)	
AC to DC Converter ICs	699
Accelerometers	683
Alphanumeric Displays	378
Amplifier ICs	
Audio	680
Buffer	680
Comparators	680
Current Feedback High Speed	679
Difference	680
Differential	702
General Purpose	701, 725, 703, 744, 766, 787
High Performance	701
High Speed	766
Instrumentation	678
Internally Compensated, Dual	803, 804
Internally Compensated, Quad	804
Internally Compensated, Single	803
Isolation	677
Low Current Noise	678
Low Power	766
Low Voltage Noise	678, 679
Low/Micro Power	678
Precision	679

RF Amplifier ICs	787
Sample and Hold Amplifiers	698
Sample/Track and Hold	677
Single Supply	679
Video Amplifiers	725
Video Multiplexers/Amplifiers	726
Video Pre-Amps/CRT Drivers	768
Voltage Feedback High Speed	679, 680
Analog Multiplier/Divider ICs	680
Analog Switch and Multiplexer ICs	677
Analog to Digital Converters	673, 674, 675, 722, 743, 768, 788, 801
Asynchronous PAL Devices	672
Audio Control/Noise Reduction Pre-Amp ICs	767
Audio Power Amps ICs	767
Bar Code Decoder ICs	377
Battery Charger ICs	724, 810
Bipolar Programmable Logic	798
Boost Converter ICs	724
Buffer ICs	701, 766, 767
CDP18xx Series CMOS Peripheral ICs	1093
Charge-Pump ICs	724
Circuit Breaker ICs	810
Clock Driver ICs	739
Clock ICs	774
Communications Interface Drivers and Receivers	809
Compondors	787
Comparators	700, 726, 744, 745, 787, 803
Complex Programmable Logic Devices (MACH)	670
Converter ICs	
AC to DC Converters	699
Analog to Digital	673, 674, 675, 722, 743, 768, 788, 801
Boost	724
DC-DC	724
Digital to Analog Converters	675, 676, 722, 743, 768, 769, 789, 801
RMS to DC Converter ICs	681
Switched Capacitor Voltage Converter ICs	805
Voltage to Freq./Freq. to Voltage Converters	682, 683
Data Communications ICs	696
DC-DC Converter ICs	724
DIACs	781
Differential Amplifiers ICs	702
Digital Imaging Product ICs	697
Digital Signal Processor Filter ICs	697
Digital Signal Processor ICs	730, 799, 800, 801
Digital Signal Synthesis ICs	697
Digital to Analog Converters	675, 676, 722, 743, 768, 769, 789, 801
Diodes	
Arrays	702
General Purpose	781, 790
Hot-Carrier (Schottky)	758
Kits	684
Microwave	710
Rectifiers	763, 764
Schottky	762, 763, 789
Surface Mount	762, 763, 764
Switching	758, 759, 789
Tuning	758
TVS	760, 761, 762
Variable Capacitance	789
Zener	759, 760, 781, 789
Display Driver ICs	698
DRAM SIMM Modules	726, 728, 795, 814
DRAMS	726, 727
Driver ICs	698, 699, 809
Dual Port RAM	711
E/EEPROM Programmers	832
EDO DRAMS	726
EEPROMs	776, 777
Embedded Controller ICs	731, 732
Embedded Microprocessors	669
Embedded Processors	715, 716
EPLDs	818
EPROM Erasers	832, 833
Evaluation Boards	700, 809
Fiber Optic Transmitters and Receivers	376
FIFO ICs	712, 728
Flash Memory Programming Supplies	723
FM IF System ICs	788
FPGA Programmers	832
FPGAs	818
FPM DRAMS	726

Front-End and Mixer System ICs.....	788	Upgrades (Modules and Kits).....	793, 794, 795, 812, 813, 814	Regulators.....	745, 746, 770, 771, 772

BUD INDUSTRIES, INC.

Your Single Source Enclosure Supplier

1-800-433-5700

The best combination... AMP Products and ALLIED Service.

Mod plugs and jacks

Sockets

Memory card connectors

Filtered connectors

Terminal blocks

Enhanced Eurocard connectors

RF connectors

Terminators

As your complete component source, ALLIED ELECTRONICS carries a full stock of AMP products based on a computer analysis of what you need most often for production, replacement and repair. In addition, the complete AMP industry standard product line is only a phone call away from any ALLIED Branch. For products that save time, labor and money, specify AMP and order from ALLIED today.
